Cottolene
Shortens your food
Lengthens your life

Cottolene is a cleanly, wholesome product. It is made from refined seed oils, in a thoroughly commendable, hygienically approved manner, and is virtually free from the characteristics that make many household fats objectionable.

Cottolene is a refined product that contains no impurities, is free from rancidity, and contains no capricious tendencies to solidify when subjected to a large range of changes in temperature.

Cottolene is a healthier product. It contains no added fats, and is not subject to the weakening influences of transitory or imperfect fats. It is free from transitory elements, and is not subject to the weakening influences of transitory or imperfect fats. It is free from transitory elements, and is not subject to the weakening influences of transitory or imperfect fats. It is free from transitory elements, and is not subject to the weakening influences of transitory or imperfect fats.

Cottolene is a naturally wholesome product. It is derived from the olive, a fruit of the Marmarist region, and is free from the characteristic elements that are found in many household fats. It is free from the characteristic elements that are found in many household fats.

Cottolene is a wholesome product. It is derived from the olive, a fruit of the Marmarist region, and is free from the characteristic elements that are found in many household fats. It is free from the characteristic elements that are found in many household fats.

Nature's Gift from the Sunny South
