MILK STANDARD IS UNFAIR

OREGON OPPOSES PLAN OF DAIRY CONFERENCE.

Commercial Body Advised That Gathering Has No Power to Fix Arbitrary Rule.

The published report that the Pure Food and Dairy Conference, now in session at Mackinac Island, Mich., has under consideration the adoption of a standard of 23 per cent solids for condensed milk and 7.7 per cent butter fat yesterday brought vigorous protests from the Portland Commercial Club, Oregon Development League and Oregon State Dairy Association, for the reason that the adoption of such a standard in the matter of solids would prove disastrous to the milk-condensing industry in Oregon.

While the conference at Mackinac has no power under its appropriation act to create standards, the fact that it represents 60 per cent of the dairy sections of the country would seem likely to give it considerable influence with the Department of Agriculture in recommending standards. The standard recommended by the conference as regards butter fat can be easily reached by the Pacific Coast

condensers for the reason that the milk produced in this section is known to be very rich; but it does not have the same solids as milk produced in the Middle West because in that section cows are fed grain and artificial food. In Oregon the climatic conditions and method of feeding make it impossible to reach the proposed standard with regard to solids. The men interested in the local milk-condensing plants contend that the standards should be based on the percentage of butter fat and that there should be no requirement in the matter of percentage of solids. This would be in entire conformity with the pure food laws. It is known that the Oregon condensed milk is preferred to the product of the Middle West by consumers in that section and it is believed the proposed standard may have been devised to injure local manufacturers.

In response to the protests of the Commercial Club and State Dairy Association the following telegram was received from Acting Secretary Moore, of the Department of Agriculture: "Any standards adopted by committee on food standards at Mackinac are not binding on the Department of Agriculture and the conference has no power at present under its appropriation act to create standards."

REMODEL FAILING BLOCK

CITY OFFICES OF HARRIMAN LINES TO BE ENLARGED.

Washington-Street Entrance Will Be Done Away With and Other Space Added.

Extensive alterations are to be made in the failing building at the southeast corner of Washington and Third streets. The Harriman lines' city ticket and freight offices are to occupy all the Washington street front with the exception of the room leased to the Scandinavian bank at the eastern end of the building. The alterations include throwing the Washington-street entrance to the building into the office space, the single entrance to the building hereafter to be from Third street. The barber shop and entrance space on Washington street will enable the city offices to be nearly double the present space occupied, and the big room in the rear of the elevator formerly the city freight office of the companies, is again to be utilized by them in connection with the new plan of uniting the two city departments.

Third and Washington has always been the location of the city offices of the old O. R. & N., and when the consolidation of that company with the other Harriman lines in Oregon was effected the city

ticket office remained in the same location. Before the erection of the failing building the office was in a frame building opposite, and upon the completion of the failing building it was moved to the corner since occupied. It now becomes necessary to enlarge the quarters, and the alterations outlined will be started at once, it being expected to have the new rooms ready for occupancy by October 1.

The Chicago-Northwestern ticket and freight office is to move into the office now occupied by the city freight office of the Harriman lines in the McKay building when the new rooms on Washington street are ready.

MATCH STARTS EXPLOSION

Engineer at Weiser So Badly Scorched He Will Likely Die.

WEISER, Idaho, Aug. 7.—(Special.)—J. H. Beverly, foreman of the P. & N. Railway roundhouse in this city, was perhaps fatally burned by an explosion of gasoline today. He was running the gasoline engine at the pumping plant when the machinery got out of order. He lighted a torch and went into the pit where the machinery is located, when there was an explosion and he ran out with his clothing in flames. Persons who happened to be present threw him down and extinguished the flames. He was immediately taken to the hospital. His arms and body were badly burned, the flesh in places being literally cooked.

Rosenthal's winnows are money-savers.

Out on the ranges of Eastern Oregon the round-up is on—those ranges famed in poem and story—and there you will find Smith's buyers picking the tops of the herds and the cream of the flock. With us it's a question of how good we can buy—not how cheap. Come to any of Smith's markets today and every day and you can buy these prize-winning heaves and lambs from 3c to 15c per pound. You can buy them from us at these prices because at Smith's markets all you pay is the wholesale price of meat. We can sell them to you at these prices because we have pledged ourselves to fight and keep a-fighting the great Chicago Beef Trust, who would grind you as it grinds the people wherever it gains a foothold. Keep away from the Beef Trust and its markets. Don't eat Eastern meat, cold-storage meat or meat brought from some other state. Patronize a Smith Market.

Frank L. Smith Meat Co.
