TWO MILLION WILL BE RAILROAD GOST

Construction of Line Into Central Oregon Promised in December.

ROUTES BEING CONSIDERED

Decision Will Be Reached at Conference to Be Held by Officials at Pelican Bay.

Two million dollars will be spent by the Harriman interests in building the new line into Central Oregon, if the project just announced by Mr. Harriman is carried to completion. The new road will be about 150 miles long. Additional track will be added during the following years, the track just decided upon to be a beginning in tapping the great prairies of the interior.

Work of construction on the new line will be commenced about December I, according to those in a position to know what preliminaries are necessary before actual grading will be started. Before dirt will fly, existing surveys must be gone over, verified and brought up to date. If the Deschutes route is followed by the new line, an entirely new survey must be run for a considerable distance, for the Harriman engineers have only mapped out the route for a track about half-way up the Deschutes canyon as yet. If this route is adopted, Work of construction on the new a track about hair-way up the Deschutes canyon as yet. If this route is adopted, surveying gangs must go over the old sur-vey from the mouth of the river and then make a new line south into the Agency Plains country.

Engineers Have Surveys.

Surveys south from Shaniko, the pres-

Surveys south from Shaniko, the present terminus of the Shaniko branch, the old Columbia Southern, are in the local offices of the Harriman engineers, and the same is true of the extension of the Corvallis & Eastern into Eastern Oregon. If either route is decided upon, however, the old surveys must be brought up to date and considerably revised.

The cost of getting into the desired Central Oregon territory will be the prime factor in determining which route will be used. The choice will be made, it is believed, at a conference to be held this week at Pelican Bay between Mr. Harriman, Julius Kruttschnitt, director of maintenance and operation of the Harriman system, and William Hood, chief engineer of the Southern Pacific. Mr. Hood is already at Pelican Bay, and Mr. Kruttschnitt left Portland last night in his pri-

is already at Pelican Bay, and Mr. Kruttschnitt left Portland last night in his private car for the Harriman lodge.

Elaborate data of all the different routes
by which the bottled-up Central Oregon
territory can be reached will be taken
to Pelican Bay, and this week's conference will decide which direction the projected line will take. Immediately this is
settled, surveying outfits will be put in
the field and the preliminary surveying the field and the preliminary surveying work accomplished as rapidly as possible. When the surveys are complete, construction forces will be set to work, and the construction hurrled with all possible speed. It is said by railroad men that December 1 is an approximate date at which the building of the new line into Central Oregon will begin.

Progress Will Be Rapid.

Once started, the work will be carried forward with all the speed that big con-struction gangs and plenty of money can accomplish. There is nothing to hinder the progress of the work during the Winter months, for the line will be built thorugh a country where construction is entirely feasible during that season, for but little rain or snow falls on the plateaus of the interior.

The completion of the new Central Ore-

son line is a matter of perhaps a year. The new track should be completed in time for the next crop season, and Mr. Harriman has intimated that he will build about 100 miles of new track a year in future until all the north-and-south east-and-west lines mapped out in this state are completed. It is predicted by those best informed

as to routes that the new line into the inwill follow the Deschutes River from its mouth, it being thought that this offers the best means of reaching the ter-ritory sought to be tapped. However, it may be decided to extend the Shaniko branch or other routes may be adopted

KNEW PHONOGRAPH'S VOICE

Took Property When It Sang "I'm Afraid to Go Home in the Dark."

ST. LOUIS, Aug. 22—(Special.)—Out of a window at 414 North Leffingwell street floated the sweet strains, "I'm afraid to go home in the dark."
"That's it," said W. C. Arnold, of 816
Market street, to the policeman by his
side. "I would know that voice anywhere."

Again came the sweet sounds in woman's voice. The man by the side of the policeman shuddered. "That's her voice," he said. "I would know it anywhere."

Once more the voice soared out and filled the street with melody. Even the policeman shook with emotion. The words, some of them thrilled him.
"What shall we do?" asked the police-

Break into the house," exclaimed the man by his side. Into the palpitating night air came the

Policeman and man went through the dark halls of the house until they came to the room from which the voice came. They threw it open and saw a phonograph on a table tolling forth the musto of the song that had held them spell-bound in the street.

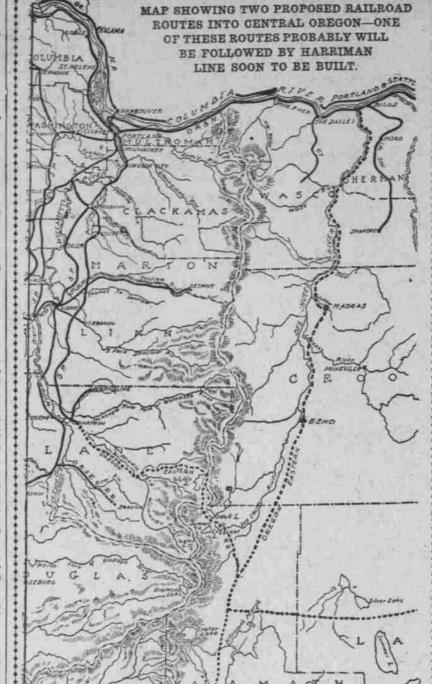

The policeman arrested May Kavanaugh on the charge of stealing the pho-nograph from Mrs. Bettle Arnold, of 816 Market street. Earlier in the day Miss Kavanaugh had called at the Arnold Shortly afterward the phone-

arnh was missed.

Arnold knew the voice of the instru-ment so well that when he heard it singng on Leffingwell avenue he recognized

It immediately.

The phonograph has a record. Mrs. Arnold was accused a year ago of killing James Reed, a boarder in her house. Her husband had insisted that he be sent away and one afternoon while he was sleeping on his bed the phonograph was turned on and at the same time a shot was find in Paced's room. There was was fired in Reed's room. There was a woman visitor at the house, but she was distening to the song of the phonograph and did not hear the shot,

Professor Willett Ridicules Bible Miracles.

STORIES ARE DISSECTED

Cherished Stories of Holy Writ Are Called by Critic Work of Clever Men or Impossible Tales.

CHICAGO, Aug. 23.—(Special.)—"No man ever lived who could perform a miracle— hat is, who could cause a change of God's laws of government of the universe. The Old Testament miracles as narrated by Old Testament writers are chiefly fanci-ful narratives based on fact or legend and should not be taught children as iteral description of facts. You cannot teach children in school of the unchange-able laws of nature and then teach them in Sunday school that these laws are at times broken by God or his prophets." In this language Professor Herbert L. Willett, of the University of Chicago Di-vinity School, today outlined to a reporter for the Daily News his belief that the Old Testament accounts of miraculous feats by prophets of the children of in-rael are largely imaginative in their make-up and that when reduced to basis of fact the miracles will be found to have been natural phenomena exaggerated by writers who sought further to glorify the great men of whom they wrote. Professor Willett enumerated a number of Old Tes-tament miracles and gave his opinion of the truth concerning them. His talk fol-lowed a lecture last night in which he told his classes of his theory.

Gives Basis for Faith.

"I hold this interpretation to be of value as giving a basis for believers of this generation to cling to their faith," said Professor Willett. "We must interpret according to strict letter and lose the value of the writings or we must interpret according to the personalizies of the pret according to the personalities of the men written about to arrive at the basis of truth of the narratives. Any primitive people-the ancient Hebrews as well as others-love marvels. Our own chil-dren, undeveloped intellectually, have woice, singing:

Baby dear, listen here, I'm afraid to go bome in the dark.

Every day the papers say "There's a robbery in the park."

So I sit alone in the Y M. C. A., singing just like a lark.

"There's no place like home."

But I'm afraid to go home in the dark.

"Till do it," said the policeman, his hand clutching his night stick and his teeth clinched tightly.

Policeman and man went through the

higher use or application of such a law.
I believe that there were great men in
the Old Testament days, as there have
been in all tims, and that they did great
to induce its owner, an old shepherd,

thingsa "For instance, I believe that there were "For instance, I believe that there were men who appeared to the people of their marvel-loving time to control Nature or natural forces. Men who could heal as men of our own time have done, by com-vincing him that he is well. Call it hyp-notism or what you will. I believe in the inspiration of the Old Testament, but in the inspiration of man, and not the mere

words of the text.
"I have divided the miracles of the Old Testament into four groups. My first group includes miracle narratives apparently based on fact, but exaggerated. The ten plagues of Esypt come under this head. I believe that the ten plagues formed a series of unusual natural disasters which visited Egypt.

ormed a series of unusual natural dis-aters which visited Egypt.

Children of Israel Seize Chance.

"The children of Israel took advantage
of these," continued the speaker, "to

point out how God befriended them and to free themselves of bondage. There is the miracle of the restoring to life of the Shulamite's son. I do not question that the great prophets did heal sick, as we know of men today who have a magnetic or other power to heal, but the son prob-

or other power to heal, but the son probably was not yet dead except by reason of the narrators' exaggeration.

"Of the crossing of the Red Sea by the children of Israel during their escape from Egypt we have two accounts. In the prose account we are told in a matter of fact way that they crossed at a time when the wind had driven back the waters Of the postle account I shall meak. ers. Of the poetic account I shail speak under another heading. The narratives of the miracles of creation, to my mind, are fanciful accounts of the successive steps of evolution as we understand it today.

"The second set of tales of miraculous accounts of these based on figure and the second set of tales of miraculous accounts to the second set of tales of miraculous accounts to the second set of tales."

happenings contains those based on figures of speech which have fact, including the command of Joshua to the sun and moon to stand still as told in the poetical book of Joshua; also the buttle of Beth-Horon, in which God was said to have huried down stones on the Canaanites. This probably was some kind of storm. In the 15th chapter of Exodus we have the poetical account of the crossthat the waters piled themselves up or each side and congealed into walls, leav-ing a dry path. The psalmist also in this group tells about mountains bowing down and little hills skipping like lambs. This doesn't mislead any one into believing that this occurred; then why should the

Some Classed as Legends.

"The third group is of miracle stories with legendary basis," declared Professor Willett, "such as that of the man raised to life after being killed in battle, his body being dropped into Elisha's tomb and touching the prophet's bones—mere legend, given its Old Testament form to glorify Elisha. As to the three children of Israel in the flery furnace, this story should be used not to emphasize a leg-endary miracle, but to illustrate the faithfulness and courage of the three.

"My fourth group of Old Testament miracles includes those which violate not only probability, but morals, and therefore cannot be taken as authoritative demonstration from God of the ethics of his religion. The destruction of the children by bears at Bethel at Elisha's company to one of these. The death of Livra mand is one of these. The death of Uzza as punishment for his efforts to sustain the tottering ark is another, as is the destruction of the band of soldlers sent by the King of Israel to arrest Elijah.

Real Miracles Growth of Ideas.

"The great miracles of the Old Testament are not these marvel stories some of which are fact and some of which are the work of imagination, but the growth of ethical ideas; the lives of great men who made history-prophets, heroes, sages and martyrs of the faith; the use of law, institutions, history and biography for the development of character; the production of the greatest literature of antiquitythe Old Testament—and the creation and fostering of the Messianic hope.".

Couldn't Swim the Atlantic.

Kansas City Journal. For once the American had discovered something British that was better than anything that could be produced "across the pond." His discovery was

to sell it.

"Wad ye be takin' him to America?" inquired the old Scot.

"Yes, I guess so," said the Yankee.

"I thocht as muckle," said the shepherd. "I couldna part wi' Jock."

But while they sat and chatted an English tourist came up and to him the shepherd sold the collie for much less than the American had offered. than the American had offered.
"You told me you wouldn't sell him," said the Yankee when the purchaser had

YOUR HOME will be healthier when you keep bottled Schlitz. The barley is food-the hops are a tonic. And the drinking of liquids flushes the system of waste.

Every doctor knows that most people drink too little. On this account, their systems become clogged with waste.

There lies the main good of watering places. They induce the drinking of water.

That is one reason why the drinking of beer is good for you. It leads you to drink more liquid than you would drink without it. And that liquid is both a food and a tonic.

The sturdiest peoples of the earth drink the most of it. But be sure that the beer is aged, so it will not cause biliousness. And be sure it is pure.

Schlitz beer is all healthfulness.

SIX PERSONS BADLY HURT

Mrs. Anne Hoff Still Unconscious. Feared Skull Is Fractured. Streetcar Crowded With Passengers From Venice.

LOS ANGELES, Aug. 23.-Six persons were injured, one probably fatally, late to-day, when an inbound Los Angeles Pacific car struck an automobile at the intersection of Sixteenth street and Western avenue, practically destroying the ma-chine and hurling its six passengers in every direction. The injured are: Mr. and Mrs. R. C. McKibben, of 2130 West Twenty-seventh street.

Mr, and Mrs. Corry C. Hoff, of 769 Ceres

Mrs. Anne Hoff. Pasadena.

Sarah Hoff, aged 14, Pasadena. Mrs. Anne Hoff is believed to have been the most seriously injured. She had not recovered consciousness several hours after the accident, and it was feared her skull was fractured. Responsibility for the collision has not

the approach of another vehicle.

The streetcar, which was crowded with passengers returning from Venicia, caught didn't know that rate inhabited the the machine when it was partly across rock, and my surprise at this unexthe track. The tonneau, containing the pected discovery in natural history, combined with the start I gave when

injuries, although both were flung to the street. The car was immediately stopped, and after the four women, all unconand after the four women, all uncon-scious, had been lifted aboard, a quick run was made to the California Hospital, where medical aid was given the injured.

PHOTOGRAPHING

Plenty of Adventures to Be Derived From the Sport.

Chicago News. than the American had offered.

"You told me you wouldn't sell him," said the Yankee when the purchaser had departed.

"Na," replied the Scot, "I said I couldna' part wi' him. Jock'll be back in a day or so, but he couldna' swim the Atlantic.

The flame of an ordinary match has a much higher temperature than is generally known, and will melt case flow or steel flings. Try it by striking a match and sprinkle the filings through the flame. Sputtering sparks like gunpowder will be the result of the meiting metal.

There are plenty of adventures to be found in photographing the great waves of the sea. F. J. Mortimer, and the great waves of the sea. F. J. Mortimer, and the sprobably be tried for selling one of his waves of the sea. F. J. Mortimer, and the sprobably be tried for selling one of his waves of the sea. F. J. Mortimer, and the sea for some time the stormy coast of the Scilly be from one to ten years in the will goose chases, the penalty for which will be from one to ten years in the trust the sea for a moment. Once I was standing with my back to a cliff, on the top of which was a friend, whose outstretched hands I could just reach outstretched hands I could just reach outstretched hands I could just reach and sprinkle the filings through the flame. Sputtering at a safe distance I turned my back on it for one moment to reach up to my friend for a fresh dark slide. There are plenty of adventures to be

Patal moment— as fatal as taking one's eye from a crouching tiger—for no sooner had I turned my head than a wave darted in and crashed with terrific force on to my back. I was absolutely flattened out against the rock, all breath and feeling were knocked. all breath and feeling were knocked from my body, while my camera was smashed to smithereens. Bruised and gasping. I could only totter home to bed, and two days were passed before

I was fit to venture out again. "Then there was another venture," says Mr. Mortimer again, "caused by a ropeman who was too careless. He had lowered me down a narrow crevice a 'chimney', as it is called, and having seen me safely come to ground at the bottom he calmly threw the rope down to me and went off, never thinking that he might be required to haul me up again. One glance at sea told me that I was in a most dangerous posi-tion; the tide was coming in, and would soon be welling up the chimney, and only by way of the chimney could I escape. All intentions of taking photographs I threw to the wind. After shouting till I was hoarse I began the upward climb unaided-elbow work of the stiffest kind. The chimney was 100 feet high, and I spent the rest of

the day getting to the top. "Another time the promptitude of a friend in trying to save my life cost me a valuable outfit. I was photographing from the base of a cliff, on the top of which stood my friend, holding the rope to which I was attached. Along came a fine wave that would have made a magnificent study. While it was yet far distant a sudden distrust of it entered my friend's soul, and while I was stooping over my things on the ground, without a word of warning he gave a mighty jerk to the rope and hauled me into the air. Dangling helplessly, unable to cry out, I was forced to watch that fine wave roll questiv in, break with a great effect of quietly in, break with a great effect of foam and as quickly go off with all my

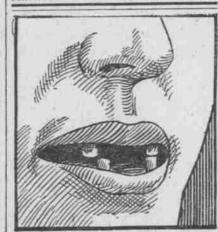

apparatus.
"I once had an awful fail when descending a steep bit of cliff on St. Agnes. I was clambering down, very much encumbered by my camera, which been placed, the motorman of the car and Cory Hoff, who was driving the automobile. both declaring they failed to sight impact and was torn from the body of the vehicle, the women meanwhile being flung many feet away.

Hoff and McKibben escaped with slight injuries, although both were flung to the
