DR. TAYLOR.

Varicocele

A thorough cure without pain or cutting. Every case of Varicoccie I treat proves the superiority of my mild and harmless method, and the folly of resorting to surgery. In most instances it is even unnecessary to detain the patient a single day from his business. The treatment I employ is distinctively my own, and can be had at my office only. Do not submit to the knife and hospital expenses, when a complete and permanent cure can be had without the loss of time, and without pain or cutting.

Specific Blood Poison

Others dose the system with mineral

Others dose the system with mineral polsoes scarcely less dangerous than the disease itself. The best they hope to do by this treatment is to keep the disease from manifesting its presence upon the surface of the body. Under my treatment the entire system is cleansed. The last taint vanishes to appear no more. I employ harmless blood-cleansing remedies. They are remedies heretofore unknown in the treatment of this disease. They cure by neutralizing and absolutely destroying the poison in the system. Such cures cannot be other than complete and permanent.

Government Figures of Grain Production.

TEN YEARS

Wheat, Oats and Barley Output of Oregon, Washington and Idaho and Farm Value of the Products.

Secretary Fred Muller, of the Portland Board of Trade, has made an interesting compliation from Government reports of statistics of the wheat, oats and barley rops, acreage and value, in Oregon, vashington and Idaho, covering the eriod from 1898 to 1907. The statistics

Acreage and production in bushels in 1907 and stocks in farmers' hands March 1, 1968: Re-15,265,000 35,045,000 8,633,000 2,442,000 5,958,000 1,814,000

Average yield and farm value per acre of wheat and average farm price of wheat per bushel, 1898 to 1907, inclusive: Oregon.

Acreage and production in bushels of oats in 1907 and stocks in farmers hands March 1, 1908; Re-279,000 100,000 113,000 Oregon Washington Idaho Average yield and farm value per acre of oats and average farm price of oats par bushel, 1888 to 1997, inclusive:

market yesterday, so far as could be learned locally. The excitement of Priday and Saturday has subsided, but while it lasted, a considerable amount of business was done in the way of contracts, and more was attempted. Seven cents is understood to be the price offered. Mr. Klaber says the report that was in circulation last week that he paid The cents in the Silverton and Mount Angel sections was not correct, as he has not paid that price anywhere.

In and out of the market the weather h new the principal topic of conversation. I conditions are favorable, picking will be Arrival of Large Quantities of Eastit is feared the rain may delay the harvest should the storm last any length of time it might seriously hurt the crop, but a continuous rain is not expected at this period and a few days of it will not affect

Hop picking returns in New York indicate Humphreys have been sold at 14 cents and 12% cents has been offered for the late

A New York dealer figures out the visible supply of hops as follows:
"At the beginning of the new hop season there are remaining in first hands about 45,000 bales of 1906 and 1907 hops. The holdings are divided as follows: 1907—Ore-

gon, 6500; California, 17,000; Washington, 4000; New York, 1500; total, 29,000, 1006—Oregon, 4000; California, 7000; Washington, 2500; New York, 500; total, 15,000. The crop is estimated as follows: Oregon, 100,000; California, 75,000; Washington, 15,000; New York, 40,000; total, 210,000 bales, so against about 200,000 bales last year.

Oversupply of Peaches Point to Low Prices This Week.

The produce houses closed at noon yester-day. The only selling in the truit line was to fruit stands and hawkers, who confined their buying principally to peaches. There were no established prices on this fruit. Sound stock was well held, but ripe peaches went at almost any price, in some instances to cents under Saturday's figures. Receipts ere very large and a weak market today is

casabas and a car of mixed vegetables.

The potato market has taken on a weaker tone as a result of the cessation of Northern buying Shippers are practically out of the market and at the moment prices are more or less nominal on shipping stock

The country produce markets were neglected. No receipts of poultry were reported and there was no demand. There is a firmer undertone in the egg market Hold-ers of good Eastern and storage stock are \$7.70; cows and belfers, \$1.70@5.70; Tex-

are very scarce.

The butter market is very firm. The sup-ply, especially of the best city creamery stock, is decidedly light and there is a strong demand for the best established brands of country creamery.

AMERICAN HAY CROP IS LARGE. Yield This Year May Exceed the Bumper

Harvest of 1907. The three main classes of American crops which have primary bearing upon husiness conditions generally are the fiber crops, the cereal crops and the fodder crops. Under the last-named class hay is the leading team. Last year the farm value of the hay crop was 743,507,000. This total was greater than the entire value of wheat. It exceeds the full value of the cotton crops. ceeded the full value of the cotton cropp and was more than half the value of the

From present prospects both the acreage and the yield of the hay trop for the year 1908 will be far in excess of that of 1907. when No. I hale timothy hay in December price estimates are usually made, was selling at from \$13 to \$17.55 a ton. The present price there ranges from \$11 to \$12 a tos. Prices are now about 25 per cent less than

Round Advances in Provisions

advance of 1 cent in kettle-rendered lard will be shown in a new provisions price that which will go into effect today. Standard pure lard will be quoted to cent higher. Dry sait and smoked clears and backs will be advanced 1 cent and exports 1 to cents. Bacon and hams are unchanged except skinned hams, which go up it centsolectories. been playing a series of games in this city, beginning Friday afternoon. In the first game they defeated the locals by a score of 10 to 6. Saturday afternoon the

DOWNING-HOPKINS

"I claim to know a great deal

about a few ailments, rather

than a little of human ills."

THE WORK OF A SPECIALIST IS THE

DOING OF A FEW THINGS BEST

There is not a physician living who can claim to be proficient in the treatment of all human aliments and diseases. To attain the highest possible degree of science would require half a dozen lifetimes of study and as many more of practical experience. The regular practitioner is proficient in a large number of the commonest and most easily conquered diseases. The specialist must first become proficient for general practice, and must then go on to proficiency in a few of those conditions and diseases more difficult to understand and more difficult to cure.

IN UNCOMPLICATED CASES

WHAT WEAKNESS IS AND

HOW I CURE IT.

"Weakness" is merely a symptom of chronic inflammation in the prostate gland, brought on by the improper treatment of some contracted disease. A complete and radical cure is, therefore, a question of restoring the prostate gland to its normal state, and this I accomplish promptly and completely without the use of internal remedies. My treatment is a local one entirely. It is original and scientific and has been proven absolutely effective by thousands of tests. I am convinced that hy no other methods can full and permanent restoration of strength and vigor be accomplished.

FREE CONSULTATION

Call at the office if possible for Free Advice, Examination and Diagnosis. If you cannot call, write for symptom blank.
