EXCESS OF HOPS

World's Production as Figured by a German Expert.

ABOVE TEN-YEAR AVERAGE

Crops of the European Countries Compared With Last Year—Indications Are for Low Prices Again.

The following article from the Saazer Hopfen & Brauerzeitung of Saaz, Bohemia, dated August 22, 1908, giving the world's estimate of the hop crop of 1908, as compared with the crop of 1907, has been translated by G. Muecke, of this city. The figures are given in zentners, equal to 50 kilos, or 110 pounds English. The figures in parenthesis indicate official returns of the crop of 1907 in zentners. The article follows:

The recent inclement weather has now changed for the better, and although the temperature is not quite normal yet, it seems beyond any question that with the healthy and vigorous stand of the hopvines, any serious damage could occur, and we may now consider it an assured fact that this year's hop crop will exceed in quality that of the previous year and also the average of the last ten years. The world's hop crop will not only fully satisfy the consumption, but will leave quite a considerable surplus for conserving purposes; therefore, there is no doubt that we have to reckon with very moderate prices, and a proof that our growers are already convinced of this is the fact that in countries where early hops are available, like in Wurtemberg, Styria and Hungary, they are being readily parted with at exceedingly low prices.

We might just as well save ourselves the trouble of going into detailing the estimates of all the hop-growing districts, but in order to comply with the requests of a number of our friends we will give a short review.

The German Empire, as the most important producer in Europe, enjoys a splendid stand of its hopyards; in all its different states, which grow hops, a larger crop is expected than in 1907; we estimate the total at 564,000 zentners against 483,000 zentners last year, of which Bavaria alone will have 325,000 zentners (271,000), Wurtemberg 75,000 (63,000), Baden 37,000 (30,000), Alsace-Lorraine 103,000 (96,000), and the North 24,000 (20,000). The most favored district seems to be the Holledau. This comprises the hop lands in Upper and Lower Bavaria, and expects on its acreage of 10,100 hektars (about 25,000 acres) at least 140,000 zentners (129,400 l. y.); the few bales which already have reached market were of exceptional choice quality. Estimating for the German production of 70,000,000 hektoliters of beer (nearly 60,000,000 barrels) the requirement of 375,000 zentners, the empire will have a surplus for export of 190,000 zentners.

The Austro-Hungarian Monarchy, with an area in hops of about 25,000 hektars (1 hektar equal to nearly 2½ acres) expects 330,000 zentners, against 290,000 zentners last year. Of this quantity Bohemia alone will have 260,000 zentners, against 211,000 last year. The prospects are especially favorable in the famous districts of Saaz and Auscha; the quality promises to be entirely satisfactory.

Of other hop-producing states on the European continent France expects about the same quantity as last year, Belgium and Holland perhaps 40,000 zentners more, Russia, however, about that much less. The total production of the European Continent may therefore be put down as 1,147,000 zentners as against last year's 1,014,000 zentners. This excess of 133,000 zentners would not cut much of a figure, but as England expects at least 100,000 zentners more than in 1907 and as we are depending with our surplus upon the British Isles, export will only be possible at very low prices, so much less so, as the brewers there are carrying into the new campaign large stocks, mostly Americans.

The United States of America, according to official returns, have raised in 1907 520,000 zentners of hops, of which fully 100,000 zentners were shipped to Great Britain. The estimates for 1908 vary greatly; but if we strike the average of the different seemingly conservative estimates, we arrive at a quantity of about 420,000 zentners, which means 100,000 zentners less than last year, and this encourages somewhat the hope of our friends who do an export business to America. The export of German hops to the United States in the period from September 1, 1907, to June 30, 1908, amounted to 41,616 zentners. Finally not forgetting Australia, with 12 to 15,000 zentners, we arrive at the total from the world's hop crop of 1908 of around 2,060,000 zentners of 50 kilogrammes, or 110 pounds each, which, against 1,929,000 zentners in 1907 shows 71,000 zentners more, and an excess of 230,000 zentners over and above the average of the last 10 years of 1,770,000 zentners.

Not being sanguine in our expectations as to prices, the beginning season is not likely to bring us any surprises, and if dealers, producers and consumers, instead of fighting and antagonizing each other, will go hand in hand and every one do his duty to avoid excesses as either bulls or bears, the rich crop of 1908 will finally quietly pass into the hands of consumers at prices adequate with existing circumstances.

WEAK UNDERTONE IN SPITE OF RAISE

Conditions Become More Unsettled in the Local Butter Market.

Conditions in the local butter market are somewhat unsettled. Several of the city creameries that have held back to the 30-cent quotation, yesterday advanced to 31½ cents, and the two largest Valley producers have raised to the same price. This puts all the leading brands on a parity and to all appearances indicates a firm market.

Back of this firmness, however, are certain factors that are likely to undermine its strength. While there is something of a shortage now, which in certain quarters is rather acute, the make is increasing to a noticeable degree, and that it will continue to increase from now on is to be taken for granted. The Puget Sound markets, according to the latest reports, have been weakened by the receipt of a fresh supply of Eastern butter and, it is feared, may cease to be a buyer of Oregon butter. Eastern butter is also coming into this market more plentifully and Eastern dealers are making renewed efforts to place stocks here.

A year ago similar conditions prevailed in the local field and the creamery men, by holding the price up too long, brought on a flood of butter from the East with disastrous consequences. They are not likely to pursue the same course this season. Therefore, when stocks begin to pile up a backward movement in the price can be looked for.

BUYERS AND SELLERS ARE APART

But Only a Quarter of a Cent Prevents Business at the Board of Trade.

Only a quarter of a cent separated the views of wheat buyers and sellers at the Board of Trade yesterday, but this difference proved insurmountable, and in spite of the efforts of Secretary Muller, no business resulted. December wheat was offered at 93½@94 cents and the bids ranged from 92¾ to 93¼ cents. September wheat was nominal at 90½ cents bid. Oats and barley were firmer.

A branch office of the Western Union Telegraph Company was opened on the floor of the Exchange yesterday for the benefit of the members.

The spot grain market was quiet and unchanged.

The receipts for the day were 131 cars and 24,533 sacks wheat, 16 cars and 463 sacks oats, 9 cars and 835 sacks barley, 510 sacks flour and 18 cars hay.

The range of futures was as follows (f. o. b. warehouse, Portland):

HOP PICKING SHOWS UP LIGHT

Yields Are Not Coming Down as Well as Expected.

Yard reports received yesterday were to the effect that hops are coming down lighter than expected. Picking will be general all over the state today, as many of the larger growers will begin their harvest this morning. A few will not start until Saturday or Monday in order that the hops may ripen fully.

"Until we get more specific reports as to the yield," said Herman Klaber yesterday, "we are not inclined to reduce our estimate for Oregon below 90,000 to 100,000 bales.

"Reports are coming from the East of offers by dealers as low as 8 cents delivered to brewers, which means that the dealers expect to cover their short sales at about 5 cents."

Foreign cables received by Klaber, Wolf & Netter yesterday were as follows: "London market closed dull with less inquiry." "German market is declining." "Bohemian market closed dull with less inquiry."

Pfeister & Wustl, of Saaz, write to Klaber, Wolf & Netter under date of August 22 that the Austrian crop is estimated at 330,000 centners, of which Bohemia will produce about 260,000. They add: "There are 25,000 hectars (37,500 acres) in hops in Austria. Mostly favored are the yards of Saaz and Auscha. On account of the greatness of the world's crops and the large stocks in brewers' hands, prices of our hops will probably be a little lower than in 1907."

Otto Heller, of Prague, sends to the firm this estimate of continental crops: Austria, 317,000 to 350,000 centners; Germany, 520,000 to 565,000, France, 70,000 to 80,000; Russia, 55,000 to 60,000; Belgium, 70,000 to 80,000; a total of 1,032,000 to 1,132,000 centners as against 1,005,000 centners grown last year.

PEACHES HOLD STEADY IN PRICE

Receipts Are Large and the Demand Active—Cantaloupes and Melons Weak.

Another big lot of peaches came in yesterday, mostly small in size. Prices held the same as on Tuesday, 30 to 70 cents, with the bulk of sales at 50 cents. The demand was strong and nearly all the arrivals were moved. Large receipts are expected again today.

There was a good demand for grapes and the market was steady. Tokays sold at $1.50 and Muscats and Malagas at $1.25. Local grapes sold around 75 cents for the most part. A car of California grapes was due, but failed to arrive. Cantaloupes and watermelons were weak.

Ranch Eggs Are Very Scarce.

Receipts of Oregon eggs yesterday were only 118 cases. The demand was good for both ranch and Eastern stock, and prices were firm.

Poultry arrivals were not heavy, but the inquiry was slow and prices were barely steady.

Cheese is moving fairly well at steady prices.

Hops Light, but of Fine Quality.

CANBY, Or., Sept. 9.—(Special.)—The hop crop in Canby, Barlow and Macksburg districts will not bale out over one-half that of last year. With some of last year's yards plowed up entirely, others reduced one-half or more and that part of the yards that is left with many missing hills, it is easy to see that the crop output in these districts is going to be light. A view of the yards within the last day or two shows most yards with light yields, but good quality. Picking is well under way, the price being 40 cents per box.

PORTLAND LIVESTOCK MARKET.

Prices Current Locally on Cattle, Sheep and Hogs.

The livestock market yesterday was fairly well supplied, and trade was active at unchanged prices. The larger part of the day's arrivals, however, were of inferior quality and for such the demand was not urgent. The inquiry for prime stock exceeds the supply. Receipts for the day were 75 cattle and 350 hogs.

The following prices were current on livestock in the local market yesterday:

CATTLE—Best steers, $3.75@4; medium, $3.25@3.50; common, $3@3.25; cows, best, $2.50@3; medium, $2.25@2.50; calves, $3.50@4.50.

ADVANCE IS STEADY

But Stock Market Rise Is Charged to Speculation.

SALES MADE IN A CIRCLE

July Earnings of Union Pacific and Southern Pacific Show Gains Over Last Year—Money Market Unchanged.

NEW YORK, Sept. 9.—An unusual thing about the current upward movement in prices in the stock market is the freedom with which admissions are heard of the part played by professionalism. Admonitions to this effect are common in the news of the market letters and advices sent out by commission houses to their clients or prepared for general public circulation. A small company of very wealthy capitalists is given credit for the Summer rise in prices, and there is no disguising the belief in the large part played by manipulation in the advance. Even Mr. Harriman himself, while asserting his faith in the value of his properties, as reflected in the advancing quotations, has given public expression to his conviction that much of the market activity in shares represents sales "made in a circle."

There was little news today as usual to explain the upward movement of stocks. Both Union Pacific and Southern Pacific reported earnings for July and showed operating costs cut down sufficiently to more than overcome the decline in gross earnings and to establish gains over July of last year. The Western Union statement of earnings for the September quarter had some effect on sentiment with its transformation of a deficit last year of $1,961,581 into a surplus this year of $769,148. But last year's operations of the company were hampered by the telegraphers' strike, leaving the comparison of no value as a reflection of business conditions in general.

The day's crop news did not quiet the feelings of anxiety over the corn crop. Copper was lower in London. The day's changes in the money market were not perceptible in the quotations. Sales to realize profits had some slight effect in reducing the day's advances.

Bonds were firm. Total sales, par value, $4,896,000. United States bonds were unchanged on call.

EXPECT BUYING OUTBURST

SEATTLE WHEATDEALERS LOOK FOR ACTIVE TRADING SOON.

Transport Dix Will Take Last of Government's Oats and Hay Supplies.

SEATTLE, Wash., Sept. 9.—(Special.)—The local wheat market is nervous. While there is little trading on the exchange, dealers feel that there should be more activity than is apparent, and are momentarily expecting another buying outburst. Millers do not believe that flour prices will stay where they are long.

The oats market is fairly strong, due largely to the fact that the Government transport Dix is soon to load 1500 tons for the Philippines. This will clean up the Government's contracts out of last season's crop. Considerable hay is also to go out on the Dix.

Fruits were weak today in all departments. Large quantities of peaches forced prices down in spite of a heavy demand.

Poultry held firm at yesterday's prices. Veal is not quite as strong. Cooler weather has brought out heavier receipts.

INVITES 1000 DELEGATES

Secretary Francis Prepares for Coming Session of Trans-Mississippi.

SAN FRANCISCO, Sept. 9.—The offices of the executive committee of the Trans-Mississippi Commercial Congress, to be held in this city October 6-10, have been opened by Secretary Francis, who announces the appointment of over 1000 delegates to date. An unusually large attendance is promised, and the speakers already accepting invitations to make addresses are: David Starr Jordan, of Stanford University; John Barrett, of Washington, D. C.; Theodore B. Wilcox, of Portland, Or.; E. E. C. Simmons, of St. Louis, president of the National Prosperity Association; John W. Wolfe, of St. Louis, and Colonel Baker, of Council Bluffs. Delegates representing the movement for a deep waterway from the Lakes to the Gulf are expected to take an important part in the proceedings, and attention will be paid to the attitude of the National administration upon the conservation of National resources.

KANSAS CITY, Mo., Sept. 9.—The members of the National committee on the conservation of natural resources have been given one day at the Trans-Mississippi Commercial Congress, which meets at San Francisco October 6-10. President J. B. Case, of Abilene, Kan., today received from Washington acceptance of the committee's part on the programme.

DIES IN CLUBHOUSE FIRE

Walter's Charred Body Found in Ruins at Philadelphia.

PHILADELPHIA, Sept. 9.—One man was burned to death, two women were seriously injured and several others were more or less badly burned this morning in a fire which destroyed the men's and women's building of the Philadelphia Cricket Club at Chestnut Hill, a suburb. There were only employes in the building when the fire started.

Many rescuing parties were formed immediately in the wealthy neighborhood, whose residences surrounded the grounds. Repeatedly these men started up the burning stairways, but were beaten back. It was not until an hour later that the charred body of Thomas McHenry, a waiter, was found in the ruins.

According to the Electrician the committee appointed in connection with rebuilding of the Russian navy has decided to utilize the public contributions which have been subscribed for the purpose of rebuilding the warships in establishing telegraph stations at 18 points on the Baltic coast line.

WHEAT TONE HEAVY

Selling Pressure in the Chicago Market.

CLOSES NEAR THE LOWEST

Great Increase in the World's Visible Supply Is a Depressing Factor—Northwestern Receipts Are Very Large.

CHICAGO, Sept. 9.—The wheat market was subjected to considerable selling pressure all day and a heavy tone prevailed the entire session. The market was bearishly affected at the start by weak cables and by continued liberal receipts in the Northwest, and opened with prices ⅛c to ⅜c below the previous close. As the session advanced, the selling became more general, elevators and Northwestern interests joining in the movement. Bradstreet's report of the world's visible supply was one of the chief depressing influences, and showed an increase of 5,914,000 bushels for the week. A falling off in export demand also tended to weaken the market. The market closed weak at almost the lowest point. Clearances of wheat and flour were equal to 229,000 bushels. Primary receipts were 2,047,000 bushels, compared with 724,000 the corresponding day a year ago. Minneapolis, Duluth and Chicago reported receipts of 1014 cars, against 525 last week, and 376 cars a year ago.

The demand for corn was fairly active all day, and offerings at no time were liberal. The market closed firm, with prices up ⅛c to ¼@⅜c. Local receipts were 412 cars, with 107 of contract grade.

Selling of September and December deliveries by cash houses was the feature of trade in the oats market. The market was influenced to a large extent by the weakness of wheat, sentiment being bearish all day. At the close prices were ⅛c to ½c below the previous close.

Shorts were free buyers of lard, but aside from that the provisions market was dull all day. Prices at the close were 5c lower to 5@7½c higher. Estimated receipts for tomorrow: Wheat, 52 cars; corn, 210; oats, 275; hogs, 22,000 head.

The leading futures ranged as follows:
