First Auction of This Product Ever Held in the Country-Weaker Market for Peaches. Wool Trade Dull.

The first pool sale of cascara bark ever held in the United States occurred at Ed-dyville. In Lincoln County, pesterday after-

The cascara bark market has been showing much strength lately. The 1908 peel has been unusually light, and because of limited offerings from the Coast, the tendency of the New York market has been steadily upward. Prices at New York are now from 2 to 3% cents higher than they were last Winter.

EASTERN WOOL MARKETS DULL No Recent Transactions in Oregona-Sales of Territories.

Eastern markets generally have become very quiet and no change for the bet-ter in this respect is expected ason. The Boston Commercial Bulletin of recent date

Hoston Commercial Bulletin of recent date says:

As for several weeks, most of the trading is between a few firms and as few buyers. In the majority of cases merchants report a very quiet week, not only in contracts booked, but in the interest which buyers have shown. It is not a healthy state of affairs when most holders are finding no outlet for supplies. An explanation is not found in any unwillingness to sell at current prices for all dealers are ready to sell, even though the profit on interior cost is small. The only solution that is reasonable is that the condition of the consuming industry does not warrant extensive purchases of raw maierial. While some purchases of raw maierial. While some purchases of raw in the condition of the contiling, and manufacturers are not operating in wool simply because they have not got on hand orders for goods. At present the Fall and early Winter, for there is no indication of a revival in the manufacturing end, and until that arrives demand for wool will be regulated by the amount of bustness that manufacturers receive from week to week.

Good Demand for Well Colored Early
Americans Expected.

W. Dennis & Sons, of Lendon, say in their
first apple report of the season.

The home crop is, on the whole, considerably above the average. In the county
of Kent, while parts of it are patchy from
the effects of the caterpillar, other sections
have a humper crop, and altogether it will
pan out above the quantity of last year.

In the western counties of England,

Sharp Fall in Stocks Affects Entire East.

HEAVY REALIZING

Effect of the Hepburn Law Decision Had Been Discounted-Sudden Rise in Call Money

NEW YORK, Sept. 10.—There were developments with real and important bearing on values today, compared with the unsubstantial fabric of tips and rumors whave made up the influences in the st market for some time past. The effect to throw the market into a state of seem unsettlement, reflected in constant and feverish fluctuations and a final sharp break in prices. Feeding out of stocks which have been the favorite mediums of speculation during much of the recent rise was clearly during much of the recent rise was clearly perceptible, as shown by the constant range below last night's level of the Harrimans and transcontinental stocks and Erie. Even the excited movement in Reading was not able to detach Erie from the prevailing tendency in the Harriman group, although Haltimore. & Ohlo got the benefit of this division. Illinois Central also moved in sympathy with the Southern group and apart from the other Harrimans.

Harrimans.

The most influential incidents of the day were the decision of the United States Circuit Court against the constitutionality of the commodities clause of the Hepburn law, the passing of the American Locomotive dividend and a rise in call money rates to a higher figure than had been touched since early in March.

As a speculative factor, the Hepburn decision has been assumed for many weeks and Harrimans.

cision has been assumed for many weeks and has been the active factor in the Reading speculation during all that time. Its delivery today was earlier than Wall street information had been given reason to expect, but its tenor was in accord with expectations. but its tenor was in accord with expectations. The importance to the anthracite carriers of relief from the provisions of this enactment are unquestionable. To the loss of the advantage of centering control of anthracite production in the railroad carriers would be added the embarrassment of discussorining the companies owing to the large issues of capital secured in common by mortgages on the railroad and coal properties. The speculative continuent drew large interespectations contingent drew large inferences also from the bearing of the decision on possible checks by the courts on the attempts to control and punish corporations. Whatever the bearing on values of this decision, the disposition to resilize speculative profits today in the stock market gave warning that much has been dis

worse then expected.

The sharp upturn in call money rates can hardly be attributed to the near approach of exhaustion of loanable funds, considering the banking surplus of nearly \$50,000,000 shown by last Saturday's statement of condition. Copper was lower in London again.

SUNDAY FALLS FROM GRACE

Evangelist Wrecks Printing Office in Fit of Rage.

CHICAGO, Sept. 10 .- "Billy" Sunday, former professional baseball player, but now an evangelist, resented the publication of a book of his sermons by a publishing company of Hammond, Ind., yesterday by dashing into the stereotyping rooms of the publishing house and destroying the plates with a big mallet. At the conclusion of his performance he broke down and wept. Sunday was incensed because 15,000 copies of the books had been issued by the company without his permission. It had been his intention to gather his sermons and have them published him-

Strong Demand Sends Prices Higher at Chicago.

FEELING IS VERY BULLISH

Active Bidding for Cash Wheat in Northwest and Southwest. Corn Crop Situation Is Serfous.

CHICAGO, Sept. 10.—The wheat market was strong from start to finish and closed at the highest point. Despite lower cables and ontinued liberal receipts in the Northwest the market opened firm, with prices a chade lower to the higher. Within a few minutes prices had advanced about the on buying by aborts and bull leaders. Demand continued shorts and buil leaders. Demand continued brisk throughout the entire session and the market steadily gained strength. The buying was based chiefly upon the urgent de-mand for each wheat at nearly all markets in this country and on the large seles of flour being made in the Northwest. One authority claimed that last week's flour output at Min nempolis was the largest since early Spring. Millers were active bidders for wheat here and in the Northwest, the premlums here being the same as yeaterday. The cash situation in the Southwest is equally as bullish, one report asserting that a Kansas City concern had bought back cash wheat sold to Chicago interests some time ago. No export business was transacted here and according to a local exporter, none is now in eight, owing to today's advance, effectively shutting off all foreign demand. This view, however, was not sustained by a dispatch from New York, which reported 16 boatloads worked there for export. Another factor that augmented enthusiasm was a report from a Portland, Or., trade journal, which estimated the total crop of Oregon. Washington and Idaho at 19.800,000 bushels less than last year's yield. The market was also affected by dry weather in the Winter wheat belt, which is delaying Fall plowing The corn market also displayed decided buillabness and the new crop months established new high-record marks for the season. December touching 69% c and May 67%c. The trade is rapidly becoming convinced that the situation in the corn belt, growing out of the continued drouth is assuming an alarm-ing aspect and that great damage will result unless the drouth is soon broken. The

not forthcoming in sufficient quantity to sup-ply the needs. The market closed strong a the highest point of the day at net gains o %#% to %c.
The activity manifested in the wheat and orn pits detracted in the cate market and mently trade in that pit was quiet. ose was firm at net gains of %@ %c.
