

PHASES OF INDUSTRIAL GROWTH IN PACIFIC NORTHWEST

RICH IN RESOURCES

Skamania County's Products Cover Wide Range.

FRUIT, GRAIN AND TIMBER

New Territory on North Bank of Columbia Will Be Developed by New Railroad and Made Tributary to Portland.

CARSON, Wash., Oct. 25.—(To the Editor.)—Having spent my entire time as County Fair during the two weeks past, attending our County Fair at Stevenson and at The Dalles, the week beginning October 5 and four days last week at Hood River, I feel more than ever impressed with the future possibilities of the Columbia River gorge and its tributaries. At Hood River I put up and handled the Skamania County exhibit. The task of collecting this exhibit was no small matter, attended, as it was, with all sorts of difficulties, as is always the case in a region where horticulture is practically unknown. Where the pruning hook and the spray pump are not used, and the orchards unplowed for years. Such of your readers who are familiar with Hood River and Rogue River methods will readily understand the handicap under which I was in gathering and displaying alongside of the Hood River products—the very best apple in the world.

With this preface, let me say that Skamania County, for variety of products, best anywhere under the great big tent of the 1000 boxes of peerless apples. We showed them without irrigation and very little cultivation; Onions, potatoes, corn on the stalk, corn on the ear, ripened off and corn in the glass jar.

We showed apples of the following varieties: Yellow Newtown, Spitzenberg, Kays, Northern Spies, Yellow Bellflower, Ben Davis, Blue Pearmain, Wolf River, and also some seedling apples. By close comparison, it was observed that orchards along the north bank of the Columbia are far in advance of those in the color belt.

We had popcorn, chestnuts of the American sweet variety; English walnuts, nuts in the shell, Hotho, red-top, red-clover, nutmeg, and other nuts that weighed 50 pounds and better.

From the map, embracing the Columbia gorge you will see that Skamania County has a frontage of more than 40 miles, embracing Underwood on the east, then Cooks, Drano, House Valley, Collins, Carson, Stevenson (the county seat), Cascade, Butler, Cape Horn and Mount Pleasant on the west. We boast of one snow mountain and half of another. All of St. Helens and one-half of Mount Adams. We have 125,000,000 worth of raw material in our virgin forests, Wind River Valley alone, of which Carson is the gateway, having 45,000,000 worth, according to a conservative estimate of a government timber cruiser, Skamania County is the home of several hot mineral springs, where thousands of people annually seek and find relief.

Mr. Schiecher has been engaged in grape culture during the past 21 years and is considered an authority on the subject. He is a correspondent of the Department of Agriculture and receives samples, for experimental purposes, of grapes shipped to the department from all parts of the world. Grapes grown by Mr. Schiecher won 18 prizes among 300 competitors at the St. Louis Exposition. Prizes have also been awarded his exhibits at all other National exhibitions.

Recently the Lewiston Commercial Club and prominent fruitgrowers in that vicinity engaged Professor Twilight, head of the Department of Horticulture and Viticulture in the University of California, to visit Lewiston periodically and advise them concerning the care of their orchards. Professor Twilight is a graduate of the University of France and has traveled extensively through the fruit sections of Europe and Northern Africa and is thoroughly qualified to pass upon matters pertaining to the culture of fruit.

PROMISE ARTESIAN WATER

People of North Yakima to Be Given Ample Supply Soon.

NORTH YAKIMA, Wash., Oct. 25.—(Special.)—Artesian drinking water for North Yakima in the rate of one million gallons a day is promised to North Yakima before the beginning of the new year by Jesse H. Rose, of Seattle, who recently sunk an artesian well in the west side of the city at a cost of \$2,000.

Mr. Rose says that by December 1 he will have 100 men at work laying pipes and that he expects to spend \$100,000 in the proper installation of his water system. He has a franchise granted him by the City Council some months ago. It is not his purpose to furnish water for irrigation, but only for household use. There are many cases of typhoid in North Yakima this fall, and while it is not certain that the city water is responsible, there has been considerable complaint about it lately. Recent analysis of the water furnished the city by the Northwest Light & Water Company taken from the Naches River were made at Olympia and showed an excessive amount of decayed vegetable matter. Members of the Council are considering the advisability of asking the water company to put in a filter at the intake.

CREAMERY FOR SHELburn

Construction of Building With Concrete Foundation Begun.

ALBANY, Or., Oct. 25.—(Special.)—A big creamery is being erected at Shelburn, the intersection of the Corvallis & Eastern Railroad and Woodburn-Natron branch of the Southern Pacific. Shelden Taylor, formerly of Murphy, Josephine County, has purchased from W. W. Miller a tract of ground at the intersection of the two roads and will construct a building with a frontage on each track. The transfer was completed Tuesday and Taylor has begun work on the building. He will erect a large structure with a concrete foundation. Taylor has had considerable experience in operation of creameries and will conduct an up-to-date plant.

Dr. Lorenz's Nerve Tonic Tablets at Eyster's Pharmacy, 289 Market.

SPECIMENS OF PERFECT APPLES GROWN IN LANE COUNTY ORCHARDS

EUGENE, Or., Oct. 25.—(Special.)—This photograph shows a few of the varieties of apples that are grown in Lane County and which reliable fruitmen claim will make this section a reputation if more growers give apples the proper attention. The varieties are the King, Spitzenberg, Baldwin and Gravenstein, and were raised near Eugene on Fruit Inspector Beebe's farm. The fact that the few men who have devoted their attention to apple-raising here, using discrimination in the varieties grown, have produced the finest type of apple, is the basis upon which the claim is made that, with the attention that Hood River and Rogue River growers give their fruit, the apple here could be grown to quite the same degree of perfection.

CHOICE GRAPES ON DISPLAY

LEWISTON FRUIT ATTRACTS ATTENTION IN PORTLAND.

Select Varieties, Raised by Robert Schiecher, Form Striking Exhibit in Local Show Window.

A notable exhibit of grapes is that now in place in one of the display windows of Olds, Wortman & King. The exhibitor is Robert Schiecher, of Lewiston, and the grapes were grown on his ranch near that city. A prominent place in the display is given to the variety known as the Ramona. This is one of the largest grapes grown and is also the best keeper. It is a native of Algeria and was furnished Mr. Schiecher by the Department of Agriculture. Other varieties shown are the Flaming Tokay, which is grown more extensively than any other grape in Lewiston Valley vineyards. This grape is used in the manufacture of Idaho wine. Specimens of Carillon and Emperor grapes are also included in the display.

Mr. Schiecher has been engaged in grape culture during the past 21 years and is considered an authority on the subject. He is a correspondent of the Department of Agriculture and receives samples, for experimental purposes, of grapes shipped to the department from all parts of the world. Grapes grown by Mr. Schiecher won 18 prizes among 300 competitors at the St. Louis Exposition. Prizes have also been awarded his exhibits at all other National exhibitions.

Recently the Lewiston Commercial Club and prominent fruitgrowers in that vicinity engaged Professor Twilight, head of the Department of Horticulture and Viticulture in the University of California, to visit Lewiston periodically and advise them concerning the care of their orchards. Professor Twilight is a graduate of the University of France and has traveled extensively through the fruit sections of Europe and Northern Africa and is thoroughly qualified to pass upon matters pertaining to the culture of fruit.

WILL PLANT MUCH WHEAT

Klamath Farmers Rejoice Because of Recent Heavy Rains.

KIAMATH FALLS, Or., Oct. 25.—(Special.)—Splendid rains fell the past week on the valley around the Klamath Basin, extending to the Big Butte Valley in California also, being the first moisture of any consequence to fall over the region of Klamath County, Oregon, and Northern Shoshone and Modoc counties, California, since June. Great benefit will be derived from the rain by fall-sown grain, and it has also put the ground in excellent condition for plowing, and will be a continued favorable weather there will be a

ELGIN'S NEW PUBLIC SCHOOL BUILDING.

BRICK AND STONE STRUCTURE RECENTLY ERECTED AT COST OF \$200,000.

PATROL TO GUARD DITCH

WATER TURNED IN MAIN CANAL OF UMATILLA PROJECT.

Plenty Assured for Dry Season and Breaks in Canal Are No Longer Feared.

SHIPPING APPLES TO EAST

Larger Part of Yakima Crop Has Been Contracted For.

NORTH YAKIMA, Wash., Oct. 25.—(Special.)—Despite the fact that the apple crop of the Yakima Valley this year is the largest in its history, there is little likelihood that much of the fruit will remain in storage in North Yakima. With a large part of the crop not yet harvested, fully half has been sold, going to New York, Chicago, Minneapolis and other distributing centers. Several North Yakima applegrowers expect an adequate supply for the Spokane apple show for first growers of apples in the Pacific Northwest. There are trees on the ranch of J. J. and Wallace Wiley in the Ahtanum known to have been planted as early as 1853. J. P. Marks and L. D. Morris planted trees in 1870, while B. E. Lesh owned the first commercial orchard of any size in 1887, some of the trees being planted in 1882.

PRICES ARE HAVING BOOM

No Vacant Houses in Montesano and Newcomers Must Build.

MONTESSANO, Wash., Oct. 25.—(Special.)—The realty market in this section is on the jump. Several small acreage tracts and one or two larger ranches near this city having changed hands in the last few days and all at topnotch prices. In this city property is changing hands rapidly and at prices that were never asked before. People are constantly coming to Montesano, and as there are no vacant houses, these have to buy a place.

Cabbages Yield \$1800 an Acre.

NORTH YAKIMA, Wash., Oct. 25.—(Special.)—Six hundred dollars from a third of an acre of cabbages is the profit reported by Frank Jordan on his ranch near Priest Rapids, 21 miles from North Yakima. This figure is up at the rate of \$1800 an acre, and the land is not under an irrigation project either, but is watered by springs.

Mayor France to Tour Europe.

ABERDEEN, Wash., Oct. 25.—(Special.)—Mayor France, who will finish his term in April next, has decided not to be a candidate again. Mayor France proposes to take an extended trip, which will include Europe, at the close of his official regime.

DEPOT CONTRACTS ARE LET

Work to Begin on Wallowa Structure Within Few Days.

WALLOWA, Or., Oct. 25.—(Special.)—Preparations for the Wallowa depot are being made rapidly. Contracts have been let for three depots in this county. The same contractor will build the Wallowa, Lostine and Joseph depots. The Wallowa depot will be the first one built. Part of the material has been shipped and work will commence within a few days.

Schoolhouse Will Cost \$53,000.

MARSHFIELD, Or., Oct. 25.—(Special.)—The cornerstone of the new High School building at North Bend will be laid October 28. The occasion will be made quite an event. The new North Bend school will cost \$53,000, and will be the finest building in that city.

Ten Cows Sell for \$650.

ECHO, Or., Oct. 25.—(Special.)—T. G. Smith, the pioneer dairyman of this locality, sold 10 head of milk cows to a Hermiton butter-maker for \$650, probably the highest price ever received for such a number of cows in this county.

TO EMPLOY 75 MEN

New Sawmill Will Be Established at Oregon City.

STOCK BEING SUBSCRIBED

John W. Moffett, Experienced Mill Man, Is Promoting Undertaking. Local Market Would Consume Large Part of Output.

OREGON CITY, Or., Oct. 25.—(Special.)

With a capital of \$75,000 in sight, the organization of a lumber company to operate a mill with a capacity of 7,000 feet a day is in progress at Oregon City, with every chance of success. The promotion department is in the hands of John W. Moffett, forty years with the Willamette Pulp & Paper Co., and C. S. Keller, who has been connected with the Booth-Kelly Lumber Company and the Tongue Point Lumber Company and is an experienced lumberman.

It is proposed to take over the plant of the Oregon City Mill & Lumber Company and re-equip it with machinery. A sawmill that is now situated at Alsea, Clackamas County, and owned by W. G. Bohn, now of Portland, but formerly a successful lumberman of Wisconsin. Mr. Bohn has taken stock in the proposed concern to the value of \$20,000, and is willing to assume even more.

To Have Well-Equipped Plant.

The Oregon City Mill & Lumber Company has a plant that is well equipped to turn out a variety of products, with a saw and door factory, dry kilns, etc., but it has been handicapped for the want of a sawmill, being compelled to purchase its lumber in the open market, and thereby entering into competition with planing mills and factories with facilities for handling the raw product. The concern will hold to the North California Lumber Company, or rather trade for stock in the California concern, but the local men have obtained an option to purchase the Oregon City Mill & Lumber Company, and if the new deal goes through, the entire plant will be kept in Oregon City.

This will also mean that at least 75 men will receive employment, and the payroll, instead of disappearing entirely, will be increased from \$2000 to about \$6000 monthly. Even the employees of the Oregon City Mill & Lumber Company have shown their faith in the new project by subscribing for stock to the amount of \$2000, and the present stockholders of the company have taken about \$4000.

With a capital stock of \$75,000 the new company will have \$25,000 for working capital. The stock is divided into 750 shares, and the Crown-Columbia Pulp & Paper Company, which owns the site of the mill, has tacitly agreed to issue the lease five years, giving it 13 years to run.

Logging Problem Easy One.

Mr. Moffett, who has gone into the whole matter very carefully, and who is known to be a practical man, says that the logging features present no difficulties. The timber of the Upper Willamette will supply all the logs necessary for years to come. The paper mills at Oregon City pay 25 cents per 1000 for the average of logs and procure enough during the high water of May, June and July to last for the rest of the year, and the new lumber company could follow this plan. There are immense bodies of timber in Clackamas County that are practically untouched and a logging railroad is one of the possibilities in connection with the project, running out of Oregon City and taking an easy grade up the Abernethy. This is the route of the proposed Oregon City, Beaver Creek & Molalla Railroad.

BOND ISSUE UP TO VOTERS

Question of City Ownership to Be Decided at Grants Pass.

GRANTS PASS, Or., Oct. 25.—(Special.)—This city will for the first time exercise the referendum in amending its present charter. By ordinance No. 328, the voters will be called upon to amend section 123 of the city charter, which provides for municipal ownership of city water works. The present proposition, if the amendment is adopted, is that the Council to issue bonds to the sum of \$54,000 for the Rogue River water plant.

Many voters are in favor of the amendment, but there is a feeling that the present plan is not worth that amount of money, and believe that the sum to be raised should be used for a new city plant. Quite an interest is being manifested in the amendment, and much literature is being distributed upon the streets in the shape of dodgers that point out arguments pro and con in the situation. A special election to decide the matter has been called for October 27.

NEW LIBRARY ASSURED

Hogium Council Makes Appropriation for Site.

HOQUIAM, Wash., Oct. 25.—(Special.)—That Hogium will soon have a fine Carnegie Library is an established fact. The City Council has just purchased a site on the corner of Seventh and K streets, centrally located, for \$5000. It has also appropriated \$2000 annually for maintenance. Mr. Carnegie will furnish \$25,000 for the project and work will be rushed.

Painting Grants Pass Factories.

GRANTS PASS, Or., Oct. 25.—(Special.)—The large warehouses of this place, which occupy prominent positions near the depot and in the railroad yards will be decidedly improved by the use of paint and whitewash. This movement has been brought about by the city improvement workers, who have urged upon the owners of the buildings the necessity of such improvement. When this work has been completed, the railroad yards and abutting buildings will have a neat appearance from both local and traveler's view. The initiatory step in carrying out these plans has been taken by the Grants Pass Fruit Exchange, which is now putting two coats of paint over its packing-house.

Dr. S. Abbott, Pioneer, Dies.

MARSHFIELD, Or., Oct. 25.—(Special.)—Dr. S. Abbott, one of the old veterinary surgeons of this part of the state, and a pioneer of Oregon, died at his home in Myrtle Point today.

WAKE UP, OREGONIANS

Other Sections Are Stealing the Benefits of Your Free Publicity.

A striking example of how a great state like Oregon is worsted in the race for colonists is afforded in the current edition of The Fruit Grower, the great Fruit Paper, published in St. Joseph, Mo.

James M. Irvine, the founder and editor of The Fruit Grower, is an exceedingly modest man.

He has been through the fruit districts of the Northwest several times in the last ten years and has been so quiet about it that few people, aside from fruit men, have realized that our country's most influential writer on fruit culture was in our midst.

Mr. Irvine made one of these quiet trips this fall. He spent time in Colorado, Wyoming, Utah, Idaho, Washington and Oregon.

As he traveled, he observed and made notes, and when he got back to his editorial sanctum he wrote a long article—an article which with its profuse photo-illustrations occupied 36 columns in the current issue of his publication—more than all the rest of the reading matter combined. The article deals most appreciatively with fruit culture in the Northwest, and especially with the opportunities for the eastern farmer to come here and raise fruit.

Now here is the point of what I am writing: Some advertisers, interested in colonization and sale of fruit lands, were wise enough to take advertising space in this issue. Mr. Irvine's trip, in advance, and realized what a splendid advertising opportunity was afforded by the edition in which his great article would appear.

In all these advertisers used 18 columns of advertising space—to appropriate to themselves a large part of the benefit of 36 columns of reading matter.

Now, what percentage, do you suppose, what percentage of that 36 columns of reading matter was about Oregon? There was 46 per cent—nearly half.

What percentage of the advertising space was used for Oregon?—Only 2 1/2 per cent—a thirtieth.

Mr. Irvine's neighbors to the Northwest—in the Spokane country—what did they do?

Having the benefit of only 15 per cent of the reading matter, they used 59 per cent of the advertising space—thereby procuring for themselves over half the benefit of Mr. Irvine's editorial work—a half that should have been retained by Oregon, especially as Mr. Irvine in his article devoted nearly half his space to Oregon.

FREE PUBLICITY

Oregon 26 cols, 46 per cent
Spokane Country 10 cols, 18 per cent
Other Sections 19 cols, 32 per cent

PAID ADVERTISEMENTS

Spokane 4 cols, 8 1/2 per cent
Oregon Country 5 1/2 cols, 9 1/2 per cent
Other Sections 8 cols, 17 1/2 per cent

Some folks—and smart folks, too—may think this is greatly to Oregon's advantage—to merit and procure nearly half this splendid free publicity, while paying for only a thirtieth of the facts are, that while Oregon deserves and obtains tremendous free publicity, especially through Tom Richardson's work—the facts are that it is the paid advertising which actually draws the inquires from home-seekers themselves. That is why those sections, like California, Arizona, Texas, Oklahoma, Wyoming, the Spokane Country and Alberta, which are paying for advertising, are the Fall getting the most of the inquires and most of the colonists.

Oregon's experience with the irrigation fund over again—that's what it is. Oregon contributes more to the irrigation fund than any other state, and most of the money goes to develop other states. Oregon deserves more free publicity than any other state, on her merits, and gets fewer colonists. Why?

The reason for Oregon's being distanced in both cases is alike. Oregon is not kept definitely before the people by persistent paid advertising as are the other states. The other states are shrewd, smart advertisers, and they get the benefit of publicity, irrigation funds, river and harbor appropriations and a good many other things that on merit ought to come to Oregon.

Now then, Messrs. Oregonians, I tipped Mr. Irvine's article off to your leading publicity men and land companies three months ago, and followed the information up by personal letters and personal solicitation. It was your fault that you did not take advantage of this. I asked you for your ads—and got a few, lamentably few. There was so few they barely paid the postage on the first announcement, to say nothing of the postage on the personal letters I sent out. So you are now paying through failing to take advantage of your opportunity. Other competing states will get the benefit of the publicity so splendidly earned by your great development work.

It's high time—right now—that you get busy and appropriate for yourselves some of these benefits being scattered so thickly by these great fruit papers, farm papers and magazines. Advertise, from now on, regularly, in The Fruit Grower and other papers of

equal high standing—papers that are all the time pulling results on colonization advertising—actual inquires and real colonists. Get into these papers with your advertisements, and stay in them. Write me for a list, with advertising rates.

This office is equipped right up to date with rate, information, sample copies, etc., of over 25,000 publications, and I know from experience which are the ones which pull the inquires from the home-seekers. Write today for this select list—it costs you nothing.

Yours for greater Oregon,
