**PASTOR DENIES CHARGE**

G. C. CLARK SAYS HE IS NOT G. C. SUMMERS.

**PEACHES SURE CROP IN LANE**

There is no section of the country where peaches are so well adapted as in Lane county. The fruit districts there are satisfied if they get a peach crop once in several years. Here full peach crops are the rule, with an average of 200 bushels per acre on the best lands. Peach orchardists have told me they have known a failure only once in over 20 years.

**COURT AND SCHOOLS STOP WORK**

So great was the interest in the demonstration train at Eugene today that Judge T. T. Harris dismissed the Circuit Court that the farmers in attendance might hear the lectures and view the exhibits.

**WHAT "EDUCATED" KALE WILL DO**

Kale that has been given a college education is carried on board the train to give the farmers of Lane county a better idea of the value of this plant. Kale that has been through college is better than plants of the same species that have not had the advantage of an education. One plant will grow tall, with many leaves, and will attain a weight of 60 pounds, while the other remains down near the ground and weighs less than one-third as much as its more cultured cousin.

**SELECT ONLY BEST PLANTS**

The farmer should make his best plants and save the seed from them. The seed from two plants will be sufficient to seed six acres, which will yield enough to give six cows their green feed throughout the year. This is the most important part of the result, about 40 pounds of green feed and 20 pounds of dry being the normal daily ration for a dairy cow. Kale should be planted in March,

transplanted in June, and by October it will be practically matured. However, frosts do not affect it and it will thrive all winter, giving green feed for the six winter months of the year.

**SCUDDER'S CHART INTERESTS**

Professor Scudder has a chart that attracts a little attention from the farmers and dairymen. Showing how to grow kale will yield 24 tons of feed. This, with rye or oats and vetch, clover and corn, which are called peeling crops, will yield 347 tons of continuous green feed for dairy herds the year around. By using these crops for dairy herds, 50 cows can be kept on 25 acres of Williamson Valley land.

**IF IDENTIFY IS PROVEN, GARDINER PREACHER MUST GO TO TEXAS TO STAND TRIAL**

**SALEM, Or., Nov. 9.—(Special.)**—Whether it is either a remarkable case of mistaken identity or a rank instance of hypocrisy was called to the attention of Governor Chamberlain today, when Rev. George C. Clark, of Gardiner, Douglas county, appealed to the Governor for protection against extradition. Clark has been arrested upon the theory that he is Rev. George C. Summers, who is wanted at Throckmorton, Tex., to answer a charge of embezzlement. Though the circumstances point almost conclusively to the identity of Clark and Summers, yet Mr. Clark has a letter from Rev. T. B. Ford in which the latter declares that he knows both men and that they are one and the same.

AT HIS URGENT REQUEST HE WAS BROUGHT TO SALEM TODAY BY THE SHERIFF OF DOUGLAS COUNTY IN ORDER THAT HE MIGHT TELL HIS STORY AND PROTEST AGAINST THE GRANTING OF EXTRADITION. A NUMBER OF METHODIST MINISTERS CALLED UPON THE GOVERNOR TODAY, BUT AS THEY KNOW NOTHING ABOUT THE FACTS IN THE CASE, THEY MERELY ASKED THAT THE GOVERNOR MAKE A THOROUGH INVESTIGATION BEFORE GRANTING EXTRADITION, SO THAT NO INJUSTICE SHALL BE DONE.**
