

California Would Buy Here but for High Freight.

TRADE NOW IMPOSSIBLE

Advance in South Will Permit of Movement Unless This Market Also Rises—Statistical Position of Market.

There is some California inquiry for hay, but with the freight rate of about \$8.55 per ton it is impossible to do business with that market.

The hay market rules about steady, with a good undertone. There is plenty of hay left in the country, but not much of it is in fact hands.

Advices from the country appear to confirm the prevailing opinion that the demand for hay is not so strong as it was in the early part of the season.

Conditions in the winter of last year were not so favorable as they are now, and we have every reason to believe that the winter of this year will be a good one.

Against this we have on hand a large supply of hay, and the market is not so strong as it was in the early part of the season.

Reports from the interior are discouraging. Los Angeles hay dealers are not so strong as they were in the early part of the season.

EGGSS OF CALIFORNIA Not Much Animation in Stock Speculation.

PRICE COURSE UNCERTAIN

Hazlitts Are the Principal Features of Strength, Union Pacific Touching the Highest Point of the Year.

NEW YORK, Nov. 17.—The character of today's stock market was much the same as that of yesterday.

The decreased animation of the speculation was attributed to a general way to the stock market, and to the extensive rise already achieved, which has reduced the rate of the income yield on everything tradable in the market.

There was a movement of general influence in the Hazlitts and Hill groups, Union Pacific, as usual, absorbed a large proportion of the day's total dealings.
