STEAMBOAT MEN MAKE COMPLAINT

Poor Signal Lights on Bridges Again Brought to Attention of Federal Officers.

NOT UP TO REGULATIONS

Law Specifies That Signal Lights on Drawbridges Must Be Visible at a Distance of Five Miles on a Clear Night.

Masters and pilots of vessels operating in and out of Portland have filed complaints with the Inspector of the Thirteenth Lighthouse District about the condition of the lights on bridges crossing the Willamette River. The signals on the several draws and protection piers are not up to the requirements of the law, the masters declare. The Inspectors' office will take the matter up immediately.

The principal objection is made to the lights on the Burnside bridge. Pilots assert that it is impossible to see the lights on the protection pier for a greater distance than 300 yards. The matter was first brought to the attention of the Federal authorities about two years ago. Multnomah County officials were notified to place suitable lights on the several draws. This was done only in a half-hearted style. The matter dragged along for a year and then they were sent copies of the law. It is incumbent on the court to see that lights are placed on the bridges which are visible on a clear night for a distance of five miles. Conditions have not improved.

"Any steamer or steamship which may be damaged by collision with one of the bridges," said a steamboat man yesterday, "can recover damages and Multnomah County will be out the amount of any damage done to the bridge in consequence. The lights are the worst I ever saw."

STEAMER TO BE LAUNCHED

Inland Empire Will Slide From the Ways Saturday.

Arrangements have been completed for the launching of the new steamer Inland Empire at Celilo Saturday morning. The vessel is one of the fleet of the Open River Transportation Company and has been built for service between Celilo and points on the Upper Columbia and Snake Rivers. President J. N. Teal, Superintendent Dorsey Smith and other officials and guests from Portland will be present.

The Inland Empire will be one of the finest craft on the upper river. She has plenty of power and is equipped with all modern appliances. She is 150 feet long by 36 feet beam. It is the intention to have her in active service by the first of December.

SLOOP CONDOR LEAVES DOWN

Gasoline Craft Carries Quantity of Freight for Tillamook.

The gasoline sloop Condor sailed for Tillamook, Yaquina and Alsea Bay last evening. In addition to a full cargo in the hold, the Condor carried a ten-ton boiler on deck. The offerings for the Condor were much greater than her capacity and a large quantity had to be refused.

The Condor is now making regular calls at Tillamook on both the north and south-bound trips. Offerings for that place have increased greatly and full loads could be secured for her if she discontinued the southern ports. For years the people of Tillamook Bay have been at the mercy of a single boat and the advent of the Condor was hailed with delight.

NANTES ON EN ROUTE LIST

French Bark Sails From Hobart for the Columbia River.

Merchants' Exchange advices received yesterday from Hobart Tasmania announced the sailing from the island port, for the Columbia River, of the French bark Nantes. The craft is in ballast and as far as is known here has no charter for outward cargo.

The French bark Gael, which is loading lumber at St. John, has been delayed on account of the inability of the mills to supply the requisite grade of timbers. Lay days have expired and daily claims are being made for demurrage. This is the first demurrage case for the port the present season.

Shipping News of Tacoma.

TACOMA, Wash., Nov. 18.—A message from President Alexander, of the Alaska Pacific, this afternoon, gives the name of the new steamer purchased for the Puget Sound-San Francisco service as the Admiral Sampson, a twin screw vessel of 1336 net tons.

The steamer Yosemite arrived in port today from California to load ties and other lumber for San Francisco.

The British bark Lord Templeton has returned from Mukilteo and is loading lumber for Australia.

The British ship Latimer completed her grain cargo today and will leave the latter part of the week for the United Kingdom.

The steamer President, of the Pacific Coast Company's line, is in port today, loading general freight.

Admiral Borressen Due Today.

The Norwegian steamship Admiral Borressen, sailed from Victoria yesterday for the Columbia River. She is due at Astoria this morning. On arrival at Portland the vessel will go on the drydock for cleaning and painting. She is under charter to carry lumber to Shanghai.

Steamship Alesia to Clear Today.

The Portland & Asiatic line steamship Alesia will leave down tomorrow morning for Vladivostok, Siberia. She carries a cargo consisting of 50,000 barrels of flour, 400 cases and 200 tierces of lard compound, 200 boxes of apples and 111 packages of miscellaneous plunder. The Alesia would have been ready for sea today but minor repairs to her machinery detained her for 24 hours.

Marine Notes.

The steamship Roanoke will sail this evening for San Pedro and way ports.

The steamship Eureka sailed yesterday afternoon for Eureka and Coos Bay ports.

The oil tank steamship W. S. Porter, Captain McDonald, arrived up at Linnton last night.

The steamship Breakwater sailed for Coos Bay last night with 105 passengers and 250 tons of freight.

The steamship Alliance has been barbound in Coos Bay and will not reach Portland until early Friday morning. She will sail as usual Saturday night.

Arrivals and Departures.

PORTLAND, Nov. 18.—Arrived—Steamship W. S. Porter, from San Francisco. Sailed—Gasoline sloop Condor, for Yaquina and way ports; steamship Breakwater, for Coos Bay; steamship Eureka, for Eureka and way ports.

Astoria, Nov. 18.—Condition of the bar at 5 P. M., rough; wind, southeast 26 miles; weather, cloudy. Arrived down during the night—Steamers Nome City, Roma and Shoshone. Arrived at 8 A. M. and left up at 9 A. M.—Steamer W. S. Porter, from San Francisco. Sailed at 8:50 A. M.—Steamer Nome City, for San Francisco. Sailed at 8:30 A. M.—Barge No. 91, for San Francisco. Arrived down at 9 A. M.—Schooner W. H. Talbot. Outside 2 miles northwest a four-masted German bark in ballast.

San Francisco, November 18.—Arrived at 8 A. M.—Steamers F. S. Loop and Northland, from Portland.

Kuhului, Nov. 18.—Sailed November 14, French ship Leannec, for Puget Sound.

Hobart, Nov. 18.—Sailed November 12, French bark Nantes, for Portland.

Victoria, B. C., Nov. 18.—Sailed—British steamer Admiral Boerresen, for Portland.

San Pedro, Nov. 18.—Arrived—Steamer Geo. W. Elder, from Portland and way ports.

San Francisco, Nov. 18.—Arrived—Steamer F. S. Loop, from Columbia River; steamer Northland, from Columbia River; steamer Buckman, from Seattle; steamer Coaster, from Grays Harbor. Sailed—Schooner Roy Somers, for Grays Harbor; steamer Catania, for Seattle; steamer Talac, for Seattle; steamer Hoquiam for Grays Harbor; steamer Calistrano, for Coos Bay; steamer Santa Barbara, for Grays Harbor; steamer M. F. Plant, for Coos Bay; steamer Homer, for Astoria; steamer Jim Butler for Grays Harbor.

Suva, Nov. 15.—Sailed—Indravelli, for Vancouver.

Yokohama, Nov. 18.—Arrived previously—Kaga Maru, from Seattle for Hongkong; Ningchow, from Tacoma, for Liverpool; Winnebago, from San Francisco.

Hongkong, Nov. 18.—Arrived previously—Siberia, from San Francisco via Honolulu, Yokohama, etc.; Tuscarora, from San Francisco; Iyo Maru, from Seattle, via Yokohama.

SHOW FRUIT IN NEW YORK

OREGON APPLES WILL BE DISPLAYED ON BUSIEST CORNER.

Twenty Boxes to Be Sent by Commercial Club to Some European Rulers to Form Exhibit.

Oregon apples, fit for kings, will be shown about Christmas time in a New York store window in a way that will attract widespread attention. Twenty boxes of the best fruit the state produces will be presented by the Portland Commercial Club to King Edward VII and Emperor Wilhelm of Germany. Before being shipped to the titled recipients the fruit will be exhibited in the window of Macy's, New York, one of the biggest department stores in the world.

This advertisement of Oregon apples probably will be the most striking the fruit has ever received. The 20 boxes of apples will be on display in Macy's window for 10 days. They will be admired by literally millions of people, for undoubtedly more people pass this store, prominently located on Sixth avenue, in any given time than any other corner in America, if not in the whole world.

The 20 boxes of apples will be bought by the Commercial Club from the showing to be made here early in December by the state horticultural associations. The use of the window in the New York store was secured by Julius Meier, of this city.

The first week in December will be notable for the gathering of fruitgrowers in Portland. The Oregon State Horticultural Society and the Northwest Fruitgrowers' Association will hold a joint meeting December 1 to 4. The Oregon association will meet December 1 at the Woodmen Hall, Eleventh and Alder streets. One floor of the building will be used for the convention and another for an apple display. The joint sessions of the two organizations will occupy the remaining three days. There will be a night session at the Commercial Club Tuesday, December 2, and on Thursday night, December 4, a reception will be given the fruit men in the green parlor of the Commercial Club from 8 to 11 o'clock. Luncheon will be served to the guests.

From the apples exhibited at the joint convention the best 20 boxes will be selected. The committee to do this is composed of W. K. Newell, president of the State Board of Horticulture; E. L. Smith, president of the Northwest Fruitgrowers' Association, and H. C. Atwell, president of the Oregon State Horticultural Society. The 20 boxes will be sent on to New York for display about Christmas time, and after being on view for ten days will be forwarded to the two European monarchs who have been selected by the Commercial Club to receive them.

Officer Fails in Mission.

ABERDEEN, Wash., Nov. 18.—(Special.)—Deputy Sheriff George Dean, who went to Chicago with a requisition and warrant for the arrest and return of Mrs. Mildred Russell Tonneson, on a charge of perjury arising out of the Louis Fogel case, has failed in his mission and is on his way back to Aberdeen. Governor Deneen, of Illinois, has refused to recognize the requisition papers issued by Governor Mead because the Chicago court had granted a writ of habeas corpus applied for by Mrs. Tonneson, and the Illinois executive decided not to interfere in the case.

EXPANSION PLANS PUT INTO SHAPE

Gathering of Educators at Whitman Concludes Its Work and Adjourns.

BANQUET MARKS CLOSE.

New Constitution Is Ratified by Board of Overseers in Executive Session—Important Topics Are Discussed.

WALLA WALLA, Wash., Nov. 18.—(Special.)—A banquet in honor of Dr. D. K. Pearsons, of Chicago, at which more than 500 plates were laid in the Whitman College gymnasium at 6 o'clock tonight, ended the greatest and most notable gathering of educators ever held in Walla Walla or the Northwest. The sessions have lasted two days, and have been devoted to the discussion of ways and means and proposed plans to enlarge the present Whitman College to an institution which will be the "great private Christian College of the Northwest."

There have been in attendance at the congress noted visitors from the East and all parts of the Northwest, including such men as Dean Alfred E. Burton, of the Boston Institute of Technology; Dr. Anson Phelps Stokes, Jr., secretary of Yale University; President Cyrus Northrup, of the University of Minnesota; Judge Thomas Burke, of Seattle; Judge C. H. Hanford, also of Seattle, and other prominent business, professional and educational men.

Constitution Is Ratified.

Besides the public meetings which have been held in the Whitman College chapel, there have been secret meetings of the board of overseers. At these meetings the plans in detail for the enlargement of the college have been discussed and official action taken. The most notable act of the board of overseers was the signing and ratifying of the new constitution and by-laws, done at the first sessions held Tuesday morning.

Following this action, there have been discussions on questions relating to the government, character of branches taught, number of students to be instructed, cost of buildings, equipment, maintenance and other necessary expenses which are attached to the operation of a great educational institution such as the greater Whitman is proposed to be. The public meetings throughout have been well attended, showing the deep interest the people of Walla Walla take in the establishment if the greater Whitman. In connection with the programme of speeches, the Whitman College chapel choir has furnished music for the entertainment of those present. The sessions this morning were opened by chapel services conducted by the Rev. William Proctor, of Ritzville, an alumnus of the college. Following this, the choir rendered a beautiful vocal selection led by A. C. Jackson, head of the Conservatory of Music, of Whitman.

Need of Forestry Education.

Judge Thomas Burke, of Seattle, chairman of the congress, introduced E. A. Allen, head of the Forestry Department on the North Pacific Coast, who spoke on "Forestry Education, Is it Needed?" In part, Mr. Allen said:

"There can be no doubt of the great need of forestry education. The fact is so apparent that I will not take your time, ladies and gentlemen, to dwell upon this question, at length.

"There is a time coming, not far distant, either, when the consumer of wood and water will be asking, not how much must I pay for this commodity, but can I get it at any price? With our ever increasing demand for these two foundations of commercial and industrial activities, and a corresponding decrease in the supply of the same, we are fast approaching a condition which will take no little ingenuity to cope with. We thus see the great need of conserving every bit of our natural resources in this line. Our great lumber industries need some one who can carry through the best means of saving the forests and water supply of the country. We have the record here in the Northwest for waste of forests by fire. We should study some means of successfully coping with this condition.

"We can now see that there is a great need for such a school. Walla Walla is the proper place to locate such an institution. One glance at the surrounding country proves that it is, and another shows that there are also disadvantages to be overcome. Whitman is not in close proximity to any of the forests of the country, from which to make experiments, and yet, it is surrounded at a small distance, it is true, with practically every variety of timber growing in the great forests of the Northwest.

"If Whitman establishes a school of forestry, with the proper equipment and instructors, there can be no doubt of its success."

At 2:30 o'clock this afternoon, Dr. Anson Phelps Stokes, Jr., secretary of the corporation of Yale University, spoke on "The Importance of Having a Private Christian Institution Sufficiently Endowed That it May Influence in Some Measure the Educational Policy of the Territory in Which It Is Located."

Fifty Cents a Month

A small bottle of *Scott's Emulsion* costing fifty cents will last a baby a month—a few drops in its bottle each time it is fed. That's a small outlay for so large a return of health and comfort. Babies that are given

Scott's Emulsion

quickly respond to its helpful action. It seems to contain just the elements of nourishment a baby needs most.

Ordinary food frequently lacks this nourishment; *Scott's Emulsion* always supplies it.

Send this advertisement, together with name of paper in which it appears, your address and four cents to cover postage, and we will send you a "Complete Handy Atlas of the World"

SCOTT & BOWNE, 409 Pearl Street, New York

Bald?

WILL FIGHT GRANT

Rushlight and Baker Oppose Garbage Franchise.

MAYOR ALSO AGAINST IT

Councilmen Agree to Work for Sufficient Tax Levy to Provide for New Crematory Within the Next Year.

That no contract for the collection of garbage in Portland on the basis of a 25-year exclusive franchise will be let by the City Council seems certain at this time. Councilman Rushlight, president of the Council, and Councilman Baker, one of the most influential members of the majority faction, have entered into an agreement to work for a tax levy for 1909 which will yield sufficient revenue to provide for the building of one or two modern incinerators to take care of the city's refuse. The combined influence of the two officials seems sufficient to defeat the attempt of the Sanitary Garbage Destruction Company to secure an exclusive long-term grant.

"I will never vote for an exclusive franchise for caring for the garbage, no matter who wants it," declared Mr. Rushlight yesterday. "I think the city can care for it in a more satisfactory manner, and I am going to work for a tax levy that will provide for what is so badly needed in this respect the coming year."

Mr. Baker is strongly opposed to the proposed 25-year exclusive franchise sought by the Sanitary Garbage Destruction Company, and will throw the weight of his influence against it. He will work with Mr. Rushlight for a tax levy to cover the construction of one or two modern incinerators instead.

"San Francisco just paid $400,000 to get rid of a contractor," said Mayor Lane yesterday. "The contractor had one of those long-term franchises to handle garbage, and instead of caring for it in a manner to best serve the city, did what he considered the best way to make the most money for himself, and the city finally got tired of it and paid him the enormous sum to get rid of him."

From this statement, it is perfectly clear that Mayor Lane is strongly opposed to the 25-year franchise sought by the Sanitary Garbage Destruction Company, and that it would have his disapproval seems certain. The sentiment in official circles is strongly opposed to such a proposition as contemplated, and it is regarded as a certainty that the Council will not carry the matter any further than opening and considering bids, which were asked for at the request of the committee on health and police.

Signboard Will Show New Building.

Comment was caused for the last two days by the erection of a frame structure on the Pennoyer block. Passersby were somewhat at a loss to account for the "improvement," believing that the trustee company was about to begin building operations, and had a shed put up to protect material for the Olds, Wortman & King building, that is to rise on the site. An explanation was made yesterday that the wooden structure is simply a signboard on which is to be painted a reproduction of the new building from the architect's drawings, to remain in place until February, when excavation will begin for the new building.

S.S.S. DRIVES OUT RHEUMATISM

Rheumatism is in reality an internal inflammation—a diseased condition of the blood cells which supply the nourishment and strength necessary to sustain our bodies. Uric acid, an irritating, inflammatory accumulation, gets into the circulation because of physical irregularities, and then instead of nourishing and invigorating the body, the blood irritates and inflames the different nerves, tissues, muscles and joints, because of its impure acrid condition. The pains and aches and other disagreeable and dangerous symptoms of Rheumatism can never be permanently cured until every particle of the cause is driven from the blood. S. S. S. does this because it is a perfect blood purifier. It goes down to the very bottom of the trouble, purifies and cleanses the circulation, invigorates the blood, and completely drives Rheumatism from the system. Plasters, liniments, soothing lotions, etc., may be used for the temporary relief and comfort they bring, but a cure cannot be effected until S. S. S. has removed the cause. It frees the blood of every impurity and makes it a rich, health sustaining fluid, to bring permanent relief and comfort to those who suffer with Rheumatism. Book on Rheumatism and any medical advice free to all who write.

THE SWIFT SPECIFIC CO., ATLANTA, GA.

BLOOD POISON

The origin of "specific" blood poison is not known. Numerous writers have attempted to prove its identity with various countries and have tried to fix its appearance upon the stage of history all the way from 2000 years before Christ up to the time of Columbus without results. It was, however, unknown in Europe until about the year 1495, when it broke out in the City of Naples with great virulence. But the story of its origin matters little, for it is now universally prevalent. The hydra-headed monster is encountered in palaces, mansions of the wealthy, in the home of the merchant, the mechanic and the hovel of the slave. It respects neither rich, poor, old, young, guilty nor innocent, for it may be either

CONTRACTED or HEREDITARY

After the system is once tainted with the disease it may show in the form of scrofula, eczema, rheumatic pains, stiff or swollen joints, eruptions, or copper-colored spots on the face or body, little ulcers on the mouth or on the tongue, sore throat, swollen tonsils, falling out of the hair or eyebrows, or a leprous-like decay of the flesh and bones. It is a variable disease and rarely affects two cases alike, even though they both be infected from identically the same source at the same time. I have spent many years in careful study of this dreadful malady, and there is nothing on which I can talk with a more positive knowledge than **BLOOD POISON.**

If you have any of the above symptoms, or reason to believe that you are in any way affected along this line come to my office and

Let Us Talk It Over

I will give you a free, searching examination and tell you the facts without placing you under the slightest obligation to take treatment unless you so desire. If you are a young man, remember that a young man's neglect is an old man's regret. If you are an old man, get the "today habit"—it is better than ten tomorrows.

A mote in the gunner's eye is as bad as a spike in the gun. The cankerworm of delay causes half your troubles in this life.

Our entire time and practice are devoted to the cure of **BLOOD POISON, VARICOCELE, STRICTURE, LOST VITALITY, HYDROCELE, PILES, FISTULA, DISEASES OF THE KIDNEYS, BLADDER, PROSTATE GLAND, CONTRACTED DISORDERS, WEAKNESS AND ALL DISEASES COMMON TO MEN.** Our fee in uncomplicated cases is

$10.00 PAY WHEN CURED

If you have made mistakes in the past correct the mistakes. Consultation and advice free. If you cannot call at office, write for self-examination blank—many cases cured at home. Medicines $1.50 to $6.50 per course.

Hours—9 A. M. to 1 P. M. Sundays, 10 A. M. to 12.

WEAK MEN

My Methods CURE 90 Per Cent of the Cases Others Cannot Cure

DR. TAYLOR,
The Leading Specialist.

My cures are lasting because the methods I employ meet even the most minute details of those ailments to which they apply, and are readily modified to meet the requirements of individual cases. Because my treatment is ample, scientific and thorough, my cures are complete and lasting and my patients have no relapses. For the same reason I am usually able to cure in much less time than is commonly required in obtaining but partial results. I treat for real and lasting cures. Every remedy I employ has its part in bringing positive and permanent results. Under my treatment the patient who notes improvement in his condition can feel assured that real benefit and not a temporary drug effect has been obtained, and can continue with confidence that a thorough cure is being accomplished.

My Fee for a Cure Is Only $10 in Any Uncomplicated Ailment

I Will Wait for My Fee Until You Are Cured

The Scientific Treatment of Weakness

Dosing the system with powerful stimulants and tonics in an effort to restore functional vigor can have but one final result: The condition is rendered worse than before. "Weakness" is merely an indication of a low form of inflammation in the prostate gland, and this inflammation is but aggravated by stimulating remedies that excite temporary activity. I employ the only scientific and fully effective treatment for "weakness" which effects a permanent cure by restoring the prostate gland to a sound and healthy state. I obtain complete results in every case I treat. Interesting literature and a beautiful engraved chart free if you will call.

I Cure All Diseases of Men

Those in any trouble, suffering from VARICOCELE, HYDROCELE, or any other disease tending to destroy and disfigure and to render happiness impossible, are urged to call upon me without delay. Those wasting valuable time, dissipating their money and aggravating their ailment by submitting to indirect, ineffectual, unscientific treatment that never did and never can cure, are invited to visit me and investigate my successful system. I positively guarantee results in all curable cases and frankly refuse to accept any other cases, if for any reason it is too late to guarantee a cure.

Examination Free

I offer not only FREE consultation and advice, but of every case that comes to me I will make a careful examination and diagnosis without charge. No ailing man should neglect this opportunity to get expert opinion about his trouble.

If you cannot call, write for Diagnosis and Chart. My offices are open all day from 9 A. M. to 9 P. M., and Sundays from 10 to 1 only.

The DR. TAYLOR Co.

234½ MORRISON STREET, CORNER SECOND, PORTLAND, OREGON.

How the Label Tells the Story

Most all medicines are loaded with poisons. This was a great secret among dope manufacturers until Uncle Sam stepped in and exposed everything. Now, all these compounders of nostrums are forced by law to print their formula on the label. Look for it and see what you have been doping your stomach with. You won't take another dose when you find out.

Poison will not cure anybody of anything. Every dose is a nail in the coffin of life. Every time you swallow a drug containing poison you put a brake upon your heart action and weaken your nerves and vitals.

The famous Dr. Jno. Mason Goode says that drugs have destroyed more lives than war, pestilence and famine combined.

The best doctors are breaking away from the use of drugs. They know that drugs don't help nature and that no cure can be made unless nature is given assistance. What nature wants is strength, nourishment, something that builds vitality. Drugs lower the vitality and cause disease to become chronic.

Electricity is nature's medicine. It is the force that creates vitality. It is the motive power of your body—every vital organ gets its life from this force.

If you are sick or run down restore electricity and you will have restored your health, because all sickness is due to a lack of electric energy.

Electro-Vigor is the only successful appliance for infusing electricity into the body. It pours a gentle, soothing stream of this life into your nerves and vitals while you sleep. It makes its own power and never needs charging. Electro-Vigor is curing people, and I have evidence to prove it.

This Is Free
