

CORPUS SCHOOL WANTS BIG FUND

O. A. C. Will Ask State Legislature for Annual Increase of \$50,000.

BOARD OF REGENTS ACTS

Institution Is Growing So Rapidly That Large Amount Is Also Sought for Erection of Several New Buildings.

On account of the phenomenal growth of the Oregon Agricultural College throughout all the departments, the regents decided at their meeting yesterday that it is absolutely unavoidable that they ask for a considerable increase in the state appropriations for the support of the college. After spending several hours in considering the entire situation, it was decided necessary to ask the Legislature for an increase of \$50,000 a year for maintenance, also to ask \$20,000 for the two years for equipment, \$25,000 for a horticultural building, including greenhouses, \$50,000 for a central agricultural building, \$25,000 for a central heating plant and \$25,000 for an armory and drill hall.

But even these appropriations, they represent, do not provide for all that the institution requires. For example, the institution is in great need of a large building for an auditorium and library. The only place at present the student assemblies is the armory, and this building is said to be not only unsuitable, but is not large enough to accommodate the present attendance; while the reading room of the library has accommodations for not more than 150 readers, which, with an attendance of 1600 students, is entirely inadequate. But, on account of the absolute necessity of getting additional room for class and laboratory work in the different departments, it was felt that, badly as an auditorium and library are needed, it will be necessary to get along for the present without a building for these purposes.

Work in Dry Farming.

The Board of Regents also has approved the plan for experimental work in irrigation and dry farming. On account of the co-operative assistance of the Federal Government in this work, the expense to the state will be comparatively small, while the results will be far-reaching in their effect upon the development of the agricultural interests of the state. The plan contemplates the establishment of a demonstration farm and experiment station for irrigation work at Hermiston, in Umatilla County, for the maintenance of which the United States Department of Agriculture will furnish \$2000 a year on condition that the state will provide an additional \$2000. The land, buildings and initial equipment for this work will be provided without expense to the state.

For the experimental work in dry farming, the Federal Government will appropriate more than half the cost of maintenance, as the result of application made by the college, therefore, leaving the most to the state only about \$2000 or \$2500 a year for the experimental work. If the state Legislature establishes this station, a careful investigation, including soil survey and other important work, will be made in order to determine the best possible location for the station. The conditions will be typical of the largest possible territory. This station will be located in one of the counties in Eastern Oregon. It is estimated that the value of the station at these two branch experiment stations, while costing the state comparatively little, because of the assistance received from the Federal Government, will amount to many hundreds of thousands of dollars a year.

"Notwithstanding the cost of maintaining the Oregon Agricultural College," says President Kerr, "every dollar expended for it by the state is returned many-fold in the great work it is accomplishing in promoting the development of the varied resources and industries of the state."

The Board of Regents met yesterday at the Cornelius Hotel to receive the report of President Kerr and consider the requirements of the institution for the next two years. The report contains a full account of the conditions of the institution and shows a remarkable growth during the last two years. The following is a summary:

The attendance last year was 1156, being an increase of 222 over the preceding year. The enrollment at present is between 1200 and 1300, and, including students who will enter next week, the six and eight-week courses in agriculture, domestic science and art, and mechanic arts, the registration for this year will reach between 1400 and 1500. The attendance represents all the counties in Oregon, 20 different states, and two foreign countries. Notwithstanding this increase in the matter of enrollment, the large attendance does not fully indicate the rapidity of the growth of the college. It was shown that the advanced work actually given in the different courses had increased from 25 to 500 per cent. From an investigation that had been made it was shown that of the entire student body, men and women, 91 per cent either wholly or partially earned their own way. All of these work during the summer vacation, and 38 per cent are employed either at the college or in the city during the school year. On this account it is not infrequently true that students have to omit two to three years to accumulate money with which to complete their courses.

Great Increase in Attendance.

A table had been prepared showing the attendance for each of the years from 1900 to 1908 at a number of leading agricultural centers of the country, including those of California, Colorado, Idaho, Iowa, Indiana, Michigan, Montana, New York, and Washington. From this table it is shown that during the period mentioned the increase in attendance at the Oregon Agricultural College was nearly double that of any other of the institutions named, except Washington State College.

The increase in the attendance at the Oregon Agricultural College for this period was 165 per cent, and at the Washington State College 173 per cent; but the lead of the Washington over the Oregon institution was gained during the first four years. For the four years 1904 to 1908 the increase in attendance at the Washington State College was 104 per cent, and that of the Oregon Agricultural College was 115 per cent. For the two years 1906-07 and 1907-08, the increase at the Washington State College was 23 per cent, and that at the Oregon Agricultural College was 38 per cent, being nearly double that of any of the other institutions named, and in some cases being from two to five times as great.

Although additional instructors have

been employed during the past two years, it has been impossible for want of money, to increase the faculty in proportion to the increase in attendance. On account of this crowded condition, many members of the faculty have labored under very trying conditions—with unsuitable and insufficient room, excessive hours and large classes. Notwithstanding these difficulties the work has been characterized by hearty co-operation and efficiency.

From statistics that had been gathered it was shown that the salaries paid the professors at the Oregon Agricultural College were much lower than the salaries paid for corresponding work by any of the other land-grant institutions.

The most marked growth of the institution was shown to be along different lines of agriculture. During the past two years the number of professors and instructors doing work in agriculture has been increased from three to ten; but there had been even a greater increase in the agricultural work. In 1904-1907 of the 285 term credits required for graduation from the regular agricultural course, only 49 credits, or 14 per cent, were required in agricultural subjects. During 1907-1908 the number of courses offered in agriculture were increased from 40 to 149, the proportion of the agricultural work in the degree course in agriculture being thereby increased from 14 to 51 per cent. During the present year there are 83 courses offered in agricultural subjects, aggregating 243 semester credits; and, of all the work required for graduation from the agricultural course, approximately 57 per cent may be taken in the different subjects of agriculture. During the two terms ending 1907-1908, the number of students pursuing the degree course in agriculture was 111 per cent; while the actual amount of work given was increased 300 per cent.

School of Domestic Science.

There has also been a great increase in the amount of work given in the school of Domestic Science and Art. Although the number of instructors has been increased from two to five, the amount of work given has been increased more still, the work being extended until now it includes all the different subjects offered by the best land-grant institutions of the country in training for home life.

There has also been a large increase in the work of mechanic arts, including the different subjects of engineering, the total enrollment in these courses this year being nearly 200 per cent greater than two years ago.

There has been a great increase also in the different subjects of science required in the technical courses. For example, in the department of the development of these departments, it was shown that in chemistry the enrollment during 1907-1908, for three terms, was 349; during the present year, for two terms, 480; and for the next two years it is estimated that the number of students in this work will be upward of 1000. In geology at one time during the biennium, it is estimated that there will be more than 600 students.

W. J. VAN SCHUYVER DEAD

PROMINENT BUSINESS MAN IS CALLED SUDDENLY.

Came to Portland Nearly Half-Century Ago and Was Head of House of W. J. Van Schuyver & Co.

William James Van Schuyver, pioneer resident of Portland and one of its most prominent business men, died at his home, 853 Lovejoy street, yesterday morning at 5:30 o'clock, after a short illness. Neuralgia of the heart was the cause of death. Mr. Van Schuyver became ill on Christmas Day.

The Late W. J. Van Schuyver.

and gradually grew worse until last Wednesday, when a decided improvement was noted. It was believed at that time that he would in a short time be able to resume charge of his business. He was head of the wholesale liquor firm of W. J. Van Schuyver & Co.

Mr. Van Schuyver was born in Port Wayne, Ind., in 1834, and came to Portland in July, 1860. Prior to that time he had been employed as clerk and later as bookkeeper for the Secretary of the Treasury during the administration of President Johnson. Soon after his arrival in Portland Mr. Van Schuyver was employed as bookkeeper for W. L. Reed & Co., successors of W. S. Ladd & Co. Later he went to Eastern Oregon for the late R. R. Thompson, Captain Alton, and others in the interest of their steamboat company. Upon his return to Portland Mr. Van Schuyver, with Levi Millard, organized the firm of Van Schuyver & Co. The firm name was afterwards changed to W. J. Van Schuyver & Co., which name it bears today as one of the leading wholesale houses on the Pacific Coast.

Mr. Van Schuyver was married in 1865 to Miss Angel, of San Francisco. He is survived by his wife and three children, as follows: Dr. William Orange Van Schuyver, Mrs. A. E. Mackay and Miss Helen Van Schuyver, all residents of Portland.

Arrangements for the funeral have not yet been completed. The services will, however, be held tomorrow from the family residence.

COAST ARTILLERY FOR MARSHFIELD

War Department Authorizes Formation of Company at Coos Bay Town.

SECOND FOR THIS STATE

Organization to Be Equipped by the Federal Government—Four More Infantry Companies to Be Formed This Year.

In accordance with recommendations submitted recently to the War Department by Adjutant-General W. E. Finzer, of the Oregon National Guard, instructions were received at Guard headquarters yesterday for the organization of a full company of Coast Artillery at Marshfield as early as possible. The Department also asked for a report on the work and present status of other Coast Artillery of the Oregon Guard service.

Upon receiving authorization from the War Department, General Finzer at once took up the plans for the Coos Bay company. He will communicate with Marshfield, requesting that a roster be prepared of the citizens of that place who are willing to enter the service. Plans for an armory were also ordered drawn up, to be forwarded to Marshfield, for it is imposed upon that community to establish a building suitable for armory purposes, there being no such structure there at this time.

Marshfield is the second Coast town to get a coast artillery organization, the first having gone to Astoria. The Marshfield roster must bear not less than 25 names. These men must be furnished everything in the way of equipment by the United States Government. The equipment includes the new service rifle, it being necessary for heavy artillery to be drilled for operations as infantry. An outlay of approximately \$5000 will be required to launch the new organization and the whole bill is footed by Uncle Sam. The following letter from the War Department bearing on the subject was received at headquarters:

To Adjutant-General, Oregon National Guard—Referring to your communication of November 5, 1908, in relation to organization of a company of Coast Artillery at Marshfield, Or., on Coos Bay, I am directed by the Assistant Secretary of War to inform you that the company is authorized to be organized.

Very respectfully,
E. M. WEAVER, Lieutenant Colonel, General Staff Corps, Chief of Division.

In addition to probable new coast artillery companies, at least four companies of infantry are to be organized during 1909, in order to comply with the reorganization order issued by the War Department. The location of these four companies is a matter yet to be settled. Nearly every town of any size in the state is after one. One condition hereafter to be imposed will be the construction of a suitable armory structure. This may be furnished either by the town or by private parties and will be rented by the state for use as an armory. Inasmuch as \$5000 worth of Government equipment goes with every new company, it is of extended interest to intrust this property to the inadequacies of leaky or flimsy buildings.

FOUR DAYS FROM ASTORIA

Schooner William Bowden Damaged by Ice and Survey Ordered.

The schooner William Bowden, Captain Petersen, arrived yesterday morning and docked at the North Pacific Mill. She will leave for the Columbia River in the morning. The William Bowden spent four days coming up the river, and the last 30 miles was a hard drag for the towboat. Ice was encountered and the ship was damaged. The William Bowden was damaged by ice. The Bowden suffered so much from contact with the floating ice that a survey of her hull was ordered. The survey was completed yesterday. The survey showed that the hull was damaged by ice. The survey was completed yesterday. The survey showed that the hull was damaged by ice.

Captain Files Accident Report.

Entered Thursday.

Wm. Bowden, Am. schooner (Petersen), with ballast, from San Francisco.

Alliance, Am. steamship (Parsons), with general cargo from Coos Bay.

January 4, near Elliot's Landing, on the Columbia, has been filed by Captain W. W. McCully, of the steamer, Captain McCully states that Brandon was drunk at the time and declared war on the board from the midship gangway. The steamer was stopped and a boat put over, but the man did not appear again.

San Pedro Shipping Notes.

SAN PEDRO, Cal., Jan. 7.—The steamer

Claremont arrived yesterday from Grays Harbor via San Francisco with lumber. The Northern Pacific Company's steamer Roanoke, cleared for Portland via Eureka and San Francisco, with a large freight and passenger list. The steamer Stanley Dollar arrived this morning, five days from Grays Harbor, with 1,000,000 feet of lumber.

The steamer St. Helena, from Mukilteo via San Francisco, docked this morning with 1,500,000 feet of lumber.

The steamer Willapa has arrived, seven and one-half days from Willapa Harbor, bringing 750,000 feet of lumber for various consignees.

Marine News of Tacoma.

TACOMA, Jan. 7.—The Anchor line steamer Buckman finished taking cargo and left port this afternoon.

The steamer Portland, after coaling and loading freight for Alaska, left at 5:30 o'clock this evening for Seattle.

The German bark Magdalena cleared at the Customs-House this afternoon with 10,213 bushels of wheat, valued at \$13,380. She will leave port in the morning.

The French steamer Corpe is due Sunday to load for the West Coast and Havre.

The American-Hawaiian liner Mexican will arrive in port Saturday to load freight for the Hawaiian Islands.

Seattle Shipping News.

SEATTLE, Wash., Jan. 7.—The tank steamer Colonel E. L. Drake arrived from San Francisco early this morning.

The steamer Jefferson sailed tonight with 24 passengers for Skagway and way ports, and the steamer Yucatan leaves tomorrow morning for Valdez with 80 passengers. Travel to the North is beginning to increase again, many people returning, after spending the holidays here.

The steamer Buckman returned from Tacoma to complete cargo for San Francisco.

Marine Notes.

The steamship F. S. Loop sailed for San Francisco yesterday.

The steamship Yellowstone will be ready to leave down at noon today.

The steamship Senator is due to sail for San Francisco tomorrow morning.

The steamer Mayfair, which is loading at the Inman-Poulsen Mills, will finish today and leave down for Astoria.

Arrivals and Departures.

PORTLAND, Jan. 7.—Arrived—Schooner Wm. Bowden, from San Francisco; British ship Carmanian, from San Francisco. Sailed—Steamship F. S. Loop, for San Francisco; steamship Yosemite, for San Francisco.

Astoria, Jan. 7.—No bar report, cape line down. Arrived—Steamer Argo, from Tillamook, and steamer Breakwater, from Coos Bay, both from the Columbia River, and sailed at 7:30 A. M.—Steamer Homer, for San Francisco, 11 A. M.—Steamer Elmore, for Tillamook.

San Francisco, Jan. 7.—Arrived at 9 A. M.—Steamer Elmore, from Portland. Cleared—Steamer Tallac, for Portland. Sailed—Steamer Portland, for Coos Bay; Steamer Roanoke, from Portland and steamer Rhoskone, from Columbia River. Sailed—Steamer Senator, for Columbia River.

Astoria, Or., Jan. 7.—Conditions of the weather, moderate; wind west, 23 miles; cloudy.

Tides at Astoria Friday.

CHURCH GETS NEW RECTOR

Wallace, Idaho, Pastor Accepts Call to St. John.

The vestry of the St. John Episcopal Church, of Sellwood, has secured Rev. O. W. Taylor, of Wallace, Idaho, as the regular pastor of that church, and he will arrive in Portland to enter on his work February 1. Dr. John J. Sellwood, a member of the vestry, said yesterday of the new rector:

Rev. Mr. Taylor is considered one of the leading Episcopal ministers of Idaho, and a man of ability and attainment. We considered ourselves fortunate in securing him for the St. John Church. The St. John Church has been under the charge of archdeacon D. H. Chambers and Rev. William Powell, and the new rector will be the first regular pastor called since the church assumed the importance of an independent congregation. Recently a parish house was built and completed. A vested choir of 30 voices is now being organized, and the church is equipped to receive the new rector. Besides the new parish house, the property consists of an excellent located lot, located at the corner of Umatilla avenue. It was founded about 15 years ago as a mission church under the auspices of St. David's Church.

FAIR OFFICERS ELECTED

Gresham Association Prepares for Next Fall's Events.

GRESHAM, Or., Jan. 7.—(Special.)—Elijah Coalman, president; Ray Hall, vice-president; A. A. Durnall, secretary; Earl Shattuck, treasurer. These are the new officers of the Gresham Fair Association elected yesterday.

The board of directors of the fair association consists of 11 prominent farmers of Eastern Multnomah and one from Clackamas County. The latter, Mr. Coalman, is the new president. The new board of directors are: H. E. Davis, Miss Clara Webb, H. W. Snashall, C. F. Ruegg, John Sletet, A. F. Miller, E. Coalman.

WOMAN'S NIGHT

No woman's happiness can be complete without children; it is her nature to love and want them as much so as it is to love the beautiful and pure. The critical ordeal through which the expectant mother must pass, however, is so fraught with dread, pain, suffering and danger, that the very thought of it fills her with apprehension and horror. There is no necessity for the reproduction of life to be either painful or dangerous. The use of Mother's Friend so prepares the system for the coming event that it is safely passed without any danger. This great and wonderful remedy is always applied externally, and has carried thousands of women through the trying crisis without suffering.

Send for free book containing information of priceless value to all expectant mothers.

Prominent Churchman and Mason Extols Great Body Builder.

Mr. E. D. Foster, of Elkhart, Ind., Active Methodist 40 Years, Prominent in Temperance and Masonic Circles in Indiana, Who Is 83 Years Old, Expresses His Convictions on the World's Greatest Tonic and Stimulant.

Recently Mr. Foster wrote: "I have felt for some time that I ought to let you know what your medicine has done for me. I have been using Duffy's Pure Malt Whiskey for a year. My son from New York City was visiting me and gave me a bottle of your medicine. It commenced to restore my strength at once. I use it every day now."

"I can do a good day's work in the blacksmith shop at the age of 83 years, and I attribute this to three tablespoonfuls of Duffy's Pure Malt Whiskey a day. I have taken no other medicine. Duffy's Pure Malt Whiskey is a wonderful builder for an old man."

"I have been a member of the Methodist Church for over 40 years and believe in the temperate use of all good things." Men and women in all walks of life testify to the great good derived from the world's great medicine.

Every testimonial is published in good faith and is guaranteed.

Duffy's Pure Malt Whiskey

is an absolutely pure distillation of malted grain, great care being used to have every kernel thoroughly malted, thus destroying the germ and producing a predigested liquid food in the form of a malt essence, which is the most effective tonic stimulant and invigorator known to science; softened by warmth and moisture, its palatability and freedom from injurious substances render it so that it can be retained by the most sensitive stomach. It is invaluable for overworked men, delicate women and sickly children. It strengthens and sustains the system; is a promoter of health and longevity; makes the old young and keeps the young strong.

CAUTION.—When you ask your druggist, grocer or dealer for Duffy's Pure Malt Whiskey be sure you get the genuine. It's the only absolutely pure medicinal malt whiskey and is sold in sealed bottles only; never in bulk. Price \$1.00. Look for the trade-mark, the "Old Chemist," on the label, and make sure the seal over the cork is unbroken. Write Consulting Physician, Duffy Malt Whiskey Co., Rochester, N. Y., for free illustrated medical booklet and free advice.

H. A. Darnall, R. P. Rasmussen, Charles Cleveland, J. M. Short, John W. Townsend, W. A. Proctor, A. Vetsch, Ray Gill.

Preparations for another fair next fall were begun and it is expected that it will be even better and more successful than those of the past two years. A premium list will be issued early in the Spring, with substantial prizes for best displays in every department.

BAKER MAY GET SMELTER

Eastern Capitalists Send Representatives to Inspect Outlook.

BAKER CITY, Or., Jan. 7.—(Special.)—Returning from the Seven Devils country, R. Ruesch and H. Garlisch, both of New York, admitted their surprise at the splendid copper they found on the Oregon side of the Snake River. They came to Baker County as representatives of Eastern capitalists to investigate the copper. They are about to be sold to the new smelter people who are to be erected at Copperfield, or near there on the Snake River. From the statements made by the Easterners, their report to the smelter people will surely be encouraging.

If the smelter is built, it will mean a \$100,000 improvement in the country then being tapped by the new Northwestern Railroad.

RAINBOW TO CHANGE HANDS

Salt Lake Capitalists Taking Valuable Mine at \$700,000.

BAKER CITY, Or., Jan. 7.—(Special.)—It is generally believed here that the Rainbow mine, owned by Portland capitalists, and located in the Mormon Basin, Baker City, is about to be sold to the new smelter people who are to be erected at Copperfield, or near there on the Snake River.

According to the best information obtainable the Salt Lake people are taking over the property at \$700,000. Ten per cent of this amount is to be paid in at once, and the remainder is to be paid in installments, according to the mine production. This is the property that is said to have produced a thousand dollars a day during the greater part of last summer.
