Phases of Industrial Growth in the Pacific Northwest

THE DALLES NEW CITY HALL DONE

Mone of Finest Municipal Buildings in State Occupied by City Officials.

NATIVE MATERIALS USED

Stone, Brick and Fir Enter Into Construction, Costing \$40,000. Structure Supplanted Was of Great Historic Interest.

THE DALLES, Or., Jan. 17. - (Special.)-The city officials have moved into the handsome new City Hall, Third and Court streets, one of the finest municipal buildings in the state.

The main entrance to the building is on the Court-street side. The first or main floor is occupied by the offices of the Water Commission, City Clerk and Marshal. The Police Court room is also on this floor, and the fire-engine room extends along the entire west

On the second floor are the Council chamber, Mayor's office, City Engi-neer's office, Fire Chief's living-room, firemen's reading-room, dormitory and meeting-room. The engine-room takes up the entire south half of the basement. The north half is used as the City Jail. The outside entrance to the basement is on the north side. There are five cells in the jail—four for men are five cells in the jail—four for men the presence and one for women. It is prisoners and one for women. It is built of concrete, filled with scrap steel and has a foundation of solid rock of

Heated by Steam.

Each department of the building has private toilet-rooms, and hot and cold water. Electric lights are used and ne of the best steam-heating and ven tilating plants has been installed. Every department is heated by steam, with the exception of the Jaii and tollet-rooms, which are heated with a system of forced hot air. All the foul air is carried to a large airshift and forced out by a current of air supplied by the engine.

by the engine.

The material used in the construction of this building is the product of
Oregon. The foundation is of native
stone and the woodwork is flat-grain
Oregon fir. The common brick used is
a local product, and the fancy, brick
was shipped from Newberg. The doors
are of flat-grain, veneered Oregon fir,
and the antire first floor is covered and the entire first floor is covered

The estimated cost of the building is \$40,000. C. J. Crandall is the architect, and R. D. Maxon & Co. the builders, both local firms,

Epoch in County's History.

The completion of the new City Hall is an epoch in the history of The Dalles and Wasco County, marking the ad-vancement of this city and the passing from usefulness of a building which is associated with many important events occurring in the days when Wasco County extended from the crest of the Cascade Range on the west to

the Rocky Mountains on the east. Wasco County was organized by the Territorial Legislature January 11, 1854, and was named and well known 11. mother of counties. It was refluced to the eastern boundary of Oregon February 14, 1858, the date of this state's admittance to the Union. W. C. County Clerk, and Charles White, Sheriff, were county officers in

The old City Hall was the County Courthouse until 1885, when the present modern building was erected at Third and Union to meet the increasing deearly sixties it was the only between the Columbia and Mis-

Early Name Wascopum.

Judge Waite was the first Circuit Judge of the Sixth Judicial district, which was changed to the Seventh dis-trict in 1864. Judge Joseph G. Wilsen, father of Fred W. Wilson, the present District Attorney, was the first judge of the Seventh Judicial district. Judge Wilson was elected to Congress from this district, but died in the East be-fore taking the oath of office. Judge L. M. McArthur, father of C. N. Mc-Arthur, prominent politically, was also a judge in the early days of this dis-

In those days The Dalles was known as Wascopum postoffice, and the courthouse was the only large room in the village, where all meetings-from re-ligious to political-were held. Walter C. Wallace erected the building, and J. W. Marcen, still residing in this city, assisted in the work. The greater portion of the lumber came from the Moster district. The population of Wascopum was about 500.

NEW PROJECT NEAR PASCO

Twelve Miles of Ditches to Irrigate Land in Vicinity of Wahluke.

PASCO, Wash., Jan. 17 .- (Special.)-The first irrigation project of importance to of the Columbia River is to be launched by a company of wealthy Spokane men, and before Fall of the present year 15,000-acres across the river from Hanford will be under irrigation.

Wahluke is the name of the new town wariuse is the name of the new town which has been platted, and the company to operate the project is known as the Columbia River Orchards Company. R. W. Wilson is president; A. C. Oison, vice-president, and F. P. McGuire, secretary-treasurer. The irrigation plant will cost about \$55,000. Tifere will be 12 miles of ditches.

Electric Lines to Extend.

ALBANY, Or., Jan. 17.-(Special.)-Albany's electric street railway system will be extended materially this Summer. The operation of the line from the Southern Pacific depot down through the business section of the city has proved so satis-factory that it is reported several addi-tional streets will be covered with tracks during the coming Spring and Summer. According to rumored plans a line will cross the city east and west and a loop line will be constructed out past the rap-idly growing suburbs in the southwestern part of the city. This proposed line will pass a new addition which is being platted by the Albany Land Company, which some of the owners of the street rallway are interested.

TYPICAL KLICKITAT STRAWBERRY FIELD.

ENE ON C. O. BARNES' RANCH. NEAR GOLDENDALE-THIS LAND A FEW YEARS AGO WAS COVERED WITH SCRUB OAKS.

SOUTH SANTIAM WILL TURN PA-PER MILLS' WHEELS.

Will Supplant Engines Now in Use and Amount of Power Will Be Largely Increased.

ALBANY, Or., Jan. 17 .- (Special.) -A big power plant is to be erected at Water-loo, on the South Santiam River, six miles southeast of Lebanon, to furnish power for the Lebanon paper mills. There has been a rumor for four or five months that the Lebanon Paper Company conthat the Lesanon Paper Company con-templated this step and it was confirmed yesterday when J. B. Lewthwaite filed notices here of appropriations covering the water power of the falls at Waiter-loo. Lewthwaite is interested in the paper miffs at Lebanon, as well as those at Oregon City. at Oregon City.

The Lebanon paper mills use from 600 to 1000 horse-power and the Santiam canal furnishes only a small portion of the re-quired energy. The mills are forced to use big engines to supply power. The proposed power plant will supplant the engines as well as furnish more power than that now furnished. Though the company has yet made no announce-ments, whatever, it is understood that work on the power plant will soon com-

There is a 14-foot fall in the South Santiam River at Waterloo and the town was located there because of this water power. Years ago the late Thomas Kay established a woolen mill there. It burned in 1897 and since that time the power from the falls has not been utilized. Lewthwalte filed two appropriations of

water from the South Santlam of 200,000 flow of 609,000 cubic feet per minute. purposes to take the water from the river just above the falls and plans the construction of two flumes each feet long, 40 feet wide and 10 feet deep. feet long, to reet wide and in the deep.
This proposed improvement will mar the
beauty of the falls, which are rated
among the prettiest in Linn County, but
it will furnish a great amount of electrical energy for manufacturing pur-

BIT OF OLD WEST REVIVES

Copperfield, Near Baker City, Real Thing in Frontier Line.

BAKER CITY, Or., Jan. 17.—(Special.)

-Rivaling earlier mining days of the great West, when towns of considerable size sprang up almost in a night, Copper-field, located in Baker County, on the Snake River, has established itself almost instantaneously with a population of sev-eral hundred people, and is one of the fivelest camps to be found today. It is no mining excitement that has made Cop-perfield, but an extensive payroll from two of the largest commercial enterprises that have ever been built in either Idaho or Oregon. One is the Oxbow tunnel project, which will change the course of the treacherous Snake River, and in that change sufficient water fall is obtained to develop thousands of horse power. And the other is the building of what is known as the Northwestern Rallroad, a Harri as the Northwestern Railroad, a Patri-man line that leaves the Oregon Short Line at Huntington and follows the Snake River to Lewiston, Idaho, thus avoiding mountain hauis and solving the problem of transporting freight on a water level.

Several stores, barber shops, butcher shops and hotels have been erected within the past six weeks, and the dance halls flourish with more elaboration than distinguished that branch of Sumpter's in-dustry when she was the queen of mining camps. There is no saloon in Copperfield, ecause Baker County's court refused to grant a license; nevertheless, liquor is ob-tainable from a gallon house which runs be established above Pasco on this side | night and day, and alds to make the new camp a free-and-easy place. Owners of the gallon house were fined \$1000 a few days ago, which they paid without closing their doors or stopping business for an hour. Fights are numerous in the new burg, and when nightfall spreads over Snake River's box canyons foreigners employed there amuse themselves by fistic combats. An emergency hospital has been erected and it is common to

have it filled to overflowing.

Money is free in Copperfield, nothing less than two bits being used in making change, and the old-time Westerner feels perfectly at home there,

WANT THREE COUNTIES

Cottage Grove, Drain and Myrtle Creek All Desire County Seats.

ROSEBURG, Or., Jan. 17.—(Special.)— Since the Cottage Grove Commercial Club since the cottage vivoe commercial cause began advocating the formation of a new county from portions of Lane and Douglas Counties, with Cottage Grove as the county sest, all sections of Douglas County seem to have caught the division.

Drain, situated in the northern part of the county, now wants to form a new county from the northern section of

city has taken up the matter and an ef-fort will be made to bring the plan to a materialization. Drain was originally included in the part of the county which Cottage Grove wished to slice from Douglas County, but the citizens of the former place held a mass meeting and most em-

phatically protested against this.

Then Cottage Grove established its prospective lines further north, intending to leave Drain as it originally was, in Douglas County, Dealu got the county division idea from Cottage Grove, and now intends to try and slice off a piece of old Douglas containing about \$7,000,000 worth of property and a population of about \$600, to be used in the formation

BERRIES AND PEACHES THRIVE IN KLICKITAT.

James Coffield Early Makes Larger Fruits Success and Grows First Strawberries.

BY JOHN G. MADDOCK. LYLE. Wash., Jan. 17 .- (Special.)-The late James Coffield came from Pennsylvania to Klickitat County a quarter of a century ago. He was well supplied with money. He had looked over the fruit culture in the great Walla Walla Valley, where he was urged to locate, but Klickitat looked good to him. Near the present town of Cliffs he transformed unity and duces Cliffs he transformed ugly sand dunes into wind breaks for fruit culture. He spared no means in making develop-ment. Lucky for Klickitat that she

Tempting investments would never allure him to town or city. He loved the mysteries of the soll and in his Klickitat rural home you could always find the man who "did things" farm-ing. "Coffield" peaches as big as large coffee cups, with uniform size, became the delight of traveling men, and he received many orders from them. Cof-field once related he came to Klickitat with more meney than brains. Genous with the hortfeultural knowledge to tell why his Alberta peaches grew so large and were so pronouncedly kissed by the blush of heaven. His reply was: "Soil and climate, prune severely, thin carefully, cultivate and irrigate properly."

Eighteen years ago last Spring Mr. Coffield brought his fruit wagon to a halt in front of the late Hon. William R. Dunbar's office in Goldendale. He had on the wagon a crate of strawberries, he said, for exhibition. They were the first berries known to have ripened in the Northwest at that time. surprise, many eager purchasers appeared, showering money upon him in prices that to him seemed fabulous. Coffield afterwards related that the town was evidently "berry hung and he was forced to take money felt he had not earned; but from that time on he increased his strawberry production to an acre, which proved one of the best investments he ever

one of the best investments he ever made in Kilckitat.

Frank Coffield, schooled by an illus-trious size successful in all of his ex-periments in horticulture, visited dif-ferent portions of Kilckitat and Yakima counties with a view to establishing a commercial orchard and berry location. In the Big Klickitat River country this young horticulturalist, with ample means and a growing family, acquired a piece of raw land nine miles up the river at Gravel Pit. Mr. Coffield, the son, today has eight acres of the best varieties of peaches, showing the fertility of the soil after a year's growth, and he has an acre of strawberries and other fruits.

Columbus O. Barnes has been dubbed the "Strawberry King" of Kilckitat. Mr. Barnes' experience blended with trials of penury, pluck and industry, have brought opulence. Mr. Barnes was born in Washington County, O., in 1856. At the age of 21 he was in Klickitat, a poor boy and worked at any kind of labor for the late "Uncle" John J. Golden, founder of Goldendale. Later Mr. Barnes married Mr. Golden's eldest daughter. Wi growing family the plucky Ohloan, outside wages and as renter of the outside wages and as renter of the Goldendale, ranch, managed to get along with many wants unsupplied. "Jim" Coffield had told Mr. Barnes and others there was a good field for strawberry-growing for the local market. Mr. Barnes planted his first experimental patch near Goldendale. The old California prospector, Golden, his father-in-law, discredited success, owing to the elevation. The experiment was a success and the berries proved rauch firmer and better shipments than those grown at lower elevation. Crop failure to him in 15 years is unknown. "Barnes" strawberries, like "Coffield" peaches, have gained more than a local reputation. Next June Mr. than a local reputation. Next June Mr. Barnes expects to ship strawberries from his own fields by the carload to outside markets. Mr. Barnes estimates there are many thousand acres of idle tand on the slopes about Goldendale that can be made as prolific for strawberry-growing as his fields.

Rosenthal's great shoe sale is on,

UNION WILL BE FORMED IN LINN COUNTY.

Purpose Is to Have Proposed Body Take Charge of Handling and Packing of Season's Crop.

ALBANY, Or., Jan. 17 .- (Special.)-A Linn County Fruitgrowers' Union will organized in this city next Friday at a big convention of the Linn County Horticultural Society. It is planned to have an organization to pack and market the fruit of this county on a systematic, scientific basis and to adopt some uniform label for all Linn County fruit, to establish a reputation for the product of local fruitgrowers.

The convention will be held at the Courthouse and sessions will be held both forenoon and afternoon. Among the speakers will be Wilbur K. Newell, of Gaston, president of the State Board of Horticulture; H. M. Williamson, of Port-land, secretary of the State Board of Horticulture; Millard O. Lowisdale, of Lafayette, president of the Willamette Valley Applegrowers' Association; L. T. Reynolds, of Salem. Representative from Marion County in the present session of the Legislature; and C. A. Park, of Salem, Horticultural Commissioner from the Second District.

The Albany Commercial Club is assisting the Line County Horticultural So-

ing the Linn Colunty Horticultural So-clety in plans for the meeting and Man-ager Dasent is sending out invitations to 200 of the leading fruitgrowers of the county.

IDAHO BANKS COMBINE

Two Boise Institutions Unite and Form Strong Financial Combine.

BOISE Idaho Jan. 17 - (Special.) -- One of the most important deals in Boise's banking history was consummated when the Bank of Commerce was sold to the Idaho Trust & Savings Bank. This deal makes the Idaho Trust & Savings Bank one of the strongest institutions in the Northwest, combining as it does more than \$700,000 in deposits of the Bank of Commerce with more than \$800,000 of the Idaho Trust & Savings Bank, giving the latter house a combined deposit account As a part of the purchase the Idaho

Trust & Savings Bank building was sold to Captain J. E. Yates, H. N. Coffin, J. B. Morrow and S. T. N. Smith for 106, 900, while the building fixtures of the Bank of Commerce become the property of the Idaho Trust & Savings Bank

at a valuaation of \$112,000.

There will be little change in the officers and directors of the Idaho Trust & Savings Bank owing to the purchase, B. F. Olden continuing as president and N. O. Carpenter as vice-president. These officers, together with the cashiers of officers, together with the cashiers of the two banks, will remain in active charge of the combined business. Captain J. E. Yates, of the old Bank of Com-merce, will become a director in the Idaho Trust & Savings Bank. The capital stock of the bank will re-main \$200,000. The Bank of Commerce was opened for business in September, 1900 and the Idaho Trust & Savings Bank in April, 1966.

1900 and the Idaho Trust & Savings Bank in April, 1906.

SEEK MALHEUR PROJECT

New Move on Foot to Have Government Take Up Important Work.

VALE. Or., Jan. 17.—(Special.)—Just compensation for existing water rights and canals under the Government Malheur for the revival of this project. When the per proposition first was laid before the land-

to compensate owners of existing irrigation systems, and the result was that the ranchers fought the project which, ac-cordingly, was abandoned for the time

The question of compensation, however does not lie entirely with the Reciama-tion Department. If construction is undertaken the Malheur Water Users' Association, the organization of landowners under the proposed ditcles, will have something to say regarding the distribution of the cost of the work, and the owners of dry land are quite willing that the wet land owners should benefit for the work they have done. At a meeting of the central committee which is orof the central committee, which is or of the central committee, which is or-ganizing the Water Users' Association, held in Ontario Saturday, it was agreed unanimously that the existing water rights should be protected and a new form of petition for signature by owners of irrigated land was prepared.

The chief incentive to signing up for the project for the owners of irrigated land is that the Government scheme provides for an extensive drainage system. Farms

for an extensive drainage system. Farms now irrigated lie low, generally along the banks of rivers and creeks, and the irrigation of the higher and bench lands may result in subirrigation of the lower lands, which almost invariably results in raising alkali to the surface. To prevent this, a system of drainage and preferably of subsurface or pipe drainage is neces-

APPLE MEN UP IN ARMS

Hood River and Other Northwestern Growers to Fight Porter Bill.

HOOD RIVER, Jan. 17 .- (Special.)-Hood River apple-growers are up in arms against the Porter bill, which has been introduced in Congress and proposes to increase the size of the apple box used Northwest growers. testing against its adoption, the Oregon delegation in Congress has been form-ally asked to work against the measure, and the apple men of Washington have sent J. L. Dumas, owner of the big Po-mona apple ranch at Dayton, to the Capitol city to use his influence to secure

It is stated that the matter will b taken up here officially by the Hood River Apple-Growers' union, which will communicate with other similar organizations in the state asking that they use their utmost efforts to prevent the bill from passing and also for their co-operation in raising funds to send a represen tative of the apple-growers of the state to Congress to work with Mr. Dumas in opposing the measure, which, it is stated, will mean an annual loss to growers on the Coast of \$1,000,000.

It is said that the apple box now in

use, packed and graded according to the methods employed in Oregon and Wash-ington, contains over a bushel of apples that are all salcable and as noar perfect as it is possible to ship them; and that dealers who are pushing the Porter bill are taking an unjust course to compel the grower to give them more fruit and to take profits which justly belong to

CHEESE FACTORY REPORTS

Fairview Association at Tillamook Makes Good Showing.

TILLAMOOK, Or., Jan. 17.—(Special.)

—Reports prepared by Carl Haberlach, secretary of the Fairview Creamery Association of Tillamook, shows that the association received 2.754,998 pounds of milk last year, which was a gain of 306,677 pounds over 1907. The milk con-tained 108,132 pounds of butter fat, which when manufactured made 36,533 pounds of cheese. This makes a yield for the season of practically II.1 pounds of season of practically 11.1 pounds of cheese to the 100 pounds of milk. Other items were: Number of boxes of cheese Irrigation project is the keynote of the campaign new being made to secure the signatures of landowners to the petition sold for, \$37,821.04; average price received

CURE MF

25 Years' Successful Practice

Maybe you are one of the large num men who think their case is incurable. I your own doctor has told you you could cured, but remember that it is only beca cured, but remember that it is only because of did not understand your disorder and could not cure you. It did not mean that you could not get help from expert or experienced specialists. I offer you advice free. Call and find out what can be done for you. Never mind about the fee. You CAN PAY WHEN YOU ARE WELL.

Even though your case may be one that some other doctor is able to cure, and though his cure be absolutely thorough and permanent, there is yet good cause for your coming to me for treatment. The service I render is entirely unlike and better than the ordinary. I have devised new and scientific methods of treating men's diseases in all their phases. I cure cases that others cannot cure, and cases that others can cure I cure in less time and without pain or possibility of injury. All my forms of treatment have been perfected along the lines of nature's requirements and are in exact harmony with the natural recuperative forces. Therefore, my cures are painless, prompt and thorough.

Contracted Disorders

The serious results that may follow neglect of contracted diseases could scarcely be exaggrated. Safety demands an absolutely thorough cure in the least possible time. I have treated more cases of contracted disorders than any other physician upon the Pacific Coast. My cures are thorough and are accomplished in less time than other forms of treatment require in producing even doubtful results. I employ remedies of my own devising, and my treatment is equally effective in both recent and chronic cases.

I Treat Men Only

The vast multitude of men who have taken my treatment have not been disappointed. They know that I do not promise more than I perform. To them I have actually illustrated in the cure of their own cases the truth of what I gery. I employ an claim, namely, that my treatment is as certain to cure as it is that my patient engages my services and follows my directions. My such that it is that follows my directions. My such that is the obstructing cess is due not alone to education, experience, skill and scientific equipment, but to the fact that I limit my study and practice strictly to diseases and weaknesses of men. To make the follows my directions. To make the follows my directions throughout the followed as a sure cure in every instance.

DR. TAYLOR. The Leading Specialist.

Pay When Cured

painless method, and results are far better than were ever attained by the harsh and dangerous practice of cutting. But one week a required, and seldom is it even necessary to detain

the state \$27,840,40, or a total of \$345,843.99 The statement shows that work was done on a total of 248 miles, of which 78 miles are new roads. For the new roads the cost of construction aggregated \$235,485, an average of \$3057 a mile. Bridges, docks, ferries and metal culveris cost \$34,559 and road repairs and maintenance to apply the construction.

ABERDEEN, Wash., Jan. 17.—(Special.) | Camel meat is the latest Parisian food

Every mother feels a great dread of the pain and danger attendant upon the most critical period of her life. Becoming a mother should be a source of joy to all, but the suffering and

er incident to the ordeal makes its anticipation one of miss Mother's Friend is the only remedy which relieves women of the great pain and danger of maternity; this hour which is dreaded as woman's severest trial is not only made painless, but all the danger is avoided by its use. Those who use this remedy are no longer despondent or gloomy; nervousness, nausea and other distressing conditions are overcome, the system is made ready for the coming event, and the serious accidents so common to the critical hour are obviated by the use of Mother's Friend.

"It is worth its weight in gold," says many who have used it. \$1.00 per bottle at containing valuable information of inkrest to all women, will be sent free.

BRADFIELD REGULATOR CO.

Atlanta, Ga.

Men, Read This Through

For a long time we have been publishing a little booklet that goes farther to acquaint you with yourself, your duties, your physical possibilities and the common-sense things you ought to know about life-and you ought to have one. Send us your address and we will mail you one, or you can get it free by calling. There is no sentiment in the low prices we are making-it's a matter of dollars and cents

TO US AND TO YOU

Our superior advantages in knowledge and equipment make it possible, and this plainfact proposition is being found out every day by dozens of men who are thoughtful enough to investigate a little when needing the services of an experienced specialist.

Years ago doctors were supposed to charge as much for failures as for good results, but it is different with the up-to-date specialist of today, and our fee is a mere pittance compared with the results every patient receives in exchange.

We make a specialty of curing Men's Diseases, and our phenomenal success is due principally to the fact that we know how.

We cure Varicocele, Hydrocele, Vital Weakness, Blood and Skin Diseases, Kidney and Bladder Disorders, Ulcers, Sores, Painful Swellings, Burning, Itching and Iinflammation, Nervousness, Loss of Strength and Vitality and All Special and Delicate Disorders of Men. Our fees for cures are lower than the general family physician's

or surgeon. Medicine furnished from our own laboratory for the convenience and privacy of our patients; from \$1.50 to \$6.50 a course. If you cannot call, write for our free self-examination blank.

Many cases cured at home. Hours-9 A. M. to 8 P. M., and Sundays from 10 to 12.
