Senator Knex is concerning himself with the Japanese situation with a view to becoming thoroughly conversant with the subject. He regards the question as one of great moment requiring infinite delicacy and tact in approaching a solution. He considers the question one that cannot be disposed of at this time and one that is liable to come to the surface again and again, as Japanese labor comes into con fliet with American labor on the Pacific

Itched and Burned Terribly-Arms Affected, Too-Could Not Move Thumbs Without Flesh Cracking -Sleep and Work Often Impossible-Was Fairly Worn Out.

# CUTICURA SOON CURED HIS FEARFUL ECZEMA

"About a year ago an itching humos oegan to appear around the back of my hand. It started in to spread, and pretty soon it covered both my hand and got up over my wrists and ever up to the elbows. The itching and burning were terrible. My hands got all scaly and when I scratched, as I was doing a good part of the time, the surface would be covered with blisters and then get raw. The eczema got so had in around the pit of my thumbs that I could not move the thumbs without deep cracks appearing. I went to my doctor, but his medicine could only stop the Itching and did not seem to heal my hands up at all. At night I suffered so fearfully that I could not eleep, often lying awake until well toward morning, then waking up still tred, I am a chef and steward by trade and I had to give up my place, as my hands were so terrible to look at that they did not like to have me around about the food. I could not bear to touch them with water, but when I positively had to get my hands clean I would rub them with oil.

"This sort of business went on for three months and I had to give up and I had to get my hands clean I would rub "About a year ago an itching humo

them with oil.

"This sort of business went on for
three months and I kept trying zine
and tar ointments and such remedies
with no particular benefit. I did not
know what to do, for I was fairly worn
out. For a long time several friends
kept asking me why I didn't use Cuticura and at last I thought I would.
First I got the Cuticura Soap, then
Cuticura Ointment and at last Cuticura
Resolvent. I put the Cuticura Ointment on at night, covering my hands
with light cotton gloves. In the morning the inside of the gloves would be
lined with scales, sometimes half as
long as your finger, leaving nice healed
places where the scales had been. In
a month I was cured and have kept so
now for nine months. My hands and
arms are perfectly clear of all traces of
eczema and I think I am well rid of it.
