tle were appointed a special committee from the Mount Tabor Push Club to attend the meeting of the Park Board tomorrow morning, and submit an important report concerning the status of the land at Mount Tabor, needed for a park. Frank J. Parker submitted an elaborate report at the club meeting Tuesday night, which may have important bearing on the Mount Tabor Park question. According to the rereport, Mr. Perkins' 128 acres of land, including all the scenic beauty of the elevation, can be had at a little less than \$2000 an acre. He submitted figures to support his statement.

These figures are below those obtained by the Park Board, but Mr. Parker explained that some missionary work had been done whereby many of the property-owners who had been holding for higher figures had been induced to reduce their prices. Mr. Parker showed the list of property offered for park purposes, the assessed valuation of the property, the valuation the owners put on the land and valuation the Park Board considered reasonable. He then showed where cut had been made in the prices. Mr. Parker then said that not more than four or five condemnation proceedings would be necessary to get the land, and these were not important. come to Oregon in that year.
