Brick Firewall Restricts Blaze to Carpenter Shop and Barns Filled With Cars and Machine Shops Escape Flery Element.

Fire which gained uncontrollable headway because of feeble water pres-sure virtually burned itself out after raging for two hours last night at the carshops of the Portland Railway, Light & Power Company, at Twenty-third and Washington streets, damaging the company's property to the extent of \$25,000. During all this time a stiff wind blew and the firemen worked as best they water facilities availand the firemen worked as best they could with the water facilities available, but to the fact that a fireproof brick wall intervened between the carpenter shop, which was afre, and the car barns, which were filled with cars, and the machine shops, which adjoined, it is no doubt due that the entire rallation of the shops of Twentyway property at the head of Twenty-third street, valued at several hundred thousand dollars, was not entirely de-

thousand dollars, was not entirely destroyed by the flames.

The brick building on the corner of Twenty-third and Washington streets, used as the carpenter shop, was virtually destroyed. A portion of the first floor was saved from the flames, but all of the second floor and the roof were burned. The fire was discovered by Night Watchman Robert Krause, who started on his rounds at 8 o'clock. He rushed to the corner of the street and rang in an alarm from box 128. He then returned and his cries attracted the attention of six or seven other men working in various parts of the buildings, and together they manned the company's fire hose. company's fire hose.

The amount of water from the water pipes in the plant was insufficient, and the employes stood and watched the

fames leep and grow.

By the time the firemen resched the scene the blaze had a good start. Only one six-inch water main serves the entire district near Twenty-third street west of Nineteenth street, and this could not supply water enough for one of Portland's first-class fire engines.

of Portland's first-class fire engines, carrying three lines of hose.

President E. S. Josselyn, of the Portland Raliway, Light & Power Company, was early informed of the fire and was an interested spectator during the pitiful efforts of the firemen to curb the roaring flames with a wholly insufficient water supply. That such a condition should exist is a disgrace to the city," said he. "I have never seen such a poorly managed affair. They don't seem to be able to get any water at all."

Mr. Josselyn was greatly surprised

to get any water at all."

Mr. Josselyn was greatly surprised when Battalion Chief Young demonstrated with a line of hose that the pressure of the water at the fire plug would not early the stream a man's length. F. L. Fuller, the vice-president of the company, and other officials were among the spectators which numbered fully 10,000.

Most of the loss involved in the fire.

Most of the loss involved in the fire was to the building. One car on the lower floor of the carpenter shop was wheeled out into the street by the employes of the company and was not damaged. On the second floor some valuable wood turning machinery and some seasoned stock was destroyed. The shop records were saved by the wafch-

man and his associates. John King, a teamster, living at 513 Hoyt street, received a slight electric shock while attempting to assist the fireshock while attempting to assist the fire-men drag a hose across the street. Pa-trelman Stewart ran to his assistance. King was helped to a nearby saloon where stimulants were administered. After a short rest he was able to go home. King is an ex-fireman. Regarding the criticism offered the conduct of the fire by President Josselyn, Chief Campbell said: "I don't think any one would criticise the Fire Department if they knew that it was the fault of the water mains and not of the depart-

the water mains and not of the department that we cannot get a bigger and a quicker water supply out here where there is only one six inch main. I came to the fire a short time after Chlef Young and took charge and I know that at all times the men were doing all they ly could with what they had to with."

Idaho Local Option Bill Has Severe Provisions Left.

BOISE, Idaho, Feb. 8.-The Senate day, in committee of the whole, took fa-vorable action on the Senate local op-tion bill. The Democrats presented a number of amendments to make the measure constitutional and all but a few unimportant ones were turned down by the Republicans, charging them with perpetrating a subterfuge by passing an im-perfect bill in order to present the fiction of carrying out a party piedge. Vigorous objections were made, but to no purpose, to parts of the measure making it a crime to give away liquor even in one's own house, and permitting an officer without a warrant to enter a house and search

unterrifled vehemence. He ripped and he rared, he tipped and he tared, he pulled out the staple, he knocked off the faucet, he ransacked heaven and earth for new and strange similes, fantastic strings of ground and lofty adjectives, and churned up the most lurid lot of word-lightning that ever came over the theological "pike." Every little caim only presaged another storm. It was sometimes like a pack of fire-crackers exploding in a barrel, sometimes like a vociferous shout in the darkness, sometimes like a crosscut saw going through an elm knot. But it was always electrical in its effect.

Manner Varies With Words

It was his manner, his gesture, his jibe. his slang, his unconventionality that ran to the grotesque, and what the saintly might even hint was blasphemous that made it different. A great deal of the time his audience laughed with him. He pleaded for the "old-time religion." He pleaded for more Bible-reading, less novel-reading-no novel-reading in fact, no cards, no liquor, no dancing, more praying. He was carnest, flery, sarcastic, humorous, pathetic, as the mood happened to strike him. "Lord is it IT' Yes, it was Sunday,

He chased the devil from pillar to post, from bar-room to bed-chamber, from turf to timber until he nailed the satanto hide to the spiritual smokehouse, while the startled pigeons in the belfry above stood first on one leg and then on the other.

Sunday mixed his metaphors until the rhetoric stuck out like "blobs" in newlyrising bread. He said things that shocked his audience and much that amused it. And some things that set his auditors to thinking. It was audaclous to a degree. "Lord, is it I?" he would shout, and then go off on a pyrotechnic tangent of glittering generality that was clear off of the theological

TEXT OF SUNDAY'S DISCOURSE

Evangelist Takes Last Supper as

"Billy" Sunday chose as a basis for his discourse the story of Christ and the last supper, when Judas asked him: "Is it I?" Christ's prayer in the Garden of Gethsemane was also made the foun-dation for parts of the sermon. A small dation for parts of the sermon. A small portion of the speech follows:

I may say some things you don't like, but that doesn't make any difference. I shall say them just the same. I believe in the Bible, and that's what I shall preach. When the consensus of scholarship disagrees with the word of God, the consensus of scholarship can go plumb to hell, for all I care. The conversions in Spokane included the women of the street, the millionaire, the hobo, and the little, gum-chewing, frimle-headed sisay.

Christ told his disciples, "You go to town. You'll find there a colt tied, on

which never man sat. Bring him." If the country tavern in those days were like the country taverns in our day, these were a cot of town loafers lolling around, amoking, thewing, splitting, cussing. And I can see the feliow swap his cud over from the light to the left side of his mouth and ay:
