We publish ONTARIO, Or., March 25.-(Special.)-One of the most interesting agricultural experiments ever conducted in the United States is about to be undertaken in this county. It is the propagation of a genuine American strain of pedigreed sugar-beet seed. This experiment, if successful, will in all probability be the means of revolu-tionizing the entire sugar industry of the United States, for the fact that prac-tically all the sugar-beet seed used in this country is imported from Germany has hereotofore greatly retarded the growth of the industry. To put sugar manufactur-ing upon a domestic basis has long been desired by the Agricultural Department, and it is now possible that this will be attained. M'MINNVILLE, Or., March 28.-(Spe cial.)-The present season will wit for 13 co-operative cheese factories and or in sight, and there is not a man in Portland who can say he M'MINNVILLE. Or., March 28.—(Spe-clat).—The present season will wit-ness a great transformation in the ag-ricultural industry in this section, making the noble calling of the tiller of the soil more varied, more perma-nent and more able in itself to sup-port in inxury those who choose its lines with hopes and fears. In the days when there were no railroads the fertile soil of Old Yambili produced large crops of wheat, which hauled by team to the river, brought immense returns. the formulas of all our medicines. had to forego my treatment for want of money. Upon this ranch is located a Government experiment sta-tion, where Government representatives have watched carefully the progress of the seed-growing experiment, and where thorough tests of all beets grown on the ranch have been made. Their analyses have shown the beets grown there to contain, in many instances, a larger per-centage of sugar than beets grown any-Colonel Morrison's best farm at Fairthis Su this Summer. This park will be owned by a local corporation, which will turn the park over to the city at cost. Arbor Day will be celebrated by cleaning up the park and graveling the drive. All the citizens will participate. Carl Haberlach THLAMOOK, Or., March 28. (Special)—Carl Haberlach is the secretary of 12 cheese fac-tories and several small dairies in Tillamook County, represent-ing about 350 dairymen. He, handled more cheese than any-one else in Oregon last year, the amount being 2072300 SPECIAL EASTER ORDERS contain, in many instances, a larger per-centage of sugar than beets grown any-where else in the world. The percentage of sugar required in a beet by the aver-age sugar factory is 18 to 19 per cent. The farm at Fairfield produces many which test 24 per cent. For purposes of seed culture the experimenters reject all beets which test less than 22 per cent. For a partner in his enterprise at Nyssa, Colonel Morrison has William F. Zimmer-man, of Spokane, manaer of the Western branch of the Westinghouse Electric Com-pany. Each of these men has a large amount of capital invested in the enter-prise, for it requires substantial financial backing. The two men were here late last Fail and made all preliminary ar-rangements for inaugurating the trigi here. In choosing this vallay for the work they have endeavored to find a location where can be grown a larger product of beets to the acre than were grown on the farm at Fairfield. The conditions here are very favorable, the season being long-er, the soil very rich and the climate equable. This valley has long been, in fact, one of the most famous beet-grow-ing seating the the burget. MOISTURE IS PLENTIFUL amount being 2,073,390 pounds, valued at \$259,355.29, being two-thirds of the output of Tilla-mook County. March 24.—(To the Editor.)—The art depart-ment of The Oregonian certainly deserves notable consideration for its ment of The Oregonian certainly deserves notable consideration for its sunday's issue. No published work on this or kindred subjects con-tains such clean-cut pletures, and I desire to express an enthusian-tic appreciation of the work. In reproducing such an unusual set of drawings it would be almost impossible to produce so many plates without missing technical details with which, as a matter of course, an artist would not be familiar. It is a deserving iribute to the care and skill of the artist that only in a single plate could a variation be other drawing which will assist in correcting even this slight devia-tion, and thus complete the series of illustrations of the latest math-od of top-grafting. M.O. LOWNSDALE.

er, the soil very rich and the climate equable. This valley has long been, in fact, one of the most famous beet-grow-ing sections in the United States, and a number of sugar factories are leasted

has been overcome by the late inven-tion of a young farmer living two miles southwest of this city, whereby two men and a team can easily plant five acress of kale slips in a day. The implements are manufactured here, thus adding another industry fo the skilled workman's list.

skilled workman's list. The manufacturer of the kale-planter produced, in addition to his other crops last season, about 400 pounds of kale seed, and has it on the market en-closed in attractive little cases, each holding a quarter of a pound. It is not mere speculation to presume that Mc-Minnville will soon be exporting kale seed as well as flower and clover seed. the latter being a well-established in-dustry.

Big Profit in Clover Seed.

Big Profit in Clover Seed. Clover hullers are almost as plenti-ful in the country tributary to Me-Minnville as are thrashing machines, and Yamihill county farmers for the past few years have enjoyed a small bonanza in the production of clover seed. The size of the seed and its vi-tality, as well as purity, have made a name for it in the East and Middle West, and a wide market at good prices is the result. In special instances 10 and 11 bushels to the acre have been produced, but six to eight bushels can always be depended on, and an average price of 15 cents a pound, or 39 a Dushel.

bushel. One young farmer sold the seed from about 160 acres for \$4200, and had in addition a substantial profit from pas-turing his flock of Cotswold sheep on the clover fields until nearly June. Farms have been paid for with one crop of clover seed. This was when the industry was new. Clover seed and other diversities have contributed to the elevation of the prices of Yambili farm lands to such an extent in this section that not to own a piece while it is yet can-sidered cheap is to acknowledge one-self a timid investor.

number of sugar factories are located in the vicinity. The beets being planted on the new seed farm are being shipped in by the carload lot from the farm at Fair-field, where they were grown, tested and stored through the Winter in the silo.

Six Years for Pedigreed Seed.

It takes six years from the first plant-

It takes six years from the first plant-ing of the "mother" beet to produce a perfect pedigreed seed for the market. First the original "mother," which must test at heast 22 per cent sugar, is planted and grows a first crop of seed. This is used for the second crop of "mothers," which in turn must test 22 per cent, and the seed from which grows a third gen-eration of "mothers." The third crop of seed, then, from selected "mothers" test-ing the requisite 22 per cent, is finally considered a proven seed, and may be offered on the market as such. The great

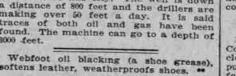

-Although it has been supposed there were large beds of coal not far from Medford, W. T. Beveridge, a civil and mining engineer, called the attention of promoters and capitalists in this direction. One of the first was Colonel J. F. Mundy, and these two men have spared neither time nor money in investigations. Starting from a point near Ashiand, and pursuing a northwest direction, with a dip of ten degrees, the coal vein has been traced by outcroppings for 14 miles

and pursuing a northwest direction, with a dip of ten degrees, the coal vein has been traced by outcroppings for 14 miles, with an average width of six to eight miles. Along this, seven openings have been developed. Those at either end and ones centrally located are the principal ones. The three companies own collect-ively this vein for the entire distance of 14 miles, containing 11,000 acres of land. The Sunnyside mine has 4009 feet of development work, the Cascade has 1000 feet, some of it on a second vein of seven-foot face. A third vein has been discovered and it is thought there are five veins. The Western mine has 600 feet of development work. All the veins have sandstone floors and roofs and thus no timber is required. The coal is all of high-grade bitiminous quality, free from slate and is not a lignite. The heating quality is said to be good. Basing the tonnage on the first vein alone, the management says it has 154,-600,000 tons and with the other veins a total of 179,000,000 tons that can be ex-tracted. Were it not for the transporta-tion problem, the mines would be pro-

total of 179,000,000 tons that can be ex-tracted. Were it not for the transporta-tion problem, the mines would be pro-ducing and shipping 250 tons daily, it is said. The engineers are now making the survey for a railroad from Medford to the mines, a distance of a litue over six rolles. miles.

The same people who are developing the The same people who are developing the coal are also positive they can get off and now have a drilling machine and 30 men at work at a point about eight miles northeast of this city. The well is down a distance of 800 feet and the drillers are making over 50 feet a day. It is said traces of both oil and gas have been found. The maching can go the a dowt found. strade lines in order to do extensive side-waik paving.
While the spirit is on, the Commercial Cub is engaged in raising a \$5000 boost fund. Through the expenditure of this amount the club hopes to keep things.
The difficulty beretofore has been that the owners of the large 200 to 600-acre anches would neither thoroughly culti-vate nor sell their farms. Now that the arge ranches are being broken up and offered in small tracts. Easterners are purchasing ground in Benton and at least to families are, scheduled to come to covarilis while cheap rates are on. Many howans landed here last year and the club hopes to keep them coming. The commercial Club now numbers 150 mem-bers and, is housed in \$5000 quarter.
The large farm broken into small tracts are limber section by the Corvallis & the timber within the next 80 days, the provide and the Oregon Agricultural Col-eral development along dairy and farm-ing lines promise much for Benton County and Corvallis. This city's moun-tin water, moral cleanliness and Sum-mers made delightful by the Ocean breas thate come through the pass to the westward, make Corvallis a delight-phone town, and this fact is being purchated in the 29 per cent increase of post precisited. The growth of Corvallis usiness interests and population is well post precisite in 1906. The prospect for an unprecedented growth of city and county in 1909 is exceptionally good.

ELGIN. Or., March 28.-(Special.)-The Commercial Club park committee today closed the deal for 10 acres for park purposes. This tract is ideally situated for a park, lying along the Grande Ronde River at the east end of Main street. There is ample water for boating and

Every mother feels a great dread of the pain and danger attendant upon the most critical period of her life. Becoming a mother should be a source of joy

to all, but the suffering and danger incident to the ordeal makes its anticipation one of misery. Mother's Friend is the only remedy which relieves women of the great pain and danger of maternity; this hour which is dreaded as woman's severest trial is not only made painless, but all the danger is avoided by its use. Those who use this remedy are no longer despondent or gloomy; nervousness, nausea and other distressing conditions are overcome, the system is made ready for the coming event, and the serious accidents so common to the critical hour are obviated by the

use of Mother's Friend. "It is worth its weight in gold," says many who have used it. \$1.00 per bette at containing valuable information of in-threat to all women, will be sent free. BRADFIELD REGULATOR CO. Atlanta, Ga.

Perfect Cures For

Different doctors have different ideas in regard to cures. Some call a supression of symptoms a cure. They dose for drug effects and claim that nothing more can be done. But the real aliment remains, and will bring the real symp-toms back again, perhaps the same as before, but very likely leave the patient in a much worse condition. I claim that nothing loss than complete eradication of disease can be a real cure. I treat to remove the disease, and not merely the symptoms. I search out every stay cured.

Weakness

Weakness I not only cure "weakness" promptly, but I employ the only treatment that can possibly cure this disorder permanently. It is a sys-tem of local treatment entirely original with me, and is employed by no physician other than myself. This may seem a broad assertion, but it is just as substantial as it is broad. So-called "weakness" is but a symptom of local infiammation or congestion, and a radical cure is merely a matter of restoring normal condi-tions throughout the organic system, and this I accomplish thoroughly and with absolute certainty.

Stricture

My treatment is absolutely pain-less, and perfect results can be de-pended upon in every instance. I do no cutting or dilating whatever.

Contracted Disorders

DR. TAYLOR. The Leading Specialist. Specific Blood Poison

No dangerous minerals to drive the virus to the interior, but harm-less, blood-cleansing remedies that remove the last poisonous taint.

Varicocele

Be sure your cure is thorough. Not one of my patients has ever had a relapse after being dis-charged as cured, and I cure in less time than the ordinary forms of treatment require. Absolutely painless treatment that cures completely in one week. In-vestigate my method. It is the only thoroughly scientific treat-ment for this disease being em-ployed.

I offer not only Free Consultation and Advice, but of every case that comes to me I will make a Careful Examination and Diagnosis, with-out charge. No alling man should neglect this opportunity to get ex-pert opinion about his trouble. If you cannot call, write for Diagnosis Chart. My offices are open all day from 9 A. M. to 9 P. M., and Sundays from 10 to 1.
