WINS AT EUGENE

Municipal Ownership Party Elects Every Man but Treasurer.

OVER 1700 VOTES POLLED

Contest, Hotly Waged, Is Orderly, Corrupt Practices Act Being Carefully Obeyed-Majority for Winning Ticket Substantial.

BUGENE, Or., April 5 .- (Special.)-In the most stubbornly-contested municipal election of years, Joseph D. Matlock defeated I. H. Bingham for Mayor of Flugene by 281 votes, the largest majority ever given a Mayor in the history of Eugene. All of the municipal league candidates on the Matlock ticket were elected, and the amendment creating a water board carried by a vote of 972 for, to 392 against making a clean sweep of the municipal ownership ticket with the single exception of Treasurer, for which Frank Reisner was re-elected over Jesse G. Wells by a majority of 18.

There were about 1700 votes polled, the highest number ever cust at a city election. The contest, hard-fought as it was from the opening of the pells at 8 o'clock this morning until the close at 7 P. M. was the most orderly of any city election held in years. The corrupt practice act was religiously observed by both tickets, and fibers was not a banner in sight or a carriage in use throughout the day. There were probably 50 votes challenged during the day in the whole city, and no disputes or jangling anywhere. The victory of the Municipal League ticket means completion of the sity power plant on the McKenzie River at a cost of \$151,000.

The vote for Mayor and Councilmen: For Mayor, I. H. Bingham 692, J. D. Matlock & 2. Councilmen, First Ward, T. H. Garrett 301, M. Svarverud 204; Second Ward, George Fisher 135, R. B. Henderson 185; Third Ward, Sherman Heller 203, C. F. Littlefield 191; Fourth Ward, C. P. Barnard 172, P. J. Berger 219. ction of years, Joseph D. Matlack defeated L H. Bingham for Mayor of

BIG PROFIT IN DAIRYING

Two Men Clear \$6000 Off 80 Acres in Five Years.

SOUTH BEND, Wash. April 5.—(Special.)—The possibilities in dairy farming in Pacific County, Wash., and, for that matter, in all of Western Washington and Oregon, are pretty well illustrated by the following fact:

Six years ago Marion and Leonard Hobi loased so acres of land in the Nema Valley, a few miles arem this city, and began dairy farming on a small scale. Last week they decided to reliaquish the place and their settlement between each other and Frank Hobi disclosed the fact that they had cleared during the six years the snug little fortune of \$500. The men and their families secured a good living from the \$0 acres during the six years, with a net annual profit of more than \$1000 a year.

Resident of Wasco Missing Since February 28.

WASCO, Or., April 5.— (Special.)—Harry Thompson, of this place, has disappeared from his place, has disappeared from his home without any reason known to wife or friends. On February 21 he left for Portland, intending to find a new location to which to take his family, and after a stay of a few days with friends, went to The Dalles, where he registered at a hotel for three days. On Sunday, February 28, he was seen on a train at Cellio, but since then no trace has been found.

The subject of Thempson's disappearance has baffled the efforts of the police of Portland and The Dailes. Thompson had no known reason for wanting to leave home. He is 5 feet, 6 inches in height and 55 years old. When last seen he wore a full heard, half gray.

Letters Given No Answer.

Letters addressed to President Sha-er of the school elicited no reply and he school was the subject of discusfer of the school elicited no reply and the school was the subject of discussion at a meeting of the executive committee this afternoon. It was decided that unless the school furnishes the statement required on or before Thursday of this week, the date of the monthly meeting of the committee, the institution shall be closed as a state institution.

President Shafer has written the secretary of the board that the money was to be used to pay teachers' salaries, but the secretary took the position that he could not use it for that purpose, even if a statement were furnished, without a duly verified and signed payroll.

Late Saturday the Ashland people withdrew the money on deposit with the State Treasurer and unless this money is again deposited with the school will be closed by order of the executive committee before the end of the week.

Poverty of blood, scientifically called æmia, is common in young girls and in persons who are overworked or confined within doors and makes its ap-proach in so stealthy a manner that it is often well developed before its presence is recognized. Taken in time the disease is readily curable, the specific being a tonic medicine which increases the number of red blood-corpuscles thus enabling the blood to carry the lifegiving oxygen to all the tissues of the

a trial. She says:
"When I was fourteen years of age I went into a decline and was miserable for a year. I had not a particle of color and my blood was turning into water. I was very weak and could not walk up stairs without great effort. I had dizzy spells and headaches all of the time and was compelled to leave school.

time and was compelled to leave school.

"The doctors pronounced my trouble ansemia but I did not receive much benefit from them. Through a neighbor, who had given her daughter Dr. Williams' Pink Pills, I began their use. After a short treatment with the pills I was stronger. I quickly regained my health and strength and have had no occasion to use the pills since."

The tonic treatment with Dr. Williams' Pink Pills is successful because it acts directly on the blood, purifying and building it up to its normal health. It thereby keeps the body healthy even under unusual conditions.

the debt. The committee takes the position that if any of the contributors feel that they have a just claim against the state for the money contributed, the use of it by the board would be the incurring of an indebtedness against the state which the board has positively refused to do. All donations received by the board since the date of its organization, July 18, 1907, have been accompanied by a written statement to the effect that they were given voluntarily, with the express understanding that no claim would be made against the state for reimbursement. The Normal Schools at Monmouth and Weston are now being operated on moneys so donated.

Officers Say Fort Stevens Is Not Damaged.

CHANGE IN BENCH MARK

One Has Dropped a Foot Within Recent Years-Cracks in Concrete at Fort Said to Be Only Surface Cracks.

ASTORIA, Or., April 5 .- (Special.)-Officers at Fort Stevens do not regard as serious the reports of the sinking of ground at the fort and along the peninsula sent out from that point recently. According to their statements, no con-

siderable damage has been done. It is nevertheless true that certain low lands whereon fills had been made within the past few years near the fort have sunk a foot or more. No dam-age to the emplacements has resulted,

Major Bartlett, the commanding officer at Fort Stevens, when asked about the report that Battery Russell, which is located at the south boundary of the reservation, near the old Point Adams lighthouse, had been damaged, or that the ground around it was sinking rethe ground around it was sinking, re-

has been reported to me; neither have I heard it discussed."

At the engineers' office it was stated that the cracks noted in the concrete work of the Battery Russell emplacement were of a minor character, such as are always looked for in heavy concrete work, and for the repair of which the Government makes a yearly appropriation.

There is a well-defined report affoat at the post that the ground about this battery has changed, based, no doubt, on an alleged discrepancy in the bench marks near the battery. The main bench mark at the post is located in the vicinity of the observation tower. It appears that some years ago, before roads were built through the reservation, another bench mark was located near the south line of the reservation, about 150 feet beyond where the battery now stands. This was later covered with drifting sand and a third one was set independent of the second one, about 500 feet farther north. Recently levels were run, and while the last bench mark was found to correspond with the main one, the other was nearly There is a well-defined report
