"I was afflicted with nervousness for nearly three years. The trouble began when I was seventeen years old and was due, I think, to overstudy. I tried to get through school too quickly with the result that I broke down a year before I would have graduated. I had severe choking spells when I would turn purple and fall down in a faint. I would be perfectly rigid. These spells would last sometimes for two hours. After these spells I would be very nervous and have to be in bed for a week. The muscles in my face and neck were affected and I was worn out.

"The first doctor I employed said he did not know what caused my sickness, but that it was some kind of nervous trouble. I could not see that he helped me at all. I then went to a specialist in nervous diseases but he also failed to help me. They said I would never fully recover.
