### UNION WOULD BE BENEFIT, HE SAYS

Church and Labor Might Well Get Together, Believes Dr. Foulkes.

### TELLS CAUSES OF BREACH

Both Need Each Other and Each Has to Fulfill, While They Have Many Common Objects Toward Which Both Strive.

Dr. William Hiram Foulkes, pastor of the First Presbyterian Church, speaking last night upon "The Church and Organspeaking ized Labor," gave the following as the causes of the breach existing between

"The church has too largely centered its attention on doctrines, and too little on personal and social righteousness, The church has sometimes been enamored of station and power,

"The church has often forgotten that it can never be divided into classes, but just ever be the common meeting ground of all classes.
"Organized labor has identified the church as a whole with some church

members.

"Organized labor has too largely overlooked the deeper side of life in its
struggle for material things.

"Organized labor has erroneously considered that by deserting the church its
own cause would be furthered."

Put into practice, Dr. Foulkes' sermon
would 'probably lead eventually to the
amalgamation of organized labor and the
church, for after quoting a part of the amalgamation of organized labor and the church, for, after quoting a part of the pledge of the American Federation of Labor, he said the church is heartly in sympathy with such a programme. The portion of the pledge quoted says that organized labor aims to bring about "the emancipation of our class from poverty, ignorance and selfishness, to be respectful in word and action to every woman; to be considerate to the widow and orto be considerate to the widow and or phan, the weak and defenseless, and never to discriminate against a fellow-worker on account of creed, color or naworker on account of creed, color or nationality: to educate ourselves and our fellow-worker in the history of the labor movement. We promise that we will never knowingly wrong a brother or see him wronged if in our power to prevent it. We will endeavor to subordinate every selfish impulse to the task of elevating the material, intellectual and moral conditions of the entire laboring class." Dr. Foulkes said it is the duty of the church to assure organized labor that her interto assure organized labor that her interests and those of the church are mutual in this matter. He continued:

### Church Needs Labor.

"The church needs labor to fill its pews, to be reached by its ministry, to practice its precepts, to carry its tidings. It needs organized labor in its social programme as an ally of the first rank.

"Organized labor needs the church, be-cause it needs what the church, despite all its faults, offers, a spiritual ministry, an open word, public worship, social felan open word, public worship, social fel-lowship, a meeting place on an equality with men from all stations of life. It needs the church to save it from its own inner confusion, to save it from dema-gogy, from the impostor, from the fan-atic, to save it from some of the curses within its ranks, such as the liquer traf-fic; to save it from its own ideals, to save it by giving the disinterested sanction of a conscience quickened by a broad view of the whole problem. of the whole problem.

of the whole problem.

"With all that may be criticised in it, to organized labor is due the marked improvement in the conditions of laboring men and their families. Without organization nothing could have been accomplished. It is my own personal conviction that organized labor is right in contending that a man has a right to a share of that which his labor produces: that if there is an unearned increment, it belongs to the public as well as to an inlongs to the public as well as to an in-dividual; that personal safety of the la-borer is a paramount consideration; that the education of his children is his and their inalienable right,

I may be challenged for not repre "I may be challenged for not representing the church. My answer is that in Christianity the labor movement had its rise. It was among the members of the labor guilds in the Apostolic days that the gospel had its freest course. Many of the officers of organized labor today are consistent church members. The worst that can be said of the church with reference to organized labor is that it has been entirely indifferent.

### Day of Rest Needed.

"Those opposing a legal day of rest which shall be assured, enforced and practically uniform, are striking both the church and organized labor. It does organized labor no lasting good whatever to have a parade and a mass meeting on the Lord's day, creating a spectacle of a church-hating organization, which is not true of the rank and file of its body.

"Organized labor and the of its body.

"Organized labor and the church have other things in common. The labor unions have done more for the cause of sobrlety than any other purely philanthropic organization. A number of unions have laws which deny assistance to a man injured while intoxicated. The best labor jured while intoxicated. The best labor leaders and practically every labor leader stands out clearly and boldly for temperance reform. At a conference of 18 employers and 18 representatives of unions, it was found that every employer indulged in strong drink, and only two labor representatives. Labor is discovering that the liquor traffic not only robs her men of efficiency and comfort, but actually robs them of wages.
"Both the church and organized labor

"Both the church and organized labor are against all those influences destroy-ing the home, including false theories of life, easy marriage and easier divorce, the social vice, child-labor, and unsani-

"If organized labor will not trust the modern church completely, let her clear her own skirts of the charges of hypochisy, unfairness and double-dealing. If shor is willies to the charges of hypochists and double-dealing. labor is willing to recognize that the fair test of an institution is its ideals, if they are sincere, then let her enter into the fullest and freest relations with the Christian Church, helping the latter better to discern its true mission in the world and helping labor to be confirmed in its rights."

PASTOR ADVISES YOUNG MEN

#### Rev. J. F. Ghormley Tells Them to Get Hold of Land.

Advising the young men in his audience to "get anchored to a ten-acre patch of land" and to establish a Christian home. Rev. J. F. Ghormley, of the Central Christian Church, spoke for 29 minutes at the Y. M. C. A. yesterday afternoon. He had taken for his text Hebrews vi:19. which speaks of hope as an anchor to in what manner their money is being the soul. The speaker said all the good purposes of his hearers bind them together, and that their attendance upon the Y. M. C. A. men's meeting indicated in 30 days.

try."

Before Rev. Mr. Ghormley commenced his address all the men present who had been in Portland less than six months were asked to indicate it. About half of the 100 men in attendance raised their hands. There were 14 who had come to the city within the last week, and 15 said they were out of work when they struck town.

### CHARACTER MOST IMPORTANT

#### Dr. Brougher Says It Counts for More Than Superficial Things.

"Pride and Vanity, Respectable Sins," was the subject of Dr. J. Whitcomb Brougher's sermon at the White Temple last night. His text was the story of Haman, Mordecal and Queen Esther. He characterized the historical incident as a graphic illustration of the proverb, "Pride goeth before destruction, and a haughty spirit before a fall." fall." Itis sermon, in part, was as fol-

fall." His sermon, in part, was as follows:

From this story, I wish to draw a few lessons. Pride and vanity emphasize calling rather than character. It is character that counts and not office, no office ever yet made a man. If a man hasn't the character and ability to fill a position, that office will never give him those things. It would be a good thing for our city if some of these two-by-three fellows that are seeking office could see this fact and withdraw before the people have to set them aside without due coremony. Pride and vanity put emphasis upon circumstance and not upon character. There are many proud people teday who are living in the torments of hell because they cannot have the circumstances in which to live that their proud hearts long for.

It takes more than clothes to make a man or woman. And yet pride and vanity are causing many women to go into extravagant dressing in order to make a display that simply prophesies bankruptcy for their husbands or their fathers. When it comes to dress. I think, everything considered, that women are more valn than men. They may not be to biame for it for they know that dress has much to do in pleasing most men. I don't biame most women for trying to tog up and look pretty. It is a difficult thing for some of them to do it even then, but all joking aside, men and women both, teday, put emphasis in clothes and give more consideration to dress than they do to the question of character. But in all that goes to make, if it is character that counts, and not clothes.

#### Preaches on Motherhood.

"Mother of Men" was the title of the sermon and services held yesterday morning in the Patton Methodist Episcopal Church. It was particularly beautiful and appropriate to the day set apart by the church in honor of all mothers and their responsibilities. In honor of the occasion, and in response to a request of the pastor, Rev. D. D. Watters, nearly all present wore a white carnation. Dr. Watters delivered an appropriate sermon setting forth the great responsibilities that rest on the shoulders of the mothers of the country, which he said were too little ap-"Mother of Men" was the title of the country, which he said were too little appreciated and understood. Special music was provided for the occasion. In the evening the mission class study gave a recital, with papers and addresses and special music.

### Marine Notes

With \$5 passengers and a large quan fity of general cargo the steamship Break-water, Capiain McCann, arrived up at 5.39 o'clock last evening. The freight con-sisted principally of milk, sash and doors, the latter principally for Eastern points.
With a full load of lumber for Shanghal
the British turret steamship Clan Macfarlane sailed yesterday morning at day-

### FIVE MILES OF DITCH DUG

Grants Pass to Have Irrigation Water Within Another Month.

GRANTS PASS, Or., May 9 .- (Special.)-The farmers and ranchers of this community are jubilant over the advancement made on the irrigating ditches. The gravity ditch on the north side of town has been completed almost to the city limits, while on the north side of the Rogue River the high land ditch to Evaluate her heart the high-land ditch to Fruitdale has been completed to the opening of the valley.

Altogether five miles of waterways are ready for use. Next Tuesday automobiles will be run from the city to various points along the ditches in order to give the business men who have so freely subscribed to the enterprise an opportunity to see in what manner their money is being

### that they wished to be upon the moral side of all great questions. He spoke of the Northwest as the greatest country in the world, and remarked: "Let us take this country and make it God's coun-LANDS ARE CHEAP

Large Farms Rapidly Being Cut Into Small Tracts and Set to Orchards.

FERTILE SOIL; MILD DAYS

Climate and Proximity of State Agricultural College Are Attracting Many Settlers-Apple Land of High Quality.

CORVALLIS. Or., May 9.—(Special.)—
Benton County, with its county seat.
Corvallis, is expected, within the next few
years, to take rapid strides in its general
development and industrial growth. The
large holdings of the old settlers, scattered throughout the low hills of the
county, are being split up and converted
into smaller farms. Consequently, better
use will be made of the fertile soil and
the land which has been lying for years
among the foothills, in tracts of from 500
to 2000 acres, supporting one family with
a few sheep and horses, will be made to
produce the apples, wheat and walnuts
for which it is adapted.

It has been demonstrated by experiment
that apples raised in the low hills of
Benton County are, in size, shape and
color, fully the equal of those raised in
the Hood River or Rogue River valleys,
and they can be raised on land which
costs only from \$20 to \$100 an acre.

W. S. Brown has just purchased 270
acres for apple-raising purposes, and has
formed the Curvallis Orchard Company,
Mr. Brown investigated thoroughly every
important apple-growing section in Oregon and Washington and finally located CORVALLIS, Or., May 9 .- (Special.)

Mr. Brown investigated thoroughly every important apple-growing section in Oregon and Washington and finally located near Corvallis, because the climatic and soil conditions were just as favorable and the land was cheaper.

Another company, the Oregon Apple Company, has obtained 1000 acres, which will be planted to apples within two years. By the end of this year there will be growing in Benton County about 800 acres of the commercial varieties of apples. of the commercial varieties of apples. The men investing in orchard lands are competent fruit men. One of them is President Kerr, of the Oregon Agricul-

In addition to the apples, there are being planted in Benton County 100 acres of Bartlett pears, 1000 acres of prunes and 160 acres of peaches. All, except the peaches, are on the upland.

The possibilities for fruitraising in this county are practically applied.

this county are practically unlimited, there being thousands of acres of clear land which can be had cheaply and there being thousands of acres of clear land which can be had cheaply and which is especially adapted for fruitraising. Benton County has an advantage in horticultural pursuits on account of its close proximity to the Agricultural College, where scientific experiments are being carried on all the time, and where are located some of the best authorities on horticulture and pests in the country.

The extension of the Oregon Electric to Corvallis will be of untold advantage to the people of Benton County. It will afford a quicker means of travel down the Valley, will stimulate the value of property, and will be the means of increasing business and population many times over.

The Oregon Agricultural College, with its 1300 students and its fine outlay of buildings, is the life of Corvallis and in its practical way of disseminating scientific knowledge, it exerts in Benton County an influence that is tremendous in building up correct methods of general farming and fruitraising.

Diversined farming and dairying are

rect methods of general farming and fruitraising.

Diversified farming and dairying are found to be particularly profitable lines of industry in this section of the Valley. The lowlands are especially adapted for the growth of hay, grain, potatoes and all kinds of vegetables. Potato land produces from 150 to 500 bushels an acre, and river bottom land in produce \$1000 an acre from cite. is said to produce \$1000 an acre from diversified crops. Dairying, as an income-producer in Benton County, can hardly be beaten. Corvallis boasts of a cannery which turns out four tons a cannery which turns out four tons of butter a day, which is said to be more than the daily product of any other creamery in Oregon. The local creamery pays \$175,000 yearly for milk.

Benton County has millions of factors.

Benton County has millions of feet of Benton County has millions of feet of standing timber, which averages 50,000 feet an acre. In Corvallis there are two sawmills with a capacity of 100,000 feet daily. One of these mills was recently purchased by G. O. Bassett, formerly superintendent for the Booth-Kelly Company at Eugene. He will bring logs over the Corvallis & Alsea Railroad a distance of 20 miles. Mr. Bassett is also constructing now an auxiliary mill in the hills six miles northwest of Corvallis. Lumber will be hauled from this mill to the planer in town by a traction engine.

in town by a traction engine.

Benton County is the home of the China pheasant, and the greatest hatchery in the state, the famed Simpson farm, is located on the outskirts of Cor-

vallis.

Building operations and realty have been active during the past year. The development of new industries and the coming of the Oregon electric are expected to better matters very materially in this regard. The deposits in the two Corvallis banks amount to \$1,000,000. Corvailis banks amount to \$1,290,000.

The new Commercial Club quarters, costing \$5000, are the pride of the city. Tom Richardson recently made the statement that they were the best in the state outside of Portland. The Commercial Club has become especially active of late, and is taking steps toward an extended publicity movement to show the advantages of this county.

### 60-DAY CLEANUP, \$10,000

Nuggets From Josephine Mines Displayed in Grants Pass Bank.

GRANTS PASS, Or., May 9 .- (Special.)-GRANTS PASS, Or., May 3.—(Special)— Six gold bricks and nuggets of various sizes from the mines of Josephine County are on exhibition at the Grants Pass Banking & Trust Company in this city. The bricks represent a 60-day clean-up at the J. T. Logan mine, near Waldo, and are valued at \$10,000. The gold will be sent to the San Francisco Mint for coinage.

The Logan mine has been in operation The Logan mine has been in operation between 40 and 50 years, and its present owners are just beginning to get to the richest part. This season has been exceptionally advantageous for miners, owing to a great amount of rain and snow, which has given the miners an opportunity to apply the giants day and night. The banks of this community this year have handled thousands of dollars of gold dust over last year's output. dust over last year's output.

No Disagreeable After Effects. Liver Beans are mild and effectual.

### DEVELOP BIG AREA

Central Oregon Settling Up, Despite Handicaps.

VISITOR TELLS OF TRIP

J. M. Lawrence Says Citizens of Progressive Class Are Doing Best to Open Country, Although Railroad Is Badly Needed.

Central Oragon is a coming country, according to J. M. Lawrence, who has just returned from a business visit to that locality. Mr. Lawrence, who is Receiver of the United States Land Office at Roseburg, formerly resided at Bend, whither he intends to return upon the termination he intends to return upon the termination of his service in the Land Office. His good opinion of the region and its prospect for development is not in any way dependent upon the recent imposing railroad talk, for he does not believe that the Deschutes Canyon offers a practicable avenue of approach at this time, and he is much inclined to discredit the good talk of this machanic of the comments of the last of the machanic of the comments of the last of the machanic of the comments of the last of the machanic of the comments of the last of the machanic o faith of this movement on the part of the

Harriman interests.
"Just six years ago I first went to Bend." said Mr. Lawrence. "I then found half a dozen settlers on the river, and there was some activity in public lands, chiefly in the yellow pine of the Des-chutes timber belt. There was a post-office, served by a tri-weekly stage, and without money-order facilities—absolutely no other means of communicating with the outside world except by runner, such as the Indians employed in the days of 'The Last of the Mohicans.' Bend is now an incorporated city of about 500 population, is a Presidential postof-fice, has an excellent high school; Laid-law and Redmond are considerable towns that were unthought of five years ago. and besides these are postoffices at Tu-malo, Gist, Cline Falls and Powell Buttes, all established within this period.

Telephone and Mail Service.

ents of the locality, but merely cite an indisputable official evidence of growth. Seven such postoffices where growth. Seven such postoffices where but one was so recently is highly significant, particularly when we hold in mind the development of the rural mail service also. A network of telephones now covers the region, and one at his 'desert' ranch on the Upper Deschutes may find his order for grand-opera seats in Portland interrupted by the sharp note of the coyote, yelped into his other ear from the neighboring sagebrush.

"More than 200 families have settled upon 'Carey act' segregations in the Des-

upon 'Carey act' segregations in the Desupon 'Carey act' segregations in the Des-chutes Valley, south of Crooked River, within the past four years, building homes and clearing and watering the land and raising crops. Irrigation has been brought to upward of 50,000 acres of these 'desert' lands within that time. This work of reclamation and settlement is going steadily forward, more than 250,-000 acres having been segregated from the open Government domain for such treatopen Government domain for such treatopen Government domain for such treat-ment. There are, of course, numerous private entries under the desert land law, and all the river lands and some others were taken as homesteads or under the old pre-emption law.

were taken as homesteads or under the old pre-emption law.

"A strictly homestead country is usually poor; that is, those who take homesteads are not, as a rule, well provided with money. Those who pay \$2.50 an acre for timber or \$4.25 an acre under the desert land law, or \$10 to \$40 an acre under the 'Carey act,' are not impecunious. Such people have the means measureably to help themselves, and they are not content to stagnate. The very fact that they have accumulated something elsewhere goes far to establish their character for intelligent enterprise, as well as industry, sobriety and frugality. They bring to the country the results of successful life elsewhere—money, experience, energy, ideals—they do not come as helpless and dejected dependents. This, I believe, accounts for the exceptionally high grade and fine quality of the civilization that is taking firm root in Central Oregon. I do not wish to be under-

sonal character as a developing agent in a new country; but under the circum-stances appearing in Central Oregon it is important as an evidence of proved strength, hope and success, as contrasted with feebleness, discouragement and fall-

Penetrate to Interior.

settlers even further into the interior of Oregon-out in the region of Summer Lake, Christmas Lake and Fort Rock, A new postoffice, Fremont, has just been established in the locality tast named. The stages go loaded with land-seekers, some parties drive in with their own outfits and supplies, some go afoot and I saw one barefooted man trudging over the long read to be been staden. the long road to a homestead on that re-mote plain. This movement to occupy and develop Central Oregon beats any-thing of the kind over seen before in this

"Of course, there should be a railroad into the Upper Deschutes Valley. The character of the settlement there makes it as certain as anything in human affairs is that there will be a large volume fairs is that there will be a large volume of traffic to move very soon. Development there is rapid—not slow and painful, as in many pioneer regions occupied by people of scanty means and small capacity for affairs. In many places where nothing but sagebrush and junipers marked the piain four or five years ago ranches embracing areas of hundreds—even thousands—of acres, are now in theifty continuation. The development orthrifty cultivation. The development or-dinarily wrought in a generation has been accomplished there in half a decade. And yet the railroad interests that should open the vast empire of Central Oregon seem to be maneuvering for tactical ad-vantage over competitors, to prevent oth-ers from entering rather than themselves to enter.

"I think an important factor relative to the Corvailis & Eastern is overlooked when we fall to consider that from the east the Cascade Range offers no barrier, as it does where the Northern Pacific and the Great Northern cross. There is and the Great Northern cross. There is no descent as in Eastern Washington to cross the Columbia. The Bastern Oregon plain is elevated and there is no grade to speak of to reach the summit of the range. The western descent is no mora precipitous than on the lines to the north. Therefore the matter of crossing the Cascades in Oregon presents only half the difficulty of crossing the same range in the State of Washington; and the Washington roads cling to their mountain diington roads cling to their mountain di-visions, even after the water grade has been found."

### FRUIT CROP WILL BE LARGE

"I am not attempting to catalogue the Grants Pass Has Added 800 Acres to Orchard Area This Year.

> GRANTS PASS, Or., May 3.—(Special.)— The outlook for a good crop of fruit in Rogue River Valley is very promising. Apple and pear crops will be large.
> Fruitgrowers have been active this season, planting new orchards, and it is roughly estimated that \$5,000 fruit trees have been distributed and planted within the vicinity of this city. This does not transfer the product of the country of t

include 350,000 grape vines, which will make 800 acres more orchard land brought into cultivation and 600 acres of vineyard. As Tokay grapes produce \$250 to \$500 an acre at maturity, it is easy to see what 600 acres in full bearing means to a community.

Outside of the usual fruit crop, this part of the valley produces many melons and indications are that the acreage will be increased this year.

### FRUITGROWERS GET READY The Dalles Association Is Seeking

Temporary Building.

THE DALLES, Or., May 9 .- (Special.) —At a special meeting of the board of directors of The Dalles Fruitgrowers' Association last night, Secretary Merrill was instructed to secure a building for temporary headquarters. The associatemporary headquarters. The associa-tion is entering into contracts with mem-bers and others for handling this year's

fruit crop. A meeting of the board will be held at the Commercial Club rooms in this city next Saturday night for the purpose of employing a manager for the association.

Railroad to Supply Sawlogs. INDEPENDENCE, Or., May 2.—(Special.)—Arrangements have been completed whereby the sawmill at this

Every mother feels a great dread of the pain and danger attendant upon the most critical period of her life. Becoming a mother should be a source of joy to all, but the suffering and

danger incident to the ordeal makes its anticipation one of misery. Mother's Friend is the only remedy which relieves women of the great pain and danger of maternity; this hour which is dreaded as woman's severest trial is not only made painless, but all the danger is avoided by its use. Those who use this remedy are no longer despondent or gloomy; nervousness, nausea and other distressing conditions are overcome, the system is made ready for the coming event, and the

are overcome, the system is made ready for the coming event, and the serious accidents so common to the critical hour are obviated by the use of Mother's Friend.

# MEN'S DISEASES THOROUGHLY CURED

parent becomes the folly of employing harsh and dangerous measures in attempting to cure the ailments of men. Drastic dosing and useless cutting have done irreparable injury in thousands of cases. I cure all special diseases of men promptly and per-manently, and by painless methods that cannot possibly produce undesirable results.

### My Treatment of WEAKNESS

Functional derangement is neither a "weakness" nor a disease. It is a symptom of
prostatic disorder. To stimulate activity by
the use of powerful tonics is an easy matter, but such results are merely temporary
drug effects. Most doctors treat "weakness"
in this manner because they do not know how to cure the real cause of
the derangement. I am the only physician employing scientific and
successful methods. I use no tonics at all. My treatment is a local one
entirely, and corrects every abnormal condition of that vital center, the
prostate gland. My cures are real cures, and are permanent.

Twenty-five years of successful practice as a Specialist in Men's Diseases justifies every claim I make. I promise my patients a complete cure in every instance, and in cases where

I cannot safely make this promise, I positively refuse to treat.

### A WARNING

There is no economy in employing an amateur to do an expert's task. Nine times in ten failure follows. In a large percentage of instances the result is narm. He doesn't treat enough cases to learn a great deal about them. His time is so fully occupied in treating a full assortment of human ills that he cannot devote special study to any particular branch of practice. Most diseases are sufficiently simple as to require no special training other than that received in the medical colleges and that afforded by experience in general practice. He prefers to be relieved of tasks beyond his training, though he cannot, without fear of injuring a patient's confidence in his ability, recommend the service of a specialist instead of his own.

### CONTRACTED DISORDERS

Be sure your cure is thorough. Not one of my patients has ever had a relapse after being discharged as cured, and I cure in less time than the ordinary forms of treatment require.

My treatment is absolutely painless, and perfect results can be depended upon in every instance. I do no cutting or dilating whatever.

#### VARICOSE **VEINS**

Absolutely painless treatment that cures completely in one week. Investigate my method. It is the only thoroughly scientific treatment for that disease being employed.

# YOU CAN PAY WHEN CURED

**EXAMINATION FREE!** 

I offer not only FREE Consultation and Advice, but of every case that comes to me I will make a Careful Examination and Diagnosis without charge. No alling man should neglect this opportunity to get expert opinion about his trouble.

If you cannot call, write for Diagnosis Chart. My offfices are open all day from 3 A. M. to 9 P. M., and Sundays from 10 to 1.

## The DR. TAYLOR Co.

place will receive logs by train from From a single room on the ground floor the camps of C. A. Spalding at Falls the Commercial Club now finds itself the camps of C. A. Spalding at Falls City and Black Rock. The logs will be brought to Dallas by the Salem, Falla City & Western, and from there by the Independence and Monmouth Railway. The first load of logs will be brought in to the mill about the middle of next week. By this arrangement the mill can now run at its full capacity. Formally logs have been effect down. merly logs have been rafted down the river to the mill, and, owing to extreme

low water, it could not run all Summer Club Now Has New Home.

GRANTS PASS, Or., May 9.-(Special.)- kitchen annex

comfortably located in a suite of nine rooms in the Williams block, with every

convenience for club purposes. convenience for club purposes.

One main room will be used for sessions and public gatherings. Two rooms have seen set aside for the use of the ladies' auxiliary, where receptions may be held for newcomers. Adjacent to these rooms will be installed a good library and all the latest magazines and leading periodicals. Next to the general reading-room will be the office of the secretary of the club. Adjoining these apartments just described comes the banquet hall and kitchen annex.

# CHRONIC, NERVOUS, BLOOD, SKIN, PRIVATE AND SPECIAL DISEASES

Ability and skill that are timetested and true will live and grow without advertising, and so likewise will holy writ; but a vigorous spread of facts is thoroughly commendable, notwithstanding all this, and hundreds upon hundreds of afflicted people are being cured every year who would never have found our offices if it had not been for the means of announcement through the daily press and otherwise. We understand, of course, that there is a sort of 'Code of Ethics'' that we violate in doing this, but every time a person is cured sound and well by us he or she goes about knocking more holes in this phantom code of ethics than 100 ethical gentlemen can

heal over in years. Perfect confidence in our ability to cure every case that we accept for treatment enables us to allow the patient to arrange to

### PAY OUR FEE AFTER THE CURE IS COMPLETED

If we cannot cure you we will candidly tell you so. If you are suffering from any derangement or weakness of the pelvic vital system, we want you to investigate our system of treatment and success in curing these diseases with as much care as you would in the purchase of real estate. We will answer any question you may wish to ask, and will gladly refer you to reliable business men whom we have cured—cured to stay cured forever. Varicose Veins, Hydrocele, Vital Weakness, Blood and Skin Dis-

eases, Kidney and Bladder Disorders, Ulcers, Sores, Painful Swelling, Burning, Itching and Inflammation, Nervousness, Loss of Strength and Vitality and all Special and Delicate Disorders of men.

Our fees for cures are lower than the general family physician or surgeon. Medicines furnished from our own laboratory for the convenience and privacy of our patients; from \$1.50 to \$6.50 a course. If you cannot call, write for our free self-examination blank.

Many cases are cured at home. HOURS-9 A. M. to 8 P. M., and Sundays from 10 to 12,
