SISSON, Cal., June 2.-While state troops are on the way to McCloud to suppress lawlessness, the power house and lighting plant at that place were captured by the striking shingle millhands today and the town is in darkness tonight. Between three and four hundred armed strikers marched on the plant in a body late tonight, drove off the 25 armed deputy sheriffs on guard. and took possession, compelling the men at work to quit. The deputies rewarning of the intention of the strikers to capture the plant, but they deemed it useless to attempt resistance and left when ordered to do so. Not a shot was fired and no one was

No Damage Done, Town Dark. No damage had been done to the machinery of the plant up to the time the last message was received from McCloud tonight. The strikers are still in possession of the ton or so of dynamite stored in the McCloud River Lum-Company's powder-house, which was captured two nights ago, but no attempt has been made to use it.

The only result of the capture of the Cloud, as well as the company buildboarding-houses, hospital and administrative building are in darkness, save for a few tallow candles and oil lamps that glimmer here and there.

Director of Works Allen, whose orders with respect to erecting selling booths on the grounds of state buildings had been set at naught through the aggressive op-position of the Oregon Commissioners caused the electric feed-wires entering the Oregon building to be cut at noon of the opening day because the Oregon Commissioners had declined to go to the expense of installing an elaborate system sued, the rumor originated that the Oregon Commission would immediately pack up its exhibits and ship them home

#### Appearance of Building Marred.

Without electric lights, the stereopticor lecture, planned as the most instructive and beneficial publicity feature of the Oregon exhibit, had to be abandoned and the public reception in the Oregon building was sadly marred by inadequate light-ing. With a record-breaking throng on the Exposition grounds, and the Oregon building swarming with visitors, the Ore gon Commissioners were frenzied by the affront and indignity. To add to their alarm, fancy fruit and perishable exhibits in the refrigerator-room were jeopardized by the stopping of the electric fans with which these rooms are equipped.

#### Burning Letters Exchanged. Efforts to get in touch with President

Chilberg and the directors of the Exposition were fruitless until a late hour last night, owing to the demands made upon their time by the ceremonial functions of the opening day. A series of burning letters was exchanged, however, with the result that Director-General Allen was ordered to connect the electric wires pending an adjustment of the cor troversy, rather than risk a damage sult over the loss of perishable exhibits. The order had scarcely been complied with when a mishap in the lighting plant threw every wire on the grounds out of commission, and the damage was not repaired until this morning.

In the interim C. W. Smith, superintendent of the Oregon building, kept two men constantly employed opening and shutting the doors of the building to

ABERDEEN. Wash., June 2 .- (Speial.)-Mrs. Jeanette Evans arrived here yesterday afternoon from San Mateo, Cal., and within an hour was he bride of Thomas W. Secor, whom she had never seen until he greeted er at the train. The marriage is the result of a correspondence carried on through a matrimonial agency. Bride and groom are each, 56 years old. When Mrs. Evans stepped off the

train, Secor insisted she go at once to the office of Justice N. W. Bush for the immediate performance of the cere-mony. She demurred, for she had brought a wedding outfit in her trunk and she wanted to get the clothes.

Mr. Secor declared, however, she was quite satisfactory just as she was, and he could see no reason for delay. Even when she reached the Justice's office, she pleaded an opportunity to get her gowns, but was finally persuaded to let the ceremony proceed.

Mrs. Evans was a widow, and Secor, who is prominent in the ranks of the Socialist party, is a widower.

#### GENERAL ALLEN HAS MAP

Signal Corps Chief Orders Preparations Made for Transmission of Scheme to Congress-To Patrol the Entire Coast.

WASHINGTON, June 2 .- Under the intructions of Brigadier-General Allen, Chief of the Signal Corps of the Army. plans have been prepared, it was anounced tonight, showing what is necessary for the aerial defense of the United States. If Congress would appropriate ASTORIA. Or., June 2.—(Special.)—A the money he would begin at three points along the Atlantic Coast-Washington, New York and Philadelphia-where dirigible balloons and aeroplanes would be sta tioned. At each point one large balloon and an aeroplane would be placed. would require more than \$500,000. Gen aral Allen has had prepared a map showing points along the other borders of the country and in the interior where he believes there should be aerial defense stations. To carry out the entire scheme would require about \$5,000,000. The War Department is convinced, in the light of achievements of the Zeppelin balloon, that aerial navigation has arrived.

In anticipation of favorable action by Congress, the Signal Corps has been instructed to prepare the plans referred to. "It is intended," said an Army officer tonight, "that the coast dirigible shall not pass off its own station except in cases of extremity and that the sailing distance shall be 125 miles south and 125 miles north from its depot. In this manner the entire coast from Maine to Florida will be patrolled and in case of war it will be virtually impossible for a hostlie fleet to approach the coast of the United States without being discovered long before the sentinels on land could see the vessels. Once discovered, the ficet's movements could be watched with safety and with the use of wireless its maneuvers could be sent the length of

the coast. "The plans will include an elaborate system of vertical searchlights, which the airships will be guided during the night flights. These lights will mark the various batteries and the balloon depots and they also will be used in signaling the swiftly flying ships overhead. Most of the signaling, however, probably will be done through the medium of the wireless."
