Speaking in behalf of the Admiral, his aide-de-camp, First Lieutenant Chikusuke Shimomura, said: "As you know, our squadron has come to American waters solely for the purpose of training the 185 midshipmen on the vessels receiving naval instruction."

In response to a question, Lieutenant Shimomura said that Japan had under contemplation the construction of more battleships of the Dreadnought type.

Today the entertainment of the visitors will begin in the morning, when under the guidance of the United States and the Japanese colony, the visitors will be shown Council Crest, the City Park and other points of interest.

MEASURE UP WHICH MAY SO AFFECT PORTLAND. Amendment Submitted to Voters at Today's Election to Prohibit Use of Patented Articles.

Can Portland have a population of 500,000 in 1912 when the city is prohibited from availing itself of modern methods of water supply and sewerage disposal?

Prohibit the use of patented articles and competition for or equipment creating a trust in many unpatented lines. Think of the many articles a city must use which are patented.

Anything of consequence is patented. What is not patented or trade-marked is a reversion to first principles and a development or improvement.

ONE FAILURE TWO RECOVERIES. We have the following letter from a physician in one of the Southern States:

"Many thanks for yours of the 8th in regard to the Renal Compound and its uses. One patient, a young lady, fifteen years old, is doing well. No oedema, pulse good, appetite all right, no pain over heart and kidneys, appetite improving, but she is still anemic, although slowly gaining in color."

Physicians all over the United States are beginning to realize that Fournier's Renal Compound is actually getting results in chronic and supposed incurable cases of Bright's Disease. We desire to hear from and advise as to cases not recovering. Literature mailed free.
