

TUCKERS AGREE TO GET DIVORCE

Wife Will Make Application, Husband Not Oppose and Give \$20,000.

SQUELCH ARMY SCANDAL

Mrs. Platt, One Cause of Quarrel, Married Recently—Mrs. Logan and Colonel's Son Chief Peace Advocates.

CHICAGO, Ill. June 25.—(Special).—A truce has been called in the war waged by Mrs. "Dolly" Logan Tucker in the Army and civil courts against her husband, Colonel William F. Tucker, U. S. A., retired, and on Monday of Tuesday of next week the daughter of Mrs. John A. Logan will seek a divorce "by agreement."

Colonel Tucker will not contest the divorce, according to the information conveyed at noon today to Judge Barnes in the Superior Court. The arrangement has been made between Mrs. Logan, Mrs. Platt, attorney for Mrs. Logan, and Leo J. Doyle, counsel for Colonel Tucker.

Give Mrs. Tucker \$20,000.

The terms of agreement have not been made public, but it is understood that Mrs. Logan will receive property interests valued in excess of \$20,000. The effect will be to shut off a further airing of the sensational charges which Mrs. Logan first brought behind the locked doors of the Army retiring board and intended to launch in open court. In one of the depositions already made the name of Mrs. Myrtle Platt, ex-secretary to Colonel Tucker, is mentioned. Mrs. Platt was married a few days ago to Dr. ...

Mrs. Logan Peace Advocate.

"Desertion" will be the plea advanced by Mrs. Logan next to the attorneys for both sides expressed the desire to have the matter disposed of as quietly as possible. It is understood that Mrs. John A. Logan has been the leading advocate of peace. To Captain Logan Tucker, 22 years old, son of the couple, the continuation of the dispute also is said to have been painful. The Tuckers were married in November, 1877. They had one other child, who died several years ago in Washington.

SMOKE CAUSE OF DEATHS

Government Engineer Declares With Its Abatement Many Would Live.

SYRACUSE, N. Y., June 25.—A feature of the session today of the International Association for the Prevention of Smoke, now in convention here, was a letter paper read by H. M. Wilson, an engineer of the technological branch of the United States Geological Survey. In part he said: "No greater step in the conservation movement in the United States could be taken," said Mr. Wilson, "than the utter suppression of the smoke nuisance in our great cities."

"This evil is one of the great dangers of modern times. The damage which smoke inflicts every year in the United States amounts to more than \$900,000,000 in the destruction of merchandise, the defacement of buildings, the tarnishing of metals, the injury to plant life and the greatly increased labor and cost of housekeeping. According to the last report of the National Conservation Commission, 150,000 persons die each year in the United States from tuberculosis and 100,000 are suffering from that disease at the present time. The statement is made that the most favorable hygienic conditions and absence of smoke three-fourths of the deaths from tuberculosis are preventable. As more than one-third of the population of the United States live in cities, the smoke nuisance has become a national pest and as such is now receiving the attention of the National Government. "Altogether the investigations show that the smokeless American city is entirely possible and that it will come when the public conscience is thoroughly awakened to the enormous waste of natural and human resources through this evil."

SCHIVELY IS IMPEACHED

(Continued From First Page.)

quired for the impeachment trial, there is nothing to prevent further prolongation in consideration of miscellaneous legislation. Bills are appearing in both houses. Two were introduced today in the lower branch and five in the Senate, none of which deal with matters of investigation. No concurrent resolution has been adopted. The House today having laid on the table the Nichols Senate resolution restricting legislation to investigation matters and the repeal and modification of appropriation bills. The Senate referred to committee, the House resolution confining work to the investigation.

The impeachment resolution was introduced in the House by Slayden, of Pierce; Benck, of King, and Lambert, of Whatcom. Warm personal friends of Schively who had stood out in the regular session against an investigation, voted silently and deliberately for impeachment today.

Friends Believe Him Guilty.

Schively's name was mentioned only in the reading of the resolution by the clerk, but his actions were referred to frequently during the day in the discussions over continuing the committee.

One of the most striking incidents of the session, and which has caused a change of sentiment among some of the members, occurred in the afternoon, when Beach, of Mason, in speaking on the continuation of the investigation, said with emotion: "You will all remember how I stood in the closing hours of the regular session on the resolution providing for the change of legislation. I believed then that the resolution was directed at one man, and that one man, James Schively, was one of my warmest personal friends. I believed in him and I believed what he told me, but the proceedings of this committee and its report have convinced me that my friend was false. Other matters have come up and the word has gone forth throughout the state that all our state officers are crooked. I believe now that a general investigation is necessary for the protection of those who are innocent of wrongdoing as well as for the punishment of those who have been guilty for a long time."

While the impeachment resolution went through the House in a calm and orderly manner, the Palmer bill in the Senate provoked a heated discussion in the Senate.

One of the principal addresses against

the bill was by Cotterill, of King, who parted from his old friends of the dry line up in the regular session and voted with the Bath faction on this issue today. "This abolishment of office is an attempt at punishment," he said. "This is a short cut to a result, but there is no short cut to justice, which does not defeat justice. Lynch law is never justifiable, and least of all when undertaken by a Legislature. We would be prostituting the highest power of the state to an ignominious purpose. Let us serve notice on the House that we expect it to do its duty and let the court do its duty. We haven't time, it will cost too much. I am prepared to do my sworn duty. Are there imputations that members of this body are to refuse to answer? On sufficient evidence when submitted? We have no right to assume it. But if there are, it is just as much a duty to brand such men and let them stand before the public as it is to brand the Insurance Commissioner."

Paulhamus Is Outspoken.

During the discussion, Paulhamus admitted that impeachment was the proper course, but declared the people wanted Schively out, and that he would always vote against him. Graves criticized Paulhamus for expressing an opinion when he would possibly sit as a judge in a case tried.

"Our committee reports this man guilty. There is no occasion for any member to plead ignorance in this matter," said Paulhamus. "Is Schively found guilty?" asked Potts, of King. "In my judgment, yes," responded Paulhamus.

The disposition of the bill occurred just before the noon recess, and gave

the House ample notice of the Senate's feeling toward abolishment of the office.

The House took up the impeachment resolution promptly at 2 o'clock and immediately sent word to the Senate that it had so acted.

The Senate has authorized the judiciary committee to make rules for the trial, but when the trial will commence is a matter of speculation.

Method of Impeachment.

The House committee of seven will begin at once formulating the articles of impeachment. These articles must be reported to the House and adopted or rejected, and this cannot be done before Monday afternoon. If the articles are accepted, the House then appoints a committee as manager of impeachment proceedings. These managers will appear before the bar of the Senate, state that the House has impeached, that the articles will be exhibited in due time and demand that the Senate order the appearance of the accused to answer. The House as a body has nothing further to do with the proceedings, and the Senate to convict must do so by two-thirds vote of all the members.

ATTORNEY ATTACKS JURISTS

Dewolf, of Tacoma, Insists Supreme Court Should Be Impeached.

OLYMPIA, Wash., June 25.—(Staff Correspondent).—Erging the house to inaugurate impeachment proceedings against every member of the Supreme Court but one, Herbert N. Dewolf, a Tacoma lawyer, sent a communication to the Legislature today setting forth his reasons why this action should be taken. Dewolf declares that the Supreme Court has decided four cases against him in each of which the law and the facts were clearly on his side, and that in one of them the court decided absolutely in direct contravention of the state constitution. He insists that this is a violation of the justness of the office. Dewolf incorporated a letter he had written to the Governor making these charges and also the Governor's reply. Governor Hay suggested that Dewolf submit evidence of misconduct by the judges. He had any. Dewolf tells the Legislature that the evidence is to be found in the records of the cases decided against him. Judge Emmet N. Parker is exempted because he did not participate in the hearings.

Dewolf was formerly City Attorney of West Seattle, and at one time was fined for contempt of court for advising the city officers to proceed with a special election which had been declared illegal. He appealed to the Supreme Court and the court sustained the conviction. The communication was referred to the House judiciary committee.

Both houses today passed Beach's bill making the State Treasurer custodian of all the funds of the state college. In the House, although Todd of Whitman, speaking for the regents, declared they favored such a bill, Beach opened an attack on Frank J. Barnard, treasurer of the college, declaring that Barnard had deposited to his own credit interest collected on the funds, and had turned this interest back to the regents. This was just prior to arrival at Pullman of the investigating committee. Barnard was reported to have been indicted for embezzlement of the interest in his name on instructions from the regents, and not for his own benefit. The bill received but a majority of the vote in the House and passed unanimously in the Senate.

Bills were introduced in the Senate today repealing the Venatche bridge appropriation, amounting to \$200,000, including the interest; repealing the Upper Columbia River improvement appropriation of \$200,000; repealing the extension of Supreme Judges from the primary law provisions; repealing the Metropolitan bill—all measures of the last session. The bill for the Olympic National Bank and the Duwamish waterway bill.

SALOON WRECKED BY BOMB

Thirtieth Missile in Series Does Nearly \$25,000 Damage.

CHICAGO, June 25.—Another bomb, the thirtieth of a mysterious series during the last few years, wrecked the saloon of Marking & Bowles, causing a loss of \$25,000. Windows in a

nearby department store and a restaurant were shattered by the force of the explosion. Michael Vargherbarin, who was asleep at his fruit stand in front of the place, was buried under the debris, but rescued and taken to a hospital. James West, who was passing the saloon sustained slight injuries. Whether the bomb was thrown in the so-called gamblers' war which has charged for, this meant a raise in the price of the saloon, is not known.

graph companies aroused a storm of indignation all over the state and the press is commenting in strong terms on the situation. The Boston Post in an editorial states: "The bill requiring this to be done was passed by the present Legislature. No member of the Legislature in voting for this measure could have had any notion that the telegraph companies would take advantage of a verbal blunder, and in effect raise the rate of a 10-word message about 80 per cent. For the telegraph companies to do this is an insolent defiance of the General Court of Massachusetts, unparalleled in the state's relations with public service corporations. The Legislature, with due regard to its own self-respect and dignity, can do no less than promptly meet and rebuke this extraordinary exhibition of corporate arrogance."

It is entirely clear that the objection of the telegraph companies is not to the expense or trouble involved. A very simple system of code signals would enable the companies to place the time of filing upon their state messages. Two or three code letters over the wire would accomplish the result at nominal expense and trouble.

The real objection of the telegraph companies is that the stating of the time of filing a message would reveal the long

Every machine we sell is guaranteed for ten years—the factory's guarantee and our word to back it. An expert demonstrator is now in our store, showing the superior advantages possessed by the Standard line. 'Twill be a revelation to some to learn how many things can be done with a first-class sewing machine. 'Twill make your work easier in many ways—darning, embroidering, hemstitching, ruffling, hemming—all these things in addition to straight sewing. The Standard Rotary is two machines in one; can be changed from chain to lock stitch in a moment. The Standard Rotary sells at \$40; the Standard Grand at \$35; the Standard Vibrator at \$32.50; the Olds, Wortman & King at \$26, and the Favorite at \$18. Join the club; pay \$5 membership fee, and then \$1 a week until you have paid the balance on your machine.

graph companies aroused a storm of indignation all over the state and the press is commenting in strong terms on the situation. The Boston Post in an editorial states: "The bill requiring this to be done was passed by the present Legislature. No member of the Legislature in voting for this measure could have had any notion that the
