The league changed the system of debates heretofore in vogue and adopt-ed the triangular system of debates followed by the universities of the country. Under this system each high school will hereafter have two teams. An arrangement was also made where-by small schools can combine, two or three together, and put teams in the field on the same hasis as one larger school. No school with more than 25 high school pupils can combine with any other for this purpose nor can more than 75 high school pupils be repre-sented in such a combination of small schools. This will give the country high schools of the state a better chance to compete in the debating schedules. chance to schedules.
