FOREIGN CROP POOR

Continental Hop Yield Placed at 800,000 Cwt.

LAST YEAR WAS 1,100,000

Local Dealers Again Scouring the Country After Contracts-Better Prices Offered - Cantaloupes Are Higher.

A German cable received yesterday stated that the continental hop crop would not exceed 800,000 cwt. Last year the production was almost 1,100,000 cwt. This is the lowest estimate yet received of the growing crop in that part of the world and taken with the low figures at which the English crop is estimated, it has naturally added to the builtsh feeling in the local trade. As a result of the strong foreign advices, a renewed effort was made to secure hop-contracts in this strong to secure hop-

contracts in this state, but without much success, although better than 15 cents was offered. The only transaction closed, so far as could be learned, was one of 200 bales of 1900s in the Independence section, at something over 15 cents. A carload of choice 1908s was offered on the market at 12 cents, and a little business in 1900s was reported, though the terms were not learned. Julius Wolf, of Silverton, who was in the city yesterday, does not believe the rain has benefited the Oregon crop as much as

some people think. He considers 60,000 to 70,000 bales a fair estimate of the crop. A bet of \$50 was made at the Belvedere Hotel yesterday that the market would not reach 22 cents by the first of the year. Adolph Heller, of Prague, Bohemia, writes under date of June 21, of crop conditions there:

The prospects for a good hop crop on he continent are at present not very cheer-ul. In the Bohemia districts the plant ful. In the Bohemia districts the plant has only in some parts made a good progress in growth, but the majority is on account of the ungenial weather, still more or less backward, and in many instances it looks like hopeless. Besides that, the plantations swarm with vermin and the danger of their going into a black blight is imminent. Washing has so far not proved effectual, as the fly reappeared in swarms. From the Bavarian district, Wurttemberg and Baden, very similar complaints are to be heard. In large areas the plantations are also slack of bine and the increase of flyblight gives cause for serious apprehensions. In Almace the plant is better forward in growth, but also infested with vermin. The markets have stiffened considerably. The prices for Sazi hops have advanced fully ten kronen and these for other Bahemian sorts five to eix krenen. The Nuremberg market is also firm with an advance of 5 to 8 marks for common and medium sorts. mmon and medium sorts.

London trade circulars, bearing dates of

July 21 to 23, may, in part: Wilde. Neame & Co.—In spite of grow-ars' efforts there is still a very severe at-tack of aphis on the plantations. Our market continues firm, and values unaltered.

W. H. and H. Le May—The market tends upward. There is a persistent attack of aphis in the plantations. Stocks are small, and the present acreage is not sufficient to

The Exchange and Hop Warehouses—
There has been very little business passing during the week, there being so few samples on offer to select from. Plantation reports show that fly and lice and vermin generally are becoming very serious, most of the plantations being affected, washing having been resorted to to keep down the pest. The bine has grown fairly freely, but is very unsven and requires more sunshine.

sufficient for the demand and everything cleaned up at former prices. Tomatoes continue scarce and were re-ported firm at \$1.50@1.75 for Southern stock. Some hothouse tomatoes were of-fered at 124,015c a pound. Beans were eaker, at 6 cents. Hothouse lettuce was a drug on the market.

GRAIN MARKET IS LIFELESS. Weekly Wheat Shipments Reported by Mer-

grain was light and offerings were very small. As far as new crop business is co corned, buyers and sellers are too far apart to accomplish anything.

Bright Outlook for the Cereal Crops. Buyers Arriving in the Larger Markets-Decrease in

NEW YORK, July 2 —R. G. Dun & Co.'s weekly review of trade tomorrow will say:
No one can now question the substantial character of the revival in the iron and steel trade, which is rapidly rising to high water mark. The output of the principal producer has already reached within a moderate percentage of full capacity and ralleads, as well as builders in leading branches of construction work, are in the market with their orders.

This wonderful change in a short period in the activity of the greatest manufacturing industry of the country, the bright outlook for the crops, that of corn giving promise of an unprecedented yield: the cheapness of money, and the fact that the tariff bill has been passed by the Senate; these are the conspicuous features of the business situation.

ALL MONTHS ARE FIRM

Market Ignores the Flattering Crop Statistics Given Out by the Department of Agriculture. Advance in Corn.

CHICAGO, July 2.—Grain prices advanced sharply on the Board of Trade today, notwithstanding the flattering crop statistics given out by the Department of Agriculture yesterday. The advance in wheat began soon after the market opened, after which the tone was weak, owing to solling based on improved weather conditions in the Winter wheat beit. The July and September options manifested the greatest firmness, the former delivery at one time being up to 2%c from the low point of the day. The distant deliveries made only a faint response to the strength of the July option, being held back by the bright outlook for the new crop. July ranged between \$1.14%.

An advance of 2%c in the price of July and \$1.17%.

An advance of 2%c in the price of July was the feature of trading in corn. The range for that delivery was between \$9%c and 72c.

Conditions in the cats market were similar to those in corn. July scoring an advance of 1%c.

Frovisions were firm all day. Prices closed unchanged to 15c higher, compared with yesterday's final figures.

The leading futures ranged as follows:

Lemons Advance to the Portland Quotation - Country Produce

Firm-Berries Weak.

SEATTLE, Wash., July 9.—(Special.)— Lemons were advanced another 50 cents per box today, making the top quotation \$7. Today's advance puts the Scattle mar-ket on a par with that at Portland. Lemon stocks here are not short. Berries were weak today. Yesterday's supply was not entirely cleaned up and re-

celpts today were somewhat heavier than Thursday. Prices ranged from \$1.50 to \$1.75 for common stock. Currents are in good demand but scarce on Western avenue. Cantaloupes were quoted higher all around today. Watermelons are moving better since high-grade stocks commenced

Butter, eggs and cheese were firm all day. The feature of the butter market is the heavy receipts of Eastern butter. The advance in Washington butter had been so closely foreseen for some time that large shipments of Eastern have been shipped

Poultry stock will be well cleaned up to-morrow night. Veal is very firm. Good veal sold as high as 11 cents without dif-ficulty. The strength of the market is due to the absence this week of range veal.

Wheat was from 1 cent to 1½ cents higher on the local exchange this morning, with oats and barley also up 50 cents at the close. September and October bluestem opened at \$1.03 bid and closed with bids of \$1.04. Sales aggregating 19,000 bushels of bluestem for September and October delivery were reported. A few new California oats have reached this market, but owing to the scarcity of old oats and the owing to the scarcity of old oats and the excellent demand, the new stocks sell at close to old oat prices.
