

BRIDGE MANAGED IS BROUGHT TO LIGHT

Diver Hunting for Remains of Peter Lundfall Finds Body of Another.

IDENTITY IS NOT KNOWN

Corpse of Man Drowned From Launch Also Recovered by Hugh Brady—Gus Danson, Owner of Boat, Fined \$200.

Gross evidence of an untold tragedy of the waterfront was brought to light yesterday afternoon when Hugh Brady, the veteran diver, feeling about him for the body of Peter Lundfall in seven fathoms of water off the Ash-street dock, brought to the surface a piece of human flesh from another body that lay buried and held down by the river sands.

Soon afterwards the diver recovered the corpse of Lundfall a short distance from the spot where the other body was lying. But though he later went down several times, Brady's efforts again to locate the first body were unavailing. The diver told Captain Speier, Harbormaster, who stood by in his launch to render assistance, that there was no doubt that some person had been drowned in the river there, and that instead of rising to the surface after nine days as usually happens, the body had been weighted down by drifting sand and silt. By some strange trick of fate, Lundfall was drowned and sank to almost the same place.

The piece of flesh brought up by Brady evidently came from a body that had been in the water for several months. Brady and Captain Speier will try to recover it today.

Lundfall was drowned in a collision between the steamer Hunter and a launch owned by Gus Danson. When he was brought up by Brady, Lundfall had a beer bottle opener tightly clutched in one hand. Coroners' jury will not hold an inquest. Members of Eugene Lodge, No. 275 of the Eagles have sent word that they will arrange for his funeral services and burial. Collector of Customs Malcolm yesterday exonerated Captain Campbell of the Hunter from any blame for the accident, and fixed Danson's launch owner \$200 for being on the river after sunset with his lights not lit as the pilot law requires. Danson had a hearing before the Harbormaster and admitted that his lights were not lit when the accident occurred. Under the laws, the launch itself is seized and held by the collector until the fine is paid, regardless of who the owner may be.

PORTLAND SHIPS 10 PER CENT

Fifth for Year as Wheat Exporting Center.

Ten per cent of all the wheat shipped from the United States during the fiscal year ending June 30, 1909, was exported from Portland according to statistics released at the Custom-House yesterday from the Department of Commerce and Labor. From the whole United States, 62,479,211 bushels were shipped, of which Portland contributed 6,356,023 bushels, compared to only 4,034,714 from the combined Sound ports.

Last year Portland exported 15,411,581 bushels and stood second as a wheat-exporting center, whereas this year it is only fifth. The drop can be accounted for, however, by the heavy wheat shipments made from here to the interior of the country. The Portland port last year shipped 11,666,273 bushels, this year's shipments being little more than a fourth of that amount.

Here is the standing of the principal ports for the fiscal year: New York, 15,204,451 bushels; Philadelphia, 8,231,227 bushels; Baltimore, 7,243,790 bushels; Galveston, 6,356,023 bushels; Portland, 6,356,023 bushels. The total export was 62,479,211 bushels, compared to 10,412,181 bushels for 1908. Flour shipments also showed a slight decrease. The whole country shipped 10,463,700 barrels, as against 13,513,367 bushels in 1908. The value of the exports for the year is placed at \$19,063,216.

LAST FLOUR SHIPMENT READY

Henrik Ibsen Will Take 1000 Tons to Hongkong.

When the Norwegian steamship Henrik Ibsen, one of the new liners engaged by the Portland & Seattle Steamship Company to replace the German steamers formerly plying on the run between this city and the Orient, arrives in port this latter part of the week, it will find awaiting it a consignment of 1000 tons of flour to Hongkong. This is a very unusual shipment for this season, when flour exports are always dull, and particularly at this time, when the market is more dull than ordinarily, agents of the steamship company said yesterday.

This 1000 tons will be positively the last shipment of flour to Hongkong for a larger amount of flour than has been shipped from all the Sound ports combined in a month, and gives further evidence of the partiality which larger shippers feel towards Portland as the logical harbor and shipping point on the Pacific Coast.

The Henrik Ibsen is expected tomorrow or Friday, and among other things it will bring a quantity of gunnysacks. The Henrik Ibsen will take the place of the Namastika, which is to go to New York.

SCOWWELLS MUST MOVE

Ladd Will Clear Waterfront at East Main Street.

Scow-dwellers on the waterfront property adjoining the foot of East Main street, which belongs to William M. Ladd, were ordered to move from there by Mr. Ladd yesterday. Mr. Ladd's action is in accord with the efforts of Harbormaster Speier to compel scow-dwellers to move to the waterfront outside of the harbor limits. This, it is said, would remove a decided source of filth and disease.

It was said yesterday that D. C. O'Reilly, president of the Oregon Round Lumber Company, is intending to build a dock on property owned by him near that of Mr. Ladd's. The site is between the Morrison and Madison-street bridges and would be a good one for a large dock.

Lighthouse Inspector Here.

Captain H. T. Mayo, naval secretary of the Lighthouse Board, with headquarters in Washington, was in Portland yesterday in the course of a tour of inspection of Pacific Coast lighthouses. Captain Mayo recently inspected the San Francisco district and will probably leave for a trip about the Sound today.

THANK YOU TO TEACHERS

Catholic Institute Continues Its Sessions.

SHAKESPEARE EXPLAINED

Brother Leo's Address Deals With Instruction in Famous Plays.

Dr. Haaren Continues Lecture on Phases of Education.

The lecture, "How to Teach Shakespeare," by Brother Leo, of St. Mary's College, Oakland, Cal., to which many teachers and lovers of Shakespeare had been looking forward with interest, was delivered yesterday morning at the Catholic Institute, in session in the Christian Brothers' College. In the course of his lecture, Brother Leo gave an analysis of several plays, including Macbeth and Hamlet, by way of illustrating his own method of teaching Shakespeare in the classroom. He said, however, at the opening, there was no hard and fast rule of teaching Shakespeare, and there are certain broad and fundamental principles that may be used with advantage.

The best way to teach Shakespeare, he held, was from the viewpoint of the student. In some ways the same as Longfellow is taught, but it should be kept in mind that Shakespeare is in a class by himself and must be studied as such. The speaker said the writing of Shakespeare must be regarded as a human document, true to life, and to study the plays with profit these methods are helpful. First, the student should know the part of the students; second, the student must have a knowledge of the play studied as a whole; third, the student should study the play as a whole; fourth, the student should study the play as a whole; fifth, the student should study the play as a whole.

MISS JEWEL HOME AGAIN

Concludes Arduous Motor Trip With No Serious Accident.

Wind-burned and weary, but jubilant over her accomplishment and return to Portland, Miss Isotta Jewel, the popular leader of the Baker Stock Company, of this city, accompanied by her mother and younger sister, Hazel, and Mrs. J. W. Beakley, chugged into Portland at 7 o'clock last evening and completed an automobile tour embracing 500 miles along the north coast.

The party left Portland one month ago today. Upon arrival at Seattle, after various experiences with the uninviting country roads, Miss Jewel left the other members of the party to "do" the A-Y-P Fair while she sailed for a short sojourn in Alaska. She spent two weeks in Sitka and Skagway before returning to Victoria, B. C. In the interim the large Selden touring car had been sent to that city and a tour of Vancouver Island was made by Miss Jewel's mother and Mrs. Beakley, with Miss Hazel at the wheel. Upon Miss Jewel's arrival at Victoria, the party left for Vancouver, B. C., where the party's journey via auto was begun southward.

"We had scores of hair-brained escapades," said Miss Jewel, "but it was jolly good sport and danger was past. We were directed a number of times, but always managed to escape without injury."

"Yes, it was a grave undertaking for four women," but she said after a moment's reflection, "I'll readily make the trip again, just because—because it was so beautiful."

The car, which was a Selden four-passenger touring design, appeared bedecked in the pennants and banners boosting Portland, which were adjusted before their departure.

Mrs. Emily Treat, of Hannibal, Mo., is said to be the first woman to employ a scow-dweller in Portland. She has just returned from a tour of inspection of Pacific Coast lighthouses. Captain Mayo recently inspected the San Francisco district and will probably leave for a trip about the Sound today.

TEN YEARS OF SCALP ERUPTION

Tiny Pinhead Pimples Filled and Hurt Tremendously—Tried Everything in Vain—His Daughter's Scalp was Crusted—Both Found

Simply Surprising Cure in Cuticura

"It is a great pleasure for me and I consider it a duty to inform you what Cuticura has done for me. About twelve years ago, I contracted an eruption of the scalp consisting of small pimples, about the size of a pinhead, which filled after a few days with pus which hurt tremendously. I tried everything, but in vain. Finally, I washed my head with sulphur and applied a cooling ointment. After a few days the pimples disappeared, only to come back again in a week. This I suffered for ten years and then I saw an advertisement in the paper of the wonderful cures by Cuticura. I bought a cake of Cuticura Soap, a box of Cuticura Ointment and a bottle of Cuticura Pills and after three weeks I had used every half the Soap and Ointment and my head was as clean as ever before. After the first application it was simply surprising how it improved. I used Cuticura Soap and Ointment and after having used them three times my head was clear and the hair became as soft and fine as silk. Since then I use nothing but Cuticura Soap for shampooing."

In consequence of my having used Cuticura Soap for shampooing, I noticed that my hands which almost always were cracked from handling undressed wood, lime and stone, became white and velvet. Formerly I used glycerine, but one night's treatment with Cuticura Soap and Ointment does more for my hands than a week's treatment with glycerine. I hope all suffering people will at least try the Cuticura Remedies. Herman Becker, Field, Wis., November 9, 1908.

MERCURY AT 78.5 DEGREES

Weather Bureau Shows Usual Estimates Incorrect.

The weather was warm all right yesterday, but it was not nearly so warm as a great many persons thought it was. The weather man's records showed that the highest official temperature reached by the thermometer was 75.5 degrees. Unofficially it was anywhere from 5 to 10 degrees hotter than that in the street. Last Saturday with its 84 degrees still stands as the warmest day of the season so far.

Anyway we are due for a period of nice weather from now on. Forecaster Beak's reports yesterday showed that with the exception of a little patch of map in Southeastern Idaho, where it was trying to rain and thunder and cut up generally, the weather was as bright as you please all over the Coast. And the indications are it will keep that way for some time to come.

Here are the official figures showing the hourly temperatures yesterday:

Hour	Temperature
6 A. M.	54
7 A. M.	56
8 A. M.	58
9 A. M.	60
10 A. M.	62
11 A. M.	64
12 Noon	66
1 P. M.	68
2 P. M.	70
3 P. M.	72
4 P. M.	74
5 P. M.	76
6 P. M.	78.5

DAVE LAMORA, RELEASED FROM ROCKPILE MARRIES FRANCES MYERS.

Dave Lamora, compelled for six months to break up with Kelly Butte is now a free man by virtue of a pardon from Governor Benson. Better still, he is married. Circuit Judge Hronaugh pronounced him yesterday morning the husband of Frances Myers 23 years old.

Lamora walked bashfully up to the marriage license counter yesterday morning, naively holding the hand of his bride-to-be, and in a low tone asked Circuit Judge Hronaugh for a marriage license. When told that he must have a witness, Lamora left the office, but returned a moment later with Attorney Logan, whom he met in the hall. "Jim," said the bridegroom, "I hope you will indicate that this was your pet name for him, 'what are you going to do with a wife?' But 'Jim' was busy answering the questions of Deputy County Clerk Rose. Lamora had served half his time in the County Jail when released.

Buying Up Phone Systems.

VALE, Or., July 20.—(Special.)—J. C. Stinsel, manager of the Independent Telephone Company, and E. A. Clark, cashier of the Caldwell Commercial Bank, are in Vale looking over the situation relative to buying the local telephone and installing the independent system. Mr. Stinsel recently purchased the Ontario telephone from the Independent Company. He now proposes to connect

Many Women Have Diseased Kidneys

And Bladder Troubles Who Suffer Endless Torture, Without Knowing the Nature of Their Ailment, or Its Cause.

This is because women are told that their every sickness is due to "ailments of their sex." The notion that to cure a woman's ailments, it is only necessary to treat the distinctly feminine organs, is one that has caused much unnecessary suffering.

The tortures and discomforts of weak, lame and aching back, swollen and bloated feet and limbs, nausea and fainting spells, lassitude, despondency, sick headaches, painful, scalding sensation, inflammation, etc., are invariably due to ailments of the kidneys and bladder, and unless there is proper healing and curative treatment for the organs, which are diseased and out of order, there can be no cure of the woman's ailments. For the cure of these conditions—and as a safeguard against even more serious and fatally dangerous diseases—there must be a thoroughly good and effective kidney and bladder medicine.

DeWitt's Kidney and Bladder Pills act at once—and with the most beneficial results—on the organs in question—insure prompt and permanent relief in every case where the disease has not been too long neglected. These pills must be depended upon to do all that is claimed for them.

They are thoroughly antiseptic—surprisingly healing and cleansing, purifying, and reconstructive in effect—and containing no opiates, narcotics, or other harmful substances, may be taken in perfect confidence.

Thousands of women all over the United States gratefully affirm the marvelous efficacy of these Pills.

DeWitt's Kidney and Bladder Pills are put up in air-tight, sanitary, glass containers (to preserve their full strength and curative qualities) and are sold by all druggists, at 50c and \$1.00 a box.

They are pleasant to take, and can in no case work injury to the system—as syrups, alcoholic, liquid preparations are apt to.

E. C. DeWitt & Co., Chicago, Ill., want every man and woman who have the least suspicion that they are afflicted with kidney and bladder diseases to at once write them, and a trial box of these Pills will be sent free by return mail postpaid. Do it to-day.

DISORDERS OF MEN Cured to Stay Cured

BY THE St. Louis Medical Co.

MEN

If you are seeking the service of Skilled Reliable Specialists

You Should First Come to Us, Because We Can Show You the Way We Will Treat You and the Reasons Why We Are Satisfying Our Patients That Our Treatment is Different from Other Treatments.

It is astonishing to us, as well as our patients, that so many men we treat and diagnose in a short time cure ailments which had been without different physicians and specialists before coming to us, without getting more than temporary benefit, if any benefit at all. It does seem that any doctor might have cured them if the trouble announced to "but little." It is, of course, experience in specialization that accounts for the great work we are doing, and while many doctors claim to be skilled and blow a big horn, they do not make good when called upon.

We have investigated and tested all known methods for the treatment and cure of ailments of the men, which gives us the right to state with confidence that the true—between shallow pretensions and sold worth—between substance and shadow, musty and ancient theories and methods cannot stand out against our advanced method of treatment against progressive medical science and indisputable evidence of hundreds and hundreds of cases cured. All that can be accomplished by expert skill, vast experience and scientific office equipment is now being done for those who apply to us for the help they need.

We will treat some of your diseases for as low a fee as \$5. We will make you an exceptionally low fee on any disease you may be suffering from.

You should take advantage of this offer when it is made by the St. Louis Medical Co., because if you are a resident of this locality you know we have been located in Portland a long time and have the reputation of being the most successful and reliable specialists treating diseases of men.

FREE! CONSULTATION AND EXAMINATION. IF YOU LIVE OUT OF TOWN WRITE FOR SYRUP, PILL, OR CURE. OUR ADVICE FREE.

HOURS—8 A. M. TO 5 P. M. SUNDAY, 10 TO 12.

ST. LOUIS MEDICAL DISPENSARY

CORNER SECOND AND YAMHILL STREETS, PORTLAND, OREGON.

CONTRACTED DISORDERS

Be sure your cure is thorough. Not one of my patients has ever had a relapse after being discharged as cured, and I cure in less time than the ordinary forms of treatment require.

VARICOSE VEINS

Absolutely painless treatment that cures completely in one week. Investigate my method. It is the only thoroughly scientific treatment for that disease being employed.

My treatment is absolutely painless, and perfect results can be depended upon in every instance. I do not cut or injure a patient's confidence in his ability, though he cannot, without fear of injuring a patient's confidence in his ability, recommend the service of a specialist instead of his own.

There is no economy in employing an amateur to do an expert's task. Nine times in ten failure follows. In a large percentage of instances the result is harm. He doesn't treat enough cases to learn a great deal about them. His time is so fully occupied in treating a full assortment of human ills that he has no time to devote special study to any particular branch of practice. Most diseases are sufficiently simple as to require no special training other than that received in the medical colleges and in every instance. I do not cut or injure a patient's confidence in his ability, though he cannot, without fear of injuring a patient's confidence in his ability, recommend the service of a specialist instead of his own.

Twenty-five years of successful practice as a Specialist in Men's Diseases justifies every claim I make. I promise my patients a complete cure in every instance, and in cases where I cannot safely make this promise, I positively refuse to treat.

A WARNING

There is no economy in employing an amateur to do an expert's task. Nine times in ten failure follows. In a large percentage of instances the result is harm.
