CZAR GREETED BY **BRITONS AT COWES**

Russia's Ruler Meets King Edward While Guns Roar Out Noisy Welcome.

ROYAL VISITOR GUARDED

Battleships, Patrol Boats and Hundreds of Sleuths on Hand to See No Untoward Incident

Mars Ceremonies.

COWES, Aug. 2.—The first official visit of Emperor Nicholas to England was one of the most impressive spectacular events of the most impressive spectacular events
that Cowes, accustomed to naval pageantry, ever witnessed. King Edward, with
most of the members of the royal family,
put out today on the royal yacht Victoria
and Albert, and met the imperial yacht
Standart and the squadron of warahips
accompanying it, off Spithead. Emperor
Nicholas immediately went on board the
British royal yacht, where he was greeted
by King Edward.

British royal yacht, where he was greeted by Elog Edward.

After luncheon, the Russian squadron, with the Victoria and Albert leading the way, passed along the British lines, the monarchs reviewing the British feet. The British had 150 ships aligned in three files between Cowes and Spithead, 26 battleships, of which seven were Dread-noughts, 48 torpedo-boat destroyers and submarines. Besides the warahips, there were hundreds of yachts of all types.

Deafening Salute Fired.

When the Russian squadron started its cruise of inspection the warships fired a salute of 21 guns, which made a tremen-dous din. All the British bands played the Russian national authem and the crews of both nationalities gave three theers for each other.

King Edward. Emperor Nicholas and the Prince of Wales, and a number of leaser officials were on the bridge of the imperial yacht Standart. Crowla lined the waterfront for miles,

The yacht races lost their interest, as every one was absorbed by the visit of the Russian imperial family. The measures taken to safeguard Em-

peror Nicholas made him seem like a prisoner of state when compared with other royal personages who have visited Cowes during the regatta week. The Standart dropped anchor between two battleships, which were surrounded by other naval vessels, while stakehoats pa-trolled about the visitor.

Sleuths Watch Czar.

Scotland Yard had 100 detectives at Cowes, and the Russian police had an equal number. The Emperor will remain aboard ship during his visit, except for a brief trip as host to the Cowes committee Wednesday morning. Three American yachts are in the

The unusual welcome of this morning was arranged designedly for the double purpose of helping to strengthen the links in the chain binding Great Britain, France and Russia in a triple entente and to dissipate continual ill-feeling engendered by the harsh denunciation of Emperor Nicholas and his methods so frequently vented by the members of the Labor party both in and out of Parliament since the coming of the Emperor first was announced.

first was announced. The dinner aboard the Victoria and Albert was brilliant. Besides the King and the Queen and the Emperor and Emand the Queen and the Ended and the press, the guests were the Crown Prince and Crown Princess of Sweden, the Prince and Princess of Wales, the Duke and Duchess of Connaught, Premier Asquith, Sir Edward Grey, Reginald McKenna and M. Iswolsky.

Japan's Ruler Alone to Decide What Will Be Manchurian Policy.

TOKIO, Aug. 2.-After long considera-tion of the difficulties existing between

Japan and China as to the status of the former nation in Manchuria, Foreign Min-ister Komura submitted the entire mat-ter to the Emperor this morning. This move had been expected before the end

of July.

Advices to the Hochl, received today, are to the effect that Chima is sending a large body of troops secretly into Chienko, but this report is not credited here.

The Japanese newspapers have followed the foreign policy in China with keen interest, and some of them recently have terest, and some of them recently have struck an alarmist note. It was expected, said the Kokumin, the mouthpiece of Marquis Katsura, that the withdrawal of the proposal to refer to the Hague arbitration tribunal the differences between the two countries, preceded the adoption of what was hoped would be a conciliatory policy by China. The latter, however, proposed terms considered by the Japanese government as wholly unacceptable, and refused to comply with Japan's request for reconsideration.

Large Dirigible Balloon to Aid Navy and Balloons and Airships for Experiment - Must Rise to Great Heights.

LONDON, Aug. 2.—The subcommittee of the imperial defense committee, appointed to consider matters of aviation, has given a verdict in favor of rigid dirigible balloons for naval purposes and non-rigid balloons for the army. The aeroplane committee considers that these machines possibly may become valuable to the Army, but says they must be able to ascend to a much greater height than has been achieved before they will be safe for reconnoitering purposes.

War Secretary Haldane announced in the House today that the Admiralty had ordered a rigid dirigible of the largest type from the Vickers, and that the government factory at Aldershot was busy with the construction of three non-rigid balloons and two aeroplanes for experimental purposes.

BRIDGE PLANS ARE READY

New Steel Span Great Improvement Over Old Structure.

Plans for the new bridge for the Harriman lines across the Willamette River, to replace the old Steel bridge, are so nearly completed that the propesition will be submitted for its approval to the Port of Portland Commission at its meeting Thursday. Though the matter has not been definitely settled, the railroad will probably adopt a bridge of the Waddell type, somewhat like the new Madison bridge. It will be a double decker, with the railroad occupying the lower deck and streetcars and the general public the upper. The lower deck is arranged to raise snugly beneath the upper one by a series of telescoping columns.

With such a type of draw, all but the larger steamboats and vessels with masts will be able to pass under the upper deck. sition will be submitted for its approval
