# JOSEPHINE MINE SHOWS PLATINUM

W. H. Ramsey Believes He Has Made Rich Find on Slate Creek.

#### ORE ASSAYS \$175 TO TON

Two Claims Are Staked Out and De velopment Work Will Begin at Once-Finder May Become Millionaire.

GRANTS PASS, Or., Aug. 31.—(Special)—W. H. Ramsay, who owns two claims at the head of Siate Creek, 23 miles from here, has made a platinum discovery that is a revelation to miners of Southern Oregon, and will make Rama minionaire if the prospects pan 

cameay has found that among his gold diggings platinum is to be found in quantities that will be available for commercial use. He has had the ore assayed by a local assayer and finds that it goes \$176 a ton in platinum.

"I went into State Creek district to locate and mine After progressing." locate a gold mine. After prospecting awhile last September, I took up two claims that looked very good to me,"

#### Finder Is Jubilant.

said Mr. Ramsay

I did not expect anything unusual, as mining at the most is very uncer-tain, but when you do strike the metal it makes a person feel jubilant. After staking out these two claims, I did the required assessment work, and up until last week I had a shaft sunk 12 feet. with about 20 tons of ore on the dump, and as I noticed other metal would appear, I concluded to have the mine properly assayed for other metals than gold, and this week I brought in a fair sample, with the results that I have a good

ple, with the results that I have a good platinum mine.

"The voin will average four feet. The mine has always paid good for the amount of work developed, and I never anticipated it would turn out platinum, as it is found only in certain foreign countries, and usually sells from \$22 to \$34 an ounce. I do not know what the value of the mine is, but it ought to be at least a half million, but as soon as I develop it a little more I will then be able to size up the situation. this in size up the situation.

#### Friends Thought Him Foolhardy.

Tam going to have the mine resurveyed as it has become too valuable not to know the exact boundaries, according to a surveyor's report. I was ridiculed for going up to the head of Slate Creek, and mining men said there was nothing there, but I have found just what I consider a good thing. I have been in the mining business for about ten years and own interests in several companies. I prospected and located 12 claims for the Queen Gold Mining Company and 21 claims for the Buckeye Minning and Smelting Company, but these two claims are ahead of anything I ever found or expected to get. But luck is found or expected to get. But luck is

### Many Filings Made.

Besides the strike by Mr. Ramsay, the general tone of mining business is look-ing up, and capital is feeling its way into the mines by having men to stake out claims in every mining portion of the south end of the county. KINGS HILL SURVEY IS NOW UNDER WAY.

Manager Bradley States That Water Will Be Placed on 20,000 Acres of Idaho Land.

GLENNS FERRY, Idaho, Aug. 31 -(Special.)-The engineering crew of the Kings Hill Extension Irrigation Company, head-ed by R. S. Fesenden, chief-engineer, started work this morning upon the perstarted work this morning upon the permanent survey of the canals of the company. The Slick Brothers' Contracting Company started Monday, moving their camp to the Gienns Ferry side of the river, and it is stated by L. G. Bradley, manager of the company, that actual construction will begin within the next two or three days.

The Kings Hill Extension Irrigation Canal will irrigate between 16,000 and 20.

Canal will irrigate between 16,000 and 20,000 acres of the lands lying along the Snake River bottom between Glenns Perry and Medbury. The system when completed will bring 100 second feet of water from the Malad River, carrying it in immense siphons twice across the great canyon of the Snake River for a distance of something like 50 miles. There will also be constructed two immense dams, making storage reservoirs with 30,-000 acre feet capacity to conserve the spring flood waters of the five creeks which drain the high Bennett Moun-

tains.
Mr. Bradley states that the construction will be rushed from now on and that it is contemplated to have the en-tire system complete in time to deliver water for next season's trrigation. This system, it is estimated, will cost in the neighborhood of \$650,000 and is one of neighborhood of \$650,000 and is one of the most difficult pieces of construction that has been undertaken in this country.

The "Safe and Sane" way to buy a piano is to deal with a reliable house-select a good instrument and pay for it on such terms as is consistent with good judgment and fair alike to buyer and seller.

By so doing you pay for what you get and get what you pay for. No merchant, unless he conducts a "shell game," can give something for nothing without in some way having a string attached to it, and at the other end of the string there is usually a hook to eatch suckers. If it were not so could Mr. Merchant long remain in business and pay his exorbitant rent, his high salaries, his extensive advertising, etc., with "everything going out and nothing coming in"? Could a factory sell a dealer a piano and accept in payment thereof a worthless piece of paper called a "credit check," "coupon," "gold bond" or other alias, instead of the cold cash?

If dealers could pay for their pianos that way we would order the entire output of the fourteen different factories we represent, get some "coupons" printed and send them back in full settlement of the accounts—keeping the good old gold coin here. But that's a "pipe dream," friends.

If we cannot, as a purchaser, go to some other city and buy at retail some of the same make of pianos now being offered by Scheme Houses in this city-and buy them for less than the balance after deducting "credit checks," etc.—we will forfeit one of our superb "APOLLO" "88" NOTE PLAYER PIANOS.
