Harriman Line Plans Another Move in Speed War From East.

SEEKING MAIL CONTRACTS

Plans Under Way for Fastest Train Ever Run Over the Same Distance-Would Cut Schedule Fourteen Hours.

LOS ANGELES, Sept. 7 .- (Special.)-The transcontinental speed war for mail control, precipitated by the Santa Fe when it offered the Postoffice Department a train that would reduce the time from Chicago to the Coast at least ten hours, assumed an interesting new phase today. This development is that the Southern Data to the Coast and the Southern Chicago to the Coast at the Southern Chicago the Coast at the C rific has determined to put on a seven coach all-steel mall train with Atlantic

ee mound locomotives between San Francisco and Chicago.

The operating department of the Southern Pacific, through the office of Assistant General Manager Calvin, of the Oregon Short Line, W. H. Bancroft, of Salt Lake, and the Union Pacific, A. L. Monier, of Omaha, are figuring out a schedule that is to reduce the running time 14 hours. The train will be known as the Pacific Coast Fast Mail.

at once after the meeting and hurrled to Arden. He reached the Harriman home shortly after 9 o'clock. His burrled trip, it was believed, must have seen the result of disquieting news from the Harriman household.

The portion of the New York statement which spoke of Mr. Harriman's business enemies gained special significance this afternoon when it was carned that certain Wall street interists have a representative here whose only duty s to report on what tran-

MARKET IS READY FOR BLOW

Speculators Prepare for Emergency if Harriman Dies.

NEW YORK, Sept. 7—(Special.)— The condition of E. H. Harriman's health again became the chief consideration in the stock market. The Labor eration in the stock market. The Labor day holidary of 1905 long will be remembered as one which developed an opening break of more than five points in Union Pacific shares. At no time since it was Jearned yesterday that Mr. Harriman had suffered a relapse, has Wall street felt assured about his health. Certainly the statement made by Mr. Harriman's attending physician, which concluded with "we are hoping for the best," was of a character to encourage grave concern, and acter to encourage grave concern, and tonight many usually well-informed people in Wall street are prepared at any time to receive the announcement

any time to receive the announcement that the end has come.

There is certainly much speculation as to the effect Mr. Harriman's demise would have on stock values, and it is generally believed that the large interests are prepared to give determined support to the market in such an event. The buying of United States Steel common was of the same gilt-edge character as that which was observed all during the market shakeup caused by fears which sprung up about the time Mr. Harriman boarded the steamer to return home. There was a report toreturn home. There was a report to-day that Standard Oil interests were selling steel while the Morgan follow-ing were buying it, but this could not be confirmed.

CAUSE OF HARRIMAN'S HANESS

Operation Delayed and He May Go to San Antonio.

NEW TORK, Sept. 7.—An intimate friend of E. H. Harriman, discussing the relapse that occurred Saturday, said today: "I think the time has now come when the public should understand the nature of Mr. Harriman's As you know he is not stone." idness. As you know, he is not strong and very nervous, and of course he has been loaded down with tremendous responsibility. Last year there developed a difficulty at the points where the stomach enters the intestines. This is sometimes called a rhounantly hard agreetiness the intestines. matic knot, sometimes rheumalism and sometimes indigestion. Mr. Harri-man, under the advice of his physicians, went to San Antonio and camped near the hot wells. These wells have a temperature of about 110 degrees Fahrenhett and are strongly impreg-

Fahrenhelt and are strongly impregnated with sulphur.

Then when he returned to New
York, while he was much improved, his
physicians concluded it would be best
for him to go to Bad Gastein. This he
did, accompanied by Dr. Lyle. At Bad
Gastein things went very well, save
that Mr. Harrman lost weight rapidly
and at the end weighed 10 pounds less
than he did at the beginning. He then
went to Vienna, where he was examined by Dr. Kovek, the most noted
diagnostician in Europe.

Street took advantage of Mr. Harriman's absence and made a raid on his property, assuming that his career was over. Drs. Lyle and Kovak, after considering the matter carefully, felt that the best thing for Mr. Harriman to do was to return to the United States. It was all very well to tell him to let business alone 4000 miles away with his enemies struggling to unhorse him. This was impossible. His physicians found there was no necessity for an immediate operation, and they thought that, if he came back to United States and went to Arden, he would be in intimate touch with his affairs.

"Acting on this advice, Mr. Harriman returned. The voyage was not a good one and he arrived in New York very weak, but with tremendous courage. After an investigation physicians confirmed Dr. Kovak's view that it was unwise to operate at once, Mr. Harriman made up his mind to go back to San Antonio Hot Wells and last week made arrangements to do so. Later he had Dr. Frank Billings, of Chicago, diagnose the case. Dr. Billings confirmed all the physicians that had preceded him. The rumor that epithelioma has developed is not warranted."

After the openins, vigorous support was exerted and prices railted. Within a few minutes an anrailied. Within a few minutes an announcement was forthcoming from the Union Pacific offices that Mr. Harriman was much better, and the appearance of the market became quieter. The market turned very weak in the last 10 minutes of trading on reports circulated in Wall street that Mr. Harriman's citality was very low, causing grave anxiety among the relatives and friends.

Another wave of selling orders flowed of the into the market in the last hour and turned prices downward again after there.
