At that time, Mayor Simon, members of the committee and other distinguished men will occupy seats on the platform, includ-ing Consul-General Laidlaw, of Great Britain: Consul Numano, of Japan, and

Consul Cremer, of Germany, Mayor Si-mon will preside and will introduce the President in a very brief speech. After the address, President Taft will be escorted back to the Hotel Portland by the same means, when the work of the Mayor and local committee will be ended as the President then becomes the guest

MANY REPUBLICANS HERE

Come From All Parts of State to Help Welcome President.

Prominent Republicans from all sections of the state are assembling in this city to lend a helping hand in the reception of President Taft today. Senators Bourne and Chamberlain have been in the city for several days and Oregon's Congressional representation was pleted yesterday by the arrival of W. C. Hawley and W. R. Ellis, Representatives from the First and Second Congressional districts, respectively. Others of the pa-triots will reach Portlaud this morning in time for the day's festivities.

Of course it will be impossible to accommodate all of the admirers of President Taft at the luncheon which will be served this noon at the Portland, but this disappointment, which carries with it a saving of \$12.50 per plate, has not kept numerous of the faithful from com-ing to nown anyway. The average out-of-town partisan will be content if he merely gets a glimpse of Roosevelt's suc-cessor and will rely on that observation as an inspiration for greater effort for

party success in future. Included among the prominent Repub licans of the state who reached Portland yesterday were: Governor Benson, who will have a prominent part in President Taft's entertainment while in the city; Representatives Ellis and Hawley, torney-General Crawford, Ralph E. Williams, National committeeman for Oregon; B. E. Kennedy, of Baker City; H. C. McAllister, Master Fish Warden; C. W. James, superintendent of the State Penitentiary at Salem, and O. P. Hoff, State Labor Commissioner.

## FUTURE IS BRIGHT

Trade With Corea Rich in Its Possibilities.

AMERICA FURNISHES BRAIN

Yankees Develop Mines and Rolling Stock of Japan-Owned Railroads Is Made Here-10 Per Cent of all Imports From U. S.

That flour and lumber will steadily crease as to the volume of exports from the Northwest to Cores and Japan is-the rediction of Thomas Sammons, Consul General for the United States at Yoko Mr. Sammons, an old newspa man of many years experience, a citizen of Tacoma and for years private secretary to Addison G. Foster, Ex-United States Senator, of Washington, has just returned from Oriental lands and declares himself optimistically regarding the fu-ture trade invasion of the Pacific North-west in the attractive territory in which he has been located for several years. He has only recently been transferred from Seoul, Corea, to the more important post at Yokohama and is therefore fitted to speak of the commerical relations be-tween this country and the Japanese protectorate where he was located during number of exceedingly strategic years Consul-General Sammons reached Portland Thursday from San Francisco, where he arrived from the Orient on the Mongolia. He is staying here for the purpose of meeting President Taft and making an official report of his siewardship of the very important post which he holds in the American Consular service Second Place in Imports.

"Corea is second in all the list of Oriental countries that consume Ameri-can products," said Mr. Sammons at the

Portland Hotel yesterday. "More than ten per cent of all the imports of the country are from the United States. Japan alone leads Corea in this respect, having, according to the most recent figures available, derived 18 per cent of its imports from the United States. Chins, the great Asiatic empire for whose trade many nations are competing. follows closely behind Corea with Ameri-can imports reaching 8½ per cent of the

"Seventy-five per cent of the mines in that country, and it is exceptionally rich so far as Far Eastern countries go, are being operated and developed by Ameri-

cans and American capital.

"We have heard little or nothing of the vast mineral deposits of Corea on this side, but there are immeasurable and very rich deposits of gold, copper and graphite. Every one of the mines is equipped with American machinery and the child laber and machinery and the skilled labor and men operating this industry are all from the United States. A single gold mine showed an output for the fiscal year ending last July 1 of \$1,400,000 and the report stated there was more than \$1,500,000 worth of American machinery installed in the mine. The operation was handled by between 60 and 70 Yankees with a force of more than 5000 Coreans under them.

"The most arduous task of a consular greatest commercial port in the Jap-

representative in the country is to settle disputes relating to mining rights and the brunt of this work fell upon me for the reason that the vast majority of concessionaires were Americans. The record of the Seoul office will show that satisfactory adjustment was reached in every

"Mines and Missionaries" Lead.

'It has become a by-word in Corea that the United States leads in 'mines and missionaries' and that is in every essential true. The Christian religion as directed and expounded by the field workers sent over there from this country has had far greater success than the combined efforts of all other nations have attained.

ortland is intimately related to the development of Corea along cer-tain philanthropical lines for the finest and most successful hospital in the Far East is the monument to a Port-land woman, Miss Mathilda Ladd. This institution is located at Pyeng-Yang, a city founded 1122 B. C. In other words, it is 3031 year old. The hospital is known as the 'Ladd Hospital' in honor of the Portland woman who established it. It is now in charge of another Portland citizen, Dr. J. Hunter Wells, who is well known to most of the people of this city. I know of no in-stitution that I have seen in all my travels throughout the Orient that is doing such excellent work for the good of humanity as the Ladd Hospital. Portland may justly be proud of it.

"The Coreans are little understood by people on this side of the Pacific until a thorough investigation is made. They are a thrifty race, a willing and hard-working people except that they do not know how to direct their energies to the best advantage. I have seen marked improvement, however, and feel frank to say that at present three of the natives are about as good three of the natives are about as good as two Americans. The Coreans can be hired in mines, on railroads and in other pursuits for about \$18 a month (gold) and I am firmly of the opinion that that great and fruitful empire will become more and more progres-sive as it feels the touch and influence of American invasion. The indications are such at least.

Religious Freedom Granted.

"The Corean government is wonder fully tolerant in regard to the estab lishment of schools. All the schools founded by American missionaries are now registered under the government and with an agreement whereby they have absolute freedom as to religious worship and teachings. This is an evidence of advanced enlightenment which few Occidentals can appreciate unless they have been familiar with the con-ditions existing in Corea in former times.

Great railroad development is in prospect in Corea. Of course, the roads are now owned and controlled by the Japanese government, but under this beneficial protectorate marked strides are being made and new lines are being constructed in various parts of the country. It rather makes a good red-blooded Yankee swell with pride as he rides over these roads, for while the lines are the property of the Japanese, the rolling-stock, equipment and motive power are exclusively American. It gives one a homelike feeling, something like hearing your own name called on a desert isle."

Has Made Fine Record.

Mr. Sammons' advancement has been due to the aggressive and spirited man-ner in which he represented the com-mercial interests of the United States It is in a large measure du to his efforts that Corea, today, ranks second among the countries that con-sume American-made products, that is proportion to the total of import

CURED BY CUTICURA AFTER LONG SUFFERING

"When my little girl was six months old I noticed small red spots on her right cheek. I did not right cheek. I did not pay any attention to them but finally the spots grew so large that I sent for the doctor who said it was ring worm. He prescribed an ointment which I used for two weeks, but instead of helping the cruption, the ointment seemed make it worse. to make it worse. Then I went to a second doctor who after examining the baby said it was eczema. He also gave me an ointment which did not help either. The disease in the meantime spread all over the face and the eyes began to swell. I became very anxious. The itching grew intolerable. I had to tie the baby's hands to the cradle to prevent her scratching. The cheeks were covered with blood and it was a terrible sight to see. I consulted doctors from September to December, but they were unable to cure the baby. I paid out from twenty to thirty dollars without relief.

"One of my friends told me of the Cuticura Remedies and I sent at once for a set which I began to use that evening. The next morning the baby's face was all white instead of red and you can imagine how surprised I was. I cannot find words enough to praise Cuticura and I do not know what would have become of my baby only for it. I used the Cuticura Remedies until the eczema entirely disappeared. The child is now three cakes of Cuticura Soap, two boxes of Cuticura Resolvent and I never use any other soap. I always recommend them whenever there is a chance for doing so. I will send you one of her pictures which she had taken just after she was healed. Mrs. P. E. Gumbin, Sheldon, Ia., July 13, 1908."

Mr. Sammons, after a conference with President Taft here today on numerous important matters of international con-cern having to do with the situation in both Corea and Japan, will visit his old home in Tacoma; then he goes east to New York and Washington and after about 60 days he will return to his post

The members of this inquisitorial body personally the County Jall, and I appreciate their approval of its management. Had I been given an opportunity to be heard by the jurors respecting the roadhouses maintained in the county, there is no question but I would have been able satisfactorily to explain the relation of the Sheriff of the county to these resorts. "As to Multnomah County roadhouses I will say that I have repeatedly served notice on the management of these re-sorts that they must conduct decent and orderly places or expect their licenses to be canceled. What is more, I have warned every one of these places that liquor must not be soid to any chauffeur liquor must not be wold to any chauffeur visiting such resorts. At the same time I have admonished the management of these roadhouses that the minute I discovered this condition was being violated.
