BOOSTERS' MEETING .- The boosters the Christian Brothers' Business College Bazaar held an enthusiastic meeting last night in Alumni Hall, attended by nearly 200 boosters. City Attorney J. P. Kavanaugh was present, and addressed the meeting on the flag, which was presented by President Taft. He made an eloquent talk and set forth the significance of the flag. There promises to be a hot contest for possession of this flag between the Knights of Columbus. Elks. Woodmen of the World and other fraternal organizations, which want the beautiful banner. There was a business meeting of boosters after Mr. Kavanaugh's address, and plans were laid. The bazaar will open next Monday and conthe Christian Brothers' Business College bazaar will open next Monday and con tinue till Saturday night.

BIG OCTOBER STRAWBERRIES.-H. Big October Strawberries.—H. C. Perkham, living five blocks south of Anabel Station, on the Mount Scott line, is raising atrawberries at the present time which measure five inches in circumference. Yesterday he displayed one which measured exactly five and one-half inches. These berries are of the Magoon variety and the wines are four years old. This fact is regarded as remarkable, as strawberries are not supmarkable, as strawberries are not sup-posed to bear after the third year. Mr. Parkham says the vines are loaded with blossoms and young fruit and will un-doubtedly continue to bear until killed by frost. The old leaves were all cut off after the first crop and the runners have

## Alveolar Teeth and Enunciation

The partial plate and bridgework which people used to wear before the Alveolar Method of restoring missing teeth was discovered interfered greatly with enunciation. The very fact of a foreign substance being introduced into the roof of the mouth made it necessary for people to learn to talk all over 15 min. A great many never succeeded.

There is an unmistakable impedimen There is an unmistakable impediment in the speech of any one whose mouth is encumbered with a partial plate or a bridge with space underneath to whistle through or make a metallic sound when talking or singing. The partial plate also makes it unpleasant when one is dining. It takes away in large measure the sense of taste, as it covers up the palate. The Alveolar Method emancipates people from the many disagreeable features of the partial plate, but, best of all, it enables one to use the Alveolar Testh with the same degree of antisfaction that they would use nature's teeth.

No one will pretend to say that teeth fastened to a partial plate are any more than a makeshift. They simply fill up the gap in the mouth where the teeth have been lost. The Alveolar Teeth fill up the gap and they also allow one to chew with them with entire satisfaction.

The satisfaction.

Alveolar Teeth Where Bridgework Is Impossible.

If only your front teeth are left, say 3 or 4 or more, we can replace all those that have been lost on both sides clear back with perfect Alveolar teets, whilst that have been lost on both sides clear back with perfect Alveolar teeth, whilst bridgework would be impossible even if you had 8 or 10 front teeth to ite too. If you have only two back teeth on each side, say, molars, we can supply all the front teeth that are missing with beautiful, serviceable, lifelike Alveolar Teeth. This could not possibly be done by the bridge route. Suppose you have lost your last (back) teeth, two or more upper or lower on either side. We can replace them with Alveolar Teeth. The bridge specialist would have to advise a partial plate which would encumber the mouth as well as to help to destroy your other teeth. Where you have lost a few teeth there are dentists who would extract all the rest to make room for a plate. (Where people have no teeth, we make plates, too. And when we do they look like they grew there. They are scientifically and artistically built for service and comfort as well as beauty). Even where bridgework is possible, there is no comparison between the two. A very large percentage of our work is taking out bridgework put in by supposedly high-class dentists, and replacing it with the beautiful and artistic Alveolar Teeth. And, unlike bridgework in another respect, it is practically painless. No boring or cutting into the gums, nothing to be dreaded. Now, then, prices being equal, which would you choose?

Curing Pyorrben (loose teeth) a discentifically by both definitions.

choose?

Curing Pyorrhen (loose teeth) a disease given up by other dentists as incurable is another of our specialities. We care it absolutely. It's a boastful statement to make, but we can do anything that is possible in dentistry, and what we do is always of the very highest class. Our booklets, alveolar Dentistry, are free. Write for one if you cannot call. We have samples of our work to show at all times. THE REX DENTAL CO., DENTISTS, 3'1 to 314 Abington Bldg. 1983; 3d St.
