Bitter Struggle Predicted America Enforces Maximum Duty.

President Taft Vested With Power to Prohibit Importation of Any Article-Senator Aldrich's Assurance Does Not Satisfy.

WASHINGTON, Oct. 20 .- Drastic measires, including the exclusion of importstions from any country unjustly discrimmating sgainst this country, may be found necessary by the President, should this country adopt retallatory tariff meas-ures against France.

While so far this Government has re-ceived no official information of the in-tention of France to operate a maximum tariff against this country upon the ter-mination, on October 31, of the com-mercial agreement, officials here are willing to admit that there is some danger of the two countries applying their maxi-mum rates against each other.

The exclusion power is furnished in tection 5 of this tariff act of August 59, 800. This section empowers the President, in case American goods are unusuly discriminated against by any country, which is the product of the country o try, absolutely to prohibit the importa-tion into the United States from that centry of any article he may see fit

who favors active French commercial expansion, in the book quotes Senator Aldrich as saying that President Taft's interpretation of "undue discrimination" did not mean that France must necessarily grant all her minimums, but only that the treatment of American products "must be resingually that and reserved." "must be reciprocally just and reasonable," and that naturally it was expected that France would give the United States the same treatment as other active com-betitors in the matter of French trade. M. Cruppi adds that Senator Aldrich's conciliatory assurances are extremely welcome, but that after all France must first consider her own interests.

M. Cruppi contends that the policy of negotiation is the commercial policy of the future and regrets that the United States in her spiendid isolation, "snaps her fingers at the world."
