the directors who were serving at the time the bank closed its doors, but others who had preceded them will prob-ably be included in the indictments. In addition to the directors, it is also believed separate indictments will be brought against officers of the bank for emberalement. From the facts brought out so far by the investigation, the grand jury, it is said, is inclined to resard the juggling of funds in the cases of the Board of Trade building, the Golden Engle Dry Goods company, the Pacific & Kastern Railroad, the with-drawal of the personal notes of Presi-dent Moore and Cashier Moyrie, as em-beziement, as well as the disappearance of a certain \$50,000, the recipient of which has not yet been brought to light. men's Protective Association and State Board of Health, calis for a little com-ment, in order that there may be no misunderstanding as to the position of the State Board of Health. In reference to the statement as to whether or not any pure milk was served to the city of Portland, the state-ment coming from the secretary of the State Board of Health was, "that so far no dairies were selling milk certi-fied to by the State Board of Health as to its purity," and, at the same time that this statement was made, the

as to its purity," and, at the same time that this statement was made, the names of iwo or three dairymen were given as having relatively clean dairies. The Association asked that samples hereafter be taken from milk wagons, creamsries, etc. direct, and were as-sured that this matter would be brought before the Board and if agreeable to them adopted. At the same time, the attention of the Association was called G. A. Hoffman, Fred Lohr, F. M. Case and Louis P. Bruce left last night Case and Louis F. Bruce let fast mans on a business trip to San Francisco. W. R. Parker, one of the crack marks-men of the sountry, and representing a powder and cartridge house, is at the before the Board and it agreeable to them, adopted. At the same time, the attention of the Association was called to the fact that every householder was entitled to have the milk in his own home examined for his own personal protection. Mr. Judd, of the Hazlewood Creamery, advocated the absolute eradi-cation of all dairise containing large numbers of tubercular cattle, or having barns of such character as to be unable to be satisfactorily rendered sanilary. Mr. Judd's ideas were the most radical we have so far heard advocated, and there is no doubt but that in some cases this procedure will be necessary. The Association was assured that the work of the State Board of Health would be directed along the lines of dairy improvement, both as regards health of dairy herds and sanitation of dairies; that the Board did not intend to exact prohibitive dairy regulations,

dairies: that the Board did not intend to exact prohibitive dairy regulations, but intended to make them matters of education. That except in aggravated cases it would not be the policy of the Board to enforce payment of money as fines, which money should be used by the dairymen in improving his dairy. Reasonable demands only would be made, and if these were not reasonably complied with, the dairy must cense made, and if these were not reasonably complied with, the dairy must cense business; the object being to secure clean dairies and pure milk and not to allow the dairyman to feel that he was justified in continuing business without

improvement, simply by paying a fine. The ruination of the dairy industry was dwelt upon a great deal by some was dwelt upon a great deal by some of the members, as if the entire prob-lem involved was one of dollars and cents. Spenking for the Board, I en-neavored to make myself dear on the point that the health of the people of this state and city demanded some con-
