Emptying Jails and Failure of Prosecutions Are Feared as Result-Title Wrong Say Big Attorneys of the State.

OLYMPIA, Wash., Nov. 25.—(Special.)— There is serious talk here that unless the State Supreme Court secures an early opportunity to act and renders a decision that the entire new criminal code is invalid, another special session of the Legislature may be sought to repeal the

measure.

Purporting to be a code of the criminal laws of the state, the same having been prepared by a committee of young prosecuting attorneys, the measure was pre-sented to the last Legislature and passed. Now that the act is in effect, from all parts of the state are coming attacks upon it—attacks which, if successful, mean that convicted criminals are to go unpunished because of errors and omissions, mistakes and carelessness of the compilers and of the Legislature.

Prompt Repeal Wanted.

The demand for prompt repeal or ciss wiping the code out by adverse decision of the Supreme Court comes from the belief that ultimately the code will be held invalid. When that holding is made, of course, it will render equally invalid all prosecutions had since the new law went into effect. went into effect.

To begin with, the act pretends to be a criminal code, but at best it contains but a fraction of the criminal statutes of the a fraction of the criminal statutes of the state. It attempts to repeal, by mere reference to old code paragraph num-bers, scores of old criminal laws. This in direct defiance of the constitutional provision against such a form of repeal.

Everyone knows that people must eat to live, and if they would eat plain food in moderation, there would be little need for doctors and drugstores; but all of us occasionally, and many of us constantly, eat not only too much, but swallow rich food that

the stomach cannot digest.

The food ferments, gas fills the stomach, and undigested lumps of food harden and the lining of the stomach herden and the lining of the stomach becomes inflamed.
