Alleged Wreckers of Oregon Trust Would Break Indictments.

Ex-Senator Fulton, for Defendant Bankers, Argues Indictments Not **Drawn** in Accordance With

1907 Amended Laws.

The attorneys for the alleged wrecker of the -Oregon Trust & Savings Bank pened their legal batteries in the Circuit Court yesterday morning in an effort to break down the indictments set up against

Present before Presiding Judge Bro Present before Presiding Judge Bro-naugh were C. W. Fulton, Dau J. Malar-key, John H. Hall, Arthur Langguth and R. The brunt of the battle fell upon ex-Semator Fulton, Attorneys Malarkey and Hall and Deputy Sysaland and Fitz-

Hall, and Deputies Vreeland and Fitz-gerald. The latter was arguing when time for adjournment came last night.

Judge Bronaugh will take up the case again this morning. As the indictments are identical with those against J. Thor-burn Ross, of the Title Guarantee & Trust Company; which was sustained in the Suprems Court, it is believed it will be decided the indictments are valid.

Statute of Limitations Arises.

Fulton represented W. H. and H. A. Moore and W. C. Morris. He argued that the question whether or not the statute of limitations had run hinges upon whether his clients are charged with a felony or a misdemeanor. He cited the Judge to sections 1236 and 1230 of the code. He then went on to argue that the in-He then went on to argue that the in-dictments against his clients had not been drawn in accordance with section 1835, as amonded by the 1907 Legislature. "We are entitled to know whether or not the property alleged to have been embezzled actually belonged to the Ore-construct & Savings Bank of to some

"A man should not be held liable under the law for something he liable under the law for something he cannot individually control." he argued. "A director has nothing more than a vote upon the bank's polley. H. A. Moore was not a duly elected cashier. The arguments for E. E. Lytle and Leco Friede, indicted with the Moores and Morris, were much the same as those for the other bank officials. Deputy Fitzgerald argued that the in-

in Reservoir Elevation.

CASE IS DISCUSSED LONG

Portland and Seattle Engineers Say Basin No. 6 Safe-Mayor Halts at \$36,000 Expenditure to Lower New Tank.

Whether justifiable to expend \$35,000 of public funds for the purpose of lowering the elevation of proposed Reservoir No. 6 at Mount Tabor for the sake of easing the minds of the residents there as to the question of safety, is puzzling Mayor Simon and members of the water board. A long session of the board was held A long session of the board was held yesterday afternoon, at which the sub-ject was discussed. The reports of Chlef Engineer Clarke were heard and the statements of Consulting Engineer Thomson, of Seattle, were talked over. The board took no definite action. Chief Engineer Clarke, of the local board, recommended the lower elevation, which would place the reservoir 300 feet

which would place the reservoir 300 feet above city datum, and will cost \$86,000 additional to build. He said, however, that he is satisfied that either elevation, the other being 10 feet higher, is safe.

Both Declared Safe.

Consulting Engineer Thomson, Seattle's City Engineer, says either elevation is safe, but recommends the higher elevation for four reasons. His reasons are: Difference in the cost of construction on the higher elevation, effecting a savon the higher elevation, effecting a sav-ing of the amount named; better pres-sure, which he deems necessary for the district; less danger of contamination from dust arising on Weat avenue, the reservoir heing but 100 feet removed from that thoroughfare, and the fact that the slope could be parked to better advantage and made beautiful. Chief Engineer Clarke agrees that the dust would be less if the reservoir sits higher, but he says there is no necessity for increased pressure, to be thus gained. He also argues that the lower clevation could be parked equally as well and says that, to case the minds of the residents in the neighborhood, he would spend the additional money neces-sary to lower the proposed elevation. **Board For and Against.**

Board For and Against.

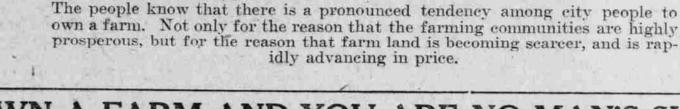

The subject is now narrowed down to a decision by the board, and at the meeting yesterday afternoon it developed that the members are evenly divided. Mayor Simon, answering a question by Commissioner Wilcox, said he does not want to expend the extra funds, unless it is shown that the safety of the reser-voir depends upon it. Commissioner Wil-cox takes the same view, but Commissioners Ainsworth and Mackey believe it is the proper function of the board to consider the effect on property in the vicinity.

There is a possibility that concessions may be secured from Wakefield & Co., may be secured from Wakefield & Co., the contracting firm for Reservoirs No. 6 and No. 5, whereby the cost of con-struction of the hig basin on the 300-foot plan will be materially reduced. Com-missioner Wilcox said, should this be done, he might see his way clear to vote for the expenditure of the sum needed to build it on the lower elevation. Other-wise, he said, he could not see, as yet, where the board is justified in spending that amount of public money. In view of

that amount of public money, in view of the statements of both engineers that there is no danger attached to either
