SOIL EXHAUSTION IS EMPTY SCARE

Secretary Wilson Issues Report Showing Fertility Is Inexhaustible.

MATTER IS DEEPLY PROBED

European Farming Records of Past Centuries Are Searched, and No Sign of Loss of Plant-Foods Is Found Anywhere.

WASHINGTON, Dec. 17 .- (Special.)-In speaking of the great question of soil fertility, which is occupying the minds of agriculturalists all over the country, and the attention of the people-as to whether the Americal soits are continually wearing out, as some authorities say and as the soil experts of the United States Bureau of Solls contend to the contrary-Secretary of Agriculture James Wilson, in his annual report deals with the subject as follows:

"A great and fundamental problem rhich has confronted our people, as it has the people of the world, is the question of the permanency of soil fertility. Of late years, particularly, the idea has prevailed that the soils of various parts the United States are wearing out through loss of mineral plant-food, and that a serious condition is thus presented portant and fundamental is this problem for the welfare of our people that I directed a thorough examination to be made of the whole subject, and an exhaustive report has been issued, from which certain important conclusions can be given

No Evidence of Failure.

"It has been found from the records kept by our own department that, on the average, crop yields per acre have shown a decided tendency to increase during a period of 40 years, and that there is no evidence of general decrease over large areas or in any particular state, as is popularly supposed. This indicates, undoubtedly, that on the average our people are farming more intelligently and therefore more successfully, and that we are, through these more intelligent methods, winning gradually larger return from the roil.

'It has been held, however, by some writers that even if the yields are increasing, the element of danger is that the larger crops remove larger amounts of plant-food from the soils, and bring nearer the time when the soils will even tually wear out. To meet this argument it has been necessary to extend the investigations into older countries and the records of Europe have been searched for information in regard to the past history of these older countries, which can be taken as a safe guide for the future of the newer soils of the United States.

Actual Increase Shown.

These records indicate that in the middle of the 18th century, or, roughly speaking, 300 to 400 years ago, the soils of Central and Northern Europe were producing on the average about as much wheat per acre as the soils of the United States are producing at the present time. These European soils have been occupied for agricultaural purposes for at least a thousand years, during most of which period the country was more densely populated than the United States is at the present time. So far as records are obtainable, they indicate that as a result of increasing population and more intensive and more intelligent methods of soil control, and in spite of their longer occurcontrol, and in spile of their longer occu-pation, the average yield per acre has increased, until in the case of Northern Europe, the soils are now producing about two or two and one-half times as much

two or two and one-half times as much per acre as the newer soils of the United States are producing.

"In addition to this evidence of actual crop yields per acre, an exhaustive investigation has been made of all the chemical analyses which have been made of soils for the last 18 years in certain countries of Northern Europe in which crop yields have been Europe in which crop yields have been increasing, and likewise of the soils of the United States, including the older soils of the Eastern states and the newer soils of the Western states. "The results of these analyses, pub-lished side by side, show no signifi-cant difference in chemical composi-tion between the cider soils of Europe and the newer soils of the United

Character Remains Same.

Thirrescopical examinations of the soils fail to show that the longer occupation of the soils of Europe has changed noticeably the mineralogical character of the soils. It is reasonable to infer from the work that has been done that within historic times the occupation of the soils for agricultural purposes has failed to noticeably change the mineral character of the soil material upon which the future life of the nation must ultimately depend. The reasons for this and the laws of nature which permit the soil thus to be continuously occupied and used for mankind as freely as the air are complicated and difficult to understand, and offer a profitable field of research for our agricultural colleges and experiment stations. cultural colleges and experiment sta-

While this satisfactory solution of this main question is hopeful for the nation, nevertheless individual farmers fail, and individual farms run down through neglect, lack of intelligent cultivation, and lack of knowledge as to soil adaptations and methods of control. So far as can be observed at the present time, cases of failure on the farm are due to individual-neglect or misjudgment. Such injury as lect or misjudgment. While this satisfactory solution of lect or misjudgment. Such injury as has resulted to the soil in such cases may be remedied by change of owner-ship, or by more intelligent methods of control, and is therefore not fundamentally due to the soil itself, but to the people who have worked the soil. This is a condition which can be im-proved either through force of necessity, as it has been in the case of Europe in the past, with increasing population and greater necessities, or through education and force of intellect, utilizing the advance knowledge now prevails alike in Europe and America

Many Soil Types Here.

cultarities, its own characteristics, and its own peculiar adaptation to crops, rotation schemes and methods of soli control. This is the great fundamental fact which our farmers must understand. The first step in agricultural development is the knowledge of the particular soil characteristic of the farm.

particular soil characteristic of the farm.

"The idea has prevailed in the past that through the use of commercial fertilizers and intelligent control all soils can be made to produce at will any crop that it is desired to grow. From a scientific standpoint this may be possible, but it cannot be done at a profit. There are soils that cannot be adapted commercially to wheat production, there are soils that cannot be adapted commercially to fruit culture, and there are soils that cannot be adapted commercially to any of our staple crops, and should remain as forest soils. The highest development of agricultural production will result from the adaptation of each type of soil to a particular line of crops, bearing at all times the market requirements and the transportation facilities. ments and the transportation facili-

BORAH'S BILL UP AGAIN

IDAHOAN TO PERSIST IN WAR ON CORPORATION LAWYERS.

Would Bar All Congressmen Who Accept Retaining Fees From Big Concerns During Term.

OREGONIAN NEWS BUREAU, Washington, Dec. 17.—Senator Borah is back in the field with his bill prohibiting Senin the heid with his bill profibiling Sen-ators and Representatives from accepting compensation as counsel for corporations engaged in interstate commerce, as well as in legsl cases in which the United States is interested. This bill was first States is interested. This bill was first introduced in January last, towards the close of the Sixtieth Congress, and created something of a sensation because of the effect it would have on a number of leading members of both branches of Congress who derive their principal income from corporations for which they act as attorneys.

Senstor Borah has little expectation that

gress who derive their principal income from corporations for which they act as attorneys.

Senator Borah has little expectation that his bill will receive serious consideration this season any more than it did in the last Congress, but he believes the underlying principle is a good one, and it will appeal to the people when its purpose and effect are thoroughly understood. He is reintroducing the bill in order to keep the subject before the people, hopeful that a campaign of education, though it may cover a period of years, will have beneficial results. He expects in time to see some such law enacted, notwithstanding powerful influences in Congress will be arrayed against it. The bill as reintroduced by Senator Borah provides—

"That no Senator or Representative or Delegate, after his election and during his continuance in office, shall receive or agree to receive any compensation whatsoever, directly or indirectly, for any services rendered or to be rendered to any person, corporation, or association, either by himself or another, in relation to any proceeding, contract, claim, controversy, charge, accusation or arrest, or other matter or thing in which the United States as a party is directly or indirectly interested, before any court whatever.

"Sec. 2. That no Senator, Representative or Delegate, after his election and during his continuance in office, shall act as attorney or counsel for any person, corporation or association engaged in commerce to which the regulative power of Congress extends under the Constitution of the United States.

"Sec. 2. That every person offending against these sections shall be deemed guilty of a misdemeanor, and shall be imprisoned not more than 10,000, and shall, moreover, upon conviction thereof, be rendered forever thereafter incapable of holding any office of honor, trust or profit under the Government of the United States."

Senator Borah maintains that no Senator or Representative retained as counsel for a corporation coming under the jurisdiction of Congress can pass

HILL GIVES \$5 TO CAUSE

RAILROAD MAGNATE DONATES TO RED CROSS CHARITY.

"I Don't Want Stamps, but I Do Wish to Show My Sympathy for Your Cause," Says Financier.

James J. Hill donated & to the Red Cross stamp fund yesterday afternoon at the Portland Hotel. The railroad magnate was spied yesterday morning by Mrs. I. Koshland and asked to purchase stamps. At that time he was leaving the hotel in a great hurry but promised to return. He did so in the afternoon, and produced a shining \$5 gold piece. produced a shining \$5 gold piece.
"I don't want the stamps." he said,
"but I do want to show my sympathy
with your cause."

Alice Lloyd, the merry little English
songstress whe has become a popular

songstress who has become a popular figure on the American stage, and is appearing at the Orpheum here, will sell Red Cross stamps at the Portland Hotel today from 13 to 1 o'clock. Her winsome manner and her great popularity are expected to effect a record sals of the stamps.

farity are expected to effect a record sale of the stamps.

From a woman's club at Hood River came an order yesterday for 10,000 stamps. An order for 10,000 stamps to be sent to Vancouver, Wash., was also received yesterday. From the Knights of the Maccabecs the nurses received a substantial check for stamps that the fraterniay has nurchased.

It is believed the 5000 postals to be put It is believed the 5000 postals to be put on sale here will arrive today from the National Red Cross. If they come, they will be distributed at once to the 14 stations in the city where the stamps are being seld. The original supply of these postal cards went so rapidly it was soon exhausted, and this additional order had to be placed to meet the great demand. The Visiting Nurse Association is greatly The Visiting Nurse Association is greatly encouraged over the prospect of the sales of Christmas stamps reaching the 1,000,000 mark set by the ambitious workers against the spread of tuberculosis.

POLICE TO STOP DROWNING

Frightened Mother Would Save Son From Older Boys.

Because two boys have threatened to drown her 3-year-old son, Mrs. M. Pillsbury, 1024 Vancouver avenue, has appealed to the police for aid.

Last night Mrs. Pillsbury states her little son was set upon by the due in question and beaten. A little girl, who witnessed the affair, hurried to his mother and gave the alarm. She interfered at a juncture when one of the boy's assailants remarked they "would drown the boy."

The police have the names of the boys and will investigate the case.

Tug Triumph Arrives at Astoria.

With the steam tug Triumph in tow, the Samson is due to arrive in the local harbor this morning. The Triumph was recently purchased by the Columbia Contract Company for service as a tew boat in the Columbia and Willamette rivers. She was formerly in company to the Columbia and Willamette rivers. River and was delivered at Marsh-field. The Samson went south from Astoria for the purpose of towing her to Portland.

BOAT, OUT OF PORTLAND, LOST

Steamer Utgard, With Cargo o Wheat, Goes Down in Straits.

Wheat, Goes Down in Straits.

SAN FRANCISCO, Dec. 17.—A cable received today by the Merchants' Exchange reports that the steamer Utgard, bound from Portland to St. Vincent with a cargo of wheat, went ashore on a high spring tide at Boga Point, near Punta Arenas, Straits of Magellan. At first it was thought that the vessel might be saved, but a later dispatch says the steamer, which is of steel construction, has broken in two and will be a total loss.

In practically the same locality the Gorman steamship Wangard, belonging to the same owners, was wrecked last January. She was a total loss, and none of the grain oargo, which had been disputched by Kerr, Gifford & Co., was saved. The Wangard loaded at Tacoma, clearing from there for St. Vincent December 1, 1908.

Where these big steamers of the same line were wrecked is considered the most dangerous point in the Straits of Magellan. It is near the Atlantic Ocean and several other vessels have piled up there at different times.

at different times.

With 270,826 bushels of wheat, valued at \$209,784, the German steamship Ut-gard cleared from Portland for St. Vin-cent, for orders, October 29. Two days later she crossed out from the Columbia River and began the long voyage to Eu-

The cargo was dispatched by Balfour Guthrie & Co. The Utgard is the second of the vessels of the firm to be lost this year.

The British bark Matterhorn, which foundered off the Columbia River, November 27, had a full cargo of barley dispatched by Baifour, Guthrie & Co.

STRIKE STIMULATES SHIPPING

Australian Coal Situation Makes Business for Puget Sound.

SEATTLE, Wash, Dec. 17.—The Australian coal strike has stimulated coal shipping from Seattle and British Columscipping from Seattle and British Columbia to California. The steamer Tampico passed out at Cape Flattery today with coal for San Francisco and the steamer Eureka will take a similar cargo.

The Bessic Dollar and the Belle of Scotland will take coal from British Columbia to San Francisco.

Change of Masters.

Clyde Raab has succeeded W. E. In-man as master of the steamer Elmore. The Elmore has been chartered to the Oregon City Transportation Company to take the place of the wrecked steamer Oregona.

Marine Notes.

The steamship Breakwater is due to arrive tomorrow afternoon from Coos Bay ports.

The steamship Catania sailed from San Francisco with fuel oil for Port-land yesterday afternoon. With general cargo and passengers for Coos Bay the steamship Alliance, Captain Parsons, will sail this even-

The steamship Rygia will clear for Hongkong and way ports today. She carries a full cargo of lumber and flour.

The gasoline schooner Oshkosh is due today from Tillamook and Alsea Bay. She will load outward for Tilla-mook.

One of the most important acts of Mr.

Beals during the four of inspection was to secure from the Western Union officials a positive assertion that the lines between Port Angeles and Port Crescent. Will be rebuilt. With a new telegraph line established between Port Angeles and Port Crescent. The Government will be able to communicate with Tatoosh lisiand at all times and the advantage to shipping will be great. The Government will be incommunicate with Tatoosh light station to Port Crescent. From the latter place the Postal and Western Union have handled the messages. During the stormy senson the lines are down part of the time and the service is bad south and east of Port Crescent.

Forecasts will hereafter be issued from the local office instead of from San Francisco. Salied at 12, neon-Steamer St. Helena. Arrived down at 12 p. M.—Steamer St. Helena. Arrived down at 24 p. has relieved bronchitis in all stages; it is the tonic lungremedy used the world over in this disease; nothing equals it in keeping up and restoring flesh and strength.

Child of Four Would Scratch Her Head for Hours - When Fifteen It Got Worse - Hair Came Off in Spots - Hundreds of Dollars Spent in Vain - Cuticura Soothed Like Cold Water on a Burn and

CUTICURA REMEDIES CURED HER AT LAST

"When I was four years old a humor came out on my scalp. It would make a thick scab in one night, itching and burning terribly. My father spent many hundreds of dollars trying to find a doctor who could cure this humor, but none of them could ever help it even a little bit. At the age of fifteen years I had the measles, and after that the sore became maturated and I had to soak my hair out before I could comb it. My hair came off in spots and my head was in a bad shape.

"About this time a friend of my father suggested he try Cuticura for me. My father took this advice and bought the Cuticura Soap, Cuticura Ointment and Cuticura Resolvent. I used them faithfully and to my surprise they stopped the itching at once, like cold water to a burn. In a week my head was clean from the scab but was very red and inflamed, but I had experienced more relief from the terrible itching and burning than ever before. I did not expect to be cured, as I thought that nothing could do that, but I had to use something all the time and Cuticura was cheaper than doctors.

"After some time, to my surprise, I awoke to the fact that my head was cured. It was as free from the disease as though I had never suffered. I am now forty-two and have never had any sign of my old trouble since I was cured. I was cured but thought it never could be, but Cuticura made the dream ome true. Exery one thought it was incurable. I used to dream sometimes that I was cured but thought it never could be, but Cuticura made the dream ome true. Fancy a child sitting up in bed until ten or eleven o'clock scratching her head! I couldn't help it either, the itching was so terrible, night and day. It is a wonder I lived through it, but I can prove all I have written by my old neighbors. Mrs. Florence E. Ames Getchell, Box 503, Hallowell, Me., Feb. 9 and 13, 1909."

Real Cures

Thorough and Permanent

Different doctors have different ideas in regard to cures. Some call a suppression of symptoms a cure. They dose for drug effects and claim that nothing more can be done. But the real allment remains, and will bring the real symptoms back again, perhaps the same as before, but very likely leave the patient in a much worse condition. I claim that nothing less than complete eradication of the ailment can be a real cure. I treat to remove the ailment, and not merely the symptoms. I search out every root and fiber of an ailment, and I cure to stay cured.

root and fiber of an aliment, and I cure to stay cured.

I want every man who is afficted with any special aliment to come and talk with me confidentially about his case. A word of suggestion will often aid a patient to get on the right road to a quick and lasting cure if his case is taken in time. Even aliments that have reached an advanced stage yield readily to my medicines and distinctive methods of treatment.

Obstructions My treatment is absolvely pain-less, and perfect results in be de-pended upon in every include. I do no cutting or dilating whatever.

Contracted Ailments Be sure your curs is thorough. Not one of my patients has ever had a relapse after being discharged as cured, and I cure in less time than the ordinary forms of treatment require.

Specific Blood Poison No dangerous minerals to drive the virus to the interior, but harm-less, blood-cleansing remedies that remove the last poisonous taint.
