'PINCHOT SPANKED **VERY FIRST TIME**

William Hanley Calls ex-Forester Faddist and Man of One-Boy Family.

TELLS NEEDS OF OREGON

"Less Conservation and More Transportation" Is Way He Sums Up Requirements - Immense Rush of Settlers Is Predicted.

"If conditions work out as it now appears, there will soon be the biggest rush for free Government land in Eastern Oregon the United States has eve

withlam Hanley, manager of the Har-ney Valley Development Company and head of the William Hanley Cattle Company, two concerns that ship 20, 800 to 30,000 head of stock out of East-ern Oregon annually, made the fore-going prediction at the Portland Hotel yesterday.

going prediction at the Portland Hotel yesterday.

"What Eastern Oregon needs is more transportation and less conservation," he continued. "The least common evil that threatens this country today is land monopoly. It is the history of big ranches that they do not pay, for lands cannot be worked to best advantage with hired help. The big rancher, too, is an object for suspicion and high taxation, and in Central Oregon he soon finds that he has a bear by the tail and dares not let go.

Small Farmer Needs Railroads.

"We have sometimes increased our holdings, because small tracts have vir-tually been thrown into our laps. The lack of transportation facilities has made it impossible for the small far-

made it impossible for the small farmer, with his little band of cattle, to make a living, and some have come begging to have the land taken off their hands at any price.

"We are now running stock to dispose of the products that we cannot get out of the country in any other way, but we expect to get our principal profits out of the land. The opportunity will come with the railroads, when the large farms can be divided and the country developed.

Much Land Is Waiting.

The homesteaders who are now go on lands which they believe will be the earliest to receive railway transportation. They are but on the outer sidge of the great country in Eastern Dregon, where it is estimated there are 10,000,000 acres of vacant Government land.

"This is included in a strip from 150 to 175 miles wide and 300 miles 150 to 175 miles wide and 300 miles long. One side, down in Lake County, has a bunch 'of timber, and on the other side, in the Blue Mountains, there is more timber. Between the two there is not a stick standing. These forests are needed in the development of that country. Two-thirds of the trees in them are over-aged, and trees are like other things—over-age brings decay. They will benefit no one if held in the Government reserves for future generations.

Pinchot Spanked First Time.

Pinchot is a faddist and is of a one-"Finchot is a faddist and is of a one-boy family. When he was fired as thief Forester it was the first time in his life that any one had ever taken him by the nape of the neck and spanked him. When he told the people back East that the resources of the country belonged to the public, they fill shouted "That's right, and we are the public; there are only a few outlaws out west."

believe that business men here realize the great principle that a man's mission is not as selfish as a lot of people seem to think it is.

"Yes, I stopped in Chicago on my way here. It doesn't come up to New York. Chicago is the first division going West. That is its relation to the country."

"Personally, I believe that the re-sources rightfully belong to the state in which they are located. Oregon should have its timber lands, and it could then sell the stumpage and improve its rivers and harbors with the proceeds, without asking Congress for appropriations. I believe that the peo-ple of Oregon as one man should sup-port President Taft and Secretary Bal-linger. President Taft said enough to us when he expressed the view that the resources should be developed, and not

Mr. Hanley's theory of the cause of igh meat prices is that the consum-rs too greatly overbalance the pro-

Railway Activity Predicted.

There are too many men who wan to walk around the cities in good clothes and eat meat and too few who are out in the country producing it," he said.

Mr. Hanley is one of the incorporators of the Bolse & Eastern Railway, which a few days ago filed maps of rights of way in the Malheur Canyon, which were taken as indication that the railroad would be built from the eastern border of the state into Central Crawon.

Yesterday Mr. Hanley asked to be excused from discussing railway plans for the present, but his prediction con-cerning the prospective land rush into Eastern Oregon plainly impiled a con-nidence in early railway development fidence in early rallway development of Harney County and that section of

the state.

"I suppose an Easterner would have a hard time imagining a county 150 miles long by 50 miles wide. Harney County is as big as two New England states, but the voting population of the county is only about 500. We have big rivers out there, the Silvies and the Elizen and the Mallenr, which have a count cannot be for Malheur, which have a great capacity for development in the way of irrigation of the valleys, and the Harney Valley con-

the valleys, and the Harney Valley contains 1,000,000 acres.
"I went into the country the year after the Plute war—that was some il years ago—and in that time the changes in the country have been comparatively slight. I was from another part of Oregon. I remember that the Plutes were led by Egan. He was a great general and had about 1890 Indians, including families, and had gathered up in his raids what was probably the biggest drove of broken horses that were ever together in the West. He had between 3000 and 4000 of them. He was going north, but the them. He was going north, but the soldiers under General O. O. Howard never stopped him until he reached the Columbia River, when Egan, for whose death a big reward had been offered, was shot from ambush and his followers dishanded.

"Burns is a very medern town. It has half a dozen good dry goods stores and you can get anything you want there in the way of merchandise. We have the Burns Commercial Club, which is a conter of social activity, women being admitted to it. Many of the farmers whose ranches are at some distance from the place have their town residences, to which they move in Winter to give their call-dren the benefit of the schools. A daily newspaper is only three or four days old when it reaches us, and in Burns there are two weekly papers, the Times-Herald and Harney County News. The school laws of Gregon are liberal and any community that has half a dozen children. Hurns is a very modern town. It has

it can get a school teacher. Of cours we have organized and we raise all the ordinary truck and farm products, but we have no market for such except lo-

ordinary truck and farm products, but we have no market for such except locally.

"The indications are now that there will be a railroad building within that district within the next year or two, so as to let the civilized and cuitly-vated class of people in. The country so far has been settled martly by natives of Oregon. We are the old style of ploneers and most of us have been there for many years.

"Why, people from New York, if they were only willing to sacrifice present comforts for the betterment of future conditions, could go out there and take fortunes from the soil. That would be a true remedy for the higher cost of living. The high prices of farm products have come to stay until conditions have been more equalized by more people going back to the soil. The men who are products of the farm have been pouring into the city ever since the early days of the country, and the soil is bare of masters. Mer who are pegging away at small salaries in New York could go out to where Portland, Me., Lawyer Wins Distinguished Local Singer.

Ellery, for bravery in saving his son Clarence's life."

Great Northern to Make Direct Connections Soon.

NEW FAST TRAIN COMING

Possibility That Too Many Cars for Service Involved Will Result Is Being Considered Seriously

by Railroad Men.

That Great Northern trains will be running through between Vancouver, B. C. and Portland early in the Summer is the traffic manager of the road, who is in

Portland. Portland.

Mr. Costello said yesterday that he could not make an authoritative statement regarding the proposed new service, but that in his opinion it would be established as soon as the double tracking of the Northern Pacific has progressed far enough to warrant the additional burden on the road. This, it is expected, will be early in the coming Summer.

"It is probable that one through train between Vancouver and Portland will be put on," said Mr. Costello, yesterday, and at least one fast local train between Portland and Seattle. Under the terms of the traffic agreement the Northern Pacific is to complete a great deal of Pacific is to complete a great deal of betterment work, and is now engaged in expending \$5,000,000 in double-tracking and other improvements. The single track is now carrying really more traffic than can be moved expeditiously. "The westward travel this year prom-

ises to be heavy. We are receiving a great many inquiries about Oregon and intend to exploit Central Oregon through bulletins issued by the company. The immigration department is now gathering

immigration department is now gathering statistics for that purpose, and we have a man engaged in that work in Central Oregon for some time.

"Central Oregon offers practically the only opportunity in the United States for all classes of homeseekers, for opportunities are offered there to the merchant and man in every business line, as well as to the farmer and fruitgrower. The development of that country will be a great thing for Portland, for it will be tributary to this city."

Mr. Costello's statement that the Great Northern will take advantage of the triparty traffic agreement affecting the Portland-Seattle line of the Northern Pacific, is not taken here as meaning definitely that the actual number of passenger trains in service will be increased that mean.

senger trains in service will be increased that many.

A strong intimation is given that he-fore the Great Northern puts on its trains an effort will be made by the three roads to get together and try to equalize matters so that the train service will not be greater than demanded by the traffic. The Northern Pacific is now running four trains each way daily between Portland and Seattle, and the Oregon & Washington three. The addition of two Great Northern trains would make a total of nine trains daily between the two cities, when the present traffic could be handled comfortably by six, it is said. There is understood to be nothing in traf-fic the agreement that binds either road as to the number of trains it may run, but it is virtually certain that the roads will try to get together on a division of the business, whether they succeed or not.

Opportunity Never Better in Oregon. Says Traffic Manager.

any period in recent years to homeseekers is the opinion expressed by J. G.
Woodworth, traffic manager of the
Northern Pacific, who is spending several days in Portland on business.

"I lived in Portland 15 years and
know conditions here," said Mr. Woodworth yesterday. "Consequently, I have
no hesitation in saying that now is the
time to come to Oregon.

"The cities will take care of themselves, but the country needs population
and also offers greater opportunities.
The railroads will do their part. They
have already spent immense sums of
money in advertising the Western
States and will do more in the future.
Our passenger department reports an
unusual number of inquiries from intending settlers and an increasing proportion of them have as their objective
point Portland or some place in the territory tributary to Portland.

"It always his seemed to me that the
new growth of this city has dated from
the building of our Portland connection, the North Bank Road, and although it has not been profitable up to
date, we have no fear of the future.

"The switchmen's strike is over. Not
all of the old men came back, but we
have good men in their places and our il of the old men came back, but we

have good men in their places and ou through business is being moved with

ADVANCE IN PRICES AT ALAMEDA PARK

BROADWAY CARS ON REGULAR SCHEDULE DI-RECT TO ALAMEDA PARK—PRICES ON LOTS AT ALAMEDA WILL ADVANCE MARCH 1.

The time is now ripe for the further advance of prices on Alameda Park lots. This fact is proved by the numerous re-sales made by original lot buyers at stiff advances. Another reason for a rise in prices is the fact that the regular Broadway schedule is now

maintained direct to and will be extended on through the Park. However, in order to give everyone the opportunity to buy at the present exceptionally low prices, which are, in fact, one-half the prices asked for property less favorably situated, the price advance

will not take place until March 1. The property will be shown and explained any day, rain or shine, by appointment. Those who wish to run out and take a look for themselves, without any assistance, may simply take the Broadway

car and get off at Alameda Park.

Further information may be had of the Alameda Land Company, owner of Alameda Park, 322 Corbett Building.

CARTOONIST BLAMES SHOW WINDOW FOR DISCONTENT AND DOMESTIC WOE

Handsomely-Gowned Figures in Stores Prompt Comparisons That Often Lead to Strife in Home, Which Leads to Divorce Court, Declares Alfred Jackson.

66 THE show window, with its down the street and observes these things and her desire for articles she ures, picture hats, glittering cannot afford becomes almost unbearhandsomely-gowned waxed fig-ures, picture hats, glittering tiaras of diamonds and other precious stones, is the greatest enemy of happiness in the home with which we have to contend.

This little preachment was made yesterday by Alfred Jackson, fightning prominent place on the programme at the Grand Theater this week, and who drew the accompanying sketch of scenes and people on Portland streets. Continuing his attack on the show window, Mr. Jackson said: "With a little stretch of the imagina-

able. A woman is a woman. That is not a very clear statement, but you cannot get away from the fact that when a woman wants anything she wants it badly, and some of them, good

wants it badly, and some of them, good as they are, will do almost anything to realize their desires.

"After seeing all these fine things she goes home and, finding the condition of her husband's finances such that she cannot have them, a discontent breeds in her soul and she is unhappy. When the wife is unhappy, so also is the husband, if he is the right sort. Sometimes the woman permits herself to resent this impecunity of her husband, and the divorce court comes next.

Mr. Jackson is much impressed with over the country and everywhere has made a study of women and types. He calls Portland women Bostonians.

calls Portland women Bostonians.

"This is the only city in the country where the women remind me so much of Boston women," he said. "They are very much alike. Few women walk down the streets of Portland without an elevation of the nose of about 45 degrees. I find here that the show window is largely patronized. I hate to see that. Wherever I go I find a crowd of women gazing longingly into the show windows.

"I think Portland women have a le-

"I think Portland women have a le window, Mr. Jackson said:

"With a little stretch of the imagination you have a panorama of everybing that appeals to a woman's heart by an inspection tour of the shopping district of any city. A woman walks its start from the show window."

Sometimes the woman permits herself to resent this impecunity of her husband, and the divorce court comes next. Were the truth known, I am positive in things you notice here is these high steps. I have taken this subject for one of my sketches."

HOMESEEKERS' TIME RIPE

That Oregon offers opportunities as good as, if not better than, those of
