Transcontinental Roads South of Line Believed to Be Seeking New Business - Rupture With Northern Pacific Likely.

Invasion of British Columbia by the transcontinental railroads that now have lines into Seattle, and a retaliatory invasion of the Puget Sound country and Oregon by the Canadian Pacific are strongly indicated, say men who are observers of railway development in the

is planned by the various roads is published by the Railway Age, which mentions the probability of the American roads extending from Seattle to Vancouver, B. C., and the Canadian Pacific building to Seattle, Tacoma and Portland.

The Great Northern is the only American road now having an extension operating to Vancouver. This extension is the coast line of the road, which runs along the Sound through Bellingham and along the Sound through Bellingham and Blaine, and thence to the British Co-

C. P. R. Has Track Rights.

The Northern Pacific has a branch line in operation northward through Snohomish, Wickersham and other interior points to Sumas, a town on the interna-tional boundary line. The Canadian Pa-cific has a branch line extending from Mission Junction, B. C., southward to Sumas, and for several years has had traffic arrangements with the Northern

traffic arrangements with the Northern Pacific, which permits the road to get into Seattle over the Sumas branch.

At one time the Canadian made Bellingham its Puget Sound rall terminus, reaching that point over the Bellingham Bay & British Columbia from Sumas. Several years ago negotiations for the purchase of the Bellingham Bay road were almost concluded, but were stopped were almost concluded, but were stopped by some final hitch. Rumors have quently arisen since then that the nadlan Pacific would purchase the Bell-ingham Bay & British Columbia road, and extend it to Scattle, or would parallel the Northern Pacific to the upper

With the Union Pacific and Southern Pacific now reaching Seattle over the Oregon & Washington, and the Milwaukee operating a through freight service the competitive situation in sight is be-lieved likely to bring about a rupture between the Northern Pacific and Canedian Pacific and a branching out for more traffic in British Columbia.

All Roads Plan Branches.

The Milwaukee is already heading for Everett 30 miles north of Seattle, but it is 126 miles to the boundary line. All the roads mentioned would serve practically the same country between Scattle and Vancouver, being limited as to routes by the topography of the country, and extension into British Columbia.

land in conjunction with the O. R. & N. line between Portland and Spokane.

Attempts have occasionally been made to identify the mysterious North Coast oad as a Canadian Pacific venture, and if this surmise should turn out to be true, the Canadian Pacific will be equipped with a through route, via Spokane, to Puget Sound, and can probably afford to give up its traffic arrangement with the Northern Pacific, pending the construc-tion of a north and south line of its

Identification of the Canadian interests behind the North Coast would account, too, for the anxiety of the American roads to get into British Columbia on retaliatory grounds.

OPPOSES FREE RANGE

Writer Advocates Perpetual Public Ownership.

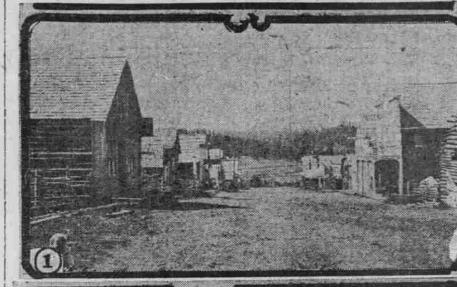

PORTLAND, Feb. 19.—(To the Editor.)—The Ballinger-Pinchot controversy has certainly attracted the attention of the people to the need of Government ownership of the forests and grashing lands of the United States. The time has come when the people must act. They are the Government and are to blame if the public domain is not handled as it should be.

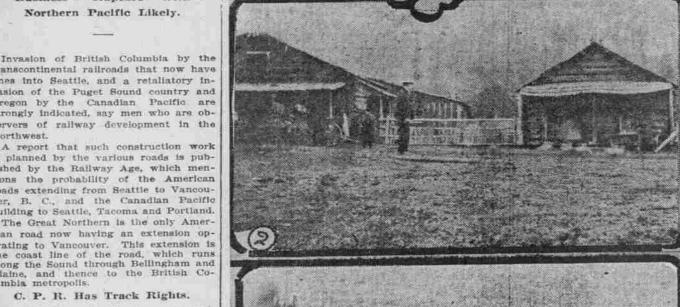

The people in general have not given a thought as to the manner in which the public land has and is being disposed of, and something radical had to be done to settract their attention to the need of conservation. The people have let the pellicians handle the subject long emough and should awaken to the fact that there is something for them to attend to at once. There are millions of acress of Government land classed as forest and grazing land. Is it not better for the people if the Government owns and controls it, than allow a few private interests to 100 and for public range would superivered it med in number of head of the land under the public range would superivered it mes the number of head of the land the settlers on small farms give a chance at the Government pasture. It is time to prohibit livestock from anging at large over public land free of charge. All livestock should be herded or placed in inclosures, the same as is done or placed in inclosures, the same as is done or placed in inclosures, the same as is done or placed in inclosures, the same as is done to placed in the losures, the same as is done to placed in the losures, the same as is done or placed in inclosures, the same as is done or placed in the public range free of charge. The grazing lands should be herded or paraing upon the public range free or charge. The grazing lands should be leased to settlers, who live near, and limit the amount to each, so that all who wish and are entitled to a share can get it. The land ought to be left open for entry under the United States land laws, and if siled on possession should be given at the expiration of lease.

The stockmen who occupy the free range h

D. O. LIVELY KEEPS BUSY

Attractive Programme, With Good Race Card. Has Been Prepared and Oregon's Rapid Progress Will Be Shown by Display.

All of the obligations of the Portland Fair and Live Stock Exposition have been paid or provision made for their payment and plans for the 1910 fair are under way. "We look for a big event this year," said D. O. Lively, who is doing the preliminary work pending the selection of a permanent secretary. "We will try to make this year's fair so varied that every man, woman and child in the Northwest will want to see what we have to offer. There will be a big display of live stock, including horses, dairy and beef cattle, sheep and hogs. An attractive race card will be a feature; there will be side shows along the 'log road.' There will be auto mobile and motor cycle races. A baby show is also being considered. "We will also offer prizes for the long-

est and most beautiful hair shown by girls not over 7 years of age and for girls between 7 and 12.

Manufacturers to Be There.

Every manufacturer of Portland and Oregon will be asked to display his prod-uct; we will ask the lumber mills to pre-pare an exhibit and the sellers of agricultural machinery to make a display in keeping with Portland's importance as a distributing center. The presidents of the Oregon Trunk and the Deschutes Railway companies will each be asked to prepare a display of the products of Central Oregon and offer prises for dry farming re-sults. The leading department stores will be expected to erect and equip booths in which they will display their choicest

"Western Oregon will be looked to for the greatest display of orchard products that has ever been made in the West and each day there will be lectures on some live industrial topic.

"The right show will be worth while.

There will be free vaudeville, economic lectures, magic lantern demonstrations of progress in the elimination of disease,

and other educational features.

"Portland's and Oregon's school children will engage in friendly rivairy in art competition, map making, mechanical skill and music, and the women of the entire state will be invited to show their chill in madiawork in cullinary endagers. skill in needlework, in culinary endeavor and in the other arts. Special days will be set apart for the fraternal orders, for the different sections and cities of this state and Washington, for children, for women, for amsteur horse events, and for special parades. We will en-deavor to make Portland day a bigger event than Seattle day was at the Alas-

Music to Be Special Feature.

"Music will be a special feature. Bands will play during the races and in the evenings. In addition to this we hope For Shur-On Eye Glasses, Kryptok Invisible Bifocals and Deep Curve Lenses, see Thompson, eye specialist, second floor Corbett bldg. 5th and Morrison.

the roads mentioned would serve practically the same country between Sentically the same country between Senticelly the same country betwe and through his organization. We expect the Y. M. C. A., the Y. W. C. A., the Daughters of the Revolution, the daughters of the Confederacy, every social, fraternal and business body or society to belp us give Portland a fair that will be in keeping with the city's import-ance and standing."

BANDON'S CLUB IS ACTIVE

Organization Busy With Project for Town's Development.

BANDON, Or., Feb. 26 .- (Special.)-Bandon's Commercial Club is an active organization and splendid results are expected for the city. Besides getting the proposition of establishing a Port of Co-quille River before the people, so that an election will be called on the question very soon, the club has taken up a num-ber of other propositions. A sidewalk will be laid from the city to the beautiful Bandon beach so that visitors as well as residents may have easier access to the ocean and the club has also taken up the subject of establishing a marine hospital here and the secretary is now in communication with the proper authorities on the question, with excellent pros-

pects of success.

The question of putting a telegraph line into the city has been taken up with the Western Union Company. Messages are now sent and received by telephone from Marshfield, which is very unsatisfactory.

Singing Societies Unite in Concert. VANCOUVER, Wash., Feb. 20.—(Special.)—The first annual concert of the Vancouver Liederkranz, a German musical society, was held in Eichenhaub's hall Sunday afternoon. The Singing Society of the Portland Turnverch assisted. There are 25 male voices in the Liederkranz and 50 men and women singers in the Turnverein. A. J. Enderlin is the director of the Liederkranz and Professor E. Stebinger is the director of the Turnverein.

Reports Affirm Importance of Elk City Find.

PORTLAND WILL PROFIT

District Is Commercially Tributary and Will Be Developed-Second Cripple Creek, Is Prediction

of C. E. Skiles.

Reports from the Morrow-Harmon edge uncovered at Elk City, Idaho, con inue to affirm the importance of the discovery on the south fork of Clearwater river. The new bonanza is about nine niles from the old camp of Elk City, and is between the stage station of Newsome and Elk City. The location is practically within the heart of the old nining district and much of the adjoining ground is covered with old locations which have been kept alive by the performance of annual assessment work. and in many instances the properties are owned by companies which for years have maintained steady development. Among the late arrivals from the Idaho find is Charles E. Skiles, president of

posed largely of Portland men, and which entered the Elk City district in 1902, Magnitude Not Doubted.

the Gold Success Mining Company, com-

"There is no doubt of the magnitude of the strike reported from the Mor-row and Harmon property," said Mr. Skiles at the Portland yesterday. "I know the men as old prospectors of the district and am not in the least cha-grined that such good fortune should crown their efforts. The result will be that the Elk City district will receive recognition and the development it has lacked will be begun speedily. The new strike opens the way. It was all that was necessary to assure the future of the camp and make it to Portland what the Coeur d'Alenes has been to Spokane, It was the money of the miners that made Spokane, and as the new camp will be altogether dependent on Portland for its supplies, it will follow that this city will be the Denver of the mining interests of Vesters. interests of Eastern Oregon and Western

Idaho.
"Elk City has operated low-grade free milling properties for many years. The cost of mining and milling the ore has averaged only about £1.52 a ton. Last year 62 claims and groups of claims were being operated. Many of them are equipped, as in the Gold Success group, with stamp mills avenide vate and the control of the control with stamp mills, cyanide vats and van-ner or wifley tables. I pinned my faith to Elk City eight years ago, after spending twenty years in Colorado and the mining camps of that state. The min-eral is there, and with the impetus which the new bonanza will give the district we hope for better transportation facil-ities. The output of ore will follow.

Trip Not Tiresome. "The best way to reach the district is by way of Lewiston. You leave here in the evening. Breakfast is had in Lew-iston. In the afternoon the train leaves for Stites, reached in the early evening. Next morning a stage leaves for Elk City, the first night out being passed at Newsome, and the journey to point of destination being finished next day. The roads are splendid and the trip is not in the least tiresome."

"The snow is now about three feet deep up there now, and aside from examinations of the tunnels and other openings which can be reached, the formation of the country can not be investigated. It will be the first of May before prospectors can do much good for themselves, although the rush has started from the towns on the east side of the state and in Western Idaho. Many of the men who are going in now will not be able to remain, and are the class who rush to every excitement in hopes of securing a location upon which a ready sale can be had.

The Elk City district lies entirely within the gneiss area. Isolated rem-nants of quartzite and mica schist are found in different parts, indicating that it once was overlaid with greatly altered sedimentary rocks. Intrusive dikes of igneous rocks are frequently found, and the veins of mineralized matter occur strongly. Values have never been found to be uniform in the various discoveries and are apt to show in some stratas in greater quantities than in others. The quartz is free near the surface, and the depth at which the new strike cut the ledge encourages the belief that the sulphides will be encountered at a much greater depth than was expected."

Camp Established in 1862.

Elk City was first brought to the attention of miners in 1861, when a party of prospectors made its way along the South Fork of the Clearwater to what was then the hunting ground of the Nez Perce Indians. The Indians considered the intrusion a violation of treaty rights, and it was only after a long parley that the party was allowed to reach Elk Creek, where rich gravel was found. In 1862 Elk City was established and a mining district organized, with Captain L. B. Monson as recorder of claims. The "skim" diggings, as the bars of the streams were designated, proved im-mensely rich in coarse gold and were worked out with the old rocker of the California days. In 1864 the miners began working the beach land with hydraulic apparatus, and it is said that the season's clean up from the first giant in-stalled was \$183,000. Experts assert that the total output for the placer mines to

the time of their practical abandonment in 1889 was \$18,500,000.

In 1884 the Buster vein was located as the ploneer of the quartz mines of the district, and is now owned by a com-pany headed by Fred Bradley, of Port-Morgan & Robb, 29 Stark st., will in-land. The early history of the Buster was one of failure, but it is now asserted

that the interest of S. W. Smith alone could not be purchased for half a million dollars. Among the other big properties are the group operated by the Gold Success Company and the Snow Storm group, owned by Pittock Brothers and Joe Coverly, G. M. Carter, Charles R. Stone, Charles E. Syenson, George S. Young, Charles E. Svenson, George S. Young, J. M. McCaffrey, Dr. J. B. Parks, R. W. Brownell, Walter Cook and J. H. Col-grove are some of the men who are in-terested in the larger properties of the

camp.

The district is said to cover a territory 20 by 30 miles, and to afford available sites for the development of electric power for the use of operating the machinery which will follow investments.

"As surely as anything in this world can be, so surely will Oregon see the development of another larger and better Criente Creek test over the east line of

ADVENT OF HALLEY COMET

Effect on Oregon Politics Treated Scientifically.

PORTLAND, Feb. 19 .- (To the Editor.) -Desiring to add my mite to the enlightenment of the poor and misguided sufferers from Bournecitisis, I answer the following queries just received:
"Why do assemblymen make us tired?—
Quillinan." Yaups always make themselves tired. They are sufferers from the

loss of mental appetite.
"How can one be married, yet happy?
—Doubter." By adopting the assembly plan in the family. Every sensible wife is an assembly man. Transient misun-derstandings are settled for good and all in convention assembled in the home, by the majority vote, a vote which, of course, is the woman's. What would you think of a molly-coddle husband botting in this case and telling his troubles to the whole state? Pooh, I'd rather marry a wooden

"Was Halley, who discovered the comet bearing his name, a cockney?—Scientist." Yes, if the calf is the mother of the cow. The O'Halley's or O'Malley's set-tled in Bally-Phillalew, about one stonethrow to the south of the peat bog, where the wild ass and the jaunting car upset O'Hofer and O'Bourne. Fear not any danger from Halley's comet. The last time we butted into it we demonstrated to the assembled astral convention our ability to throw off as much gas, bom-bastic meteors, foul-smelling volcanoes and fishmonging asteroids from dead politicians as any comet that ever came down the orbital pike. Halley's comet knows when it's well off. J. H. M.

The study of medicine is as broad as life and as complex as nature. It is therefore impossible for any individual to master the treatment of all human ills. The man who attempts to do so is able to cure only the most simple aliments. The ordinary physician is like the man who attempts to master every branch of mechanics, from watchmaking to shipbuilding. Such a man becomes neither a good watchmaker nor a successful shipbuilder. The general medical practitioner knows as much about one disease as he knows about another—and he has no intimate knowledge of any. The cures he performs—when he is fortunate enough to cure—are usually purely accidental. The patient gets well, not because of the physician's efforts, but in spite of them. When the ordinary physician treats men's aliments, HE RARELY EFFECTS A CURE.

I AM A SPECIALIST IN MEN'S AILMENTS. My practice is confined wholly to the ailments of men, and the fact that I invariably cure every case that I accept for treatment PROVES that my methods are correct. Indeed, I have for twenty-five years made a specialty of men's aliments and have so closely studied them that I am able to meet every phase and condition of each individual case, and to effect a permanent cure in a very short time. I am never for a moment in doubt as to my course. I know just WHAT to do and HOW to do it, to obtain satisfactory RESULTS. This explains why my practice has grown to be by far the largest in the western part of So confident.

America.

So confident am I that I can effect a thorough and LASTING CURE in each case that I accept for treatment, that I will give a Written and Binding GUARANTEE TO CURE YOU, and YOU NEED NOT PAY ME A DOLLAR UNTIL YOU ARE WELL.

Bear in mind that I could not afford to do this if I did not KNOW that my treatment would not fail. I am the only doctor who dares to make such a proposition. Under no circumstances do I ever take cases for treatment that are doubtful. Hence, if I accept your case for treatment you may absolutely rely upon it that I will cure you.

MY METHODS ARE ORIGINAL. MY METHODS ARE ORIGINAL.

My methods are entirely original with me, and the result of many years of special study and experience. Instead of filling my patients up with powerful drugs and stimulants, as do other specialists, I apply soothing, healing and absorbent medicines DIRECTLY to the DISEASED REGION, and thus aid nature in overcoming the trouble. The best that human skill can do is to ASSIST NATURE. It is nature that performs the cures. Powerful drugs taken through the stomach do not cure. They merely set up a new disturbance in the system, which, for a time, diverts the energies from the old disease to the new attack. This process is invariably attended with a reaction, and in consequence, leaves the patient in a worse condition than before treatment. Another method employed by another class of physicians is to dose the sufferer with tonics, which exhiliarate the patient so that he actually believes himself improving under such treatment. But after a very short time, these stimulant medicines cease producing the desired effect, when the allment gains a new and firmer hold upon the patient.

HOW I CURE.

My method of treatment overcomes infiammation and congestion by siding the tissues of the diseased region to throw off the poisonous secretions and the deadly toxins caused by the disease. Some of these toxins are more poisonous than the virus of the rattlesnake's fang. Thousands of the cases of sudden death which occur with alarming frequency in every city in the land, are directly due to toxic poison, although such cases are usually pronounced "heart failure," or heart disease. My treatment completely eliminates every trace of disease and accumulated poisons from the system, and thus allows nature to perfect a COMPLETE CURE. HOW I CURE.

DO NOT BE DECEIVED.

My methods have revolutionized the treatment of ailments peculiar to men, and consequently altered former medical theories. Imitators of my system of practice have sprung up everywhere. A pronounced success in any field of human endeavor begets imitators. Following the Genuine, there always comes the Counterfeit. These imitators of mine insist that they cure by means similar to those I employ. Such statements are uttered with a base intent to deceive. The facts are that NO OTHER PHYSICIAN ANYWHERE TREATS MEN'S ALLMENTS BY MY METHODS. My treatment is the ORIGINAL and ONLY GENUINE Direct-Method Treatment for the Aliments of Men.

My MODERN and up-to-date methods effect a certain and speedy cure of CONTRACTED ALLMENTS, SPECIFIC BLOOD POISON, NEDVONS DEBILITY, and all contracts.

My MODERN and up-to-date methods effect a certain and speedy cure of CONTRACTED AILMENTS, SPECIFIC BLOOD POISON, NERVOUS DEBILITY, and all reflex allments. Examination and Advice Free

I offer not only FREE CONSULTATION and ADVICE, but of every case that comes to me I will make a Careful Examination and Diagnosis without charge.
