

McCREEDIE'S BOYS WIN FIRST GAME

Santa Maria, Cal., Team Taken Into Camp by Port- land by 7-to-3 Score.

CASEY ORIGINAL "HOMER"

With Walter McCredie's Scoring First Run of Season, Beavers Start Rush for 1910 Pennant With Vim, Meaning Business.

BY W. J. PETRAIN.
SANTA MARIA, Feb. 27.—(Special.)—Walter McCredie, candidate for the pennant of the Pacific Coast League started off with a vim today by beating the pesky bunnies from the home of Santa Maria, by the score of 7 to 3. The advance guard of the Portland team appeared on the grounds one man shy, for none of the expected new men put in their appearance in time to play the game and a young fellow from this town alternated with one of the veterans, accompanying the Portland team in right field.

Casey's hit was a good one and would have been a "homer" on either the Portland or San Francisco grounds. Ralph Lyons, on the local team, pitched a "homer" over the same fence in the next inning and this tied the score.

McCredie Scores First Run.
Walter McCredie scored Portland's first run in the second inning, when he doubled to left field fence and scored when Harditt, the Santa Maria pitcher, became wild and walked three men successively. Armbruster doubled in the fourth inning and after being sacrificed to third by Garrett, Perle Casey scored the first homer-run of the season by driving the ball far over the right field fence, sending "Buster" in ahead of him.

Garrett's Playing Is Feature.
The feature of the game from a fielding standpoint was playing of third base by Jesse Garrett, who handled six chances without an error and McCredie's great playing in center field for the first time pulled down eight hard drives during the game, several of which were difficult to catch because of the high wind and a one-handed catch by Mac brought down the house.

How Teams Lined Up.
The teams lined-up as follows:

BRIDE BALKS AT BOARDING

Cosy Flat, or Nothing; Bridegroom Broke, so Nothing.

NEW YORK, Feb. 27.—Because his bride refused to live in a boarding-house when he couldn't furnish a flat, as he had spent his "roll" to buy her a new gown, Joseph Ryne, of 82 Lane street, Paterson, N. J., said he would try to have the marriage annulled.

Ryne and Miss Lena Glass were married after two weeks' courtship carried on in a silk mill where they worked. Ryne paid \$50 for her wedding dress and the couple were married by Justice of the Peace Ettelson.

Then came trouble. Ryne started to plot the bride to his boarding-house. She had expected nothing less than a flat. When she learned of their proposed destination she stopped plumb still in the street, declaring she wouldn't budge a step toward a boarding-house now that she was a married woman. It must be a flat or they'd part. And they did, then and there.

Player-Pianos

How to Select a Player-Piano

Do not buy any make of player-piano simply upon a salesman's say-so, or anyone else's say-so. Do not make a final decision until your OWN UNDERSTANDING tells you that a certain instrument is best.

The Apollo, the Original 88-Note Player-Piano

For eight years the Apollo was the only player with a range of 88 notes, or the entire keyboard of a 7 1/3 octave piano; others played only 65 keys and fought the APOLLO complete keyboard idea.

They fought it because they could not produce a satisfactory 88-note instrument. The invention was Melville Clark's, and he controlled the patents on the only successful mechanism.

Within the past year, when the success of the APOLLO 88-note player promised to crowd the 65-note instrument from the market, other manufacturers have come out with 88-note players.

The fact that during these eight years the APOLLO PLAYER-PIANO was the only 88-note instrument on the market has won for it a wide patronage and unquestioned popularity. As a result there are more 88-note APOLLO player-pianos in use today than the combined product of all other 88-note player factories.

Is it not a reasonable assumption that the player which alone and single-handed has forced all others to accept a great and revolutionizing idea is a better instrument than any imitation could be?

THE FOLLOWING IS VERY IMPORTANT

Would you not like to know how you can make any competitor admit that the APOLLO was the first complete player-piano, and for eight years the only complete player-piano?

We can show you in five minutes' time how you can make any competitor admit this.

Now, if this is true of the APOLLO, do you not think the APOLLO is worthy of your serious consideration, and that it would be a serious mistake to decide on some other make without giving the APOLLO 15 minutes of your time?

THE PIANO USED WITH THE APOLLO PLAYING MECHANISM

The Melville Clark Piano, in which the APOLLO player action is placed, is a type of the highest artistry in piano-building. In tone it is equal to the best pianos on the market. In touch it is a delight to the musician. In case design it is beyond criticism.

Will you not visit our warehouses this week and investigate the APOLLO, the greatest player-piano the world has ever seen?

The APOLLO will cost you a little more than any other player-piano, but then it is worth more, as you will admit after investigating all other makes. We want to sell you, of course, but wish to convince you first. Other standard makes of pianos at lowest prices.
