attend the aviation meet. The event, through the efforts of the publicity com-mittee, is being advertised through slides which are being shown by virtually every moving picture show in the States of Oregon and Washington and a very large attendance is expected as a result. Today a committee of prominent business men will visit the grounds where the meet will be held, for the purpose of sceing that adequate arrangements are made for the accommodation of the large number of spectators.

Among local people who probably will among local people who probably will enter the meet are the following: Howard M. Covey, driving E. Henry Wemme's Curtiss biplane; Jack Manning, with two factory-made biplanes; J. C. Burkhardt, with biplane made in Portaind and E. P. Preble, with a new machine combining the features of the scroplane and dirigi-ble balloon ble balloon.

## MRS. COX LAID TO REST

Police Battalion, Officials and Other Friends Attend Services.

The funeral of Mrs. Anna Cox, wife of . M. Cox, Chief of Police, was con-acted yesterday forencon in Woodmen's Hall on East Sixth street, between East Alder and East Washington, in the pres-ence of about 1000 persons. Captains Bailey and Slover, with their reliefs, and Captain Baty, with officers of the day re-lief, were present in full uniform, and the ushers were members of the police force. The casket, covered with lilies and carnations, rested in front of the plat-form. On the paliform was a profusion of elaborate floral pieces from the police, Woodmen of the World and other friends. For Chief Cox and the bereaved family a screen had been placed at the left of screen had been placed at the left of the platform.

The services, which were simple and The services, which were simple and brief, were conducted by Rev. F. D. Mar-shall, assisted by Rev. W. F. Martin. Rev. Mr. Marshall delivered the funeral address. Her life, said the speaker, was devoted to the welfare of her children and to others, scarcely ever thinking of herself. Want or sickness or distress in her found a ready response and help. in her found a ready response and help-

ing hand. The police battalion then marched in front of the casket, followed by others who were present. Interment was in Riverview Cemetery.

Mayor Simon, Auditor Barbur, Judge Bennett, members of the Council, and other city officers were among those who attended the services.

## STRANGENESS OF POLITICS

Oregon Brand Contrasted With the

English Kind.

English Kind. PCRTLAND, Feb. 27.—(To the Editor.)— Folilies makes strange bedfellows But there size politicians and politicians. Great may lie down with some of them without a dialnetctant, and one may get with some some others of them with "Mulligan board-ers." Great politicians have comprehensive thoughts of the roughnecks and "blather-mouths." In England are two great political leaders. One of them. Herbert Henry As-quith, Prime Minister and First Lord of the

given any serious attention to the development of their country, they must have left their thoughts at home for the children to play with. I fancy the test here today would work itself out in this

here today would work wise: Q.-Who are the people? A.-The people are a joke. Q.-Correct you are. Now what are the qualifications to enter the clan of Jonathan? A.-A half bushel of lungs and the man-ners of a buildog. Q.-Correct again. You for the Legisia-ture and the holy statement. Now what is the duty of a legislator? A.-To look wise and vote with the sheep noses. J. H. M. Nature of Soil and Location of Bed

HOSPITAL HAS ROMANCE SUFFERING IS BOND OF SYM-PATHY FOR PATIENTS.

Red Roses Convey SHent, Tender Messages Every Day to Dainty Convalescent.

Commonly, there is little of romance about a hospital. But when two patients, who have never seen each other, spoken or even seen each other's pic-

## Portland Schools 50 Years Ago.

PORTLAND, Feb. 26.-(To the Editor.)-Facts are made impressive by compari-son. The conditions of the public schools in this city 50 years ago and at the present time, are indicated by the fol-lowing report: "Statistics for District School House

Statistics for January, 1880: Higher department, L. L. Terwilliger, principal; Miss Hattle Millard, assistant, Number of boys in number, 104; average, 2%. Admissions, 1. "Intermediate department, Sylvester Pennoyer, principal. Number of boys in attendance, 36; number of girls, 25; whole number, 72; average, 52. "Primery department, Market and Solves and Solves S

should be spaded to the depth of not less than one foot deep and all the ground well pulverized; all stones, roots, etc., should be thrown out. Be Planted as Garden Truck Is, in Well Pulverized Soil. **OREGON MILLS RUSHED** A few weeks ago A. L. Weatherford asked through the columns of The Oregonian for information concerning the SIXTY-FIVE LUMBER PLANTS growth of ginseng in Oregon. growth of ginseng in Oregon. David Graham, who lives near Pros-pect, in Jackson County, planted an eighth of an acre four years ago last Fall. The crop requires five years for development, but Mr. Graham found the roots crowding, and rather than Manufacturers Forced to Turn Ortransplant he thinned them and har-vested 150 pounds. These roots were so near maturity that a Chicago dealer

Do Not Matter and Roots Should

offered him about \$7 a pound on the samples sent. Charles A. Kibbe has what he calls a "scientific intense culture ranch" near Salem. He started the culture of ginseng eight years ago at Buffalo, N. Y., and moved to Illinois later. A year ago he came to Oregon, with nearly

\$4000 worth of ginseng seed and root stock and in the past season the in-crease was phenomenal, being 50 per cent better than experienced in the East. He says, from observation at a small field near Monmouth, that the

time is receiving much attention be-cause there is a larger income from it than in any other product that can be raised. Eight hundred roots will grow on one square rod of ground, which makes 128,000 to the acre. Some grower claim as many as 150 and and

be found to contain about 125,000 roots. George Stanton, a ginseng-grower of New York, made the following report to the Agricultural Department Washington.

Washington. In 1897, from 8½ beds, 3x6 feet each, 2270 roots, weight 126 2-16 pounds, were taken; 1505 taken out for replanting, weight 29 15-16 pounds, leaving 96 pounds to be dried, which made 32 pounds diry, value \$165. There were also 1505 seedling roots, weight 5½ pounds. Had the en-tire product of marketable roots from the 18 beds-320 pounds-been dried. It would have made 198 pounds dry, which would have made 198 pounds dry, which would have made 198 pounds of ground with 5% years' cultivation. I do not need to add the value of the seed produced during cul-tivation or the value of \$617 seedling roots. On account of the increased price.

One square rod of ground produces S00 roots, set six inches apart each way, allowing for walks between the beds. Estimating four roots to the

decided upon make it as rich as CROP IS OF GREAT VALUE would for your garden vegetables. Lay it off in beds from four feet wide with a narrow path one foot to two feet on each side. Those wider than this are TOWN IS MOST ACCESSIBLE hard to care for, owing to the distance being too great to reach easily in weed ing and gathering seeds. The bed

To Avoid 135-Mile Journey by Wagon From Nearest Railroad Point to Burns, New District Has

Been Made; Vale Center.

OREGONIAN NEWS BUREAU, Washngton, Feb. 27 .- The House committee on public lands, in favorably reporting the Chamberlain-Ellis bill creating a new land district in Southeastern Oregon, sets forth reasons why this additional district is needed, and why Vale is selected as the site for the proposed land office. The committee report says:

The territory sought to be embraced with The territory sought to be embraced with-in the new district is about 11,800 'square miles, or about 7,500,000 acres, of which about 4,000,000 acres is unappropriated pub-lic lands. Nearly all of this is taken from what is known as the "Burns district," but there will remain in the Burns district, an acreage of 8,500,000, of which about 6,000,-000 acres is unappropriated public lands. All the lands within the proposed new dis-trict, except about 10 townships, are now subject to entry at Burns, a distance of 135 miles from the nearest railroad connecreport a careful canvass of the mills in Oregon shows that 65 mills, having an average cut of 46,000 feet, report having all the tus ness they can possibly han-dle for the next 60 days. Thirty-six of these mills report a large volume of subject to entry at Burns, a distance of 135 miles from the nearest railroad connec-tion, nacessitating that these who must ap-pear before the Land Office travel by stage or private conveyance a distance of from 300 to 500 miles, causing loss of time, great hardship and expense. A number of irri-gation enterprises are now being developed within the territory of the proposed dis-trict that will greatly increase the volume of humess, which is now very large. Vale, the proposed site for the new office, is the county seat of Malheur County, within the bounds of which is comprised most of the territory and irrigation projects of the new district. Vale has railroad facil-lities and other advantages that make it much more accessible point in the new dis-trict. In order to accommodate the settlers and more them unnecessary hardship and expense, we believe this bill should be emacted into law. Embedded in the report is a letter from Secretary Ballinger recommend-135 miles from the nearest railroad conne A number of manufacturers find that they are unable, on account of the vol-ume of business booked, to keep their found it necessary, in many instances, to turn this business over to neighbor-ing mills to keep faith with their cus-tomers. Discussing the trade outlook

in adjacent territory, officers of the Oregon and Washington Association, in a circular letter to the members of the

from Secretary Ballinger recommend-ing the district, and adding:

organization, say: The outlook in the Inland Empire and California is excellent for the lumber busi-heas, and although we fully realize that many interior millis, that are now shuld down, will recommence operations as soon as the weather permits, creating additional cutting, we have assumed through answers to inquiries that most of these mills have sufficient orders for railroad ties to keep term busy for 60 days from the time they camence operations so that no possibility exists of oversupply. We are also encouraged to believe that interior mills, as well as for such portion of the cut of larger mills as care to un-dertake this class of business. ing the district, and adding: The creation of the proposed district would to a large extent, relieve the set-tiers in the eastern part of the delistrict from traveling long distances by wagon road because of the proximity of, in the western part of Idaho, the Idaho Northern and Oregon Short Line Rallways. While the location of the Land Office for the pro-mosed land district is at Vale, in the north-eastern part thereof, it has railroad con-metion and is on the lines of two military weatorn parts of the district. Another weatorn part of the proposed district from east to west, which affords the set-lers in that locality a convenient method of travel to the near-by railways. In West-ern Idaho, above referred to. During the facal year ended June 30, 1902, 1292 entries of public lands covering 318,-057 acres. were made in the Burns Land Office, with receipts of \$35,586 and ex-penses of \$7592, \$8000 of which expenses was paid to the register and receiver as their compensation. The total fees and commissions earn were \$11,097, \$3007 of which represents the excess after the pay-ment of the compensation of the register and receiver. From the isolated location of the Burns land office, the difficulty experi-enced by settlers in visiting it, and the
