

ALLOS RESIGNS; IS FOUND GUILTY

New York Senate Votes to Sustain Charge of Accepting Bribe.

CONGRER STAYS TO FIGHT

Before Vote Is Taken by Colleagues, Accused Member Gives Up His Seat and Releases Self From Jurisdiction of Legislature.

ALBANY, N. Y., March 29.—Jotham P. Allos went to his home in Norwich tonight, a private citizen, branded as a bribe-taker by his former colleagues in the Senate and by his own act no longer a member of that body.

The Senate vindicated Conger today when it voted, 40 to 9, that the charges had been sustained by the evidence brought before it.

Even Conger's enemies admit he is a fighter, and the belief is expressed that he will oppose any attempt to drive him out of office as vigorously and with as free an expenditure of money as he attacked Allos.

Before the vote was taken in the Senate this morning, Allos resigned his position in that body, thereby releasing himself from the jurisdiction of that body.

The question of what shall be done with Senator Conger, Allos' accuser, still remains to be settled.

The resignation of Senator Allos is taken to amount to a tacit acknowledgment of guilt, since it was announced before the Senate had taken any action on the charges against him.

Wholesale corruption has been revealed since the opening of the investigation of the charges against Allos, and New York Republicans have been placed in the unenviable position of seeing some of their leaders besmirched in the graft scandals.

STATE TAKES ROCK PLANT

Convicts to Operate Crusher and Quarry Near Chehalis.

CHEHALIS, Wash., March 29.—(Special.)—H. T. Jones and A. E. Cagwin, of the State Board of Control, returned last night from an inspection of the rock quarry and crusher plant at Meskill, 12 miles west of Chehalis, on the South Bend branch. They were accompanied by M. H. Gilliam, mining engineer, Representative J. E. Leonard, J. C. Bush, Secretary Merrell, of the Citizens' Club, and County Commissioner C. D. Young.

As a result of the visit, arrangements were perfected for the state to take over the quarry and crushing plant at once. Mr. Gilliam will be in charge. Temporarily the plant will continue to be operated by the county's prisoners, but within about three weeks it is expected to send state convicts here. About 20 convicts will be put on the job when the plant is in running order.

The taking over of the quarry by the state is regarded favorably locally, as it will be possible to get the benefit of the reduced freight rate on stone, and it is figured that once the plant is fully under way the price of crushed rock will be reduced from about \$1.50 a yard to about 80 or 85 cents on shipments delivered at Chehalis.

PARSON IS AFTER SALOON

Seaside Minister Files Affidavit Alleging Opening of Beach Lid.

SEASIDE, Or., March 29.—(Special.)—Rev. J. J. Fiedler, pastor of the Methodist church here, filed a sworn statement of A. H. Ruttraff regarding the alleged sale of liquor in the Antlers Saloon at Seaside Sunday, March 20. Mr. Patton at the same time declared that as Marshal Utzinger had denied being in front of the bar at the time he would make no objection if he was removed.

Mayor Henninger announced tonight that he would order an investigation. However, he made no secret of the fact that he is dissatisfied with the nature of the evidence.

"I don't know whether it is sufficient to convict the saloon," he said, "but I do know it is quite sufficient for me to prosecute Ruttraff. That would seem to be our best step."

Both the Mayor and Council believe there is ground for some of Mr. Patton's charges, but declare his manner of making them has alienated much support that would otherwise have been accorded him.

LINE RUN TOWARD WESTON

Surveyors Seek Route From Walla Walla to La Grande.

WESTON, Or., March 29.—(Special.)—A party of railroad surveyors is at work on Weston Mountain, eight miles east of town, today. They are seeking any information, beyond the fact that they are seeking the shortest route from Grand Ronde Valley to Walla Walla. It is said that they were unable to find a suitable grade down any of the canyons leading toward Dry Creek or Couze Creek from Weston Mountain, and that they are now seeking a route toward Weston, in which event the new road would pass about a mile east of town.

George Alexander, of Boston, Mass., representing Eastern capital interested in the Central Railroad of Oregon, and F. C. Goodrich, chief location engineer of the company, were in town today and made a trip up Weston Mountain, accompanied by local men.

STEAMBOAT LINE IS SOLD

California Company Takes Over San Francisco-Stockton Boats.

STOCKTON, Cal., March 29.—It was announced today that the majority of the stock in the California Navigation & Improvement Company, owning the old line of steamboats plying between Stockton and San Francisco, has been bought up by the California Transportation Company, headed by Captain A. E. Anderson, of San Francisco.

The management of the old line will be changed at once.

Honduras now permits free importation of fence wire and staples to help the agricultural and cattle raising interests of the country.

PRINCIPALS IN INTERNATIONAL WEDDING THAT INTERESTS SOCIETY OF TWO CONTINENTS.

MISS DAILY WEDDED

Nuptials to Count Sigray, of Hungary, Celebrated.

MOTHER GIVES HER AWAY

Ceremony Performed in Fifth-avenue Home in Presence of Small Number of Guests—Wedding Trip Through Europe.

NEW YORK, March 29.—Miss Harriet Holmes Daly, daughter of the late Marcus Daly, of Butte, Mont., was married to Count Anton Sigray, of Buda Pest, Hungary, this afternoon at the home of the bride on Fifth Avenue.

The ceremony was performed in the fifth-avenue home of the bride's mother, who gave her away. The young woman was unattended and the number of guests was small but select. Monsignor Lavalle, of St. Patrick's cathedral, officiated at an altar improvised in the drawing room, which had been converted into a bower of greenery and bloom. The Count was attended by the Marquis George Pallavicini, as best man. The latter is a subaltern in Ninth regiment of Austrian Hussars, and is also chamberlain of Emperor Francis Joseph.

Meet at Szechnyi Wedding.

Two former marriages of American girls with European noblemen figure in the match that culminated today. Miss Daly first met her Count when he came to this country with Count Szechnyi, who married Gladys Vanderbilt two years ago. Again last summer in Scotland, when Miss Anita Stewart was married to Prince Miguel, of Braganza, the two met, and it was then that Count Sigray's courtship began.

The Countess Sigray is 24 years old, and is a daughter of the late "copper king" of Montana, Marcus Daly. She is the youngest of three sisters, all greatly admired for their beauty and their charm of manner. The Countess especially was complimented for her talent in amateur theatricals and her grace in posing for tableaux given by the smart set for charity. During the past few years she has been seen in society circles in London, New York and Newport.

Count Sigray is popular.

Count Sigray has been more or less in America the past five years. He is an athletic young man of about 30, and made a reputation for himself at polo in California. He has also hunted the grizzly bear in Canada. His family is one of the oldest and wealthiest in Hungary, and its members hold important positions. At Szekes, in upper Hungary, are located the extensive estates of Count Sigray, where he spends a part of each year. His father and mother are dead and he has two older sisters, one Marquise San Mazzano, who married an Italian and lives in Rome, and the other the Baroness Scheil, who lives in Hungary.

Count Sigray came to this country with letters to the Golets, and the Mills and Astor families. He was frequently mentioned by this society during his entrance to New York society was secured.

The Count and Countess will spend their honeymoon in Europe, going after an extended trip through Italy and France to the Count's estate in Hungary.

HOME BLANK TO MILLER

Football Player Doesn't Recognize Sister, Reads With Difficulty.

DETROIT, March 29.—Joy Miller, the University of Michigan football star, who disappeared last January, is home again, but home has not restored his memory of the past. He recalls nothing prior to the time he met in one city to another in the Northwest.

Not until yesterday, however, did he realize that his parents were more than people he had met somewhere. He failed to recognize his sister. His ability to read has partially left him.

Mr. Miller would not permit anyone to interview his son. He plans to restore his memory by keeping the boy in company with relatives and friends whom he knew well. Specialists will be brought into consultation.

CAMERA TO CATCH COMET

Honolulu Observation Will Determine Extent of Solid Matter.

PITTSBURG, March 29.—A special astronomical camera has been set up at Honolulu, which is expected to catch some interesting pictures of Halley's comet when on May 18 it completes its 3,100,000-mile trip around the sun and begins a similar journey all over again. Dr. John H. Brouser, the well-

SUN'S DISC IN ERUPTION

Yerkes Professor Accounts for Recent Auroral Displays.

CHICAGO, March 29.—Strange eruptions have appeared on the sun, according to a statement made yesterday by Professor Edwin B. Frost, director of the Yerkes observatory at Williams Bay, Wis.

The eruptions, which Professor Frost said are easily visible at the edge of the disk. One of them shot out a length of 150,000 miles, as nearly as we could estimate. It then detached itself from the main body and sped through space. Before it disappeared it had reached a distance from the sun of about 200,000 miles. The eruptions probably are caused by the release of pressure on some particular spot of the sun.

Professor Frost said the disturbances probably accounted for the recent brilliant auroral displays.

SERVICE IS BETTERED

EXPERIENCED MEN PUT IN CHARGE OF INDIANS.

School Work in Pacific Northwest to Be Improved, Is Word From Washington.

LEWISTON, Idaho, March 29.—(Special.)—Advice received from Washington suggests many changes in the plan for administering the affairs of the Indian reservations, and promise many important improvements in the service.

The Indian Commissioner has selected nine experienced field men who will occupy positions in his cabinet, recently organized for the betterment of the Indian service. N. B. Peary, now supervisor of Indian schools, will have charge of all Indian schools. Mr. Peary has been superintendent of the Haskell Institute, at Haskell, Kan.

W. E. Johnson will direct the work of suppressing the liquor traffic on the Indian reservations. Dr. Joseph H. Murphy will have charge of all hospitals and sanitation on the reservations; W. R. Logan, former superintendent of the Fort Belknap reservation, in Montana, will have charge of all Indian industries, farming operations and allotments. There will also be supervisors selected for the departments of irrigation, Indian forest reserves, Indian employment, purchases of supplies for the various reservations, buildings and construction.

The educational work has been divided into four districts, the fourth district consisting of Oregon, Washington, Idaho and Montana, which will be under the personal supervision of O. H. Lipps, former agent at Fort Lapwai, but who is now in temporary charge of the five civilized tribes at Muskogee, Okla. Mr. Lipps will probably be relieved at Muskogee within the next few weeks and will return to Lewiston, where he will establish headquarters for directing the work in this district.

One of the first schools to be visited will be the Chemawa school, near Salem, after which a regular itinerary for covering the entire district will be followed. There are 20 schools in the fourth district, all of which are reservation schools with the exception of Chemawa and the Fort Shaw school, in Montana. There are about 400 Indian children of school age on the reservations of this district and an Indian population of approximately 20,000.

The general outline of plans for the reorganized administration, suggests a purpose of the department to withdraw its support from the large non-reservation schools and give it to the small day and reservation boarding schools.

Commission Plan Candidates Named.

KANSAS CITY, Mo., March 29.—Complete returns show that U. S. Guyer, the present Mayor, and J. E. Porter were chosen as the nominees for Mayor in the primary election yesterday in Kansas City, Kan. Guyer is a Republican and Porter a Democrat. The election was held under the commission plan of government. Eight candidates for Commissioner were chosen.

We carry a full line of the most desirable shapes, flowers and trimmings. The prices are the lowest to be had, and we guarantee superior work.

THIS ADVERTISEMENT WAS WRITTEN BY A CITIZEN OF OTHELLO. IT TELLS OF THE ADVANTAGES AND BEAUTIES OF OTHELLO AS ONLY A CITIZEN CAN TELL IT.

Why You Should Invest in OTHELLO

Going to a new country requires faith in the resources of that country. After successfully testing the conditions of soil, healthfulness of climate, etc., we no longer walk by faith, but by sight. Such is now our attitude in regard to the territory contiguous to Othello. We have seen immense wheat crops which many claim to be the only crop successfully grown here. We have also grown fruit of as fine texture, flavor and color as seen elsewhere. And this without irrigation. Our home-grown potatoes cannot be surpassed, and melons delicious enough to tempt an epicure. We have fattened hogs on home-grown corn, and have enjoyed our own popcorn. We have proved the fertility of the soil. These products were all of excellent quality. More moisture would bring a more abundant yield. Irrigation is surely coming our way. A vast change in our landscape will be noted during the next few years. Sagebrush plains were converted into immense wheat fields, and these in turn will give place to large orchard tracts.

Poultry is grown with less care than in many localities. Wheat is an ideal egg-producing food. The business is remunerative.

Our climate is equable. In Summer, even though the thermometer may register a rather high degree, there is almost invariably a breeze which prevents the sultry heat of many places. We know nothing of the heavy, moisture-laden air which makes breathing difficult. Neither mold nor mildew annoy us during the heated period.

Our Winters are mild.

We have glimpses of mountain scenery from several different ranges and snow-capped Rainier is plainly seen when the air is clear.

We have an intelligent, sociable, kindly class of people.

Our school and church privileges are good.

There are opportunities here that are unknown in the East and many parts of the West. They far surpass the disadvantages we encounter.

Seeing is believing. Come and see. Come and help us develop more fully this, the best part of the best state in the Union. MRS. ADA PRICE LEE.

Business and residence lots of Othello can be purchased on practically your own terms. You cannot afford to miss this opportunity to invest your dollars where they will grow with leaps and bounds, far surpassing your fondest expectations. Call at our offices and let us show you maps and pictures which will convince you.
