BOTH SIDES HOLDING BACK Only a Few Small Transactions Are Reported in the Valley—Remarkable Lambing Increase This Season.

No progress has been made yet in opening up the Eastern Oregon wool market. A number of buyers are on the ground, but they do not appear to have orders and are merely looking over the situation.

THE IS BUOYANT Further Advance in the General Stock List.

CONFIDENCE IS RESTORED Coppers Alone Fail to Recover—Particulars of the Recent Foreign Bond Sales—Steel Also Shares Jump.

NEW YORK, May 5.—Today's stock market showed a decrease in the influence of the reports of sales of large issues of American securities abroad, which electrified the market yesterday.

There was apprehension at first that yesterday's reports might have been exaggerated in several particulars. As to the amount of the sales, some of the estimates, which alleged an amount of well over \$100,000,000, were corrected.

Lata confirmation of the St. Paul bond sale animated the whole market. One reason for this is that the confirmation was the first of the kind since the market was closed.

The strong return of the Bank of England demonstrated the effective recuperation of the London money position and its complete readiness for the government fiscal operations for which it was prepared.

Publication of statistics of the rate at which the pig iron production is being cut down pointed to a curbing of speculative enthusiasm.

The effect was not immediately perceptible in the United States steel, but was a contributory factor to the weakness of the copper in contrast with the strength of the general list.

The sustained production of copper, in spite of the increased demand for it, has awakened a widespread discussion of the necessity of reducing output.

Bonds were irregular. TWAJ sales, par value, \$475,000. United States bonds were unchanged on call.
