# Grading Crews Also Begin Work on

Mt. Calvary Extension - Route Has Fine Scenery - Ninety Days to Completion.

The contract for construction of the first 24 miles of the extension of the United Railways to Tillamook has been bet to Borrow Barth let to Forter Brothers and a large out fit of teams, graders, steam shovels and other implements and machinery for heavy grading is being daily rushed to Butter and Eggs Are Firm. the front.

In addition, the United Railways has lecided on the final location of the ex-ension to Mount Calvary, West of Portland, and the first grading crews were put to work yesterday. Camps are be-ing established an along the projected

instructions from President Ender Stevens, the road will be rushed to com-pletion. It is estimated by officials of the company that the line will be ready for operation in about 90 days. Since J. J. Hill assumed full control of the United Railways work on a large scale has been the order of the day. The 24-mile contract lat to Porter Brothers includes the long tunnel at Cornellus Gap, where construction is progressing so favorably that it is now thought the bore will be completed by January 1. The large bridge over Rock Creek is com-pleted and construction trains are now running over It.

### Bridge Crews at Work.

Annual Reinspection Begins. Notice was yesterday given by local Inspectors Edwards and Fuller they will at once begin the reinspection of all ves-sels in their district. Regardless of the yearly inspection, the officials will visit craft in their district, comprising Oregon, lidaho Montana and a portion of Wash-Several bridge crews are at work west of Rock Creek and there are five engineering camps between the 24th mile-post and Tillamook. The work of lo-cating and securing the right of way is practically completed. Bids for the work between milepost 24 and Tillamook have already been opened and the contractors are going over the line examining de-

Idaho, Montana and a portion of Wash-ington. Excursion steamers are to be inspected monthly, ferries three times during the year and all passenger steam-

are going over the line examining de-tails of the work before them. The projected line will be extended from Tillamook to Bay City and its com-pletion will give the United Railways Company an 80-mile route between Port-land and the coast. It is expected that the running time of electric trains be-tween Portland and the Coast will be not more than two and one-half hours for the through trains. Lumber was started into the hatches of the Italian ship Ninfa yesterday morning at Prescott. Work in loading the American barkentine Pactolus will begin this morning at the dock of the Standard Box Lume through trains.

On the Mount Calvary extension the company for weeks has had a force of ngineers looking for an available route. The old survey had to be abandoned by reason of the engineering difficulties it presented. The necessity of allowing for hydraulic removal of the hillsides in North Portland made the original loca-tion impracticable. These difficulties were also complicated by the necessity of going through Macleay Park, an item of serious objection to those who deduce

Supplies were yesterday assembled at Ash-street dock for the Port of Port-land tug Oneonta, which will be in-spected today and leave for her station on the bar tempered beauty. Road Has Scenic Beautles.

The company concluded therefore to The company concluded, therefore, to seek a more available route to Mount Cal-vary, and finally adopted the line from the head of Washington street west-ward. This will give the United Rail-ways a route which for scenic beauty, it is believed, is unsurpassed. According to an unvertified report, the Chilean back Curzon has been chartered to take a cargo of lumber from the Co-lumbia River to a South American port that has not yet been named.

the following day. The Cascoe and Loop were looked for

Figure 2 and Loop were looked for Sunday, and the Quinault should have reported inside yesterday, but the prevalence of strong northwest winds is sttributed as the difficulty. The wind is said to have been so strong the past few days that persons at Seaelde, who usually enjoy a clear view of passing craft, were unable to distin-guish in which direction the coasters were headed, for the northwest wind carriers ahead of them. NEW MILL SEEKS CHANNEL News has just been received from San Francisco to the effect that the steamer francisco to the effect that the steamer to take a cargo of suplies to the Gov-ernment military and marine station at Midway Island.

#### Scheme Is to Have Steamers Load in

Haydens Slough for South.

Another prospect for increasing the lumber output of the Columbia River is being investigated by the pilots, and yesterday Captain Emken was given charge of soundings in Haydens Slough, opposite Vancouver, where the steamer Ocklahama of the Port of Portland was at work for some time. A large mill was recently completed

there, and it is desired that most o the output find its way to Coast markets, but, as the waterway leading to the plant is a slough and far removed from the main channel, it was found impossible under the conditions to take steam schooners there. Dredging is being considered, but the soundings showed less than ten foet of water available at low tide.

RENO FIGHT OUTCOME KNOWN

Edwards and Fuller Get "Sure Thing" Advices and Act on Them.

Captain E. S. Edwards and George Fuller, local steamboat inspectors, are reported in the market for all loose change their friends care to intrust with them to place on the Jeffries-Johnson battle, and they assert a "sure thing" tip has been imparted to them, but to all ques-tions as to who will be winner, silence is meintained.

The outcome of the fisticuff has been ascertained by Marcus Talbot, general manager of the Alaska-Pacific Steamship Company, and former executive head of The Dalles, Portland & Astoria Naviga-tion Company, who yesterday sent the inspectors a wireless from the steamer Buckman, en route from the Sound to San Francisco, as follows:

"Will meet you at Reno. Bring all your dough. Got sure thing."

#### Ellicott Off to South Bend.

Having completed the annual inspection of the North Head and Cape Disappointment light stations, Commander J. M. Ellicott returned Sunday to the city, but departed again yesterday afternoon for South Bend, to rejoin the tender Heather. After ending the inspection on V Harbor he will sail for Coos Bay. Willapa

#### Beaver Wins Race With President.

In a race run by the steamer Beaver, which arrived here yesterady from San Francisco, and the steamer Presi-dent of the Pacific Coast Steamship Company, bound from San Francisco to Seattle, the Beaver won out. The two steamers becan the race when off

resigned as agent of the North Pacific Steamship Company, W. H. Slusser has been named as district freight agent and Martin J. Higley district passenger agent. The schooner Charles R. Wilson, which

drifted ashore May 20 at Point Reyes and sprang a leak as well as losing hef rud-der, is to be repaired at the Moore & Scott Iron Works, San Francisco, The cost will be \$375. News has just been received from Sar

Midway Island. Despite reports that steamers are racing in the harbor, it is asserted by Harbormaster Speler that they are not exceeding the limit, as he has reports Harbon each morning of the manner in which they go through the bridges.

Having finished working cargo here, the steamer Northland left down last night for Rainier. The steamer Tahoe night for Rainer. The Steamer Tanoe completed discharging last night at Oak-street dock and departed for Grays Harbor. The Fair Oaks, which arrived up with a cargo of asphalt, will take on lumber here.

Company, bound from San Francisco to Seattle, the Beaver won out. The two steamers began the race when off 4:35 P. M....7.5 feet[11:45 P. M....31 feet] is really for the start of the star

"Everybody is too busy in Southern Oregon to think of what the rest of the world is doing," said H. T. Norton, of Grants Pass, at the Imperial Hotel last night. "Things are humming down our way, many settlers are

coming in and there will be remarkable development of that part of the state within the next few years. "The Rogue River Irrigation & Power Company has just let a contract for a project which will irrigate 30,000 acres although 40,000 acres are contemplated in the entire scheme. The contract calls for water on the Grants Pass dis.

trict, composed of about 15,000 acres, for the irrigation season of 1911, and water on the Merlin district, contain-

ing about the same acreage, for the eason of 1912. "The districts are being settled rapidly and the irrigation ditches mean a transformation of the entire country. In many places there is sufficient subirrigation to insure good crops and the valleys are also productive without irrigation. The new system will patch up the bare spots left by na-ture, making the whole country a vast field of producing soil. Many of the ranchers who are raising good crops without irrigation will take water to

insure against a possible drought and increase the productiveness of the fertile soil. "Irrigation was not considered feas

ible until a local company was organ-ized and promoted a system last year. It was a pumping proposition. The contract for the pumping and water was let to the Golden Drift Mining Company and last Summer the water was run down the main street of Guants Pass to show that irrigation was possible. Then high water came, one end of the mining company's dan washed away, the stockholders of the company became involved in litigation among themselves, and no repairs were made. The local irrigation company is now part of the Rogue River Irriga-tion & Power Company and will carry Irrigathe new project through.

CURES J. BLOOD POISON Contagious Blood Poison is the most powerful and destructive of all

blood disorders. It corrupts and vitiates the entire circulation and manifests itself in the most hateful and loathsome symptoms, such as ulcerated mouth and throat, copper-colored spots, and even sores and ulcers on different parts of the body. The poison causes the hair and eyebrows to fall out, and sometimes the finger nails come off and the entire glandular system is attacked. No medicine can cure Contagious Blood Poison which does not rid the circulation of every particle of the insidious virus. The least taint left in the blood will break out afresh, when treatment is left off. S.S.S. The least taint is the real and certain cure; it goes into the blood and by removing every particle of the poison, and adding rich, healthy qualities to the circulation, forever cures this powerful disease. All who suffer with Contagious Blood Poison may cure themselves in the privacy of their own homes by using S. S. S., and following instructions contained in our Home Treatment Book, which which we will send, together with any medical advice desired, free to all who write. THE SWIFT SPECIFIC CO., ATLANTA, GA.
