capitalists, indicates the Umpqua Valley is soon to have electricity for light, heat and power. The gist of Mr. Blaisdell's report is as follows:

It has been proposed to develop some part of the Umpqua River, where at least 20,000 horsepower is available during low water and transmit it over the entire valley. Power will be supplied to all towns, mines, mills and farmers who wish it. The service will be continuous. This will give the minea power for hoists, stamps, etc., and will develop many mines which are lying idle because of the lack of cheaper power. The power can be used in the lumber camps for cutting trees.

Farmers will be able to use this power. Farmers will be able to use this power. Separators can be run by a small motor. A simple pumping system can be installed and the water pumped for irrigation, besides using it for the house and for fire protection. Lights in the barn and outhouses will be of great service.

# Music to the Home

Is the best music of the great composers heard frequently in your home?

If it is not, you and your family are denied the keenest and most elevating pleasure life can know. There was a time when the lack of good music was unavoidable. There is no excuse for it now.

The greatest compositions in the realm of music you may now have through the medium of the Autopiano. The masterpieces that mean to music what Shaakespeare and Milton and Burns mean to literature, are all at your command.

And with the latest soloist Autopiano it will not be mechanical music. It will be music with soul and feeling, rendered according to your own interpretation.

The Autopiano opens to every home, whether musically educated or not, a world of pleasure that hitherto has been reserved for but few. It familiarizes every member of the family with the best in music. It makes your home better and hap-

pier and more homelike.

Eilers Music House is sole Coast distributer of the Autopiano, it having displaced the so extensively advertised Pianola Piano heretofore sold by us. Several months ago the big music houses of St. Louis and Cincinnati took the same step, and only a few days ago the most widely known music concern in Chicago also indorsed the decision made by Eilers Music House. This important decision in favor of the latest Autopiano you may be assured was not made without careful consideration, although but little investigation will a lable even the lays on to recognize the superiority of the wonderful Autopiano over all other player pianos .. Its improve-

ments are in many ways so marked that there can be no room for doubt. We believe-yes, we know-there is no other player piano made that has the efficency, quality and value offered in the Autopiano. It has always been the policy of Eilers Piano House to lead-and the Autopiano leads all other player pianos in sales and preference of the musically particular. In the Autopiano we give our customers the greatest player piano in the world-and also the greatest value. You are cordially invited to inspect and hear same at our display
