Tou will remember that in 1901 the Carnegle Company of Pittsburg sold its plant to the United States Steel Corporation, organized that year. The steel corporation paid the Carnegle Steel Company \$500,000,000 for its plant and business.

What Is Plant Worth?

"Of this incomprehensible sum, Andrew Carnegle received \$55,000,000 in drew Carnegie received \$55,000,000 in the bonds of the corporation and his associates in business received the remainder. What was the plant worth? That is not a subject longer in dispute. It has been most minutely investigated. "The highest value any reasonable man would put on it in 1901 was \$50,000,000, and the United States Steel Corporation paid to Andrew Carnegie & Co. \$125,000,000 more than it was worth, more than would be required to reproduce it than would be required to reproduce it with every modern improvement known to the business.

Cummins Explains Reason.

, "Now, why did the United States Steel Corporation pay \$420,000,000 more for this property than it was worth? I will tell you. If examined the books of the Caryou. It examined the books of the Carnegic Steel Company and there it was shown that over a series of years the Carnegie Company had been making profits that would pay interest on \$500,000,000, and the United States Steel Corporation had enough confidence in its own power, enough confidence in the friendship of men like Dalzell, of Pennsylvania, and Payne, of New York, and Aldrich, of Rhode Island, and Hale, of Maine, and Lodge, of Massachusetts, to be sure that in the years to come it would be able to earn interest upon the \$500,000,000,000 it was then paying to the Car-\$500,000,000 it was then paying to the Car-negic Steel Company. Sunly Ship Culgoa in Peril When Lighter Blazes Alongside.

NEW YORK, July 26.—Intense ex-citement prevailed for a time at the Brooklyn Navy-yard today when an ammunition lighter, which was berthed alongside the supply ship Cul-goa, caught fire and was destroyed, together with her ammunition, after being towed out in midstream. The Culgon was only slightly damaged. The ammunition, which was in the form of powder, flashed up and burned, but being in unsealed cans did not ex-

When the fire broke out the bluejackets in the yard were rushed into service as fire fighters. The lighter, it was soon seen, could not be saved and tugs managed to get a line to her and towed her out into the river, where the flames had pretty much their own way despite many streams of water.

The damage to the Culgon was con-

Chicagoan and Wife May Be Fatally Injured in Ireland.

BELFAST, Ireland, July 26.—Fire swept through the Kelvin Hotel today, burning to death three employes, while several guests received frightful injuries. Five of the guests were dangerously burned and others are in a serious condition.

Among those surviving who suffered most are the Rev. William John Mc-Caughan, for nine years paster of the Third Presbyterian Church of Chicago,

The minister and his wife finally threw emselves from an upper window. Both struck the pavement with great force and when they were removed to a hospital it was found that the skulls of both had been fractured. The con-dition of the two is critical. Dr. McCaughan resigned his pastor-ate in Chicago in May, 1907, to become paster of the May-Street congregation in this city.

Platform of Sympathy Adopted and

Option Law Indorsed. LINCOLN, Neb., July 26.—The state convention of the Republican party of Nebraska today adopted a platform strongly indorsing the Administration anie opposition to "the system known as Cannonism," and hearty sympathy with the "insurgent" movement in and out of Congress. The platform includes a declaration for county option as the method of regulating the liquor taffic, and for an amendment to the constitution providing for direct legis-

These resolutions were not adopted without strong opposition, both in the resolutions committee and on the floor of the convention, but, while there were no votes to spare in the committee for county option and the other subjects that came before the main body of delegates as minority reports, the vote in their favor in the convention was overwhelming.

Insurgents Favor Option.

As a general proposition, it had been understood that the indersement of county option and "insurgency" were supported by the same people. In consupported by the same people. In con-sequence, when, at the opening of the convention at noon, United States Senator Norris Brown. a "standpatter," was chosen permanent chairman over Representative Norris, a leader in "insurgency," by an overwhelming vote, the rank and file of the "county optionists" began to fear for the fate of their

pet resolution.

It developed, however, that, while no compromise is admitted by either side, compromise is admitted by either side, there was a conference last night at which Senator Brown assured the 'optionists' of the character of the resolutions committee he would appoint if he were made permanent chairman. The committee of seven appointed by him included three in favor of county option, three in favor of the present law and one in favor of the submission of a state-wide prohibition amendment. The last-named member finally voted for the county option plank. for the county option plank.

Opponents Badly Beaten,

A minority report opposing such a esolution was defeated in the convention, 280 ayes to 550 noes. There was no division in voting on the majority Senator Brown's speech on taking the

Senator Brown's speech on taking the chair began with the deciaration that the Democrats in Congress had repudiated their piedges. He added:
"The last National platform piedged the party to free lumber, but they voted against free lumber. They promised a postal savings bank. They kept their promise in the Senate by casting 31 out of 22 votes in that body against it. They promised the neonle free roats it. They promised the people free coal; they voted for a duty on coal. They promised free iron ore; they voted 'no' on the proposition."

Centrasting this record with that of

the Republican party, Senator Brown

"Fourteen years ago, when McKinley was chosen President on the pledge that he would pass a tariff law with protection to American industries in it, he kept the pledge and the country prospered. Five years later Roosevell succeeded to the Presidency, and is 1994, when re-elected by the people, he promised to carry out the McKinley policies and retain the protective features of McKinley's tariff act. He, too, kept the pledge and the country continued to prosper. When, four years

Speaking of the Payne-Aldrich tariff law, he said;
"No one has ever pretended that the

"No one has ever pretended that the act was perfect. Its warmest friends have always admitted its imperfections. But, notwithstanding its imperfections, with the information Congress had at the time, it was a better haw than the law it superseded and is entitled to the commendation and support of the American people as a step toward the relief of the public from the duties of the Dingley law, which the country has outgrown."

The resolutions adopted strongly in-dorse the National Administration and the new tariff law. In state matters the platform calls for the creation of a non-partisan board of control for charitable and penal institutions and a reapportionment of the Senators and Representatives of the state. As an amendment, a resolution calling for a constitutional amendment providing for direct legislation was adopted.

Insurgent Resolution Passed.

Near the close of the convention Mr. Norris offered the following resolution: "Every protest against wrong is 'insurging' for the right. We are unalterably opposed to the system known as 'Cannonism' and are in hearty sympathy with the 'insurgent' movement in and out of Congress. We urge our Senators and Representatives to continue to use their votes and influence along progressive lines in the future." There was a storm of protest when the resolution was first presented, but when put to a vote it was declared adopted.

OREGONIAN NEWS BUREAU, Washington, July 26 .- Pinchotism in Alaska is not only injuring the people of the Pacific Coast, who are deprived of a superior coal at reasonable price, but is actually costing the United States Government money. This is il-justrated by the case of W. G. Whorf, who has long been struggling iustrated by the case of W. G. Whorf, who has long been struggling to secure title to 68 zeres of reasonably good coal lands at Port Graham, in the Cooks Inlet region of Alaska.

Some years ago Whorf went on this land, discovered his coal, and sought to make entry. The coal land laws were not then applicable to Alaska, and he was temporarily restrained; tho weaver, when Congress extended the coal land laws to the territory, he made his filing, established his home upon the land, proceeded with his develop-

the course of his development Whorf mined considerable coal, work, Whorf mined considerable coal, and in years past has been selling it to the revenue cutter service for \$5 a ton. Notice has been served on him, however, that he can no longer mine coal for market, inasmuch as he has not been granted a patent, and the revenue cutter service has been forced to buy British Columbia coal, of no better grade, for which it pays \$14 a ton, or \$9 more than Whorf was asking. And this condition of affairs will continue until the blight is removed, for Whorf cannot get patent, and until Whorf cannot get patent, and until he gets patent, or some one else gets patent, the revenue cutter service is at the mercy of the Canadian coal dealers, who slone are profiting from Pinchotism in Alaska.
