Portland, Thursday, July 28, 1910.

BRYAN'S LATEST DEFEAT.

Mr. Bryan's energetic effort to drive the Democratic party of Nebraska into the Prohibition camp has resulted in dismal failure. The Democracy of his home state has followed its chief leader in many a hopeless battle. It cheerfully faced defeat over free silver and anti-imperialism and other disastrous issues in three Presidential contests. It accepted in 1894 with hardly a grimace its unparalleled reconstruction of the Peersless Leader that all got down the line for so obnoxious a candidate as Alton B. Parker.

Every year at the opening of the harvest season, some Walla Walla farmers, through ignorance or in the belief that they are improving the market situation, start a rumor that wheat will command a higher price in Tacoma than in Portland. A Walla Walla dispatch in the Oregonian yesterday states: "Farmers say that Tacoma always pays several cents better price for wheat than does Portland, and those on the Harriman lines have been demanding rates to the former city."

Figures on the wheat business of the Northwest are not in relation to the charge that Tacoma pays the better market. During the twelve months ending July 1 there was shipped from Portland to Europe 5,665,967 bushels of wheat; from all Puget Sound ports to Europe the shipments were 3,874,722 bushels. In California, the third largest wheat producing state, there were shipped 3,888,058 bushels while Puget Sound shipped 2,729,518 bushels. If Portland had been a poorer market than Tacoma, the figures would have been reversed.

The quarterly statement of the United States Steel Corporation, better known as the "steel trust," was made public Tuesday. It shows that this kind of all trusts has a perfect right to be known as the greatest industrial trust in the world.

There is one branch of industry that is not suffering by the violent changes in the New York stock market and the Chicago grain markets. The broker, with his little ticker, like the stock exchange, has not been affected by the changes in the market.

These colleges arose in response to the needs of women—the need to be something, to do something self-respecting and self-supporting. Following the college idea comes the modern industrial school, the aim of which is to be as informative about modern industry as the primitive home was about primitive industry.

It is a condition, not a theory, that reports through government agencies is not only desirable but necessary to keep material in stock, so to speak, from which promotions can be made. Some of the leading railroads made this discovery several years ago and gave out the information that no more women would be taken on although the facilities and cheapness of raw material enable the trust to manufacture steel at a much lower cost than it can be produced abroad.

These colleges arose in response to the needs of women—the need to be something, to do something self-respecting and self-supporting. Following the college idea comes the modern industrial school, the aim of which is to be as informative about modern industry as the primitive home was about primitive industry.

THE DEMOCRATIC GAME.

The Aberdeen Herald, a Democratic newspaper, openly advises Democrats to vote for Miles Polindexter for the United States Senator in the Republican primary. If Polindexter is not good enough Republican for Republicans, he is good enough Democrat for Democrats.

OUR VERSATILE SENATOR.

Our senior Senator at Washington has apparently changed his mind again regarding the bridge draw problem. The task of carrying water on both shoulders has never been an easy one, although the political history of Oregon shows Senator Bourne as an adept at the business when he was just getting into politics in this state.

MISREPRESENTING PORTLAND.

Every year at the opening of the harvest season, some Walla Walla farmers, through ignorance or in the belief that they are improving the market situation, start a rumor that wheat will command a higher price in Tacoma than in Portland.

THE WOMAN OF TOMORROW.

Mr. William Hard contributes a remarkable article, from an economic standpoint, in the Oregonian for August under the above head.

These colleges arose in response to the needs of women—the need to be something, to do something self-respecting and self-supporting. Following the college idea comes the modern industrial school, the aim of which is to be as informative about modern industry as the primitive home was about primitive industry.

WHY NOT HAVE TWO PARTIES?

Suggestions to Republicans and Democrats for an Off Year. PORTLAND, July 27.—(To the Editor.) Politically the writer assumes no virtues not possessed by the masses, but appeals to the common sense of Oregon's electorate.

CHRISTIAN UNITY NOT A DREAM.

Organic Union Not Needed; Merely a Success of Purpose. UNIVERSITY PARK, Or., July 27.—(To the Editor.)—The call for a union by the churches of the world, to which The Oregonian recently gave editorial attention, cannot expect uniformity of churches and denominations.

MR. MARTIN ANSWERS CRITICS.

He is Unable to Indict the Dog in Print Without Violating Decency. PORTLAND, July 27.—(To the Editor.)—To present the facts concerning the dog through the medium of my decent newspaper would be impossible.

LIQUOR TO INDIANS IN NEWPORT.

Mayor Bessell Corrects an Error Made by a Visitor. NEWPORT, Or., July 27.—(To the Editor.)—Dr. L. J. Falkenberg, of the Smithsonian Institute, is mistaken in his statement that Oregonian editorials have said that the city of Newport allows the saloonkeepers to sell whisky to Indians.

These colleges arose in response to the needs of women—the need to be something, to do something self-respecting and self-supporting. Following the college idea comes the modern industrial school, the aim of which is to be as informative about modern industry as the primitive home was about primitive industry.

DOGS AND CHILDREN.

PORTLAND, July 25.—(To the Editor.)—In answer to J. Brown's letter, I rise to remark that just as many people are annoyed by their neighbors' children as they are by their own.

"ETHEL" DOESN'T KNOW DOGS.

PORTLAND, July 27.—(To the Editor.)—About this everlasting dog question, I'm very much surprised "Ethel" (where did you get that name?) should take the time that really belongs to her "higher and nobler calling" and stoop to give us poor animal-lovers such a lecture.

"LOVE ME, LOVE MY DOG."

PORTLAND, July 27.—(To the Editor.)—"Love me, love my dog" is a saying found in the Bible, and I am sure that Mr. Martin can console himself, however, by reflecting that he isn't compelled to do either.

USE FOR LAST YEAR'S HAT.

Last year's hats have their uses, H. B. Wilson, of Wallis Run, Linn County, has a story to tell of a crow on a rafter in the wagon shed loft. This Spring swallows built a nest on the crown part hanging uppermost, and also another nest with "last year's" straw hat. After the swallows came a wren and built her nest in the swallows' nest within the crown.

These colleges arose in response to the needs of women—the need to be something, to do something self-respecting and self-supporting. Following the college idea comes the modern industrial school, the aim of which is to be as informative about modern industry as the primitive home was about primitive industry.

BASEBALL NOT PLAYED WITH THE MOUTH.

Nothing is more amusing and silly than to see a ballplayer kick on a decision which he is out ten feet, and there are many who do it. It is useless generally and is more harmful to himself than any one else. Baseball is played with a ball and bat, not with the mouth.

BASEBALL NOT PLAYED WITH THE MOUTH.
