Out of the scramble for concessions and contracts has spring a new industry—the professional price-cutters. They are located chiefly in Salonika. Their policy is to put in bids for all competitions, without representing anything atronger than paper, thereby compelling the serious contractors, whose prices are higher, to buy them off and save deiny. A German firm has paid these sharks \$1000 to get out of the way on one competition.

PITTMAN OUT OF PRISON

Estrada's Representative at Capital Declares Relatives of Groce and Cannon, Who Were Executed, Will Get Indemnities.

WASHINGTON. Aug. 24.—The final word telling of the passing into history of the Madriz government at Managua has been received at the State Department in an official dispatch from American Consul Olivares, stationed at

Managua.

The message told of the disorder that preceded the downfail of Madriz.

Officials of the penitentiary at Managua, where 700 prisoners, among them William Pittman, the American, were confined, informed the American, were the prison intended to blow up the institution and its immates in the event of the downfail of the Madrix faction.

Pittman Is Released.

The matter was laid before Dr. Madriz. who said he would guarantee that the plot would be nipped. Mr. Olivares, however, asked for and obtained the removal of Pittinan to the consulate.

On Saturday Madris dismissed the commandant of the prison and all the inmates escaped. About 600 of them were political prisoners and many of them obtained rifles and roamed the streets, in some cases firing upon the streets, in some cases firing upon the Madriz troops.

United States Cheered.

After Madrir, amid a fusilade, left the city for Corinto on a train, crowds gathered around the American Consu-ate and, during Saturday night, cheered for the Government of the United

States.

Senor Castrillo, diplomatic representative here of the Estrada forces, said that the mother of Leonard Groce, who was executed by Zelaya, would receive a pension and his children be educated in indemnity and that Groce's Nicaraguan wife would receive a pension and his children be educated at the ex-

nee of the government. He said the father of Leroy Cannon who was executed with Groce, would receive such indemnity as the American State Department deemed quitable. It is not believed here, however, Senor Castrillo has received authority from his leader to make this announcement.

MANAGUA. Aug. 24.—In a lengthy decree just issued Jose Dolores Estrada, who temporarily assumed the relia of government when President Madris vacated his office and fled to the country, gives full recognition to the provisional government formed at Sluefleids last year with his brother. General Juan Estrada, as president in doing so, however, he stipulated that a regular and free election for the office of chief executive must be neld within six months.

The decree also names the members of a commission, the duty of which will be to draw up and have signed by the hostile factions a permanent treaty of peace. In part the instruments says:

which substantlated his reputation as an angler.

Since his departure on August 12, the police executive has been secluded along the trout streams in the vicinity of Springfield, Lane County. He reported having had exceedingly good luck.

Chief Cox left the city unceremoniously ten days ago, without advising his nearest kin or his associates at headquarters as to his destination. After escaping from the vigilance of his own men, he said he shouldered his camping outfit and hied himself to his favorite trout streams alone. After having angled and lived next to mature nearly a fortnight he broke camp yesterday and headed for Portland.

Considerable apprehension has been felt for his safety for several days. He was believed to have gone to his favorite hunting grounds on a deer hunting expedition in Southern Oregon and to have been trapped by the raging forest fires.

FRICTION BETWEEN OFFICERS OF GERMAN SHIPS DEEPENS.

Admiral's Notice to Engineers, Surgeons and Paymasters to Walk Meekly and Lowly, Amazes.

HAMBURG. Aug. 24.—(Special.)—That nobbery is a grave peril in the German snobbery is a grave peril in the German navy is proved by an official notice issued by Admiral von Prittwitz and Gaffron, commanding the Baltic Station. German naval circles are in a ferment of heated discussion for and against the Admiral. For a long time, he had observed fric-tion between executive officers and the engineers, surgeons and paymasters. Fueling that matters had reached a crista, the Admiral took the drastic step of out-

the Admiral took the drastic step of out-lining the social privileges of both classes of officers.

He reminds the engineers and other non-executives that they cannot expect executive officers and their wives to mix executive officers and their wives to mix with them as social equals, and advises them literally to take a back seat on social occasions. Proceeding to details, he counsels engineers, surgeons and paymasters to content themselves with seats other than the orchestra stalls at the theater. At sea, he adds, conditions are necessarily different, and a certain amount of intercourse on terms of equality cannot be avoided. But non-executives must not presume upon these conditions, which are extraordinary, and should be careful to walk humbly and lowly when brought into contact ashore with their superior, the executive officer. That the mischlef is no laughing matter is proved by the fact that in the past year the percentage of resignations amongst naval engineers has been unduly high. They are, in fact, leaving the service in dozens, and the same applies to surgeons and paymasters, of whom there will undoubtedly be a grave shortage next year. with them as social equals, and advises

age next year.
Competent critics ascribe this intrusion of the class spirit to the ever-increasing number of titled entrants to the navy. Up to a few years ago, the German aristocracy looked with disfavor upon the havy as a career for their sons, but of late they have recognized the solid ad-vantages attaching to the service, and ap-

vantages attaching to the service, and applications have accordingly poured in from the most exaited families.

The German papers are demanding the instant suppression of this perilous isnobbery, which, it is recognized, will play havoc with the discipline and general efficiency of the service if allowed to continue unchecked. Hitherto, the Marine Department has maintained silence, but there is reason to believe that some of the more outspoken newspapers have received a quiet believe. that some of the more outspoken news-papers have received a quiet hint to moderate their tone, as official action is about to be taken.

Nevertheless, the astounding notice by

Admiral von Prittwitz and Gaffron has not been withdrawn. Its effect upon the less ornamental but equally useful branches of the "officer corps" may be better imagined than described. It may be added that quite recently, the non-executive branches agitated for some dis-tinguishing sleeve badge, and obtained it. What was their disgust, however, to learn that a week afterwards executive officers had received an additional and very prominent badge which more than ever accentuated their superior rank.
