LUMBER SHIPPING **EXCEEDS RECORDS**

Nearly 33,000,000 Feet Sent From Port in July and August.

1909 LEAD IS DWINDLING

Four Vessels Now Loading and Many Others Listed - Alden Salls With 3,000,000 Feet, Giving September Good Start.

With three tramps and one scho leading in the river for offshore ports and nine tramp steamers, two scienoners and three square-riggers listed by the Merchania Exchange to arrive for lumber cargues, prospects are decidedly favor-able for exceeding the record made last year for the first half of the season, when II whole or part cargoes were dis-patched to foreign lands.

There were no shipments in August, 1909, and for the period ending January 1 the total was slightly over 23,000,000 feet, while for two months of this season. July and August, the export movement reached

Probably by September 15 the lead of less than 6,00,000 feet will be overcome, for the carge of the Alden, which sailed Saturday, measured more than half of Saturday, measured more than half of that end with the Japanese steamer Charu Maru No. 2 leading 1500,000 feet and the Norwegian steamer Tricolor and British steamer Towergate over double the amount each. September's business will give the period a heavy lead, with October, November and December left o make it a record.

to make it a record.

September may not prove a brisk month as compared with August, when 30.135.690 feet was sent away, but it should reach the average. The Wotan is on the way from San Francisco for a full cargo, the Aymeric will come from Puget Sound for a part lead about the time the next Fortland and Asiatic liner is due, which will be September 19, and other carriers will follow until early in November, by which time the coterie will be augmented by additional charters. The other steamers listed are the Bessie Dollar, from Victoria; Strathdene, from San Francisco, Needles and Notherlee, from Victoria: Tamon Maro No. 6, from Hako-date: the Knight of the Garter, from Shanghal, and the Sark, from San Fran-

PLOATAGE LITTERS HARBOR

Steamer Runs Into Mass at Hawthorne Bridge and Makes Work.

When a steamer passing through the Hawthorne-street bridge yesterday morn-log swung so that boomsticks she was towing crashed into a number of old tim-bers collected there by the contractors, the mass of floatage was loosened and a short time had littered the entire bor. The steamer Hoo Hoo was or lered to secure the material, but cou small stuff, so Harbon master Speler ordered the launch Elidor out and with the aid of two skiffs most of the stuff was caught.

In addition to danger to small craft because the water was thickly dotted with motorbooks in advance of the afterraces, the derelict timbers bothered steamboat skippers, who were kept busy evading them. One small timber in the wheel of a riverboat often means a prolonged respite for repairs, and as frou-ble has been experienced in the past with drift from the bridge, Harbormaster Speler will insist that a permanent boom be constructed to retain the waste pieces.

CAPTAIN REED QUITS SERVICE

Port of Portland Official at Astoria Sends in Resignation.

ASTORIA, Or., Sept. 5.—(Special.)— Captain John C. Reed, who has been assistant superintendent of the towboat and pilotage service at the mouth of the Columbia River since the Port of Portland assumed charge, has tendered his resignation to take effect Septem-

Captain Reed has been engeged in tugboating on the Columbia River bar during the past eight years, coming here from Wiliapa Harbor to take command of the tug Wallula.

French Bark Coming With Coal.

Another square-rigger will leave up to day, the French bark Gen. de Botsdeffre, which has been discharging coal at As-toria since her arrival from Newcastle. August 22. The steamer Ocklahoma left down yesterday to take the bark in tow. She will join the British bark Andro meda in unloading fuel at the Pacific Coast hupkers and then prepare to re-ceive wheat cargo. Both vessels should be on the way to the United Kingdom be on the way t

BIG AREA OF GOAL LAND WITHDRAWN

Extent of Deposits in Idaho Is Not Known, but They Will Be "Conserved."

GOOD TRACTS AFFECTED

Southern Part of State, Including Snake River Valley and Payette-Boise Irrigation Project, Are Included in Territory.

OREGONIAN NEWS BUREAU, Washington. Sept. 5.—With a view to "con-serving" the coal resources of the state of Idaho, President Taft recently insued orders withdrawing from entry up-wards of \$.000,000 acres of land sup-posed to contain deposits of coal or lignite. How much of this area actualy contains coal or lignite, nebody at this time can tell; how much of this area is now in private ownership, and therefore not subject to withdrawal by order of the President, has not been computed, but there is a vast percentage of the area included in the with-drawal that is now tied up so that

drawal that is now tied up so that there can be no new development of coal on any of the lands still in the hands of the Government.

The President's order affects a great part of Southern Idaho, all of the Snake River Valley, in fact, from the Oregon line eastward to the Minidoka Irrigation project, and extending south along the Oregon line for a distance of nearly 100 miles from Weiser. Included early 100 miles from Weiser. Included in this withdrawn area are the cities of Boise. Nampa, Caldwell, Weiser, Payette and a number of others; also included is the entire Payette-Boise irrigation project and the Twin Palls rigation project. lying to the eastward.

Good Land Affected.

Some of the best agricultural land in Idaho, new under irrigation, is em-braced in the President's order. But the order is not effective as to lands that have been patented by the Gov-ernment and are now in private own-

As to lands which have been entered out which are not patented, there is me doubt; the department inclines to the opinion that such entrymen, under what is known as the surface rights may proceed and secure patent to surface of their lands, but be denied all right and interest in coal that may lie beneath the surface. This en-tire Snake River Valley is presumed contain lignite, not coal.

Southeastern Idaho, however, lie about 58 townships along the Wyoming border, which are believed to contain valuable bituminous coal. the only deposits of the kind in Idaho. There has been little development of this coal as yet, though the geologists hold that it is of the same quality as the best Wyoming coal, now being produced not 50 miles distant.

Smaller withdrawals were made, one around the town of Salmon, another

in Nez Perce County, and a third in the Sawtooth forest reserve. These tracts embrace what are supposed to be old lake beds. Little is known of their coal, however, or rather of their lignite, but all lands affected by the lignite, but all lands allected by the withdrawal will later be examined by the Geological Survey to determine the character and value of the deposits. Pending investigation and appraisal, none of the coal or lignite may be accommodated. quired. All these withdrawals are made on information gathered by the Geo-logical Survey from time to time. No recent examinations have been made of the coal deposits of Idaho.

President Orders Withdrawal. The President's order of withdrawal

reads as follows:

"It is hereby ordered that the following described lands be, and the same are hereby withdrawn from settlement, location, sale or entry, and reserved for location, sate of examination with re-examination and classification with re-spect to coal value, subject to all of the provisions, limitations, exceptions and conditions contained in the act of Gongress entitled 'An act to authorize the President of the United States to make withdrawals of public lands in certain cases, approved June 25, 1910, and the act of Congress entitled 'An act to provide for agricultural entries on coal lands,' approved June 22, 1910;

A NEW STATEMENT NO. 1

Legislators Should Vote for Highest Party Nominee, Is Urged.

SALEM, Or., Sept. 5 .- (To the Editor.) It may be safely assumed that no sane citizen will openly advocate minority rule, in place of rule by majority. In fact, is it not universally conceded, as a very basic principle on which our form of government resis, that majorities shall rule? It is a further fact that in the last two elections, under our primary law, in the more important offices, men have been installed and are now holding said offices, who received only a minority of the votes cast and are therefore in no sense the choice of the voting public and this in open deflance of the persist-ent hue and cry for recognition of the

the present incumbents? Can anyone question the self-evident fact that no one can honestly claim he is the choice one can honestly claim he is the choice of the people unless he have a majority of all the votes cast by the said people. Is it not a further fact that these men are holding office under minority rule, by flatly ignoring the constitutionally declared and therefore legal mode of proceedings, as it relates to election of United States Senators? That Statement No. 1 is the spawn of demagogues is becoming evident to the most obtuse. Is it consistent with our boasted freedom to require candidates for the Legislature to sign away their freedom as American citizens? It shows also a woeful lack of citizens? It shows siso a woeful lack of knowledge of human nature to suppose that Statement No. I will prevent bar-gain and sale of votes in Senatorial

A much more reasonable view is that a candidate who is so devoid of fixed convictions that he will prove recreant to his party and all his former professed to his party and all his former professed beliefs and agree to vote for a man who is openly opposed to all he has contended for, and by so doing say, in effect. "you and your party in all your past have been right and I and the Republican party have been wrong, and I hereby apologize and meekly surrender to your political dictation," would be among the first to surrender to corrupt approach. Is it not strangely derelict and inconstant that Statement No. I, that ballast of free institutions and guardian of the "dear people's" interests, should ballast of free institutions and guardian of the "dear people's" interests, should apply only to Senatorial elections? If Statement No. 1 is for the protection of the people's right to rule, why is it that about nine-tenths of their interests are thus carelessly left unprotected? The reason is found in the fact that it was need the "dear records" after all, but the not the "dear people" after all, but the malignantly selfish and unscrupulous politicians who had an eye on that particular office.

The demagogic politician's whole inter-pretation of "the people's rule" then seems to be embodied in the question of getting himself elected to the United States Senate? This view must be cor-States Senate? This view must be correct, for the statement has no application except as it relates to the very office he is reaching for. One is asked to look over the political personnel of the majority who are doing the heroics in behalf of Statement No. 1 and anti-assembly. They were formerly in behalf of anti-assembly. They were former, anti-assembly. They were former, equally as positive as to the merits of the sacred ratio of 16 to 1 as they are to sacred ratio of 16 to 1 as they are to sacred ratio of 16 to 1 as they are to Statement No. 1 now. With all their alleged assurance they have proved susceptible to sudden radical changes on the shortest notice. One finds himself wondering how persons can reverse themselves with the seasons, belong to all parties and to no parties and be consistent or safe leaders.

There is one feature in the erratic per-

formance of these self-proclaimed pur-ists and patriots which is peculiar and could come from no other source in that of most tenaciously claiming member-ship in a party, the very mention of whose name causes their pure souls such ndescribable shame and anguish. They Indescribable shame and anguish. They perhaps realized that by such course only can they work the Republican party any injury and they themselves have nothing to lose. The crowning feature of hypocrisy is reached, however, when they think of Republicans holding an assembly. It doesn't matter in the least that such assembly was held in the open, that it had a membership of 1200, and that the consultation of the 1200 and that the consultation of the 1200 openly expressed a preference for certain openly expressed a preference for certain men whom they believed to be bonest and competent. It matters not that all the names mentioned must run the gauntiet for the "people's choice," in full compliance with the primary law. It doesn't matter to these disinterested (7) pairiots that such abridgment of inherent rights was never before attempted to be questioned on the Continent. They are blind to the fact of nent. They are blind to the fact of their absurd position that this embargo on freedom of speech should apply only to Republicans, when they are doing the same thing (only secretly) with the greatest industry.

The fact is that the Statement No. 1 and anti-assembly is socialistic and revolutionary in character, intended to render the maintenance of party organization impossible, and the possibility of the rehabilitation of the Republican party by the assembly makes political free-booters frantic, as they realize their booters frantic, as they realize their trickery is becoming more clearly appreciated by all intelligent and true friends of good government. They have "sneaked" two elections by duplicity and false pretense and it is believed that their hypocritical pretention of solicitude for the "dear people" has been worked for about all it is worth. Many Republicans are getting disgusted with their shallow duplicity and pretended purity of purpose. "You cannot gather figs

cans are getting disgusted with their shallow duplicity and pretended purity of purpose. "You cannot gather figs from thistles," etc.

The primary law can be and should be amended so that Statement No. 1 shall mean, vote for the candidate receiving the highest number of votes, belonging to the party to which you belong. A becognition of the right of assembly will act to prevent a horde of political outcasts and demagogues rushing to the front and nominating themselves to the disgust of friends of clean government.

It is believed that very many who have acted heretofore with these puresouled refemers (7) are getting sick and disgusted with the Jonathan Bourne brand of socialistic and revolutionary heresies and will vote consistently with their professed allegiance to the Republican party. Surely the climax of political perfidy is reached in constantly claiming to be members of the Republican party, while indorsing every dirty in the carefular day and night with can party, while indorsing every dirty intrigue and working day and night with its enemies to bring about its destruc-tion. If one is politically honest, there should be no great difficulty in ascertaining his classification, unless he plead

a lack of intelligence.
Senator Bourne's reported recent dec aration that "in case the assembly canlaration that "in case the assembly can-didates carry the primaries, he will vote for the election of Democrats," ought to be conclusive evidence of his treachery and political dishonesty. Let every friend of decent manhood and honesty in politics think over this declaration and determine whether he can march under the banner of one who is reported to openly declare himself an enemy to every phase of political honests and at the same time hypocritically claim to be a Republican. Think it over carefully be-fore you vote. W. A. CUSICK.

FIREBUGS ARE AT WORK

Boys Discover Unknown Man Leaving Barn-Blaze Just Started.

A deliberate attempt at incendiarism was reported to the police yes-terday by Sam Sasal, of 560 East Seventeenth street, the says that an un-known man set fire to his barn Saturday night. Two boys who were in the vicinity saw the fire spring up and noticed a strange man leaving the place hurriedly about the same time, The boys called Sasal, who extinguished the blaze with small loss. In the stable he found an empty kero-sene can, which had not been there-previously. He said he knew of no ason why anyone should attempt to do him damage.

Fire broke out in the one-story cot-

tage of J. Spring, 40 Grand avenue, North, at 4 o'clock yesterday morn-ing, doing damage to the extent of \$500, with no insurance. The fire

ent hue and cry for recognition of the "choice of the people"
Except by a wanton perversion of consistency and rational interpretation, neither of our present United States Senators from Oregon can claim that they were the people's choice, for did not a majority (voting for other candidates) thereby declare they did not want for sale by all dealers.

Billiousness is due to a disordered condition of the stomach. Chamberlain's Tablets are essentially a stomach medicine, intended especially to strengen it, tone and invigorate it, for sale by all dealers.

Oregon Hops This Year Are of Choice Quality.

PICKING IN FULL SWING

No Trading Has Yet Developed in the New Crop-Brewers Requirements Will Be Larger. Conditions in the East.

Hop picking is now in full swing in Oregon. The larger yards started yesterday with nearly full crews. Some of the smaller places, which began their harvest a week ago, already have the crops picked and a few have started bailing Picking is unus-ually fast this year and so far the crop has been remarkably clean. The most satisfactory feature of the ha

vest is the fine quality that is showing in the crop. Hop men who have inspected the first samples from different sections say that without doubt the 1910 Oregon crop will be the finest in point of quality the trade has nown for a decade.

No business has developed yet, but it is

probable there will be some sales of early bailings before the week has progressed far. There is much interest in the opening prices and many guesses as to the figure at which the first lots will sell. The market is not likely to be active before next

Crop conditions in New York State and the general outlook in the country are sum narized by the New York Journal of Commerce, of September 1, as follows:

"The market continues inactive, all in terests apparently awaiting further crop developments. In New York State pickins is progressing rapidly, and the bulk of the crop will probably be histvested within a week. A few of the yards affected by white mould are being left unpicked, but, or the whole, the quantity harvested will prob-ably not be reduced materially on tha score, though the yield is generally expected to fall 10 to 15 per cent short of last year's crop of 45,000 bales. Oregon is now generally estimated at 90,000 to 100,000 bales, California at 70,000 bales, Washington at 20,000 bales, so that if these estimates ar approximately correct, the United States will have about 225,000 bales, compared with 215,000 bales in 1909. Of the latter crop it is estimated that there are still left in first hands 10,000 bales in Oregon, 4500 in California, 500 bales in Washington and 1000 bales in New York State, or a total of 16,000 bales, compared with 5000 bales of the 1998 crop in first hands a year ago. On the other hand, stocks in browerles are indoubtedly considerably smaller than they ofre a year ago."

The brewers' requirements in the season should play a more important part in the operations of the market as the sales of beer are much larger than they were last year. The total sales in July last were 6,745,406 barrels, an increase of 540,510 barreis over the output of July, 1909. As compared with July, 1908, the increase this year is 557,574 barrels, there is a decrease of 217,777 barrels as compared with July, 1907. and, an increase of 686,296 barrels when

HALF HOLIDAY ON FRONT STREET. Shippers Ignored the Fact That Yesterday

Was Labor Day. A good many shippers of fruit at countr oints ignored the fact that yesterday was a holiday. Arrivals from some sections were about as liberal as on a business day. was no chance to work off the fresh sup-plies or even reduce the surplus carried over from Saturday. The retail grocers were not doing business and the fruit stands and peddlers made but a small impression on Front-street stocks. Trading came to stop at noon when the wholesale stores closed. In the country produce department, noth-ing was done beyond receiving the few

SMALL BUNCH BRINGS \$10.40 AT STOCKYARDS.

Holiday Is Generally Observed by Buyers and Sellers-Receipts Are Liberal.

The strong undertone of the local live ock market was demonstrated yesterday when a sale was effected at the North Portland yards at \$10.40, an advance of 2 cents over the best price of last week. Only a small bunch, 89 head, were moved, but they were of top grade. In other lines there was practically nothing doing during the day, buyers and sellers generally observing the holiday. Receipts for Sunday and Monday were 214 cattle, 237 sheep, 1343 hogs and 204 goats. Of the hogs received, 15 cars were from Nebraska, and were understood to e sold to arrive. The other receipts should rovide a fair amount of business for today. The shippers of the stock were Marion Hager, of Creswell, two cars of goats; J. C. Persons, of St. Johns, one car of hogs; the Sundial Ranch Company, Troutdale, one car of sheep; Charles McCullough, of Haines, two cars of cattle and calves; Armstrong & Sons, of Nebraska, seven cars of hogs; Henline & Oblinger, of Nebraska, eight carof hogs; Toney Bros., of Haines, one car of cattle and calves; the State Bank of Joseph two cars of cattle and John Shaw, of Eche one car of cattle.

Prices quoted on the various classes of stock at the North Portland yard yesterday were as follows:

Beef steers, good to choice ... \$5.00@\$5.25 Beef steers, fair to medium ... 4.00@4.50 Cows and heifers, good to choice 3.75@ 4.00 tows and heifers, fair to medium 3.25@ 4.50 Cows and network 3.50 mg Bulls 3.50 mg Bulls 3.50 mg Stags, good to choice 4.00 mg Stags, good to choice 5.00 mg Stags 3.75 mg Calves heavy 3.75 mg 10.00 mg Caives, heavy
