## SUICIDE LEAVES BAD NOTES

Hamilton's Debts Prove Greater Than First Thought.

The money difficulties which caused F. H. # DISEASE BIG SCARE BEACH LOTS GO UP

Infantile Paralysis Far From Epidemic Stage.

CAUSE FOR ALARM

Secretary of State Board of Health, by Comparisons, Shows Close to Dozen Persons Died Last Year of Anterior Poleo Myelitis.

iamson, who was to have spoken on | foot, The Value of Exercise and Rest to Public Health," at the open meeting of the Oregon State Medical Association in the First Presbyterian Church next Thursday night, will deliver an ad-dress on "Infantile Paralysis, Its Cause, Mortality Ratio, Prevention and Treat-

ment."
The state association, which begins its sessions this morning, will give wide latitude to the dicussion of infantile paralysis, and Dr. Williamon will have the benefit of the exchange of the opinions and observations when he deivers his address.

Dr. Calvin S. White, secretary of the State Board of Health, said yesterday that reports of infantile paralysis are greatly exaggerated. "It is a big scare," said Dr. White,

"similar to excitement always caused by a few cases of smallpox, yet there has been only one death from smallpox within a year and a haif. I have just received the annual report of the Massachusetts health department and it places the mortality of infantile paralysis at 7.59 per cent. There are many other diseases much more fatal and they are preventable and can be cured. Reports are greatly exaggerated and many suffering from other ailments think they have infantile paralysis. For instance, I was called out the other day to investigate two cases on the East Side, because of the alarm felt on account of infantile paralysis. One case proved to be a tubercular hip joint and the other a case of postscarlet

"Last year there were 11 deaths from anterior poleo myelitis, or infantile paralysis. Compared to this mortality record there were 195 deaths of children under two years of age from Summer complaint; 78 deaths out of 589 cases of diphtheris, 142 deaths out of 990 cases of typhold fever, and 565 deaths from consumption. When this comparison is made it is seen there is no just caue for such undue alarm. I believe there have only been eight or nine deaths in the state this year that were due to infantile paralysis." ecord there were 195 deaths of children

## SUBWAY IS SUGGESTED

Writer Would Remove Congestion From Washington Street.

PORTLAND, Sept. 6 .- (To the Editor.)—I have been wondering for the past six months why the city has not made some provision for the widening of Washington street, or has not ar-ranged for an elevated road or subway proved a big feature of the club since for the good of the property-owners on initiated last Spring. Washington street. It would be done more to overcome the congestion that occurs on that thoroughfare Saturday and Sunday nights. I have often had to walk in the street to get to my work on time. Mr. Wilson seems to be under the Impression that when Washington street gets crowded people will go to some other street. But I hardly think so. People are like sheep—they all go where the crowds are. As long as Washington street is left, as to width. as it is today, in five more years the sidewalks and stores won't hold the people alone. Such improvements people alone. Such improvements should be kept five years in advance of the times. Suppose we wait five years, when the traffic grows the improvement will only be the more difficult and more expensive. We ought to have a subway on Washington street, and W? It is cheaper an JAMES F. WILLIAMS. why not now? easter.

## GEAR METHOD SEEMS NEW

Trade School Instructor Perfects Short Cut in Designing.

J. H. Klein, instructor in carpentry and pattern making at the Portland Trade School, is just completing a new method for designing gear wheels with-out the aid of any mathematical form-ulas. The method consists mainly of a series of six simple geometrical drawings from which the dimensions of the various parts of the gear wheel are taken and the cycloidal surfaces of the teeth are drawn. The method has been fully tested in all its details for several years and many gear wheels of widely different dimensions have been made

from it with satisfactory results.

Mr. Klein has had wide experience as a pattern maker and although he has sedulously examined all the available books and periodicals or the subject of gear wheels he can find nothing like it in existence. He declares his method to be so simple that almost any school-boy can work it.

## FIRE BOARD INVESTIGATES

Underwriters to Inspect Portland Facilities and Make Suggestion.

To make a complete investigation of Portland's fire fighting apparatus, five engineers from the National Board of Fire Underwriters arrived in Portland Fire Underwriters arrived in Portland yesterday and called upon Chief Campbell and Mayor Simon yesterday morning. E. P. Walther, civil engineer, is at the head of the party. The other members are R. A. Raymend, inspector of Fire Department work; K. Lydecker, assistant inspector, and R. C. Dennett and G. L. Bean, water engineers.

The fireboat is to be tested thoroughly, the water supply investigated and

ly, the water supply investigated and auggestions made for improvements, and the building construction per-mitted by the city will be looked into.

NO OTHER PROPERTY RE-TURNS SUCH PROFITS.

California Reports the Biggest Melon Ever Cut in Beach Home Site Locations.

"There is a higger percentage of profit in Summer-resort property than any other investment I know of," said day, speaking of the rapid developmen of the California coast. "Ten years ago Venice was a drear waste, worth almost nothing and good for nothing. so far as we could see then. When the wise man from the East came along he discerned a big future for a magnificent ocean shore resort at Venice, and he bought it for little or nothing. For a while, after platting, he had difficulty in selling lots for \$100 cach. A short time later \$500 a lot was easy to get. Today I know of Venice property that you cannot buy for \$100 a front liamson, who was to have spoken on the state of the state of

"As a matter of fact it is quite im possible to get a business location Venice at any price. Venice is such staple on the real estate market that any property-owner can borrow enough to build a fine home or business block. It has certainly had a wonderful his-

C. E. Fields, representing Tillamook Beach, on the Oregon coast, stated that what had proven true of Venice would certainly be duplicated at Tillamook Beach, where transportation, climate and environment are so far ahead of Venice that there is no comparison. He believes that \$100 invested now in Tillamook Beach will produce a handsome profit. It is a certainty that the present prices are so low that one cannot possibly lose. The constant de-crease of desirable beach property is assuming alarming proportions. It will not be long until good sites will be at such a great premium that those who can buy now will not be able to do so then. Mr. Fields is located in the Board of Trade Bidg., and will gladly send literature concerning this tract on re-

is understood that he will guard the mains in this country.
