Darling liked his quarters at the City Darling liked his quarters at the City Juli so well that he returned the second Jail so well that he returned the second time within 24 hours. Each occasion he was charged with being drunk. Darf-ing was picked up by Special Officer Franklin at 1:30 o'clock yesterday morn-ing, and was sent to the station. When sober he was allowed to deposit \$2 baff and depart. At 10 o'clock he was back again, this time eccorted by Patrol-man Heppner. The unusual occurrence man Happner. The unnaual occurrence was unnoticed until Darling became so-ber and clamored to be lot out. "Well do you want to put up ball?" asked Turnkey Flack. "Tve got up ball now." responded Darling. It was hard to con-vince him that the one ball could not cover a multitude of sins. He finally deposited another \$2 and departed.

MESSENGER BOT CAUGHT SPEEDING .- Cecil Cook, aged 17 years, employed by the City Messenger Company, and living the City Messenger Company, and living at Zill, Russell street, was going at the rate of 200 feet in four seconds, on a motorcycle, when timed on Union av-enue by Patrolman Grisim, Truesday evening, Grisim took out his pencil and figured that this was a little better than 24 miles an hour, 13 miles more than the law allows. The boy being under the sage of responsibility to the regular courts, the names of his parents were taken and his case will be presented to the Juvenile Court. The officer says thin several motorcycles are operated by mes-sengers, all of whom drive at reckless speed.

WINDOW MYSTERIOUSLY BROKEN. "Someone has just fired a shot through our plate-glass window," was the report telephoned to police headquarters yesterday from the office of the Howard Au-tomobile Company, at Seventh and Couch streets. An officer was sent to investigate but found only a clean-cut hole in the glass. No explosion was heard at the time. A theory has been ad-vanced by a plate-glass insurance com-pany that many breakages are caused by pebbles from the street being shot forcfbly from under automobile tires, and it is believed probable that this case was one of that kind.

WATER OFFICE WANTED .- A committee from the North East Side Improvement Association will mak that a water col-lector's office be built on the ground owned by the city on the south side of Russell street, east of Williams avenue. The city owns a lot 50x50 in the center of the block with a S-foot entrance from Russell street. L. T. Peery, a member of the committee, suggests that the city build an office on the S-foot lot and erect a storage building on the lot in the rear. It is urged that the present water office is inconvenient for that disclet office is inconvenient for that district.

LOCAERS WILL RESUME.—The Twin Falls Logging Company will resume operations in the Yacolt, Wash, district September 26. Lumbering was stopped by the tremendous fire which swept through the Yacolt country in August, the different crews being driven out of timber after hastily caching their tools, and for a time it was believed that the Twin Falls mills would be wiped out. Since the passing of the fire an examination of the country re-veals the satisfactory condition that veals the satisfactory condition that the operating machinery is largely un-hurt. The chief damage sustained was the operating machinery is largely un-hurt. The chief damage sustained was in the destruction of a number of bridges and trestles. Arrangements have been made immediately to employ 250 men and place them at work in camps 7, 8 and 9. Operations in the timber will be continued to full ca-pacity of the plants until snow fall in-terferes. terferes.
