VANCOUVER, Wash., Sept. 25.—(Special.)—Elmer Suggs was going to the Union Depot in an automobile last night, on his way to enter Washington University at Seattle. When the machine had run about a mile it stopped and no inducement could force it to go ahead. Investigation proved there was no gasoline in the tank. Suggs went into the home of J. M. Loomis, who operates a gasoline-propelled wood saw, which is pulled from place to place by a Missouri mule. It was almost midnight and Mr. Loomis was in bed. Upon being told that gasoline was wanted, Mr. Loomis told Suggs to go to the barn, open the door, turn to the right, and he would find a can of gasoline, and to help himself. Suggs opened the door in the dark, put out his hand to feel for a can and was shocked into insensibility by the kick of Loomis' mule, which objected to being carried by a stranger in the dark. Suggs' hand was badly injured, so he called for the chauffeur to come to his assistance. Hearing the disturbance and the cries of Suggs, Loomis at once realized what had happened. He opened the door, and standing clad only in his night robe, cried to Suggs, "I forgot to tell you to look out for the mule."

CAREER OF WEST HAS BEEN VARIED

Democratic Nominee for Governor Is Native of State of Michigan.

BOYHOOD LIVED IN WEST

Candidate Is Resident of Oregon for 33 Years; Banker, Stockman, Lawyer and Politician, Is Now on Railroad Commission.

Oswald West, the Democratic nominee for Governor, was formerly paying tetter in Ladd & Bush's Bank at Salem. He gave up this position to accept a place with the First National Bank of Astoria, which place he took in March, 1906. In September, 1903, he was appointed by Governor Chamberlain as State Land Agent. This place he resigned in February, 1907, to accept an appointment to the office of Railroad Commissioner. Mr. West was born in Ontario, Mich., near Detroit, May 29, 1872. His father, John G. West, his mother, and seven children, all boys, came to Oregon in 1877. In July of that year, when they arrived West was 4 years old. Soon afterward the family was burned out in the Cosmopolitan Hotel fire and left practically destitute. They remained in Portland only a few weeks, moving from here to Roseburg. In a few months they went to Salem. Early Employment Varied. In 1883 the family again moved to Portland, and West attended school in Holladay's Addition. His evenings and his Saturdays he spent on a pony, driving stock for O'Shea Bros. and the late A. H. Johnson, from the East Side railroad stockyards across the ferry which was then being operated across the Willamette to the South Portland slaughter yards on the West Side. In those days stock was driven up Third street.

In those days stock was driven up Third street. The Wests returned to Salem two years later, and the father began buying and selling stock and butchering. The lad's time was divided between attending public school, driving the butcher cart, herding cattle, and occasionally riding a racehorse. He left the public school in 1889, when 16 years old, to become a messenger for Ladd & Bush. He was made paying tetter three years later. That after that was State Land Agent and Railroad Commissioner. His father died in 1895. Two years later he married Miss Mabel Hutton, of Salem. Their only child, Helen, is now 7 years old. Mr. West's mother died this year. During his spare time he has studied law and was recently admitted to the bar.

BRUCE CLENDENNING REFUSES TO DISCUSS THEATER LEASE.

Klaw & Erlanger Plans for New Playhouse and Pacific Coast Circuit Advance.

Bruce Clendenning, attorney for Charles Sweeney, the Spokane millionaire who has leased a site for a theater, at Fourteenth and Morrison streets, on which he proposes to erect a playhouse for Klaw & Erlanger, is at the Hotel Portland. Mr. Clendenning would not discuss the purpose of his visit to Portland at this time, but he is presumably here in the interests of his client and Klaw & Erlanger. The lease of the property at Fourteenth and Morrison streets has already been negotiated and it is believed that Mr. Clendenning is here to arrange details for the beginning of construction of the theater. Klaw & Erlanger have announced that they will not be prepared to give theaters of the Pacific Coast their production this year, but bookings will be made for next season, when a string of theaters, beginning at Vancouver and stretching along the Pacific Coast almost to the borders of Mexico, will have been completed. In Seattle have been prepared and are in the hands of the Metropolitan Building Company, and the new theater will soon occupy a site across the street from the larger office buildings that company has erected in the Puget Sound city. The corner and Spokane are also on the list and sites for theaters have been procured in those cities. It is certain that Klaw & Erlanger will have a theater in Vancouver, and there is no longer any doubt that the big candidate will have a playhouse in Portland ready for opening next season. A Klaw & Erlanger circuit will probably be made of Vancouver, Seattle, Tacoma, Spokane, Portland, San Francisco, Los Angeles, Salt Lake City and include Oakland and a few smaller cities.

Hair Health

If You Have Scalp or Hair Trouble, Take Advantage of This Offer

We could not afford to so strongly endorse Rexall "93" Hair Tonic and continue to sell it as we do, if we were not certain that it would do all we claim it will. Should our enthusiasm carry us away, and Rexall "93" Hair Tonic not give entire satisfaction to the users, they would lose faith in us and our statements, and in consequence our business would be ruined. Therefore, when we assure you that if your hair is beginning to unaturally fall out or if you have any scalp trouble, Rexall "93" Hair Tonic will promptly eradicate dandruff, stimulate hair growth and prevent premature baldness, you may rest assured that we know what we are talking about.

COLUMBIA AT LOW STAGE

Sand Bar and Lack of Water Force Sawmill to Shut Down.

CASCADE LOCKS, Or., Sept. 25.—(Special.)—The sawmill of the Wind River Lumber Company, which was forced to close Tuesday and August 23, is now expected to resume operations about November 1. The stage of water at the locks is the lowest in 12 years, according to the Government records. The large sand bar about a mile above the locks has been steadily working downstream and is now directly in front of the Wind River Lumber Company's plant, which necessitates extensive dredging in front of the log slip. The Government is now expected to resume operations about November 1. The stage of water at the locks is the lowest in 12 years, according to the Government records.
